(ii) Assume the same facts as (i), except that after SK's admission to the partnership, the Ventureco securities appreciate in value to $74,000 and are sold, resulting in taxable gain of $54,000 ($74,000 less $20,000 adjusted tax basis) and book gain of $24,000 ($74,000 less $50,000 book value). Under the partnership agreement the $24,000 book gain (the appreciation in value occurring after SK became a partner) is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $54,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared $23,000 to MC, $23,000 to RW, and $8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission	$10,000	$25,000	$10,000	$25,000	$25,000	$25,000
Plus: gain	23,000	8,000	23,000	8,000	8,000	8,000
Capital account following sale	$33,000	$33,000	$33,000	$33,000	$33,000	$33,000

(iii) Assume the same facts as (i) except that after SK's admission to the partnership, the Ventureco securities depreciate in value to $44,000 and are sold, resulting in taxable gain of $24,000 ($44,000 less $20,000 adjusted tax basis) and a book loss of $6,000 ($50,000 book value less $44,000). Under the partnership agreement the $6,000 book loss is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $24,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission	$10,000	$25,000	$10,000	$25,000	$25,000	$25,000
Plus: gain	12,000	0	12,000	0	0	0
Less: loss	0	(2,000)	0	(2,000)	0	(2,000)
Capital account following sale	$22,000	$23,000	$22,000	$23,000	$25,000	$25,000

That SK bears an economic loss of $2,000 without a corresponding taxable loss is attributable entirely to the "ceiling rule." See paragraph (c)(2) of § 1.704–1.

(iv) Assume the same facts as in (ii) except that upon the admission of SK the capital accounts of MC and RW are not each adjusted upward from $10,000 to $25,000 to reflect the appreciation in the partnership's securities that occurred before SK was admitted to the partnership. Rather, upon SK's admission to the partnership, the partnership agreement is amended to provide that the first $30,000 of taxable gain upon the sale of such securities will be allocated equally between MC and RW, and that all other income, gain, loss, and deduction will be allocated equally between MC, RW, and SK. When the securities are sold for $74,000, the $54,000 of taxable gain is so allocated. These allocations of taxable gain have substantial economic effect. (If the agreement instead provides for all taxable gain (including the $30,000 taxable gain attributable to the appreciation in the securities prior to SK's admission to the partnership) to be allocated equally between MC, RW, and SK, the partners should consider whether, and to what extent, the provisions of paragraphs (b)(1)(iii) and (iv) of this section are applicable.)

(v) Assume the same facts as in (iv) except that instead of selling the securities, the partnership makes a distribution of the securities (which have a fair market value of $74,000). Assume the distribution does not give rise to a transaction described in section 707(a)(2)(B). In accordance with paragraph (b)(2)(iv)(e) of this section, the partners' capital accounts are adjusted immediately prior to the distribution to reflect how taxable gain ($54,000) would have been allocated had the securities been sold for their $74,000 fair market value, and capital account adjustments in respect of the distribution of the securities are made with reference to the $74,000 "booked-up" fair market value.

	MC	RW	SK
Capital account before adjustment	$10,000	$10,000	$25,000
Deemed sale adjustment	23,000	23,000	8,000
Less: distribution	(24,667)	(24,667)	(24,667)

	MC	RW	SK
Capital account after distribution	$8,333	$8,333	$8,333

(vi) Assume the same facts as in (i) except that the partnership does not sell the Ventureco securities. During the next 3 years the fair market value of the Ventureco securities remains at $50,000, and the partnership engages in no other investment activities. Thus, at the end of that period the balance sheet of the partnership and the partners' capital accounts are the same as they were at the beginning of such period. At the end of the 3 years, MC's interest in the partnership is liquidated for the $25,000 cash held by the partnership. Assume the distribution does not give rise to a transaction described in section 707(a)(2)(B). Assume further that the partnership has a section 754 election in effect for the taxable year during which such liquidation occurs. Under sections 734(b) and 755 the partnership increases the basis of the Ventureco securities by the $15,000 basis adjustment (the excess of $25,000 over the $10,000 adjusted tax basis of MC's partnership interest).

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account before distribution	$10,000	$25,000	$10,000	$25,000	$25,000	$25,000
Plus: basis adjustment..................	15,000	0	0	0	0	0
Less: distribution	(25,000)	(25,000)	0	0	0	0
Capital account after liquidation	0	0	$10,000	$25,000	$25,000	$25,000

(vii) Assume the same facts as in (vi) except that the partnership has no section 754 election in effect for the taxable year during which such liquidation occurs.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account before distribution	$10,000	$25,000	$10,000	$25,000	$25,000	$25,000
Less: distribution	(25,000)	(25,000)	0	0	0	0
Capital account after liquidation	($15,000)	0	$10,000	$25,000	$25,000	$25,000

Following the liquidation of MC's interest in the partnership, the Ventureco securities are sold for their $50,000 fair market value, resulting in no book gain or loss but a $30,000 taxable gain. An allocation of this $30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that $15,000 of such taxable gain will, in accordance with section 704(c) principles, be included in RW's distributive share, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section. The remaining $15,000 of such gain will, under paragraph (b)(3) of this section, be shared equally between RW and SK.

Example (15). (i) JB and DK form a limited partnership for the purpose of purchasing residential real estate to lease. JB, the limited partner, contributes $13,500, and DK, the general partner, contributes $1,500. The partnership, which uses the cash receipts and disbursements method of accounting, purchases a building for $100,000 (on leased land), incurring a recourse mortgage of $85,000 that requires the payment of interest only for a period of 3 years. The partnership agreement provides that partnership net taxable income and loss will be allocated 90 percent to JB and 10 percent to DK, the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), and JB is not required to restore any deficit balance in his capital account, but DK is so required. The partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section). As of the end of each of the partnership's first 3 taxable years, the items described in paragraphs (b)(2)(ii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in JB's capital account. In the partnership's first taxable year, it has rental income of $10,000, operating expenses of $2,000, interest expense of $8,000, and cost recovery deductions of $12,000. Under the partnership agreement JB and DK are allocated $10,800 and $1,200, respectively, of the $12,000 net taxable loss incurred in the partnership's first taxable year.

	JB	DK
Capital account upon formation	$13,500	$1,500
Less: year 1 net loss...........	(10,800)	(1,200)
Capital account at end of year 1	$2,700	$300

The alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section is satisfied as of the end of the partnership's first taxable year. Thus, the allocation made in the partnership's first taxable year has economic effect.

(ii) Assume the same facts as in (i) and that in the partnership's second taxable year it again has rental income of $10,000, operating expenses of $2,000, interest expense of $8,000, and cost recovery deductions of $12,000. Under the partnership agreement JB and DK are allocated $10,800 and $1,200, respectively, of the $12,000 net taxable loss incurred in the partnership's second taxable year.

	JB	DK
Capital account at beginning of year 1	$2,700	$300
Less: year 2 net loss...........	(10,800)	(1,200)
Capital account at end of year 2......................	($8,100)	($900)

Only $2,700 of the $10,800 net taxable loss allocated to JB satisfies the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section as of the end of the partner-

ship's second taxable year. The allocation of such $2,700 net taxable loss to JB (consisting of $2,250 of rental income, $450 of operating expenses, $1,800 of interest expense, and $2,700 of cost recovery deductions) has economic effect. The remaining $8,100 of net taxable loss allocated by the partnership agreement to JB must be reallocated in accordance with the partners' interests in the partnership. Under paragraph (b)(3)(iii) of this section, the determination of the partners' interests in the remaining $8,100 net taxable loss is made by comparing how distributions (and contributions) would be made if the partnership sold its property at its adjusted tax basis and liquidated immediately following the end of the partnership's first taxable year with the results of such a sale and liquidation immediately following the end of the partnership's second taxable year. If the partnership's real property were sold for its $88,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's first taxable year, the $88,000 sales proceeds would be used to repay the $85,000 note, and there would be $3,000 remaining in the partnership, which would be used to make liquidating distributions to DK and JB of $300 and $2,700, respectively. If such property were sold for its $76,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's second taxable year, DK would be required to contribute $9,000 to the partnership in order for the partnership to repay the $85,000 note, and there would be no assets remaining in the partnership to distribute. A comparison of these outcomes indicates that JB bore $2,700 and DK $9,300 of the economic burden that corresponds to the $12,000 net taxable loss. Thus, in addition to the $1,200 net taxable loss allocated to DK under the partnership agreement, $8,100 of net taxable loss will be reallocated to DK under paragraph (b)(3)(iii) of this section. Similarly, for subsequent taxable years, absent an increase in JB's capital account, all net taxable loss allocated to JB under the partnership agreement will be reallocated to DK.

(iii) Assume the same facts as in (ii) and that in the partnership's third taxable year there is rental income of $35,000, operating expenses of $2,000, interest expenses of $8,000, and cost recovery deductions of $10,000. The capital accounts of the partners maintained on the books of the partnership do not take into account the reallocation to DK of the $8,100 net taxable loss in the partnership's second taxable year. Thus, an allocation of the $15,000 net taxable income, $13,500 to JB and $1,500 to DK (as dictated by the partnership agreement and as reflected in the capital accounts of the partners) does not have economic effect. The partners' interests in the partnership with respect to such $15,000 taxable gain again is made in the manner described in paragraph (b)(3)(iii) of this section. If the partnership's real property were sold for its $76,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's second taxable year, DK would be required to contribute $9,000 to the partnership in order for the partnership to repay the $85,000 note, and there would be no assets remaining to distribute. If such property were sold for its $66,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's third taxable year, the $91,000 ($66,000 sales proceeds plus $25,000 cash on hand) would be used to repay the $85,000 note and there would be $6,000 remaining in the partnership, which would be used to make liquidating distributions to DK and JB of $600 and $5,400, respectively. Accordingly, under paragraph (b)(3)(iii) of this section the $15,000 net taxable income in the partnership's third taxable year will be reallocated $9,600 to DK (minus $9,000 at end of the second taxable year to positive $600 at end of the third taxable year) and $5,400 to JB (zero at end of the second taxable year to positive $5,400 at end of the third taxable year).

Example (16). (i) KG and WN form a limited partnership for the purpose of investing in improved real estate. KG, the general partner, contributes $10,000 to the partnership, and WN, the limited partner, contributes $990,000 to the partnership. The $1,000,000 is used to purchase an apartment building on leased land. The partnership agreement provides that (1) the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section; (2) cash will be distributed first to WN until such time as he has received the amount of his original capital contribution ($990,000), next to KG until such time as he has received the amount of his original capital contribution ($10,000), and thereafter equally between WN and KG; (3) partnership net taxable income will be allocated 99 percent to WN and 1 percent to KG until the cumulative net taxable income allocated for all taxable years is equal to the cumulative net taxable loss previously allocated to the partners, and thereafter equally between WN and KG; (4) partnership net taxable loss will be allocated 99 percent to WN and 1 percent to KG, unless net taxable income has previously been allocated equally between WN and KG, in which case such net taxable loss first will be allocated equally until the cumulative net taxable loss allocated for all taxable years is equal to the cumulative net taxable income previously allocated to the partners; and (5) upon liquidation, WN is not required to restore any deficit balance in his capital account, but KG is so required. Since distributions in liquidation are not required to be made in accordance with the partners' positive capital account balances, and since WN is not required, upon the liquidation of his interest, to restore the deficit balance in his capital account to the partnership, the allocations provided by the partnership agreement do not have economic effect and will be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i) except that the partnership agreement further provides that distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Assume further that the partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section) and that, as of the end of each partnership taxable year, the items described in paragraphs (b)(2)(iii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in WN's capital account. The allocations provided by the partnership agreement have economic effect.

Example (17). FG and RP form a partnership with FG contributing cash of $100 and RP contributing property, with 2 years of cost recovery deductions remaining, that has an adjusted tax basis of $80 and a fair market value of $100. The partnership, FG, and RP have calendar taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, liquidation proceeds will be made in accordance with capital account balances, and each partner is liable to restore the deficit balance in his capital account to the partnership upon liquidation of his interest (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). FG expects to be in a substantially higher tax bracket than RP in the partnership's first taxable year. In the partnership's second taxable year, and in subsequent taxable years, it is expected that both will be in approximately equivalent tax brackets. The partnership agreement allocates all items equally except that all $50 of book depreciation is allocated to FG in the partnership's first taxable year and all $50 of book depreciation is allocated to RP in the partnership's second taxable year. If the allocation to FG of all book depreciation in the

partnership's first taxable year is respected, FG would be entitled under section 704(c) to the entire cost recovery deduction ($40) for such year. Likewise, if the allocation to RP of all the book depreciation in the partnership's second taxable year is respected, RP would be entitled under section 704(c) to the entire cost recovery deduction ($40) for such year. The allocation of book depreciation to FG and RP in the partnership's first 2 taxable years has economic effect within the meaning of paragraph (b)(2)(ii) of this section. However, the economic effect of these allocations is not substantial under the test described in paragraph (b)(2)(iii)(c) of this section since there is a strong likelihood at the time such allocations became part of the partnership agreement that at the end of the 2-year period to which such allocations relate, the net increases and decreases to FG's and RP's capital accounts will be the same with such allocations as they would have been in the absence of such allocation, and the total tax liability of FG and RP for the taxable years to which the section 704(c) determinations relate would be reduced as a result of the allocations of book depreciation. As a result the allocations of book depreciation in the partnership agreement will be disregarded. FG and RP will be allocated such book depreciation in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. Under these facts the book depreciation deductions will be reallocated equally between the partners, and section 704(c) will be applied with reference to such reallocation of book depreciation.

Example (18). (i) WM and JL form a general partnership by each contributing $300,000 thereto. The partnership uses the $600,000 to purchase an item of tangible personal property, which it leases out. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement provides that (1) the partners' capital account will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, (2) distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), (3) any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(3) of this section), (4) all income, gain, loss, and deduction of the partnership will be allocated equally between the partners, and (5) all non-liquidating distributions of the partnership will be made equally between the partners. Assume that in each of the partnership's taxable years, it recognizes operating income equal to its operating deductions (excluding cost recovery and depreciation deductions and gain or loss on the sale of its property). During its first 2 taxable years, the partnership has an additional $200,000 cost recovery deduction in each year. Pursuant to the partnership agreement these items are allocated equally between WM and JL.

	WM	JL
Capital account upon formation	$300,000	$300,000
Less: net loss for years 1 and 2	(200,000)	(200,000)
Capital account at end of year 2	$100,000	$100,000

The allocations made in the partnership's first 2 taxable years have substantial economic effect.

(ii) Assume the same facts as in (i) and that MK is admitted to the partnership at the beginning of the partnership's third taxable year. At the time of his admission, the fair market value of the partnership property is $600,000. MK contributes $300,000 to the partnership in exchange for an equal one-third interest in the partnership, and, as permitted under paragraph (b)(2)(iv)(g), the capital accounts of WM and JL are adjusted upward to $300,000 each to reflect the fair market value of partnership property. In addition, the partnership agreement is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the partnership property that appreciated prior to MK's admission will be shared among the partners in a manner that takes account of the variation between such property's $200,000 adjusted tax basis and its $600,000 book value in accordance with paragraph (b)(2)(iv)(f) and the special rule contained in paragraph (b)(4)(i) of this section. Depreciation and gain or loss, as computed for book purposes, with respect to such property will be allocated equally among the partners and, in accordance with paragraph (b)(2)(iv)(g) of this section, will be reflected in the partner's capital accounts, as will all other partnership income, gain, loss, and deduction. Since the requirements of (b)(2)(iv)(g) of this section are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with paragraph (b)(2)(iv) of this section.

(iii) Assume the same facts as in (ii) and that immediately after MK's admission to the partnership, the partnership property is sold for $600,000, resulting in a taxable gain of $400,000 ($600,000 less $200,000 adjusted tax basis) and no book gain or loss, and the partnership is liquidated. An allocation of the $400,000 taxable gain cannot have economic effect because such gain cannot properly be reflected in the partners' book capital accounts. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $400,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between WM and JL.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Plus: gain	200,000	0	200,000	0	0	0
Capital account before liquidation	$300,000	$300,000	$300,000	$300,000	$300,000	$300,000

The $900,000 of partnership cash ($600,000 sales proceeds plus $300,000 contributed by MK) is distributed equally among WM, JL, and MK in accordance with their adjusted positive capital account balances, each of which is $300,000.

(iv) Assume the same facts as in (iii) except that prior to liquidation the property appreciates and is sold for $900,000, resulting in a taxable gain of $700,000 ($900,000 less $200,000 adjusted tax basis) and a book gain of $300,000 ($900,000 less $600,000 book value). Under the partnership agreement the $300,000 of book gain is allocated equally among the partners, and such allocation has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Plus: gain	300,000	100,000	300,000	100,000	100,000	100,000
Capital account before liquidation	$400,000	$400,000	$400,000	$400,000	$400,000	$400,000

Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $700,000 taxable gain is, in accordance with section 704(c) principles, shared $300,000 to JL, $300,000 to WM, and $100,000 to MK. This ensures that (1) WM and JL share equally the $400,000 taxable gain that is attributable to appreciation in the property that occurred prior to MK's admission to the partnership in the same manner as it was reflected in their capital accounts upon MK's admission, and (2) WM, JL, and MK share equally the additional $300,000 taxable gain in the same manner as they shared the $300,000 book gain.

(v) Assume the same facts as in (ii) except that shortly after MK's admission the property depreciates and is sold for $450,000, resulting in a taxable gain of $250,000 ($450,000 less $200,000 adjusted tax basis) and a book loss of $150,000 ($450,000 less $600,000 book value). Under the partnership agreement these items are allocated as follows:

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Plus: gain	125,000	0	125,000	0	0	0
Less: loss	0	(50,000)	0	(50,000)	0	(50,000)
Capital account before liquidation	$225,000	$250,000	$225,000	$250,000	$300,000	$250,000

The $150,000 book loss is allocated equally among the partners, and such allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $250,000 taxable gain is, in accordance with section 704(c) principles, shared equally between WM and JL. The fact that MK bears an economic loss of $50,000 without a corresponding taxable loss is attributable entirely to the "ceiling rule." See paragraph (c)(2) of § 1.704-1.

(vi) Assume the same facts as in (ii) except that the property depreciates and is sold for $170,000, resulting in a $30,000 taxable loss ($200,000 adjusted tax basis less $170,000) and a book loss of $430,000 ($600,000 book value less $170,000). The book loss of $430,000 is allocated equally among the partners ($143,333 each) and has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the entire $30,000 taxable loss is, in accordance with section 704(c) principles, included in MK's distributive share.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Less: loss	0	(143,333)	0	(143,333)	(30,000)	(143,333)
Capital account before liquidation	$100,000	$156,667	$100,000	$156,667	$270,000	$156,667

(vii) Assume the same facts as in (ii) and that during the partnership's third taxable year, the partnership has an additional $100,000 cost recovery deduction and $300,000 book depreciation deduction attributable to the property purchased by the partnership in its first taxable year. The $300,000 book depreciation deduction is allocated equally among the partners, and that allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $100,000 cost recovery deduction for the partnership's third taxable year is, in accordance with section 704(c) principles, included in MK's distributive share. This is because under these facts those principles require MK to include the cost recovery deduction for such property in his distributive share up to the amount of the book depreciation deduction for such property properly allocated to him.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Less: recovery/depreciation deduction for year 3	0	(100,000)	0	(100,000)	(100,000)	(100,000)
Capital account at end of year 3	$100,000	$200,000	$100,000	$200,000	$200,000	$200,000

(viii) Assume the same facts as in (vii) except that upon MK's admission the partnership property has an adjusted tax basis of $220,000 (instead of $200,000), and thus the cost recovery deduction for the partnership's third taxable year is $110,000. Assume further that upon MK's admission WM and JL have adjusted capital account balances of $110,000 and $100,000, respectively. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the excess $10,000 cost recovery deduction ($110,000 less $100,000 included in MK's distributive share) is, in accordance with section 704(c) principles, shared equally between WM and JL and is so included in their respective distributive shares for the partnership's third taxable year.

(ix) Assume the same facts as in (vii) except that upon MK's admission the partnership agreement is amended to allocate the first $400,000 of book depreciation and loss on partnership property equally between WM and JL and the last $200,000 of such book depreciation and loss to MK. Assume such allocations have substantial economic effect. Pursuant to this amendment the $300,000 book depreciation deduction in the partnership's third taxable year is allocated equally between WM and JL. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $100,000 cost recovery deduction is, in accordance with section 704(c) principles, shared equally between WM and JL. In the partnership's fourth taxable year, it has a $60,000 cost recovery deduction and a $180,000 book depreciation deduction. Under the amendment described above, the $180,000 book depreciation deduction is allocated $50,000 to WM, $50,000 to JL, and $80,000 to MK. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $60,000 cost recovery deduction is, in accordance with section 704(c) principles, included entirely in MK's distributive share.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Less:						
(a) recovery/depreciation deduction for year 3	(50,000)	(150,000)	(50,000)	(150,000)	0	0
(b) recovery/depreciation deduction for year 4	0	(50,000)	0	(50,000)	(60,000)	(80,000)
Capital account at end of year 4	$50,000	$100,000	$50,000	$100,000	$240,000	$220,000

(x) Assume the same facts as in (vii) and that at the beginning of the partnership's third taxable year, the partnership purchases a second item of tangible personal property for $300,000 and elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement is amended to allocate the first $150,000 of cost recovery deductions and loss from such property to WM and the next $150,000 of cost recovery deductions and loss from such property equally between JL and MK. Thus, in the partnership's third taxable year it has, in addition to the items specified in (vii), a cost recovery and book depreciation deduction of $100,000 attributable to the newly acquired property, which is allocated entirely to WM.

As in (vii), the allocation of the $300,000 book depreciation attributable to the property purchased in the partnership's first taxable year equally among the partners has substantial economic effect, and consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement properly provides for the entire $100,000 cost recovery deduction attributable to such property to be included in MK's distributive share. Furthermore, the allocation to WM of the $100,000 cost recovery deduction attributable to the property purchased in the partnership's third taxable year has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	$100,000	$300,000	$100,000	$300,000	$300,000	$300,000
Less:						
(a) recovery/depreciation deduction for property bought in year 1	0	(100,000)	0	(100,000)	(100,000)	(100,000)
(b) recovery/depreciation deduction for property bought in year 3	(100,000)	(100,000)	0	0	0	0
Capital account at end of year 3	0	$100,000	$100,000	$200,000	$200,000	$200,000

(xi) Assume the same facts as in (x) and that at the beginning of the partnership's fourth taxable year, the properties purchased in the partnership's first and third taxable years are disposed of for $90,000 and $180,000, respectively, and the partnership is liquidated. With respect to the property purchased in the first taxable year, there is a book loss of $210,000 ($300,000 book value less $90,000) and a taxable loss of $10,000 ($100,000 adjusted tax basis less $90,000). The book loss is allocated equally among the partners, and such allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the taxable loss of $10,000 will, in accordance with section 704(c) principles, be included entirely in MK's distributive share. With respect to the property purchased in the partnership's third taxable year, there is a book and taxable loss of $20,000. Pursuant to the partnership agreement this loss is allocated entirely to WM, and such allocation has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 4	0	$100,000	$100,000	$200,000	$200,000	$200,000
Less:						
(a) loss on property bought in year 1	0	(70,000)	0	(70,000)	(10,000)	(70,000)
(b) loss on property bought in year 3	(20,000)	(20,000)	0	0	0	0
Capital account before liquidation	($20,000)	$10,000	$100,000	$130,000	$190,000	$130,000

Partnership liquidation proceeds ($270,000) are properly distributed in accordance with the partners' adjusted positive book capital account balances ($10,000 to WM, $130,000 to JL and $130,000 to MK).

(xii) Assume the same facts as in (x) and that in the partnership's fourth taxable year it has a cost recovery deduction of $60,000 and book depreciation deduction of $180,000 attributable to the property purchased in the partnership's first taxable year, and a cost recovery and book depreciation deduction of $100,000 attributable to the property purchased in the partnership's third taxable year. The $180,000 book depreciation deduction attributable to the property purchased in the partnership's first taxable year is allocated equally among the partners, and such allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $60,000 cost recovery deduction attributable to the property purchased in the first taxable year is, in accordance with section 704(c) principles, included entirely in MK's distributive share. Furthermore, the $100,000 cost recovery deduction attributable to the property purchased in the third taxable year is allocated $50,000 to WM, $25,000 to JL, and $25,000 to MK, and such allocation has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 4	0	$100,000	$100,000	$200,000	$200,000	$200,000
Less:						
(a) recovery/depreciation deduction for property bought in year 1	0	(60,000)	0	(60,000)	(60,000)	(60,000)
(b) recovery/depreciation deduction for property bought in year 3	(50,000)	(50,000)	(25,000)	(25,000)	(25,000)	(25,000)
Capital account at end of year 4	($50,000)	($10,000)	$75,000	$115,000	$115,000	$115,000

At the end of the partnership's fourth taxable year the adjusted tax bases of the partnership properties acquired in its first and third taxable years are $40,000 and $100,000, respectively. If the properties are disposed of at the beginning of the partnership's fifth taxable year for their adjusted tax bases, there would be no taxable gain or loss, a book loss of $80,000 on the property purchased in the partnership's first taxable year ($120,000 book value less $40,000), and cash available for distribution of $140,000.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 5	($50,000)	($10,000)	$75,000	$115,000	$115,000	$115,000
Less: loss	0	(26,667)	0	(26,667)	0	(26,667)
Capital account before liquidation	($50,000)	($36,667)	$75,000	$88,333	$115,000	$88,333

If the partnership is then liquidated, the $140,000 of cash on hand plus the $36,667 balance that WM would be required to contribute to the partnership (the deficit balance in his book capital account) would be distributed equally between JL and MK in accordance with their adjusted positive book capital account balances.

(xiii) Assume the same facts as in (i). Any tax preferences under section 57(a)(12) attributable to the partnership's cost recovery deductions in the first 2 taxable years will be taken into account equally by WM and JL. If the partnership agreement instead provides that the partnership's cost recovery deductions in its first 2 taxable years are allocated 25 percent to WM and 75 percent to JL (and such allocations have substantial economic effect), the tax preferences attributable to such cost recovery deductions would be taken into account 25 percent by WM and 75 percent by JL. The conclusion in the previous sentence is unchanged even if the partnership's operating expenses (exclusive of cost recovery and depreciation deductions) exceed its operating income in each of the partnership's first 2 taxable years, the resulting net loss is allocated entirely to WM, and the cost recovery deductions are allocated 25 percent to WM and 75 percent to JL (provided such allocations have substantial economic effect). If the partnership agreement instead provides that all income, gain, loss, and deduction (including cost recovery and depreciations) are allocated equally between JL and WM, the tax preferences attributable to the cost recovery deductions would be taken into account equally by JL and WM. In this case, if the partnership has a $100,000 cost recovery deduction in its first taxable year and an additional net loss of $100,000 in its first taxable year (i.e., its operating expenses exceed its operating income by $100,000) and purports to categorize JL's $100,000 distributive share of partnership loss as being attributable to the cost recovery deduction and WM's $100,000 distributive share of partnership loss as being attributable to the net loss, the economic effect of such allocations is not substantial, and each partner will be allocated one-half of all partnership income, gain, loss, and deduction and will take into account one-half of the tax preferences attributable to the cost recovery deductions.

Example (19). (i) DG and JC form a general partnership for the purpose of drilling oil wells. DG contributes an oil lease, which has a fair market value and adjusted tax basis of $100,000. JC contributes $100,000 in cash, which is used to finance the drilling operations. The partnership agreement provides that DG is credited with a capital account of $100,000, and JC is credited with a capital account of $100,000. The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership chooses to adjust capital accounts on a simulated cost depletion basis and elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the basis of its section 38 property. The agreement further provides that (1) all additional cash requirements of the partnership will be borne equally by DG and JC, (2) the deductions attributable to the property (including money) contributed by each partner will be

allocated to such partner, (3) all other income, gain, loss, and deductions (and item thereof) will be allocated equally between DG and JC, and (4) all cash from operations will be distributed equally between DG and JC. In the partnership's first taxable year $80,000 of partnership intangible drilling cost deductions and $20,000 of cost recovery deductions on partnership equipment are allocated to JC, and the $100,000 basis of the lease is, for purposes of the depletion allowance under sections 611 and 613A(c)(7)(D), allocated to DG. The allocations of income, gain, loss, and deduction provided in the partnership agreement have substantial economic effect. Furthermore, since the allocation of the entire basis of the lease to DG will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and since all other partnership allocations are recognized under this paragraph, the allocation of the $100,000 adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, recognized as being in accordance with the partners' interests in partnership capital for purposes of section 613A(c)(7)(D).

(ii) Assume the same facts as in (i) except that the partnership agreement provides that (1) all additional cash requirements of the partnership for additional expenses will be funded by additional contributions from JC, (2) all cash from operations will first be distributed to JC until the excess of such cash distributions over the amount of such additional expense equals his initial $100,000 contributions, (3) all deductions attributable to such additional operating expenses will be allocated to JC, and (4) all income will be allocated to JC until the aggregate amount of income allocated to him equals the amount of partnership operating expenses funded by his initial $100,000 contribution plus the amount of additional operating expenses paid from contributions made solely by him. The allocations of income, gain, loss, and deduction provided in partnership agreement have economic effect. In addition, the economic effect of the allocations provided in the agreement is substantial. Because the partnership's drilling activities are sufficiently speculative, there is not a strong likelihood at the time the disproportionate allocations of loss and deduction to JC are provided for by the partnership agreement that the economic effect of such allocations will be largely offset by allocations of income. In addition, since the allocation of the entire basis of the lease to DG will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and since all other partnership allocations are recognized under this paragraph, the allocation of the adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, recognized as being in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D).

(iii) Assume the same facts as in (i) except that all distributions, including those made upon liquidation of the partnership, will be made equally between DG and JC, and no partner is obligated to restore the deficit balance in his capital account to the partnership following the liquidation of his interest for distribution to partners with positive capital account balances. Since liquidation proceeds will be distributed equally between DG and JC irrespective of their capital account balances, and since no partner is required to restore the deficit balance in his capital account to the partnership upon liquidation (in accordance with paragraph (b)(2)(ii)(b)(3) of this section), the allocations of income, gain, loss, and deduction provided in the partnership agreement do not have economic effect and must be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. Under these facts all partnership income, gain, loss, and deduction (and item thereof) will be reallocated equally between JC and DG. Furthermore, the allocation of the $100,000 adjusted tax basis of the lease of DG is not, under paragraph (b)(4)(v) of this section, deemed to be in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D), and such basis must be reallocated in accordance with the partners' interests in partnership capital or income as determined under section 613A(c)(7)(D). The results in this example would be the same if JC's initial cash contribution were $1,000,000 (instead of $100,000), but in such case the partners should consider whether, and to what extent, the provisions of paragraph (b)(1) of § 1.721-1, and principles related thereto, may be applicable.

(iv) Assume the same facts as in (i) and that for the partnership's first taxable year the simulated depletion deduction with respect to the lease is $10,000. Since DG properly was allocated the entire depletable basis of the lease (such allocation having been recognized as being in accordance with DG's interest in partnership capital with respect to such lease), under paragraph (b)(2)(iv)(k)(1) of this section the partnership's $10,-000 simulated depletion deduction is allocated to DG and will reduce his capital account accordingly. If (prior to any additional simulated depletion deductions) the lease is sold for $100,000, paragraph (b)(4)(v) of this section requires that the first $90,000 (i.e., the partnership's simulated adjusted basis in the lease) out of the $100,000 amount realized on such sale be allocated to DG (but does not directly affect his capital account). The partnership agreement allocates the remaining $10,000 amount realized equally between JC and DG (but such allocation does not directly affect their capital accounts). This allocation of the $10,000 portion of amount realized that exceeds the partnership's simulated adjusted basis in the lease will be treated as being in accordance with the partners' allocable shares of such amount realized under section 613A(c)(7)(D) because such allocation will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and all other partnership allocations are recognized under this paragraph. Under paragraph (b)(2)(iv)(k) of this section, the partners' capital accounts are adjusted upward by the partnership's simulated gain of $10,000 ($100,000 sales price less $90,000 simulated adjusted basis) in proportion to such partners' allocable shares of the $10,000 portion of the total amount realized that exceeds the partnership's $90,000 simulated adjusted basis ($5,000 to JC and $5,000 to DG). If the lease is sold for $50,000, under paragraph (b)(4)(v) of this section the entire $50,000 amount realized on the sale of the lease will be allocated to DG (but will not directly affect his capital account). Under paragraph (b)(2)(iv)(k) of this section the partners' capital accounts will be adjusted downward by the partnership's $40,000 simulated loss ($50,000 sales price less $90,-000 simulated adjusted basis) in proportion to the partners' allocable shares of the total amount realized from the property that represents recovery of the partnership's simulated adjusted basis therein. Accordingly, DG's capital account will be reduced by such $40,000.

Example (20). (i) RM and HB form a limited partnership to acquire and operate a commercial office building. RM, the limited partner, contributes $180,000, and HB, the general partner, contributes $20,000 to the partnership, which obtains an $800,000 nonrecourse loan and purchases the building (on leased land) for $1,000,000. The nonrecourse loan is secured only by the building, and no principal payments are due for 5 years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), HB will be required to restore any deficit balance in his capital account following the liquidation of his interest (as set

forth in paragraph (b)(2)(ii)(b)(3) of this section), and RM will not be required to restore any deficit balance in his capital account following the liquidation of his interest. The partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section), and, as of the end of each partnership taxable year discussed herein, the items described in paragraphs (b)(2)(ii)(d) (4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in RM's capital account. In addition, the agreement contains a minimum gain chargeback (in accordance with paragraph (b)(4)(iv)(e) of this section). The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, (a) all partnership items will be allocated 90 percent to RM and 10 percent to HB until the first time when the partnership has recognized items of income and gain that exceed the items of loss and deduction it has recognized over its life, and (b) all further partnership items will be allocated equally between RM and HB. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made 90 percent to RM and 10 percent to HB until a total of $200,000 has been distributed, and thereafter all such distributions will be made equally to RM and HB. In each of the partnership's first 2 taxable years, it generates rental income of $95,000, operating expenses (including land lease payments) of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000 in each of those years. The allocations of these losses, 90 percent to RM and 10 percent to HB, have substantial economic effect.

	RM	HB
Capital account upon formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Capital account at end of year 2	$27,000	$3,000

In the partnership's third taxable year, it again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize $70,000 of gain ($800,000 amount realized less $730,000 adjusted tax basis). Since the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is $70,000, the amount of partnership nonrecourse deductions for that year is $70,000, consisting of cost recovery deductions allowable with respect to the building of $70,000. Pursuant to the partnership agreement all partnership items comprising the net taxable loss of $85,000, including the $70,000 nonrecourse deduction, are allocated 90 percent to RM and 10 percent to HB. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	RM	HB
Capital account at end of year 2	$27,000	$3,000
Less: net loss in year 3 (without nonrecourse deduction)	(13,500)	(1,500)
Less: nonrecourse deduction in year 3	(63,000)	(7,000)
Capital account at end of year 3	($49,500)	($5,500)

This allocation of the $70,000 nonrecourse deduction, 90 percent, to RM and 10 percent to HB, satisfies requirement (2) of paragraph (b)(4)(iv)(d) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the building. Since the remaining requirements of paragraph (b)(4)(iv)(d) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, RM's and HB's shares of partnership minimum gain are $63,000 and $7,000, respectively. Therefore, pursuant to the next to last sentence in paragraph (b)(4)(iv)(f) of this section, RM is treated as obligated to restore a deficit balance in his capital account of $63,000, so that in the succeeding year RM could be allocated up to an additional $13,500 of partnership deductions, losses, and section 705(a)(2)(B) expenditures that are not nonrecourse deductions, and that allocation would be considered to have economic effect under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section even though such an allocation would increase a deficit capital account balance. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the beginning of the partnership's fourth taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,000 to zero. RM's and HB's shares of that net decrease would be $63,000 and $7,000, respectively. Upon such a disposition the minimum gain chargeback would require that RM be allocated an amount of that gain equal to $49,500 (the deficit balance in his capital account before any allocation is made to him under section 704(b) with respect to partnership items for the partnership's fourth taxable year).

(ii) Assume the same facts as originally stated in (i) except that the partnership agreement provides that all nonrecourse deductions of the partnership will be allocated equally between RM and HB. Furthermore, at the time the partnership agreement is entered into, there is a reasonable likelihood that over the partnership's life it will recognize amounts of income and gain significantly in excess of amounts of loss and deduction (other than nonrecourse deductions). The allocation of such excess equally between the partners pursuant to the partnership agreement will have substantial economic effect. The allocation of all items, other than the nonrecourse deductions, 90 percent to RM and 10 percent to HB, has substantial economic effect.

	RM	HB
Capital account upon formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Capital account at end of year 2	27,000	3,000
Less: net loss in year 3 (without nonrecourse deduction)	(13,500)	(1,500)
Less: nonrecourse deduction in year 3	(35,000)	(35,000)
Capital account at end of year 3	($21,500)	($33,500)

The allocation of the $70,000 nonrecourse deduction equally between RM and HB satisfies requirement (2) of paragraph (b)(4)(iv)(d) of this section because the allocation is consistent with allocations, which will have substantial economic effect, of other significant partnership items attributable to the building. Since the remaining requirements of paragraph (b)(4)(iv)(d) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. The allocation of the nonrecourse deductions, 75 percent to RM and 25 percent to HB (or in any other ratio between 90 percent to RM/10 percent to HB and 50 percent to RM/50 percent to HB), also would satisfy requirement (2) of paragraph (b)(4)(iv)(d) of this section.

(iii) Assume the same facts as originally stated in (i) except that the partnership agreement provides that RM will be allocated 99 percent, and HB 1 percent, of all nonrecourse

deductions of the partnership. This allocation of the $70,000 nonrecourse deduction does not satisfy requirement (2) of paragraph (b)(4)(iv)(d) because it is not reasonably consistent with allocations, which have substantial economic effect, of any other significant partnership item attributable to the building. Therefore, the allocation of nonrecourse deductions will be disregarded, and the nonrecourse deductions of the partnership will be reallocated according to the partners' overall economic interests in the partnership, determined with reference to the factors set forth in paragraph (b)(3)(ii) of this section.

(iv) Assume the same facts as originally stated in (i) except that, at the beginning of the partnership's fourth taxable year, RM contributes $144,000 and HB contributes $16,000 of additional capital to the partnership, which the partnership uses to reduce the amount of its nonrecourse liability from $800,000 to $640,000. In addition, in the partnership's fourth taxable year, it again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain ($640,000 amount realized less $640,-000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of the year is zero, which represents a net decrease in partnership minimum gain of $70,000 during the year. RM's and HB's shares of this net decrease are $63,000 and $7,000, respectively, so that at the end of the partnership's fourth taxable year, RM's and HB's shares of partnership minimum gain are zero. Therefore, pursuant to the next to last sentence in paragraph (b)(4)(iv)(f) of this section, RM is no longer treated as being obligated to restore any deficit balance in his capital account. Assuming the sum of the reductions to RM's capital account described in paragraph (b)(2)(ii)(d) (4), (5), and (6) of this section do not exceed $94,500, the minimum gain chargeback does not require that either RM or HB be allocated items of income and gain in the partnership's fourth taxable year even though there is a net decrease in partnership minimum gain during that year. This is true because at the end of the year, before any allocation is made under section 704(b) to RM with respect to partnership items for the fourth taxable year, RM's capital account balance is $94,500 (his capital account balance at the end of the partnership's third taxable year increased by his $144,000 capital contribution), and HB has a full deficit makeup obligation.

	RM	HB
Capital account at end of year 3	($49,500)	($5,500)
Plus: contribution	144,000	16,000
Less: net loss in year 4	(76,500)	(8,500)
Capital account at end of year 4	$18,000	$2,000

(v) Assume the same facts as originally stated in (i) except that the partnership incurred only a $700,000 nonrecourse loan and, in addition, incurred a $100,000 recourse loan, subordinate in priority to the nonrecourse loan, to which the partnership's building is also subject. Under paragraph (b)(4)(iv)(c) of this section, $700,000 of the adjusted basis of the building at the end of the partnership's third taxahle year is allocated to the nonrecourse liability (with the remaining $30,000 allocated to the recourse liability) so that if the partnership disposed of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain ($700,000 amount realized less $700,000 adjusted tax basis). Therefore, there is no minimum gain at the end of the partnership's third taxable year (and no increase in partnership minimum gain in such year). If, however, the $700,000 nonrecourse loan were subordinate in priority to the $100,000 recourse loan, under paragraph (b)(4)(iv)(c) of this section, only $630,000 of the adjusted basis of the building would be allocated to the $700,000 nonrecourse loan (the excess of the $730,000 adjusted tax basis of the building at the end of the partnership's third taxable year over the balance of the superior $100,000 recourse liability). In that case the balance of the $700,000 nonrecourse liability would exceed the adjusted tax basis of the building so allocated by $70,000 so that there would be $70,000 of minimum gain (and a $70,000 increase in partnership minimum gain) in the partnership's third taxable year.

(vi) Assume the same facts as originally stated in (i) except that RM and HB personally guarantee the "first" $100,000 of the $800,000 nonrecourse loan (i.e., only if the building is worth less than $100,000 will they be called upon to make up any deficiency). Under paragraph (b)(4)(iv)(c) of this section, only $630,000 of the adjusted tax basis of the building is allocated to the $700,000 nonrecourse portion of the loan because the collateral will be applied first to satisfy the $100,-000 guaranteed portion, in effect making it superior in priority to the remainder of the loan. On the other hand, if RM and HB were to guarantee the "last" $100,000 (i.e., if the building is worth less than $800,000, they will be called upon to make up the deficiency up to $100,000), $700,000 of the adjusted tax basis of the building would be allocated to the $700,000 nonrecourse portion of the loan because the guaranteed portion in effect would be inferior in priority to it.

(vii) Assume the same facts as originally stated in (i) except that the $800,000 loan is made by HB, the general partner. Under paragraph (b)(4)(iv)(g) of this section, the $800,000 obligation does not constitute a nonrecourse liability of the partnership for purposes of this paragraph (b)(4)(iv). To the extent that such obligation constitutes a nonrecourse liability under § 1.1001-2, $70,000 of the $90,000 cost recovery deduction in the partnership's third taxable year must be allocated in accordance with the partners' interests in the partnership, under paragraph (b)(3) of this section. HB bears the burden of any economic loss corresponding to that $70,000 deduction. Therefore, HB must be allocated the entire amount of such deduction.

(viii) Assume the same facts as in (vii) except that the $800,000 loan from HB to the partnership is a purchase money loan that "wraps around" a $700,000 underlying nonrecourse note (also secured by the building) issued by HB to an unrelated person in connection with HB's acquisition of the building. Under these circumstances if the partnership were to convey the building to HB in satisfaction of the partnership's $800,000 liability, HB would bear the economic risk of loss with respect to only $100,000 of the liability. Therefore, for purposes of this paragraph (b)(4)(iv), the $800,000 liability will be treated as a $700,000 nonrecourse liability of the partnership and a $100,000 liability (inferior in priority to the $700,000 liability) of the partnership to HB. Under paragraph (b)(4)(iv)(g) of this section, the $100,000 liability does not constitute a nonrecourse liability of the partnership for purposes of this paragraph (b)(4)(iv). To the extent that such obligation constitutes a nonrecourse liability under § 1.1001-2, $70,000 of the $90,000 cost recovery deduction realized in the partnership's third taxable year must be allocated to HB.

Example (21). (i) RD and PK form a general partnership to acquire and operate residential real properties. Each partner contributes $150,000 to the partnership. The partnership obtains a $1,500,000 nonrecourse loan and purchases 3 apartment buildings (on leased land) for $720,000 ("Property A"), $540,-000 ("Property B"), and $540,000 ("Property C"), respectively. The nonrecourse loan is secured only by the 3 buildings, and no principal payments are due for 5 years. In each of the partnership's first 3 taxable years, it generates rental income of $225,000, operating expenses (including land lease payments) of

$50,000, interest expense of $175,000, and cost recovery deductions on the 3 properties of $150,000 ($60,000 on Property A, $45,000 on Property B, and $45,000 on Property C), resulting in a net taxable loss of $150,000 in each of those years. If the partnership were to dispose of the 3 apartment buildings in full satisfaction of its nonrecourse liability at the end of its third taxable year, it would realize $150,000 of gain ($1,500,000 amount realized less $1,350,000 adjusted tax basis). Since the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is $150,000, the amount of partnership nonrecourse deductions for that year is $150,000, consisting of cost recovery deductions allowable with respect to the 3 apartment buildings of $150,000. The result would be the same if the partnership obtained 3 separate nonrecourse loans that were "cross-collateralized" (i.e., if each separate loan were secured by all 3 of the apartment buildings).

(ii) Assume the same facts as originally stated in (i) and that at the beginning of the partnership's fourth taxable year, the partnership (with the permission of the nonrecourse lender) disposes of Property A for $835,000 and uses a portion of the proceeds to repay $600,000 of the nonrecourse liability, reducing the balance to $900,000. As a result of the disposition, the partnerships recognizes gain of $295,000 ($835,000 amount realized less $540,000 adjusted tax basis). Also during the partnership's fourth taxable year it generates rental income of $135,000 and operating expenses of $30,000, interest expense of $105,000, and cost recovery deductions of $90,000 ($45,000 on each remaining building). If the partnership were to dispose of the remaining 2 buildings in full satisfaction of its nonrecourse liability at the end of the partnership's fourth taxable year, it would realize gain of $180,000 ($900,000 amount realized less $720,000 aggregate adjusted tax basis), which represents the amount of partnership minimum gain at the end of such year. Since the amount of partnership minimum gain increased from $150,000 to $180,000 during the partnership's fourth taxable year, the amount of partnership nonrecourse deductions for such year is $30,000, consisting of cost recovery deductions allowable with respect to the 2 remaining apartment buildings.

Example (22). (i) OC and DR form a limited partnership to acquire and lease machinery that is 5-year recovery property. OC, the limited partner, and DR, the general partner, contribute $100,000 each to the partnership, which obtains an $800,000 nonrecourse loan and purchases the equipment for $1,000,000. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such machinery. The nonrecourse loan is secured only by the machinery. The principal amount of the loan is to be repaid $50,000 per year during each of the partnership's first 5 taxable years, with the remaining $550,000 of unpaid principal due on the first day of the partnership's sixth taxable year. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). DR will be required to restore any deficit balance in his capital account following the liquidation of his interest (as set forth in paragraph (b)(2)(ii)(b)(3) of this section), and OC will not be required to restore any deficit balance in his capital account following the liquidation of his interest. The partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section), and, as of the end of each partnership taxable year discussed herein, the items described in paragraphs (b)(2)(ii)(d) (4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in RM's capital account. In addition, the agreement contains a minimum gain chargeback (in accordance with paragraph (b)(4)(iv)(e) of this section). The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated equally between OC and DR. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made equally between OC and DR. In the partnership's first taxable year, it generates rental income of $130,000, interest expense of $80,000, and a cost recovery deduction of $150,000, resulting in a net taxable loss of $100,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $750,000. Allocations of these losses equally between OC and DR have substantial economic effect.

	OC	DR
Capital account upon formation	$100,000	$100,000
Less: net loss in year 1	(50,000)	(50,000)
Capital account at end of year 1	$50,000	$50,000

In the partnership's second taxable year it generates rental income of $130,000, interest expense of $75,000, and a cost recovery deduction of $220,000, resulting in a net taxable loss of $165,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $700,000, and distributes $2,500 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of that year, it would realize $70,000 of gain ($700,000 amount realized less $630,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is $70,000, and the amount of partnership nonrecourse deductions for that year is $70,000, consisting of cost recovery deductions allowable with respect to the machinery of $70,000. Pursuant to the partnership agreement all partnership items comprising the net taxable loss of $165,000, including the $70,000 nonrecourse deduction, are allocated equally between OC and DR. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	OC	DR
Capital account at end of year 1	$50,000	$50,000
Less: net loss in year 2 (without nonrecourse deduction)	(47,500)	(47,500)
Less: nonrecourse deduction in year 2	(35,000)	(35,000)
Less: distribution	(2,500)	(2,500)
Capital account at end of year 2	($35,000)	($35,000)

This allocation of the $70,000 nonrecourse deduction equally between OC and DR satisfies requirement (2) of paragraph (b)(4)(iv)(d) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the machinery. Since the remaining requirements of paragraph (b)(4)(iv)(d) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's second taxable year, OC's and DR's shares of partnership minimum gain are $35,000 each. Therefore, pursuant to the next to last sentence in paragraph (b)(4)(iv)(f) of this section, OC is treated as obligated to restore a deficit balance in his capital account of $35,000. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the beginning of the partnership's third taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,-

000 to zero. OC's and DR's shares of that net decrease would be $35,000 each. Upon such a disposition the minimum gain chargeback would require that OC be allocated an amount of that gain equal to $35,000 (the deficit balance in his capital account before any allocation is made to him under section 704(b) with respect to partnership items for the partnership's third taxable year). The minimum gain chargeback would not require that DR be allocated any amount of such gain, since he has a full deficit makeup obligation.

(ii) Assume the same facts as originally stated in (i) and that DT is admitted to the partnership at the beginning of the partnership's third taxable year. At the time of DT's admission, the fair market value of the machinery is $900,000. DT contributes $100,000 to the partnership (which amount the partnership invests in undeveloped land) in exchange for an interest in the partnership. Pursuant to paragraph (b)(2)(iv)(f) of this section, the capital accounts of OC and DR are adjusted upward to $100,000 each. This reflects the manner in which the partnership gain of $270,000 ($900,000 fair market value minus $630,000 adjusted basis) would be shared if the machinery were sold for its fair market value immediately prior to DT's admission to the partnership.

	OC	DR
Capital account before DT's admission	($35,000)	($35,000)
Deemed sale adjustment	135,000	135,000
Capital account adjusted for DT's admission	$100,000	$100,000

The partnership agreement is modified to provide that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, partnership income, gain, loss, and deduction, as computed for book purposes, will be allocated equally among the partners, and such allocations will be reflected in the partners' capital accounts. The partnership agreement also is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the machinery will be shared among the partners in a manner that takes account of the variation between such property's $630,000 adjusted tax basis and its $900,000 book value, in accordance with paragraph (b)(2)(iv)(f) of this section and the special rule contained in paragraph (b)(4)(i) of this section. Finally, the partnership agreement is modified to provide that DT will not be required to restore any deficit balance in his capital account following the liquidation of his interest. Since the requirements of paragraph (b)(2)(iv)(g) of this section are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with paragraph (b)(2)(iv) of this section. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability immediately following the revaluation of the machinery, it would realize no book gain ($700,000 amount realized less $900,000 book value). Thus, as a result of the revaluation of the machinery upward by $270,000, the partnership minimum gain is reduced from $70,000 immediately prior to such revaluation to zero. OC's and DR's shares of that decrease are $35,000 each.

(iii) Assume the same facts as in (ii) and that also during the partnership's third taxable year the partnership generates rental income of $130,000, interest expense of $70,000, a cost recovery deduction of $210,000, and a book depreciation deduction (attributable to the machinery) of $300,000. As a result the partnership has a net taxable loss of $150,000 and a net book loss of $240,000. In addition, the partnership repays $50,000 of the nonrecourse liability (after the date of DT's admission), reducing that liability to $650,000, and distributes $5,000 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, $50,000 of book gain would result ($650,000 amount realized less $600,000 book value). Therefore, the amount of partnership minimum gain at the end of the year is $50,000, which represents a net decrease in partnership minimum gain of $20,000 during the year. (This is so even though there would be an increase in partnership minimum gain in the partnership's third taxable year if minimum gain were computed with reference to the adjusted tax basis of the machinery.) Nevertheless, pursuant to the third sentence of paragraph (b)(4)(iv)(b) of this section the amount of nonrecourse deductions of the partnership for its third taxable year is $50,000 (the net increase in partnership minimum gain during the year determined by adding back the $70,000 decrease in partnership minimum gain attributable to the revaluation of the machinery to the $20,000 net decrease in partnership minimum gain during the year). The $50,000 of partnership nonrecourse deductions for the year consist of book depreciation deductions allowable with respect to the machinery of $50,000. Pursuant to the partnership agreement all partnership items comprising the net book loss of $240,000, including the $50,000 nonrecourse deduction, are allocated equally among the partners. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $210,000 cost recovery deduction for the partnership's third taxable year is, in accordance with section 704(c) principles, shared $55,000 to OC, $55,000 to DR, and $100,000 to DT.

	OC		DR		DT	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end of year 2	($35,000)	$100,000	($35,000)	$100,000	$100,000	$100,000
Less: nonrecourse deduction	(9,166)	(16,666)	(9,166)	(16,666)	(16,666)	(16,666)
Plus: items other than nonrecourse deduction in year 3	(25,834)	(63,334)	(25,834)	(63,334)	(63,334)	(63,334)
Less: Distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 3	(75,000)	(15,000)	(75,000)	(15,000)	(15,000)	(15,000)

The allocation of the $50,000 nonrecourse deduction equally among OC, DR, and DT satisfies requirement (2) of paragraph (b)(4)(iv)(d) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the machinery. Since the remaining requirements of paragraph (b)(4)(iv)(d) of this section are satisfied, such allocation is deemed to be made in accordance with the partners' interest in the partnership. At the end of the partnership's third taxable year, OC's, DR's, and DT's shares of partnership minimum gain are $16,666 each.

(iv) Assume the same facts as in (iii) and that during the partnership's fourth taxable year the partnership generates rental income of $130,000, interest expense of $65,000, a cost recovery deduction of $210,000, and a book depreciation de-

duction (attributable to the machinery) of $300,000. As a result the partnership has a net taxable loss of $145,000 and a net book loss of $235,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $600,000, and distributes $5,000 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, $300,000 of book gain would result ($600,000 amount realized less $300,000 book value). Therefore, the amount of partnership minimum gain as of the end of the year is $300,000, which represents a net increase in partnership minimum gain during the year of $250,000. Thus, the amount of partnership nonrecourse deductions for that year equals $250,000, consisting of book depreciation deductions of $250,000. Pursuant to the partnership agreement all partnership items comprising the net book loss of $235,000, including the $250,000 nonrecourse deduction, are allocated equally among the partners. That allocation of all items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $210,000 cost recovery deduction for the partnership's fourth taxable year is, in accordance with section 704(c) principles, shared $55,000 to OC, $55,000 to DR, and $100,000 to DT.

	OC		DR		DT	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end of year 3	($75,000)	$15,000	($75,000)	$15,000	$15,000	$15,000
Less: nonrecourse deduction	(45,833)	(83,333)	(45,833)	(83,333)	(83,333)	(83,333)
Plus: items other than nonrecourse deduction in year 4	(12,449)	5,000	12,449	5,000	5,000	5,000
Less: Distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 4	(113,334)	(68,333)	(113,334)	(68,333)	(68,333)	(68,333)

The allocation of the $250,000 nonrecourse deduction equally among OC, DR, and DT satisfies requirement (2) of paragraph (b)(4)(iv)(d) of this section. Since the remaining requirements of paragraph (b)(4)(iv)(d) of this section are satisfied, such allocation is deemed to be made in accordance with the partners' interest in the partnership. At the end of the partnership's third taxable year, OC's, DR's, and DT's shares of partnership minimum gain are $100,000 each.

(v) Assume the same facts as (iv) and that at the beginning of the partnership's fifth taxable year it sells the machinery for $650,000 (using $600,000 of the proceeds to repay the nonrecourse liability), resulting in a taxable gain of $440,000 ($650,000 amount realized less $210,000 adjusted tax basis) and a book gain of $350,000 ($650,000 amount realized less $300,000 book basis). The partnership has no other items of income, gain, loss, or deduction for such year. As a result of the sale, partnership minimum gain is reduced from $300,000 to zero, reducing OC's DR's and DT's shares of partnership minimum gain to zero from $100,000 each. The minimum gain chargeback requires that OC and DT each be allocated an amount of that gain equal to $68,333 (the deficit balance in each of their capital accounts at the end of the partnership's fifth taxable year before any allocation is made to them under section 704(b) with respect to partnership items for that year). Thus, the allocation of the first $136,666 of book gain $68,333 to OC and $68,333 to DT is deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4)(iv)(e) of this section. The allocation of the remaining $213,334 of book gain in a manner such that the total book gain is allocated equally among the partners has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the $440,000 taxable gain is, in accordance with section 704(c) principles, shared $161,667 to OC, $161,667 DR, and $116,666 to DT.

	OC		DR		DT	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end of year 4	($113,334)	($68,333)	($113,334)	($68,333)	($68,333)	($68,333)
Plus: minimum gain chargeback	94,691	68,333	0	0	68,333	68,333
Plus: additional gain	66,976	48,333	161,667	116,666	48,333	48,333
Capital account before liquidation	48,333	48,333	48,333	48,333	48,333	48,333

Example 23. (i) A partnership owns 4 properties, each of which is subject to a nonrecourse liability of the partnership. During a taxable year of the partnership, the following events take place. First, the partnership generates a cost recovery deduction (for both book and tax purposes) with respect to Property W of $10,000 and repays $5,000 of the nonrecourse liability secured only by that property, resulting in an increase in minimum gain with respect to that liability of $5,000. Second, the partnership generates a cost recovery deduction (for both book and tax purposes) with respect to Property X of $10,000 and repays none of the nonrecourse liability secured by that property, resulting in an increase in minimum gain with respect to that liability of $10,000. Third, the partnership generates a cost recovery deduction (for both book and tax purposes) of $2,000 on Property Y and repays $11,000 of the nonrecourse liability secured only by that property, resulting in a decrease in minimum gain with respect to that liability of $9,000 (although at the end of that year, there remains minimum gain with respect to that liability). Finally, the partnership borrows $5,000 on a nonrecourse basis, giving as the only security for that liability Property Z, which is a parcel of undeveloped land with an adjusted tax basis (and book value) of $2,000, resulting in a net increase in minimum gain with respect to that liability of $3,000. The net increase in partnership minimum gain during that year is $9,000, so that the amount of nonrecourse deductions of the partnership for that taxable year is $9,000. Those nonrecourse deductions consist of $3,000 of cost recovery deductions with respect to Property W and $6,000 of cost recovery deductions with respect to Property X. The amount of nonrecourse deductions consisting of cost recovery deductions is determined as follows. With respect to the nonrecourse liability secured by Property Z, with respect to which there is no cost recovery deduction, the amount of cost recovery deductions that constitutes nonrecourse deductions is zero. Similarly, with respect to the nonrecourse liability secured by Property Y, for which there is

no increase in minimum gain, the amount of cost recovery deductions that constitutes nonrecourse deductions is zero. With respect to each of the nonrecourse liabilities secured by Properties W and X, which are (i) secured by property with respect to which there are cost recovery deductions and (ii) for which there is an increase in minimum gain, the amount of cost recovery deductions that constitutes nonrecourse deductions equals the product obtained by multiplying the net increase in partnership minimum gain ($9,000) times a fraction, the numerator of which is the total cost recovery deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability and the denominator of which is the sum of the numerators for each such liability. Thus, for the liability secured by Property W, the amount is $9,000 times $5,000/$15,000. For the liability secured by Property X, the amount is $9,000 times $10,000/$15,000. (If one depreciable property secured 2 partnership nonrecourse liabilities, the amount of cost recovery or book depreciation with respect to that property would be allocated among such liabilities in accordance with the method by which adjusted basis is allocated under paragraph (b)(2)(iv)(b) of this section.)

(ii) Assume the facts as in (i) except that the loan secured by Property Z is $15,000 (rather than $5,000), resulting in a net increase in minimum gain with respect to that liability of $13,000. Thus, the net increase in partnership minimum gain is $19,000, and the amount of nonrecourse deductions of the partnership for that taxable year is $19,000. Those nonrecourse deductions consist of $5,000 of cost recovery deductions with respect to Property W, $10,000 of cost recovery deductions with respect to Property X, and a pro rata portion of the partnership's other items of deduction, loss, and section 705(a)(2)(B) expenditure for that year. The method for computing the amounts of cost recovery deductions that constitute nonrecourse deductions is the same as in (i) for the liabilities secured by Properties Y and Z. With respect to each of the nonrecourse liabilities secured by Properties W and X, the amount of cost recovery deductions that constitutes nonrecourse deductions equals the total cost recovery deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability.

(c) Contributed property—(1) In general. Where property has actually been contributed by a partner to a partnership (so as to become partnership property as among the partners and not merely property subject to the claims of partnership creditors), section 704(c) and this paragraph provide rules for determining a partner's distributive share of depreciation, depletion, or gain or loss with respect to such contributed property. These rules do not apply to property, only the use of which is permitted the partnership by the partner who owns it. Section 704(c) and this paragraph provide certain alternatives in determining the partners' distributive shares of such items in order to account for precontribution appreciation or diminution in value of the property contributed. When the partnership agreement is silent as to the treatment of such items with respect to contributed property (and if such property is not an undivided interest as described in section 704(c)(3)), depreciation, depletion, or gain or loss with respect to such property shall be treated in the same manner as though such items arose with respect to property purchased by the partnership. The application of this provision may be illustrated by the following examples:

Example (1). A and B form an equal partnership. A contributes $1,000 cash and B contributes inventory with an adjusted basis to him of $800 and a fair market value of $1,000. Under section 723, the basis of the inventory to the partnership is also $800. During the year, the inventory is sold for $1,100. There is no provision in the partnership agreement for treatment of items with respect to contributed property. Under section 704(c)(1), the $300 profit on the sale of the inventory is treated as if it were gain on property that had been purchased by the partnership and subsequently sold. Therefore, each partner's distributive share of such profit on the inventory is $150.

Example (2). C and D form an equal partnership. C contributes machinery worth $10,000 with an adjusted basis to him of $4,000. D contributes $10,000 cash. Under the provisions of section 722, the basis of C's partnership interest is $4,000 and the basis of D's interest is $10,000. There is no provision in the partnership agreement relating to contributed property. If the contributed property depreciates at an annual rate of 10 percent, the partnership will have an annual depreciation deduction of $400, which will result in a reduction of $200 in each partner's distributive share of partnership income. Thus, at the end of the first year, the adjusted basis of the contributed property will be $3,600. If the partnership has no other taxable income or loss for that year, each partner will have a deduction of $200, representing his distributive share of partnership loss for the year. C's adjusted basis for his interest will be $3,800 ($4,000, the original basis of his interest, reduced by $200); D's adjusted basis will be $9,800 ($10,000, reduced by $200).

Example (3). Assume that the property in example (2) of this subparagraph is sold at the beginning of the second year of partnership operation for $9,000. The partnership gain will be $5,400 ($9,000, the amount realized, less the adjusted basis of $3,600). Each partner's share of the $5,400 gain will be $2,700. If the partnership has no other taxable income or loss for that year, each partner will have a gain from the partnership of $2,700, representing his distributive share of gain from the sale of property used in the partnership business. C's adjusted basis for his interest will then be $6,500 (the basis of $3,800, increased by the gain of $2,700). D's adjusted basis will be $12,500 (the basis of $9,800, increased by the gain of $2,700). If the partnership is then terminated, and its assets consisting of $19,000 in cash are distributed to the partners *pro rata* in liquidation of their entire interests, C will have a capital gain of $3,000 ($9,500, the amount received, less $6,500, the adjusted basis of his interest). D will have a capital loss of $3,000 (D's adjusted basis, $12,500, reduced by the amount received $9,500).

(2) Effect of partnership agreement. (i) If the partners so provide in the partnership agreement, depreciation, depletion, or gain or loss with respect to contributed property may be allocated among the partners in a manner which takes into account all or any portion of the difference between the adjusted basis and the fair market value of contributed property at the time of contribution. The allocation may apply to all contributed property or to specific items. The appreciation or diminution in value represented by the difference between the

adjusted basis and the fair market value of contributed property at the time of contribution may thus be attributed to the contributing partner upon a subsequent sale or exchange of the property by the partnership. Such appreciation or diminution also may be used in allocating the allowable depreciation or depletion with respect to such property among the contributing partner and the noncontributing partners. In any case, however, the total depreciation, depletion, or gain or loss allocated to the partners is limited to a "ceiling" which cannot exceed the amount of gain or loss realized by the partnership or the depreciation or depletion allowable to it. The application of this subdivision may be illustrated by the following examples:

Example (1). Assume that partners C and D, in examples (2) and (3) of subparagraph (1) of this paragraph, agree under section 704(c)(2) to attribute to C, the contributor of the machinery, the potential gain of $6,000 represented by the difference between its adjusted basis of $4,000 and its fair market value of $10,000. With his contribution of $10,000 cash, D has, in effect, purchased an undivided one-half interest in the property for $5,000. Since the property depreciates at an annual rate of 10 percent, D would have been entitled to a depreciation deduction of $500 per year. However, since under the "ceiling" approach the partnership is allowed only $400 per year (10 percent of $4,000), no more than $400 may be allocated between the partners, *i.e.*, the partnership cannot allocate $500 of depreciation to D and thereby treat C as if C had received an additional $100 of income. Therefore, the partners allocate the $400 deduction for depreciation entirely to D and none to C, the contributor. At the end of the first year, the adjusted basis of the contributed property will be $3,600. Since the $400 deduction is allocated entirely to D, if the partnership has no other taxable income or loss, C will have no income or loss, and D will have a deduction of $400. C's basis for his interest will remain $4,000. D's adjusted basis for his interest will be $9,600 ($10,000, the original basis of his interest, reduced by the deduction of $400).

Example (2). Assume that the partners in example (1) of this subdivision also agree under section 704(c)(2) that, upon a sale of the contributed property, the portion of the proceeds attributable to the excess of the fair market value of the property at date of contribution (less accumulated depreciation on such value) over its basis at date of contribution (less accumulated depreciation on such basis) shall result in gain to the contributing partner only. If the property is sold at the beginning of the second year of partnership operation for $9,000, the partnership gain of $5,400 ($9,000, the amount realized, less the adjusted basis of $3,600) must be allocated to the partners under the terms of the agreement. The fair market value of the property as depreciated is $9,000 ($10,000, the value on contribution, less $1,000, the accumulated depreciation on such value). Under section 704(c)(2) and the terms of the partnership agreement, the $5,400 difference between $9,000, the fair market value as depreciated, and $3,600, the adjusted basis of the property, represents the portion of the gain to be allocated to C. None of this gain is allocated to D. (If the property were sold for more than $9,000, the portion of the gain in excess of $5,400 would be allocated equally between the partners in accordance with their agreement for sharing gains. If the property were sold for less than $9,000, the entire gain would be allocated to C and nothing to D.) If the partnership and partners engaged in no other transactions that year, C will report a gain of $5,400, and D, no income or loss. C's adjusted basis for his interest will then be $9,400 ($4,000, his original basis, increased by the gain of $5,400). D's adjusted basis will be $9,000 ($10,000, his original basis, less $400 depreciation deduction in the first partnership year). If the partnership is then terminated, and its assets consisting of $19,000 in cash are distributed to the partners *pro rata* in liquidation of their interests, C will have a capital gain of $100 ($9,500, the amount received, less $9,400, the adjusted basis of his interest). D will have a capital loss of $100 (the excess of D's adjusted basis, $9,600, over the amount received, $9,500).

(ii) For the effect of an agreement under section 704(c)(2) on undivided interests in property contributed to the partnership where the partners' interests in the capital and profits of the partnership do not correspond with such undivided interests, see subparagraph (3)(ii) of this paragraph.

(3) Undivided interests. (i) Section 704(c)(3) provides a special rule for the allocation of depreciation, depletion, or gain or loss with respect to undivided interests in property contributed by the partners to a partnership where the partnership agreement does not provide otherwise. This provision applies only to property contributed to a partnership by all of its partners and only where the relative undivided interests of the partners in the property prior to the contribution are in the same ratio as their interests in the capital and in the profits of the partnership (except for depreciation, depletion, or gain or loss with respect to the contributed undivided interest) after the contribution. Where these conditions are met, depreciation, depletion, or gain or loss with respect to the undivided interests in contributed property shall be determined in the same manner as though such undivided interests continued to be held by the partners outside the partnership. The rule stated in section 704(c)(3) applies only to the case where persons actually contribute undivided interests to a partnership. The provisions of this subdivision may be illustrated by the following examples:

Example (1). A and B are tenants in common owning undivided one-half interests in improved real estate consisting of land on which a factory is situated. They each contribute their respective undivided interests in the real estate to a partnership in which the profits are to be divided equally and, because the partners have equal shares in the capital, the assets will be divided equally on dissolution. A's basis for his undivided one-half interest is $4,000, of which $1,000 is allocable to the land and $3,000 to the factory. B's basis for his undivided one-half interest is $10,000, of which $3,000 is allocable to the land and $7,000 to the factory. The partnership agreement contains no provisions as to the allocation of depreciation or gain or loss on disposition of the property by the partnership. The factory depreciates at a rate of 5 percent a year. The annual partnership allowance for depreciation of $500 (5 percent of $10,000) will be allocated between the partners by allowing A a deduction of $150 (5 percent of $3,000, his basis for his undivided interest in the factory), and by allowing B a deduction of $350 (5 percent of $7,000, his basis for his undivided interest in the factory). At the end of the first year of partnership operation, A's adjusted basis for his

undivided interest in the factory is $2,850 ($3,000 less $150), and B's adjusted basis is $6,650 ($7,000 less $350).

Example (2). If, in example (1) of this subdivision, the partnership at the end of the first year's operation sells the factory and land for $12,000, each partner's share of the gain or loss would be determined as follows: Since the undivided interests in the factory and the land are to be treated as though held by the partners outside the partnership, A's share of the proceeds of the sale is $6,000. His adjusted basis in the contributed property is $3,850 ($1,000 for the land and $2,850 for the factory). Therefore, his gain from the sale is $2,150. Since B's share of the proceeds is also $6,000, and his adjusted basis in the contributed property is $9,650 ($3,000 for the land and $6,650 for the factory), his loss is $3,650.

Example (3). Assume the same facts as in examples (1) and (2) of this subdivision, except that A and B do not enter into a partnership agreement. Assume further that they are found to be a partnership for income tax purposes because of their joint business activity, but that the factory and the land are not actually contributed by them to the partnership. Although A and B have permitted the partnership to use such properties, they continue to own the factory and the land in their individual capacities (as tenants in common), and the same tax consequences result as in examples (1) and (2) of this subdivision.

(ii) The allocation illustrated in subdivision (i) of this subparagraph will not be affected by the contribution, either at the time of the original contribution or subsequent thereto, of additional property not held as undivided interests if the partners' respective interests in the capital and in the profits of the partnership (except for depreciation, depletion, or gain or loss with respect to the contributed undivided interests) remain the same as their undivided interests in the property previously contributed to the partnership. If the partners' interests in the capital and profits of the partnership are changed from their undivided interests in the property previously contributed to the partnership, the method of allocation of depreciation, depletion, or gain or loss with respect to such property no longer applies. Such a change of the partner's interests in capital and profits may result from a modification of the agreement, or from a change in a partner's respective interest in capital either as a result of a further contribution or as a result of a distribution. (However, drawings made throughout the year against profits, and loans will be disregarded.) Where such a change takes place, the partners may agree under section 704(c)(2) that depreciation, depletion, or gain or loss with respect to the property formerly held as undivided interests shall continue to be allocated in the same manner as prior to the change. These provisions may be illustrated by the following examples:

Example (1). C and D are tenants in common, each owning an undivided one-half interest in certain unimproved land. Each contributes his respective undivided interest in the land to a partnership in which each has an equal interest in capital and profits. C's basis for his one-half interest is $4,000; D's basis is $10,000. The fair market value of the land is $20,000. Subsequently, C contributes $5,000 cash to his share of partnership capital. As a result of C's additional contribution, he now has a 60-percent interest in partnership capital and D, a 40-percent interest, although profits and losses still are to be shared equally. Since the interests of the partners in the capital and profits of the partnership no longer correspond to their undivided interests in the land, the method of allocation prescribed by section 704(c)(3) no longer applies. Therefore, if the land is sold for $12,000, the partnership will have a loss of $2,000 ($14,000 partnership basis minus $12,000). Since the partnership agreement contains no special allocation for gain or loss with respect to contributed property, the $2,000 loss is allocated as if such property had been purchased by the partnership, *i.e.*, $1,000 to each partner.

Example (2). Assume in example (1) of this subdivision that the partners agree that, because of C's additional contribution of $5,000 cash, he is to have a 60-percent interest in partnership capital. Profits and losses still are to be shared equally, except that gain or loss with respect to the land is, under section 704(c)(2), to continue to be allocated in the same manner as it had been allocated under section 704(c)(3) prior to the additional contribution. The land is sold for $12,000. C's share of the proceeds is $6,000. His basis for the land is $4,000. Therefore, he has a $2,000 gain. D's loss is $4,000 ($10,000 basis less $6,000 proceeds).

(d) Limitation on allowance of losses. **(1)** A partner's distributive share of partnership loss will be allowed only to the extent of the adjusted basis (before reduction by current year's losses) of such partner's interest in the partnership at the end of the partnership taxable year in which such loss occurred. A partner's share of loss in excess of his adjusted basis at the end of the partnership taxable year will not be allowed for that year. However, any loss so disallowed shall be allowed as a deduction at the end of the first succeeding partnership taxable year, and subsequent partnership taxable years, to the extent that the partner's adjusted basis for his partnership interest at the end of any such year exceeds zero (before reduction by such loss for such year).

(2) In computing the adjusted basis of a partner's interest for the purpose of ascertaining the extent to which a partner's distributive share of partnership loss shall be allowed as a deduction for the taxable year, the basis shall first be increased under section 705(a)(1) and decreased under section 705(a)(2), except for losses of the taxable year and losses previously disallowed. If the partner's distributive share of the aggregate of items of loss specified in section 702(a)(1), (2), (3), (8), and (9) exceeds the basis of the partner's interest computed under the preceding sentence, the limitation on losses under section 704(d) must be allocated to his distributive share of each such loss. This allocation shall be determined by taking the proportion that each loss bears to the total of all such losses. For purposes of the preceding sentence, the total losses for the taxable year shall be the

sum of his distributive share of losses for the current year and his losses disallowed and carried forward from prior years.

(3) For the treatment of certain liabilities of the partner or partnership, see section 752 and § 1.752-1.

(4) The provisions of this paragraph may be illustrated by the following examples:

Example (1). At the end of the partnership taxable year 1955, partnership AB has a loss of $20,000. Partner A's distributive share of this loss is $10,000. At the end of such year, A's adjusted basis for his interest in the partnership (not taking into account his distributive share of the loss) is $6,000. Under section 704(d), A's distributive share of partnership loss is allowed to him (in his taxable year within or with which the partnership taxable year ends) only to the extent of his adjusted basis of $6,000. The $6,000 loss allowed for 1955 decreases the adjusted basis of A's interest to zero. Assume that, at the end of partnership taxable year 1956, A's share of partnership income has increased the adjusted basis of A's interest in the partnership to $3,000 (not taking into account the $4,000 loss disallowed in 1955). Of the $4,000 loss disallowed for the partnership taxable year 1955, $3,000 is allowed A for the partnership taxable year 1956, thus again decreasing the adjusted basis of his interest to zero. If, at the end of partnership taxable year 1957, A has an adjusted basis of his interest of at least $1,000 (not taking into account the disallowed loss of $1,000), he will be allowed the $1,000 loss previously disallowed.

Example (2). At the end of partnership taxable year 1955, partnership CD has a loss of $20,000. Partner C's distributive share of this loss is $10,000. The adjusted basis of his interest in the partnership (not taking into account his distributive share of such loss) is $6,000. Therefore, $4,000 of the loss is disallowed. At the end of partnership taxable year 1956, the partnership has no taxable income or loss, but owes $8,000 to a bank for money borrowed. Since C's share of this liability is $4,000, the basis of his partnership interest is increased from zero to $4,000. (See sections 752 and 722, and §§ 1.752-1 and 1.722-1.) C is allowed the $4,000 loss, disallowed for the preceding year under section 704(d), for his taxable year within or with which partnership taxable year 1956 ends.

Example (3). At the end of partnership taxable year 1955, partner C has the following distributive share of partnership items described in section 702(a): Long-term capital loss, $4,000; short-term capital loss, $2,000; income as described in section 702(a)(9), $4,000. Partner C's adjusted basis for his partnership interest at the end of 1955, before adjustment for any of the above items, is $1,000. As adjusted under section 705(a)(1)(A), C's basis is increased from $1,000 to $5,000 at the end of the year. C's total distributive share of partnership loss is $6,000. Since without regard to losses, C has a basis of only $5,000, C is allowed only $5,000/$6,000 of each loss, that is, $3,333 of his long-term capital loss, and $1,667 of his short-term capital loss. C must carry forward to succeeding taxable years $667 as a long-term capital loss and $333 as a short-term capital loss.

(e) Family partnerships—(1) In general—(i) Introduction. The production of income by a partnership is attributable to the capital or services, or both, contributed by the partners. The provisions of Subchapter K, Chapter 1 of the Code, are to be read in the light of their relationship to section 61, which requires, *inter alia*, that income be taxed to the person who earns it through his own labor and skill and the utilization of his own capital.

(ii) Recognition of donee as partner. With respect to partnerships in which capital is a material income-producing factor, section 704(e)(1) provides that a person shall be recognized as a partner for income tax purposes if he owns a capital interest in such a partnership whether or not such interest is derived by purchase or gift from any other person. If a capital interest in a partnership in which capital is a material income-producing factor is created by gift, section 704(e)(2) provides that the distributive share of the donee under the partnership agreement shall be includible in his gross income, except to the extent that such distributive share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the share of the donor attributable to the donor's capital. For rules of allocation in such cases, see subparagraph (3) of this paragraph.

(iii) Requirement of complete transfer to donee. A donee or purchaser of a capital interest in a partnership is not recognized as a partner under the principles of section 704(e)(1) unless such interest is acquired in a *bona fide* transaction, not a mere sham for tax avoidance or evasion purposes, and the donee or purchaser is the real owner of such interest. To be recognized, a transfer must vest dominion and control of the partnership interest in the transferee. The existence of such dominion and control in the donee is to be determined from all the facts and circumstances. A transfer is not recognized if the transferor retains such incidents of ownership that the transferee has not acquired full and complete ownership of the partnership interest. Transactions between members of a family will be closely scrutinized, and the circumstances, not only at the time of the purported transfer but also during the periods preceding and following it, will be taken into consideration in determining the *bona fides* or lack of *bona fides* of the purported gift or sale. A partnership may be recognized for income tax purposes as to some partners but not as to others.

(iv) Capital as a material income-producing factor. For purposes of section 704(e)(1), the determination as to whether capital is a material income-producing factor must be made by reference to all the facts of each case. Capital is a material income-producing factor if a substantial portion of the gross income of the business is

attributable to the employment of capital in the business conducted by the partnership. In general, capital is not a material income-producing factor where the income of the business consists principally of fees, commissions, or other compensation for personal services performed by members or employees of the partnership. On the other hand, capital is ordinarily a material income-producing factor if the operation of the business requires substantial inventories or a substantial investment in plant, machinery, or other equipment.

(v) Capital interest in a partnership. For purposes of section 704(e), a capital interest in a partnership means an interest in the assets of the partnership, which is distributable to the owner of the capital interest upon his withdrawal from the partnership or upon liquidation of the partnership. The mere right to participate in the earnings and profits of a partnership is not a capital interest in the partnership.

(2) Basic tests as to ownership—(i) In general. Whether an alleged partner who is a donee of a capital interest in a partnership is the real owner of such capital interest, and whether the donee has dominion and control over such interest, must be ascertained from all the facts and circumstances of the particular case. Isolated facts are not determinative; the reality of the donee's ownership is to be determined in the light of the transaction as a whole. The execution of legally sufficient and irrevocable deeds or other instruments of gift under State law is a factor to be taken into account but is not determinative of ownership by the donee for the purposes of section 704(e). The reality of the transfer and of the donee's ownership of the property attributed to him are to be ascertained from the conduct of the parties with respect to the alleged gift and not by any mechanical or formal test. Some of the more important factors to be considered in determining whether the donee has acquired ownership of the capital interest in a partnership are indicated in subdivisions (ii) to (x), inclusive, of this subparagraph.

(ii) Retained controls. The donor may have retained such controls of the interest which he has purported to transfer to the donee that the donor should be treated as remaining the substantial owner of the interest. Controls of particular significance include, for example, the following:

(a) Retention of control of the distribution of amounts of income or restrictions on the distributions of amounts of income (other than amounts retained in the partnership annually with the consent of the partners, including the donee partner, for the reasonable needs of the business). If there is a partnership agreement providing for a managing partner or partners, then amounts of income may be retained in the partnership without the acquiescence of all the partners if such amounts are retained for the reasonable needs of the business.

(b) Limitation of the right of the donee to liquidate or sell his interest in the partnership at his discretion without financial detriment.

(c) Retention of control of assets essential to the business (for example, through retention of assets leased to the alleged partnership).

(d) Retention of management powers inconsistent with normal relationships among partners. Retention by the donor of control of business management or of voting control, such as is common in ordinary business relationships, is not by itself to be considered as inconsistent with normal relationships among partners, provided the donee is free to liquidate his interest at his discretion without financial detriment. The donee shall not be considered free to liquidate his interest unless, considering all the facts, it is evident that the donee is independent of the donor and has such maturity and understanding of his rights as to be capable of deciding to exercise, and capable of exercising, his right to withdraw his capital interest from the partnership.

The existence of some of the indicated controls, though amounting to less than substantial ownership retained by the donor, may be considered along with other facts and circumstances as tending to show the lack of reality of the partnership interest of the donee.

(iii) Indirect controls. Controls inconsistent with ownership by the donee may be exercised indirectly as well as directly, for example, through a separate business organization, estate, trust, individual, or other partnership. Where such indirect controls exist, the reality of the donee's interest will be determined as if such controls were exercisable directly.

(iv) Participation in management. Substantial participation by the donee in the control and management of the business (including participation in the major policy decisions affecting the business) is strong evidence of a donee partner's exercise of dominion and control over his interest. Such participation presupposes sufficient maturity and experience on the part of the donee to deal with the business problems of the partnership.

(v) Income distributions. The actual distribution to a donee partner of the entire amount or a major portion of his distributive share of the business income for the sole benefit and use of the donee is substantial evidence of the reality of the donee's interest, provided the donor has not retained controls inconsistent with real ownership by the donee. Amounts distributed are not considered to be used for the donee's sole benefit if, for example, they are deposited, loaned, or invested in such manner that the donor controls or can control the use or enjoyment of such funds.

(vi) Conduct of partnership business. In determining the reality of the donee's ownership of a capital interest in a partnership, consideration shall be given to whether the donee is actually treated as a partner in the operation of the business. Whether or not the donee has been held out publicly as a partner in the conduct of the business, in relations with customers, or with creditors or other sources of financing, is of primary significance. Other factors of significance in this connection include:

(a) Compliance with local partnership, fictitious names, and business registration statutes.

(b) Control of business bank accounts.

(c) Recognition of the donee's rights in distributions of partnership property and profits.

(d) Recognition of the donee's interest in insurance policies, leases, and other business contracts and in litigation affecting business.

(e) The existence of written agreements, records, or memoranda, contemporaneous with the taxable year or years concerned, establishing the nature of the partnership agreement and the rights and liabilities of the respective partners.

(f) Filing of partnership tax returns as required by law.

However, despite formal compliance with the above factors, other circumstances may indicate that the donor has retained substantial ownership of the interest purportedly transferred to the donee.

(vii) Trustees as partners. A trustee may be recognized as a partner for income tax purposes under the principles relating to family partnerships generally as applied to the particular facts of the trust-partnership arrangement. A trustee who is unrelated to and independent of the grantor, and who participates as a partner and receives distribution of the income distributable to the trust, will ordinarily be recognized as the legal owner of the partnership interest which he holds in trust unless the grantor has retained controls inconsistent with such ownership. However, if the grantor is the trustee, or if the trustee is amenable to the will of the grantor, the provisions of the trust instrument (particularly as to whether the trustee is subject to the responsibilities of a fiduciary), the provisions of the partnership agreement, and the conduct of the parties must all be taken into account in determining whether the trustee in a fiduciary capacity has become the real owner of the partnership interest. Where the grantor (or person amenable to his will) is the trustee, the trust may be recognized as a partner only if the grantor (or such other person) in his participation in the affairs of the partnership actively represents and protects the interests of the beneficiaries in accordance with the obligations of a fiduciary and does not subordinate such interests to the interests of the grantor. Furthermore, if the grantor (or person amenable to his will) is the trustee, the following factors will be given particular consideration:

(a) Whether the trust is recognized as a partner in business dealings with customers and creditors, and

(b) Whether, if any amount of the partnership income is not properly retained for the reasonable needs of the business, the trust's share of such amount is distributed to the trust annually and paid to the beneficiaries or reinvested with regard solely to the interests of the beneficiaries.

(viii) Interests (not held in trust) of minor children. Except where a minor child is shown to be competent to manage his own property and participate in the partnership activities in accordance with his interest in the property, a minor child generally will not be recognized as a member of a partnership unless control of the property is exercised by another person as fiduciary for the sole benefit of the child, and unless there is such judicial supervision of the conduct of the fiduciary as is required by law. The use of the child's property or income for support for which a parent is legally responsible will be considered a use for the parent's benefit. "Judicial supervision of the conduct of the fiduciary" includes filing of such accountings and reports as are required by law of the fiduciary who participates in the affairs of the partnership on behalf of the minor. A minor child will be considered as competent to manage his own property if he actually has sufficient maturity and experience to be treated by disinterested persons as competent to enter business dealings and otherwise to conduct his affairs on a basis of

equality with adult persons, notwithstanding legal disabilities of the minor under State law.

(ix) Donees as limited partners. The recognition of a donee's interest in a limited partnership will depend, as in the case of other donated interests, on whether the transfer of property is real and on whether the donee has acquired dominion and control over the interest purportedly transferred to him. To be recognized for Federal income tax purposes, a limited partnership must be organized and conducted in accordance with the requirements of the applicable State limited-partnership law. The absence of services and participation in management by a donee in a limited partnership is immaterial if the limited partnership meets all the other requirements prescribed in this paragraph. If the limited partner's right to transfer or liquidate his interest is subject to substantial restrictions (for example, where the interest of the limited partner is not assignable in a real sense or where such interest may be required to be left in the business for a long term of years), or if the general partner retains any other control which substantially limits any of the rights which would ordinarily be exercisable by unrelated limited partners in normal business relationships, such restrictions on the right to transfer or liquidate, or retention of other control, will be considered strong evidence as to the lack of reality of ownership by the donee.

(x) Motive. If the reality of the transfer of interest is satisfactorily established, the motives for the transaction are generally immaterial. However, the presence or absence of a tax-avoidance motive is one of many factors to be considered in determining the reality of the ownership of a capital interest acquired by gift.

(3) Allocation of family partnership income—(i) In general. (a) Where a capital interest in a partnership in which capital is a material income-producing factor is created by gift, the donee's distributive share shall be includible in his gross income, except to the extent that such share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the distributive share attributable to the donor's capital. For the purpose of section 704, a capital interest in a partnership purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital. The "family" of any individual, for the purpose of the preceding sentence, shall include only his spouse, ancestors, and lineal descendants, and any trust for the primary benefit of such persons.

(b) To the extent that the partnership agreement does not allocate the partnership income in accordance with (a) of this subdivision, the distributive shares of the partnership income of the donor and donee shall be reallocated by making a reasonable allowance for the services of the donor and by attributing the balance of such income (other than a reasonable allowance for the services, if any, rendered by the donee) to the partnership capital of the donor and donee. The portion of income, if any, thus attributable to partnership capital for the taxable year shall be allocated between the donor and donee in accordance with their respective interests in partnership capital.

(c) In determining a reasonable allowance for services rendered by the partners, consideration shall be given to all the facts and circumstances of the business, including the fact that some of the partners may have greater managerial responsibility than others. There shall also be considered the amount that would ordinarily be paid in order to obtain comparable services from a person not having an interest in the partnership.

(d) The distributive share of partnership income, as determined under (b) of this subdivision, of a partner who rendered services to the partnership before entering the Armed Forces of the United States shall not be diminished because of absence due to military service. Such distributive share shall be adjusted to reflect increases or decreases in the capital interest of the absent partner. However, the partners may by agreement allocate a smaller share to the absent partner due to his absence.

(ii) Special rules. (a) The provisions of subdivision (i) of this subparagraph, relating to allocation of family partnership income, are applicable where the interest in the partnership is created by gift, indirectly or directly. Where the partnership interest is created indirectly, the term "donor" may include persons other than the nominal transferor. This rule may be illustrated by the following examples:

Example (1). A father gives property to his son who shortly thereafter conveys the property to a partnership consisting of the father and the son. The partnership interest of the son may be considered created by gift and the father may be considered the donor of the son's partnership interest.

Example (2). A father, the owner of a business conducted as a sole proprietorship, transfers the business to a partnership consisting of his wife and himself. The wife subsequently

conveys her interest to their son. In such case, the father, as well as the mother, may be considered the donor of the son's partnership interest.

Example (3). A father makes a gift to his son of stock in the family corporation. The corporation is subsequently liquidated. The son later contributes the property received in the liquidation of the corporation to a partnership consisting of his father and himself. In such case, for purposes of section 704, the son's partnership interest may be considered created by gift and the father may be considered the donor of his son's partnership interest.

(b) The allocation rules set forth in section 704(e) and subdivision (i) of this subparagraph apply in any case in which the transfer or creation of the partnership interest has any of the substantial characteristics of a gift. Thus, allocation may be required where transfer of a partnership interest is made between members of a family (including collaterals) under a purported purchase agreement, if the characteristics of a gift are ascertained from the terms of the purchase agreement, the terms of any loan or credit arrangements made to finance the purchase, or from other relevant data.

(c) In the case of a limited partnership, for the purpose of the allocation provisions of subdivision (i) of this subparagraph, consideration shall be given to the fact that a general partner, unlike a limited partner, risks his credit in the partnership business.

(4) Purchased interest—(i) In general. If a purported purchase of a capital interest in a partnership does not meet the requirements of subdivision (ii) of this subparagraph, the ownership by the transferee of such capital interest will be recognized only if it qualifies under the requirements applicable to a transfer of a partnership interest by gifts. In a case not qualifying under subdivision (ii) of this subparagraph, if payment of any part of the purchase price is made out of partnership earnings, the transaction may be regarded in the same light as a purported gift subject to deferred enjoyment of income. Such a transaction may be lacking in reality either as a gift or as a *bona fide* purchase.

(ii) Tests as to reality of purchased interests. A purchase of a capital interest in a partnership, either directly or by means of a loan or credit extended by a member of the family, will be recognized as *bona fide* if:

(a) It can be shown that the purchase has the usual characteristics of an arm's-length transaction, considering all relevant factors, including the terms of the purchase agreement (as to price, due date of payment, rate of interest, and security, if any) and the terms of any loan or credit arrangement collateral to the purchase agreement; the credit standing of the purchaser (apart from relationship to the seller) and the capacity of the purchaser to incur a legally binding obligation; or

(b) It can be shown, in the absence of characteristics of an arm's-length transaction, that the purchase was genuinely intended to promote the success of the business by securing participation of the purchaser in the business or by adding his credit to that of the other participants.

However, if the alleged purchase price or loan has not been paid or the obligation otherwise discharged, the factors indicated in (a) and (b) of this subdivision shall be taken into account only as an aid in determining whether a *bona fide* purchase or loan obligation existed.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6771, 29 FR 15571, Nov. 20, 1964; T.D. 8365, 50 FR 53423, Dec. 31, 1985; T.D. 8065, 51 FR 10826, March 31, 1986; T.D. 8099, 51 FR 32062, 32068, Sept. 9, 1986; 52 FR 10223, March 31, 1987]

§ 1.705–1 Determination of basis of partner's interest.

(a) General rule. **(1)** Section 705 and this section provide rules for determining the adjusted basis of a partner's interest in a partnership. A partner is required to determine the adjusted basis of his interest in a partnership only when necessary for the determination of his tax liability or that of any other person. The determination of the adjusted basis of a partnership interest is ordinarily made as of the end of a partnership taxable year. Thus, for example, such year-end determination is necessary in ascertaining the extent to which a partner's distributive share of partnership losses may be allowed. See section 704(d). However, where there has been a sale or exchange of all or a part of a partnership interest or a liquidation of a partner's entire interest in a partnership, the adjusted basis of the partner's interest should be determined as of the date of sale or exchange or liquidation. The adjusted basis of a partner's interest in a partnership is determined without regard to any amount shown in the partnership books as the partner's "capital", "equity", or similar account. For example, A contributes property with an adjusted basis to him of $400 (and a value of $1,000) to a partnership. B contributes $1,000 cash. While under their agreement each may have a "capital account" in the partnership of $1,000, the adjusted basis of A's interest is only $400 and B's interest $1,000.

(2) The original basis of a partner's interest in a partnership shall be determined under section 722

(relating to contributions to a partnership) or section 742 (relating to transfers of partnership interests). Such basis shall be increased under section 722 by any further contributions to the partnership and by the sum of the partner's distributive share for the taxable year and prior taxable years of—

(i) Taxable income of the partnership as determined under section 703(a),

(ii) Tax-exempt receipts of the partnership, and

(iii) The excess of the deductions for depletion over the basis of the depletable property.

(3) The basis shall be decreased (but not below zero) by distributions from the partnership as provided in section 733 and by the sum of the partner's distributive share for the taxable year and prior taxable years of—

(i) Partnership losses (including capital losses), and

(ii) Partnership expenditures which are not deductible in computing partnership taxable income or loss and which are not capital expenditures.

(4) For the effect of liabilities in determining the amount of contributions made by a partner to a partnership or the amount of distributions made by a partnership to a partner, see section 752 and § 1.752–1, relating to the treatment of certain liabilities. In determining the basis of a partnership interest on the effective date of Subchapter K, Chapter 1 of the Code, or any of the sections thereof, the partner's share of partnership liabilities on that date shall be included.

(b) Alternative rule. In certain cases, the adjusted basis of a partner's interest in a partnership may be determined by reference to the partner's share of the adjusted basis of partnership property which would be distributable upon termination of the partnership. The alternative rule may be used to determine the adjusted basis of a partner's interest where circumstances are such that the partner cannot practicably apply the general rule set forth in section 705(a) and paragraph (a) of this section, or where, from a consideration of all the facts, it is, in the opinion of the Commissioner, reasonable to conclude that the result produced will not vary substantially from the result obtainable under the general rule. Where the alternative rule is used, adjustments may be necessary in determining the adjusted basis of a partner's interest in a partnership. Adjustments would be required, for example, in order to reflect in a partner's share of the adjusted basis of partnership property any significant discrepancies arising as a result of contributed property, transfers of partnership interests, or distributions of property to the partners. The operation of the alternative rules may be illustrated by the following examples:

Example (1). The ABC partnership, in which A, B, and C are equal partners, owns various properties with a total adjusted basis of $1,500 and has earned and retained an additional $1,500. The total adjusted basis of partnership property is thus $3,000. Each partner's share in the adjusted basis of partnership property is one-third of this amount, or $1,000. Under the alternative rule, this amount represents each partner's adjusted basis for his partnership interest.

Example (2). Assume that partner A in example (1) of this paragraph sells his partnership interest to D for $1,250 at a time when the partnership property with an adjusted basis of $1,500 had appreciated in value to $3,000, and when the partnership also had $750 in cash. The total adjusted basis of all partnership property is $2,250 and the value of such property is $3,750. D's basis for his partnership interest is his cost, $1,250. However, his one-third share of the adjusted basis of partnership property is only $750. Therefore, for the purposes of the alternative rule, D has an adjustment of $500 in determining the basis of his interest. This amount represents the difference between the cost of his partnership interest and his share of partnership basis at the time of his purchase. If the partnership subsequently earns and retains an additional $1,500, its property will have an adjusted basis of $3,750. D's adjusted basis for his interest under the alternative rule is $1,750, determined by adding $500, his basis adjustment to $1,250 (his one-third share of the $3,750 adjusted basis of partnership property). If the partnership distributes $250 to each partner in a current distribution, D's adjusted basis for his interest will be $1,500 ($1,000, his one-third share of the remaining basis of partnership property, $3,000, plus his basis adjustment of $500).

Example (3). Assume that BCD partnership in example (2) of this paragraph continues to operate. In 1960, D proposes to sell his partnership interest and wishes to evaluate the tax consequences of such sale. It is necessary, therefore, to determine the adjusted basis of his interest in the partnership. Assume further that D cannot determine the adjusted basis of his interest under the general rule. The balance sheet of the BCD partnership is as follows:

Assets	Adjusted basis per books	Market value
Cash	$3,000	$3,000
Receivables	4,000	4,000
Depreciable property	5,000	5,000
Land held for investment	18,000	30,000
Total	30,000	42,000

Liabilities and capital	Per books
Liabilities	$6,000
Capital accounts:	
B	4,500
C	4,500
D	15,000
Total	30,000

The $15,000 representing the amount of D's capital account does not reflect the $500 basis adjustment arising from D's purchase of his interest. See example (2) of this paragraph. The adjusted basis of D's partnership interest determined under the alternative rule is as follows:

D's share of the adjusted basis of partnership property (reduced by the amount of liabilities) at time of proposed sale	$15,000
D's share of partnership liabilities (under the partnership agreement liabilities are shared equally)	2,000
D's basis adjustment from example (2)	500
Adjusted basis of D's interest at the time of proposed sale, as determined under alternative rule	17,500

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.706–1 Taxable years of partner and partnership.

(a) Year in which partnership income is includible. **(1)** In computing his taxable income for a taxable year, a partner is required to include his distributive share of partnership items set forth in section 702 for any partnership year ending within or with his taxable year. A partner shall also include in his taxable income for a taxable year "guaranteed payments" under section 707(c) which are made to him in a partnership taxable year ending within or with his taxable year. The provisions of this subparagraph may be illustrated by the following example:

Example. Partner A reports his income for a calendar year, while the partnership of which he is a member reports its income for a fiscal year ending May 31. During the partnership taxable year ending May 31, 1956, A received guaranteed payments of $1,200 for services and for the use of capital. Of this amount, $700 was received by A between June 1 and December 31, 1955, and the remaining $500 was received by him between January 1 and May 31, 1956. This entire $1,200 received by A is includible in his taxable income for the calendar year 1956 (together with his distributive share of partnership items set forth in section 702 for the partnership taxable year ending May 31, 1956).

(2) If a partner receives distributions under section 731 or sells or exchanges all or part of his partnership interest, any gain or loss arising therefrom does not constitute partnership income and is includible in the partner's gross income for his taxable year in which the payment is made. See sections 451 and 461.

(b) Adoption or change in taxable year—(1) Partnership taxable year. **(i)** The taxable year of a partnership shall be determined as though the partnership were a taxpayer.

(ii) A newly formed partnership may adopt a taxable year which is the same as the taxable year of all its principal partners (or the same as the taxable year to which all of its principal partners are concurrently changing) without securing prior approval from the Commissioner, or it may adopt a calendar year without securing prior approval from the Commissioner if all its principal partners are not on the same taxable year. In any other case, a newly formed partnership must secure prior approval from the Commissioner for the adoption of a taxable year.

(iii) An existing partnership may not change its taxable year without securing prior approval from the Commissioner, unless all its principal partners have the same taxable year to which the partnership changes, or unless all its principal partners concurrently change to such taxable year.

(2) Partner's taxable year. A partner may not change his taxable year without securing prior approval from the Commissioner. See section 442 and the regulations thereunder.

(3) Principal partner. For the purpose of this paragraph, a principal partner is a partner having an interest of 5 percent or more in partnership profits or capital.

(4) Application for approval—(i) Change. Application for a change in a taxable year shall be filed on Form 1128 with the Commissioner of Internal Revenue, Washington, D.C. 20224. If the short period involved in the change ends after December 31, 1973, such form shall be filed on or before the 15th day of the second calendar month following the close of such short period; if such short period ends before January 1, 1974, such form shall be filed on or before the last day of the first calendar month following the close of such short period.

(ii) Adoption. Where a newly formed partnership is required to secure prior approval from the Commissioner for the adoption of a taxable year, the partnership shall file an application on Form 1128 with the Commissioner on or before the last day of the month following the close of the taxable year to be adopted. The partnership shall modify Form 1128 to the extent necessary to indicate that it is an application for adoption of a taxable year.

(iii) Business purpose. Where prior approval is required under this paragraph, the applicant must establish a business purpose to the satisfaction of the Commissioner. For example, partnership AB, which is on a calendar year, is engaged in a business which has a natural business year (the annual accounting period encompassing all related income and expenses) ending on September 30th. The intention of the partnership to make its tax year coincide with such natural business year constitutes a sufficient business purpose.

(5) Returns—(i) Partner. A partner who changes his taxable year shall make his return for a short period in accordance with section 443, and

shall attach to the return a copy of the letter from the Commissioner granting approval for the change of taxable year.

(ii) Partnership. (a) A partnership which changes its taxable year shall make its return for a short period in accordance with section 443, but shall not annualize the partnership taxable income. The partnership shall attach to the return either a copy of the letter from the Commissioner granting approval of the change of taxable year, or a statement indicating that the partnership is changing its taxable year to the same taxable year as that of all its principal partners or to the same taxable year as that to which all its principal partners are concurrently changing.

(b) Any newly formed partnership shall file with its first return either:

(1) A copy of the letter from the Commissioner approving the adoption of a partnership taxable year which is not the same as the taxable year of all its principal partners; or

(2) A statement indicating that the taxable year it has adopted is the same as the taxable year of all its principal partners, or that all its principal partners are concurrently changing to the taxable year it has adopted; or

(3) A statement that all its principal partners are not on the same taxable year and that it is adopting a calendar year without prior approval.

(6) Effective date. Section 706(b) applies to any partnership which adopts or changes to a taxable year beginning on or after April 2, 1954, and to any partner who changes to a taxable year beginning on or after that date. For the purpose of applying this provision, section 708 (relating to the continuation of a partnership) applies to any such taxable year. See section 771(b)(1) and paragraph (b)(1) of § 1.771–1. If a partnership has changed to or adopted, or if a partner has changed to, a taxable year beginning on or after April 2, 1954, without obtaining prior approval of the Commissioner, and if, under the provisions of this paragraph, prior approval is required for the change or adoption, such annual accounting period will not be accepted as a taxable year until approval thereof is secured. Under these circumstances, an application to change to or adopt the desired taxable year will be considered timely if filed before August 23, 1956.

(7) Cross-reference to § 1.442-2T and § 1.442-3T. For special rules applicable to certain changes in annual accounting period where the short period involved in the change ends in 1986 or 1987, see § 1.442-2T. For special rules applicable to certain adoptions and retentions of a taxable year ending in 1986 or 1987, see § 1.442-3T.

(c) Closing of partnership year—(1) General rule. Section 706(c) and this paragraph provide rules governing the closing of partnership years. The closing of a partnership taxable year or a termination of a partnership for Federal income tax purposes is not necessarily governed by the "dissolution", "liquidation", etc., of a partnership under State or local law. The taxable year of a partnership shall not close as the result of the death of a partner, the entry of a new partner, the liquidation of a partner's entire interest in the partnership (as defined in section 761(d)), or the sale or exchange of a partner's interest in the partnership, except in the case of a termination of a partnership and except as provided in subparagraph (2) of this paragraph. In the case of termination, the partnership taxable year closes for all partners as of the date of termination. See section 708(b) and paragraph (b) of § 1.708–1.

(2) Partner who retires or sells interest in partnership—(i) Disposition of entire interest. A partnership taxable year shall close with respect to a partner who sells or exchanges his entire interest in a partnership, and with respect to a partner whose entire interest is liquidated. However, a partnership taxable year with respect to a partner who dies shall not close prior to the end of such partnership taxable year, or the time when such partner's interest (held by his estate or other successor) is liquidated or sold or exchanged, whichever is earlier. See subparagraph (3) of this paragraph.

(ii) Inclusions in taxable income. In the case of a sale, exchange, or liquidation of a partner's entire interest in a partnership, the partner shall include in his taxable income for his taxable year within or with which his membership in the partnership ends, his distributive share of items described in section 702(a), and any guaranteed payments under section 707(c), for his partnership taxable year ending with the date of such sale, exchange, or liquidation. In order to avoid an interim closing of the partnership books, such partner's distributive share of items described in section 702(a) may, by agreement among the partners, be estimated by taking his *pro rata* part of the amount of such items he would have included in his taxable income had he remained a partner until the end of the partnership taxable year. The proration may be based on the portion of the

taxable year that has elapsed prior to the sale, exchange, or liquidation, or may be determined under any other method that is reasonable. Any partner who is the transferee of such partner's interest shall include in his taxable income, as his distributive share of items described in section 702(a) with respect to the acquired interest, the *pro rata* part (determined by the method used by the transferor partner) of the amount of such items he would have included had he been a partner from the beginning of the taxable year of the partnership. The application of this subdivision may be illustrated by the following example:

Example. Assume that a partner selling his partnership interest on June 30, 1955, has an adjusted basis for his interest of $5,000 on that date; that his *pro rata* share of partnership income up to June 30 is $15,000; and that he sells his interest for $20,000. Under the provisions of section 706(c)(2), the partnership year with respect to him closes at the time of the sale. The $15,000 is includible in his income as his distributive share and, under section 705, it increases the basis of his partnership interest to $20,000, which is also the selling price of his interest. Therefore, no gain is realized on the sale of his partnership interest. The purchaser of this partnership interest shall include in his income as his distributive share his *pro rata* part of partnership income for the remainder of the partnership taxable year.

(3) **Partner who dies.** (i) When a partner dies, the partnership taxable year shall not close with respect to such partner prior to the end of the partnership taxable year. The partnership taxable year shall continue both for the remaining partners and the decedent partner. Where the death of a partner results in the termination of the partnership, the partnership taxable year shall close for all partners on the date of such termination under section 708(b)(1)(A). See also paragraph (b)(1)(i)(b) of § 1.708–1 for the continuation of a 2-member partnership under certain circumstances after the death of a partner. However, if the decedent partner's estate or other successor sells or exchanges its entire interest in the partnership, or if its entire interest is liquidated, the partnership taxable year with respect to the estate or other successor in interest shall close on the date of such sale or exchange, or the date of completion of the liquidation.

(ii) The last return of a decedent partner shall include only his share of partnership taxable income for any partnership taxable year or years ending within or with the last taxable year for such decedent partner (*i.e.*, the year ending with the date of his death). The distributive share of partnership taxable income for a partnership taxable year ending after the decedent's last taxable year is includible in the return of his estate or other successor in interest. If the estate or other successor in interest of a partner continues to share in the profits or losses of the partnership business, the distributive share thereof is includible in the taxable year of the estate or other successor in interest within or with which the taxable year of the partnership ends. See also paragraph (a)(1)(ii) of § 1.736–1. Where the estate or other successor in interest receives distributions, any gain or loss on such distributions is includible in its gross income for its taxable year in which the distribution is made.

(iii) If a partner (or a retiring partner), in accordance with the terms of the partnership agreement, designates a person to succeed to his interest in the partnership after his death, such designated person shall be regarded as a successor in interest of the deceased for purposes of this chapter. Thus, where a partner designates his widow as the successor in interest, her distributive share of income for the taxable year of the partnership ending within or with her taxable year may be included in a joint return in accordance with the provisions of sections 2 and 6013(a)(2) and (3).

(iv) If, under the terms of an agreement existing at the date of death of a partner, a sale or exchange of the decedent partner's interest in the partnership occurs upon that date, then the taxable year of the partnership with respect to such decedent partner shall close upon the date of death. See section 706(c)(2)(A)(i). The sale or exchange of a partnership interest does not, for the purpose of this rule, include any transfer of a partnership interest which occurs at death as a result of inheritance or any testamentary disposition.

(v) To the extent that any part of a distributive share of partnership income of the estate or other successor in interest of a deceased partner is attributable to the decedent for the period ending with the date of his death, such part of the distributive share is income in respect of the decedent under section 691. See section 691 and the regulations thereunder.

(vi) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). B has a taxable year ending December 31 and is a member of partnership ABC, the taxable year of which ends on June 30. B dies on October 31, 1955. His estate (which as a new taxpayer may, under section 441 and the regulations thereunder, adopt any taxable year) adopts a taxable year ending October 31. The return of the decedent for the period January 1 to October 31, 1955, will include only his distributive share of taxable income of the partnership for its taxable year ending June 30, 1955. The distributive share of taxable income of the partnership for its taxable year ending June 30, 1956, arising from the interest of the decedent, will be includible in the return of the estate for its taxable year ending

October 31, 1956. That part of the distributive share attributable to the decedent for the period ending with the date of his death (July 1 through October 31, 1955) is income in respect of a decedent under section 691.

Example (2). Assume the same facts as in example (1) of this subdivision, except that, prior to B's death, B and D had agreed that, upon B's death, D would purchase B's interest for $10,000. When B dies on October 31, 1955, the partnership taxable year beginning July 1, 1955, closes with respect to him. Therefore, the return for B's last taxable year (January 1 to October 31, 1955) will include his distributive share of taxable income of the partnership for its taxable year ending June 30, 1955, plus his distributive share of partnership taxable income for the period July 1 to October 31, 1955. See subdivision (iv) of this subparagraph.

Example (3). H is a member of a partnership having a taxable year ending December 31. Both H and his wife W are on a calendar year and file joint returns. H dies on March 31, 1955. Administration of the estate is completed and the estate, including the partnership interest, is distributed to W as legatee on November 30, 1955. Such distribution by the estate is not a sale or exchange of H's partnership interest. No part of the taxable income of the partnership for the taxable year ending December 31, 1955, which is allocable to H, will be included in H's taxable income for his last taxable year (January 1 through March 31, 1955) or in the taxable income of H's estate for the taxable year April 1 through November 30, 1955. The distributive share of partnership taxable income for the full calendar year that is allocable to H will be includible in the taxable income of W for her taxable year ending December 31, 1955, and she may file a joint return under sections 2 and 6013(a)(3). That part of the distributive share attributable to the decedent for the period ending with the date of his death (January 1 through March 31, 1955) is income in respect of a decedent under section 691.

Example (4). M is a member of partnership JKM which operates on a calendar year. M and his wife S file joint returns for calendar years. In accordance with the partnership agreement, M designated S to succeed to his interest in the partnership upon his death. M, who had withdrawn $10,000 from the partnership before his death, dies on October 20, 1955. S's distributive share of income for the taxable year 1955 is $15,000 ($10,000 of which represents the amount withdrawn by M). S shall include $15,000 in her income, even though M received $10,000 of this amount before his death. S may file a joint return with M for the year 1955 under sections 2 and 6013(a). That part of the $15,000 distributive share attributable to the decedent for the period ending with the date of his death (January 1 through October 20, 1955) is income in respect of a decedent under section 691.

(4) Disposition of less than entire interest. If a partner sells or exchanges a part of his interest in a partnership, or if the interest of a partner is reduced, the partnership taxable year shall continue to its normal end. In such case, the partner's distributive share of items which he is required to include in his taxable income under the provisions of section 702(a) shall be determined by taking into account his varying interests in the partnership during the partnership taxable year in which such sale, exchange, or reduction of interest occurred.

(5) Transfer of interest by gift. The transfer of a partnership interest by gift does not close the partnership taxable year with respect to the donor. However, the income up to the date of gift attributable to the donor's interest shall be allocated to him under section 704(e)(2).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7286, 38 FR 26912, Sept. 27, 1973; T.D. 8123, 52 FR 3623, Feb. 5, 1987]

§ 1.706–1T Taxable years of certain partnerships (temporary).

(a) Taxable year determined by reference to the partners—(1) In general. If for any taxable year a partnership's taxable year cannot be determined by reference to the taxable year of its partners owning a majority interest in partnership profits and capital (as described in section 706(b)(1)(B)(i)) or by reference to the taxable year of all its principal partners (as described in section 706(b)(1)(B)(ii)), then the partnership must determine its taxable year under section 706(b)(1)(B)(iii). Under section 706(b)(1)(B)(iii), the taxable year of the partnership, except as provided in paragraph (b) of this section, shall be the taxable year that results in the least aggregate deferral of income to the partners (as determined under paragraph (a)(2) of this section). See § 1.706–3T(a) for special rules which provide that certain tax-exempt partners are disregarded.

(2) Taxable year that results in the least aggregate deferral of income. The taxable year that results in the least aggregate deferral of income will be the taxable year of one or more of the partners in the partnership which will result in the least aggregate deferral of income to the partners. The aggregate deferral for a particular year is equal to the sum of the products determined by multiplying the month(s) of deferral for each partner that would be generated by that year and each partner's interest in partnership profits for that year. The partner's taxable year that produces the lowest sum when compared to the other partner's taxable years is the taxable year that results in the least aggregate deferral of income to the partners. If the calculation results in more than one taxable year qualifying as the taxable year with the least aggregate deferral, the partnership may select any one of those taxable years as its taxable year. However, if one of the qualifying taxable years is also the partnership's existing taxable year, the partnership must maintain its existing taxable year. The determination of the taxable year that results in the least aggregate deferral of income shall generally be made as of the beginning of the partnership's current taxable year. The district director, however, may determine that the first day

of the current taxable year is not the appropriate testing day and require the use of some other day or period that will more accurately reflect the ownership of the partnership and thereby the actual aggregate deferral to the partners where the partners engage in a transaction that has as its principal purpose the avoidance of the principles of this section. Thus, for example, the preceding sentence would apply where there is a transfer of an interest in the partnership that results in a temporary transfer of that interest principally for purposes of qualifying for a specific taxable year under the principles of this section. For purposes of this section, deferral to each partner is measured in terms of months from the end of the partnership's taxable year forward to the end of the partner's taxable year.

(3) Determination of the taxable year of a partner or partnership that uses a 52–53 week taxable year. For purposes of the calculation described in paragraph (a)(2) of this section, the taxable year of a partner or partnership that uses a 52–53 week taxable year shall be the same year determined under the rules of section 441(f) and the regulations thereunder with respect to the inclusion of income by the partner or partnership.

(4) Special de minimis rule. If the taxable year that results in the least aggregate deferral produces an aggregate deferral that is less than .5 when compared to the aggregate deferral of the current taxable year, the partnership's current taxable year shall be treated as the taxable year with the least aggregate deferral. Thus, the partnership will not be permitted to change its taxable year. However, this de minimis rule will not apply to the first taxable period beginning after December 31, 1986.

(b) Business purpose. A partnership may have a taxable year other than the year described in paragraph (a) of this section if it establishes, to the satisfaction of the Commissioner of Internal Revenue, a business purpose for such taxable year in accordance with and under the procedures established in § 1.442–1(b)(1). For purposes of this paragraph (b), any deferral of income to partners shall not be treated as a business purpose.

(c) Procedural requirements and effective date—(1) In general. The change in accounting period required by paragraph (a) of this section shall be treated as initiated by the partnership and made with the consent of the Commissioner. To effect the change, a partnership must show that the requirements of this section are satisfied in a statement setting forth the computations required to establish the taxable year that results in the least aggregate deferral of income to the partners under paragraph (a) of this section. The partnership must attach the statement to the income tax return for the short period involved in the changes and must indicate the following at the top of page 1 of the return: "FILED UNDER § 1.706–1T."

(2) Effective date—(i) In general. Except as provided in paragraph (c)(2)(ii) of this section, the rules of this section are effective for partnership taxable years beginning after December 31, 1986.

(ii) Special rule for first taxable year beginning after December 31, 1986. A partnership otherwise required to change its accounting period for its first taxable year beginning after December 31, 1986 to a year resulting in the least aggregate deferral of income to its partners under paragraph (a) of this section, may, at its option, delay the application of the rules of that paragraph until its first taxable year beginning after December 31, 1987. In such a case, the partnership must conform its first taxable year beginning after December 31, 1986 to the calendar year and must apply the rules of paragraph (a) of this section to its first taxable year beginning after December 31, 1987. See § 1.702–3T(a)(1) regarding the availability of a 4–year spread provision with respect to a partnership required to change its taxable year for its first taxable year beginning after December 31, 1986.

(iii) Special eligibility for 4–year spread; years beginning after December 31, 1987. Notwithstanding the provisions of § 1.702–3T(a)(1) limiting the availability of the 4–year spread provisions to a partnership's first taxable year beginning after December 31, 1986, if—

(A) A partnership is required under section 706(b)(1)(B)(iii) and paragraph (a) of this section to change to a taxable year that results in the least aggregate deferral of income to the partners for a partnership's first taxable year beginning after December 31, 1987,

(B) The partnership did exercise its option, as provided in paragraph (c)(2)(ii) of this section, to delay the application of the rules of paragraph (a) of this section until the partnership's first taxable year beginning after December 31, 1987, and

(C) The partnership would have been required to change its accounting period under section 706(b)(1)(B)(iii) and paragraph (a) of this section for its first taxable year beginning after December 31, 1986, if paragraph (a) of this section had been applicable to such taxable year, the partners in the partnership will be eligible to utilize the 4–year

spread provision provided in § 1.702–3T (subject to the other requirements of that section) with respect to the partnership's change in accounting period required under section 706(b)(1)(B)(iii) and paragraph (a) of this section for the partnership's first taxable year beginning after December 31, 1987.

(d) Examples. The principles of this section may be illustrated by the following examples:

Example (1). Partnership P is on a fiscal year ending June 30. Partner A reports income on the fiscal year ending June 30 and Partner B reports income on the fiscal year ending July 31. A and B each have a 50 percent interest in partnership profits. For its taxable year beginning July 1, 1987, the partnership will be required to retain its taxable year since the fiscal year ending June 30 results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	6/30	.5	0	0
Partner B	7/31	.5	1	.5
Aggregate deferral				.5

Test 7/31	Year End	Interest in Partnership Profits	Months of Deferral for 7/31 Year End	Interest x Deferral
Partner A	6/30	.5	11	5.5
Partner B	7/31	.5	0	0
Aggregate deferral				5.5

Example (2). The facts are the same as in *Example (1)* except that A reports income on the calendar year and B reports on the fiscal year ending November 30. For the partnership's taxable year beginning July 1, 1987, the partnership is required to change its taxable year to a fiscal year ending November 30 because such year results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 12/31	Year End	Interest in Partnership Profits	Months of Deferral for 12/31 Year End	Interest x Deferral
Partner A	12/31	.5	0	0
Partner B	11/30	.5	11	5.5
Aggregate deferral				5.5

Test 11/30	Year End	Interest in Partnership Profits	Months of Deferral for 11/30 Year End	Interest x Deferral
Partner A	12/31	.5	1	.5
Partner B	11/30	.5	0	0
Aggregate deferral				.5

Example (3). The facts are the same as in *Example (2)* except that B reports income on the fiscal year ending June 30. For the partnership's taxable year beginning July 1, 1987, each partner's taxable year will result in identical aggregate deferral of income. If the partnership's current taxable year was neither a fiscal year ending June 30 nor the calendar year, the partnership would select either the fiscal year ending June 30 or the calendar year as its taxable year. However, since the partnership's current taxable year ends June 30, it must retain its current taxable year.

Test 12/31	Year End	Interest in Partnership Profits	Months of Deferral for 12/31 Year End	Interest x Deferral
Partner A	12/31	.5	0	0
Partner B	6/30	.5	6	3.0
Aggregate deferral				3.0

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	12/31	.5	6	3.0
Partner B	6/30	.5	0	0
Aggregate deferral				3.0

Example (4). The facts are the same as in *Example (1)* except that on December 31, 1987, partner A sells a 4 percent interest in the partnership to Partner C, who reports income on the fiscal year ending June 30, and a 40 percent interest in the partnership to Partner D, who also reports income on the fiscal year ending June 30. The taxable year beginning July 1, 1987, is unaffected by the sale. However, for the taxable year beginning July 31, 1988, the partnership must determine the taxable year resulting in the least aggregate deferral as of July 1, 1988. In this case, the partnership will be required to retain its taxable year since the fiscal year ending June 30 continues to be the taxable year that results in the least aggregate deferral of income to the partners.

Example (5). The facts are the same as in *Example (4)* except that Partner D reports income on the fiscal year ending April 30. As in Example (4), the taxable year during which the sale took place is unaffected by the shifts in interests. However, for its taxable year beginning July 1, 1988, the partnership will be required to change its taxable year to the

fiscal year ending April 30. This determination is made as follows:

Test 7/31	Year End	Interest in Partnership Profits	Months of Deferral for 7/31 Year End	Interest x Deferral.
Partner A.........	6/30	.06	11	.66
Partner B.........	7/31	.5	0	0
Partner C.........	6/30	.04	11	.44
Partner D.........	4/30	.4	9	3.60
Aggregate deferral..........................				4.70

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A.........	6/30	.06	0	0
Partner B.........	7/31	.5	1	.5
Partner C.........	6/30	.04	0	0
Partner D.........	4/30	.4	10	4.0
Aggregate deferral..........................				4.5

Test 4/30	Year End	Interest in Partnership Profits	Months of Deferral for 4/30 Year End	Interest x Deferral
Partner A.........	6/30	.06	2	.12
Partner B.........	7/31	.5	3	1.50

Test 4/30	Year End	Interest in Partnership Profits	Months of Deferral for 4/30 Year End	Interest x Deferral.
Partner C.........	6/30	.04	2	.08
Partner D.........	4/30	.4	0	0
Aggregate deferral..........................				1.70

§ 1.706–1T(a)(4) Test:	
Current taxable year (June 30)	4.5
Less: Taxable year producing the least aggregate deferral (April 30)	1.7
Additional aggregate deferral (greater than .5)	2.8

Example (6). Partnership P has two partners, A who reports income on the fiscal year ending March 31, and B who reports income on the fiscal year ending July 31. A and B share profits equally. P has determined its taxable year under § 1.706–1T(a)(2) to be the fiscal year ending March 31 as follows:

Test 3/31	Year End	Interest in Partnership Profits	Deferral for 3/31 Year End	Interest x Deferral
Partner A.........	3/31	.5	0	0
Partner B.........	7/31	.5	4	2
Aggregate deferral..........................				2

Test 7/31	Year End	Interest in Partnership Profits	Deferral for 7/31 Year End	Interest x Deferral
Partner A.........	3/31	.5	8	4
Partner B.........	7/31	.5	0	0
Aggregate deferral..........................				4

In May 1988, Partner A sells a 45 percent interest in the partnership to C, who reports income on the fiscal year ending April 30. For the taxable period beginning April 1, 1989, the fiscal year ending April 30 is the taxable year that produces the least aggregate deferral of income to the partners. However, under paragraph (a)(4) of this section the partnership is required to retain its fiscal year ending March 31. This determination is made as follows:

Test 3/31	Year End	Interest in Partnership Profits	Deferral for 3/31 Year End	Interest x Deferral
Partner A.........	3/31	.05	0	0
Partner B.........	7/31	.5	4	2.0
Partner C.........	4/30	.45	1	.45
Aggregate deferral..........................				2.45

Test 7/31	Year End	Interest in Partnership Profits	Deferral for 7/31 Year End	Interest x Deferral
Partner A.........	3/31	.05	8	.40
Partner B.........	7/31	.5	0	0
Partner C.........	4/30	.45	9	4.05
Aggregate deferral				4.45

Test 4/30	Year End	Interest in Partnership Profits	Deferral for 4/30 Year End	Interest x Deferral
Partner A.........	3/31	.05	11	.55
Partner B.........	7/31	.5	3	1.50
Partner C.........	4/30	.45	0	0
Aggregate deferral				2.05
§ 1.706–1T(a)(4) Test:				
Current taxable year (3/31)				2.45
Less: Taxable year producing the least aggregate deferral (4/30)				2.05

Test 4/30	Year End	Interest in Partnership Profits	Deferral for 4/30 Year End	Interest x Deferral
Additional aggregate deferral (less tban .5)				.40

[T.D. 8169, 52 FR 48995, Dec. 29, 1987; T.D. 8169, 53 FR 1441, Jan. 19, 1988; T.D. 8205, 53 FR 19711, May 27, 1988]

§ 1.706–2T Temporary regulations; question and answer under the Tax Reform Act of 1984.

Question 1: For purposes of section 706(d), how is an otherwise deductible amount that is deferred under section 267(a)(2) treated?

Answer 1: In the year the deduction is allowed, the deduction will constitute an allocable cash basis item under section 706(d)(2)(B)(iv).

[T.D. 7991, 49 FR 47001, Nov. 30, 1984]

§ 1.706–3T Temporary regulations under the Tax Reform Act of 1986 and the Revenue Act of 1987 (temporary).

(a) Certain tax-exempt partners disregarded—(1) General rule. In determining the taxable year (the "current year") of a partnership under section 706(b) and the regulations thereunder, a partner that is tax-exempt under section 501(a) shall be disregarded if such partner was not subject to tax, under chapter 1 of the Code, on any income attributable to its investment in the partnership during the partnership's taxable year immediately preceding the current year. However, if a partner that is tax-exempt under section 501(a) was not a partner during the partnership's immediately preceding taxable year, such partner will be disregarded for the current year if the partnership reasonably believes that the partner will not be subject to tax, under chapter 1 of the Code, on any income attributable to such partner's investment in the partnership during the current year.

(2) Example. The provisions of paragraph (a)(1) of this section may be illustrated by the following example.

Example. Assume that partnership A has historically used the calendar year as its taxable year. In addition, assume that A is owned by 5 partners, 4 calendar year individuals (each owning 10 percent of A's profits and capital) and a tax-exempt organization (owning 60 percent of A's profits and capital). The tax-exempt organization has never had unrelated business taxable income with respect to A and has historically used a June 30 fiscal year. Finally, assume that A desires to retain the calendar year for its taxable year beginning January 1, 1987. Under tbese facts and but for the special rule in paragraph (a)(1) of this section, A would be required under section 706(b)(1)(B)(i) to change to a year ending June 30, for its taxable year beginning January 1, 1987. However, under the special rule provided in paragraph (a)(1) of this section, and assuming the optional effective date provided in paragraph (c) of this section is chosen, the partner that is tax-exempt is disregarded, and A must retain the calendar year, under section 706(b)(1)(B)(i), for its taxable year beginning January 1, 1987.

(b) Effect of partner elections under section 444. For purposes of section 706(b)(1)(B), any section 444 election by a partner in a partnership shall be taken into account in determining the taxable year of the partnership. See example (4) of § 1.7519-1T(d).

(c) Effective date. The provisions of this section are generally effective for taxable years beginning after December 31, 1987. However, a partnership may, at its option, apply the provisions of this section for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19710, May 27, 1988]

§ 1.707–1 Transactions between partner and partnership.

(a) Partner not acting in capacity as partner. A partner who engages in a transaction with a partnership other than in his capacity as a partner shall be treated as if he were not a member of the partnership with respect to such transaction. Such transactions include, for example, loans of money or property by the partnership to the partner or by the partner to the partnership, the sale of property by the partner to the partnership, the purchase of property by the partner from the partnership, and the rendering of services by the partnership to the partner or by the partner to the partnership. Where a partner retains the ownership of property but allows the partnership to use such separately owned property for partnership purposes (for example, to obtain credit or to secure firm creditors by guaranty, pledge, or other agreement) the transaction is treated as one between a partnership and a partner not acting in his capacity as a partner. However, transfers of money or property by a partner to a partnership as contributions, or transfers of money or property by a partnership to a partner as distributions, are not transactions included within the provisions of this section. In all cases, the substance of the transaction will govern rather than its form. See paragraph (c)(3) of § 1.731–1.

(b) Certain sales or exchanges of property with respect to controlled partnerships—(1) Losses disallowed. (i) No deduction shall be allowed for a loss on a sale or exchange of property (other than an interest in the partnership, directly or indirect-

ly, between a partnership and a partner who owns, directly or indirectly, more than 50 percent of the capital interest or profits interest in such partnership. A loss on a sale or exchange of property, directly or indirectly, between two partnerships in which the same persons own, directly or indirectly, more than 50 percent of the capital interest or profits interest in each partnership shall not be allowed.

(ii) If a gain is realized upon the subsequent sale or exchange by a transferee of property with respect to which a loss was disallowed under the provisions of subdivision (i) of this subparagraph, section 267(d) (relating to amount of gain where loss previously disallowed) shall apply as though the loss were disallowed under section 267(a)(1).

(2) Gains treated as ordinary income. Any gain recognized upon the sale or exchange, directly or indirectly, of property which, in the hands of the transferee immediately after the transfer, is property other than a capital asset, as defined in section 1221, shall be ordinary income if the transaction is between a partnership and a partner who owns, directly or indirectly, more than 80 percent of the capital interest or profits interest in the partnership. This rule also applies where such a transaction is between partnerships in which the same persons own, directly or indirectly, more than 80 percent of the capital interest or profits interest in each partnership. The term "property other than a capital asset" includes (but is not limited to) trade accounts receivable, inventory, stock in trade, and depreciable or real property used in the trade or business.

(3) Ownership of a capital or profits interest. In determining the extent of the ownership by a partner, as defined in section 761(b), of his capital interest or profits interest in a partnership, the rules for constructive ownership of stock provided in section 267(c)(1), (2), (4), and (5) shall be applied for the purpose of section 707(b) and this paragraph. Under these rules, ownership of a capital or profits interest in a partnership may be attributed to a person who is not a partner as defined in section 761(b) in order that another partner may be considered the constructive owner of such interest under section 267(c). However, section 707(b)(1)(A) does not apply to a constructive owner of a partnership interest since he is not a partner as defined in section 761(b). For example, where trust T is a partner in the partnership ABT, and AW, A's wife, is the sole beneficiary of the trust, the ownership of a capital and profits interest in the partnership by T will be attributed to AW only for the purpose of further attributing the ownership of such interest to A. See section 267(c)(1) and (5). If A, B, and T are equal partners, then A will be considered as owning more than 50 percent of the capital and profits interest in the partnership, and losses on transactions between him and the partnership will be disallowed by section 707(b)(1)(A). However, a loss sustained by AW on a sale or exchange of property with the partnership would not be disallowed by section 707, but will be disallowed to the extent provided in paragraph (b) of § 1.267(b)–1. See section 267(a) and (b), and the regulations thereunder.

(c) Guaranteed payments. Payments made by a partnership to a partner for services or for the use of capital are considered as made to a person who is not a partner, to the extent such payments are determined without regard to the income of the partnership. However, a partner must include such payments as ordinary income for his taxable year within or with which ends the partnership taxable year in which the partnership deducted such payments as paid or accrued under its method of accounting. See section 706(a) and paragraph (a) of § 1.706–1. Guaranteed payments are considered as made to one who is not a member of the partnership only for the purposes of section 61(a) (relating to gross income) and section 162(a) (relating to trade or business expenses). For a guaranteed payment to be a partnership deduction, it must meet the same tests under section 162(a) as it would if the payment had been made to a person who is not a member of the partnership, and the rules of section 263 (relating to capital expenditures) must be taken into account. This rule does not affect the deductibility to the partnership of a payment described in section 736(a)(2) to a retiring partner or to a deceased partner's successor in interest. Guaranteed payments do not constitute an interest in partnership profits for purposes of sections 706(b)(3), 707(b), and 708(b). For the purposes of other provisions of the internal revenue laws, guaranteed payments are regarded as a partner's distributive share of ordinary income. Thus, a partner who receives guaranteed payments for a period during which he is absent from work because of personal injuries or sickness is not entitled to exclude such payments from his gross income under section 105(d). Similarly, a partner who receives guaranteed payments is not regarded as an employee of the partnership for the purposes of withholding of tax at source, deferred compensation plans, etc. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Under the ABC partnership agreement, partner A is entitled to a fixed annual payment of $10,000 for

services, without regard to the income of the partnership. His distributive share is 10 percent. After deducting the guaranteed payment, the partnership has $50,000 ordinary income. A must include $15,000 as ordinary income for his taxable year within or with which the partnership taxable year ends ($10,000 guaranteed payment plus $5,000 distributive share).

Example (2). Partner C in the CD partnership is to receive 30 percent of partnership income as determined before taking into account any guaranteed payments, but not less than $10,000. The income of the partnership is $60,000, and C is entitled to $18,000 (30 percent of $60,000) as his distributive share. No part of this amount is a guaranteed payment. However, if the partnership had income of $20,000 instead of $60,000, $6,000 (30 percent of $20,000) would be partner C's distributive share, and the remaining $4,000 payable to C would be a guaranteed payment.

Example (3). Partner X in the XY partnership is to receive a payment of $10,000 for services, plus 30 percent of the taxable income or loss of the partnership. After deducting the payment of $10,000 to partner X, the XY partnership has a loss of $9,000. Of this amount, $2,700 (30 percent of the loss) is X's distributive share of partnership loss and, subject to section 704(d), is to be taken into account by him in his return. In addition, he must report as ordinary income the guaranteed payment of $10,000 made to him by the partnership.

Example (4). Assume the same facts as in example (3) of this paragraph, except that, instead of a $9,000 loss, the partnership has $30,000 in capital gains and no other items of income or deduction except the $10,000 paid X as a guaranteed payment. Since the items of partnership income or loss must be segregated under section 702(a), the partnership has a $10,000 ordinary loss and $30,000 in capital gains. X's 30 percent distributive shares of these amounts are $3,000 ordinary loss and $9,000 capital gain. In addition, X has received a $10,000 guaranteed payment which is ordinary income to him.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; as amended by T.D. 7891, 48 FR 20049, May 4, 1983]

§ 1.708–1 Continuation of partnership.

(a) General rule. For purposes of subchapter K, chapter 1 of the Code, an existing partnership shall be considered as continuing if it is not terminated.

(b) Termination—(1) General rule. (i) A partnership shall terminate when the operations of the partnership are discontinued and no part of any business, financial operation, or venture of the partnership continues to be carried on by any of its partners in a partnership. For example, on November 20, 1956, A and B, each of whom is a 20-percent partner in partnership ABC, sell their interests to C, who is a 60-percent partner. Since the business is no longer carried on by any of its partners in a partnership, the ABC partnership is terminated as of November 20, 1956. However, where partners DEF agree on April 30, 1957, to dissolve their partnership, but carry on the business through a winding up period ending September 30, 1957, when all remaining assets, consisting only of cash, are distributed to the partners, the partnership does not terminate because of cessation of business until September 30, 1957.

(a) Upon the death of one partner in a 2-member partnership, the partnership shall not be considered as terminated if the estate or other successor in interest of the deceased partner continues to share in the profits or losses of the partnership business.

(b) For the continuation of a partnership where payments are being made under section 736 (relating to payments to a retiring partner or a deceased partner's successor in interest), see paragraph (a)(6) of § 1.736–1.

(ii) A partnership shall terminate when 50-percent or more of the total interest in partnership capital and profits is sold or exchanged within a period of 12 consecutive months. Such sale or exchange includes a sale or exchange to another member of the partnership. However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, or the liquidation of a partnership interest, is not a sale or exchange for purposes of this subparagraph. Furthermore, the contribution of property to a partnership does not constitute such a sale or exchange. See, however, paragraph (c)(3) of § 1.731–1. Fifty percent or more of the total interest in partnership capital and profits means 50 percent or more of the total interest in partnership capital plus 50-percent or more of the total interest in partnership profits. Thus, the sale of a 30-percent interest in partnership capital and a 60-percent interest in partnership profits is not the sale or exchange of 50 percent or more of the total interest in partnership capital and profits. If one or more partners sell or exchange interests aggregating 50-percent or more of the total interest in partnership capital and 50-percent or more of the total interest in partnership profits within a period of 12 consecutive months, such sale or exchange is considered as being within the provisions of this subparagraph. When interests are sold or exchanged on different dates, the percentages to be added are determined as of the date of each sale. For example, with respect to the ABC partnership, the sale by A on May 12, 1956, of a 30-percent interest in capital and profits to D, and the sale by B on March 27, 1957, of a 30-percent interest in capital and profits to E, is a sale of a 50-percent or more interest. Accordingly, the partnership is terminated as of March 27, 1957. However, if, on March 27, 1957, D instead of B, sold his 30-percent interest in capital and profits to E, there would be no termination since only one

30-percent interest would have been sold or exchanged within a 12-month period.

(iii) For purposes of subchapter K, chapter 1 of the Code, a partnership taxable year closes with respect to all partners on the date on which the partnership terminates. See section 706(c)(1) and paragraph (c)(1) of § 1.706–1. The date of termination is:

(a) For purposes of section 708(b)(1)(A), the date on which the winding up of the partnership affairs is completed.

(b) For purposes of section 708(b)(1)(B), the date of the sale or exchange of a partnership interest which, of itself or together with sales or exchanges in the preceding 12 months, transfers an interest of 50-percent or more in both partnership capital and profits.

(iv) If a partnership is terminated by a sale or exchange of an interest, the following is deemed to occur: The partnership distributes its properties to the purchaser and the other remaining partners in proportion to their respective interests in the partnership properties; and, immediately thereafter, the purchaser and the other remaining partners contribute the properties to a new partnership, either for the continuation of the business or for its dissolution and winding up. In the latter case, the new partnership terminates in accordance with subdivision (i) of this subparagraph. See sections 731 and 732 and §§ 1.731–1 and 1.732–1. For election of basis adjustments by the purchaser and other remaining partners, see sections 732(d) and 743(b) and paragraph (d) of § 1.732–1 and paragraph (b) of § 1.743–1.

(2) Special rules—(i) Merger or consolidation. If two or more partnerships merge or consolidate into one partnership, the resulting partnership shall be considered a continuation of the merging or consolidating partnership the members of which own an interest of more than 50 percent in the capital and profits of the resulting partnership. If the resulting partnership can, under the preceding sentence, be considered a continuation of more than one of the merging or consolidating partnerships, it shall, unless the Commissioner permits otherwise, be considered the continuation of that partnership which is credited with the contribution of the greatest dollar value of assets to the resulting partnership. Any other merging or consolidating partnerships shall be considered as terminated. If the members of none of the merging or consolidating partnerships have an interest of more than 50 percent in the capital and profits of the resulting partnership, all of the merged or consolidated partnerships are terminated, and a new partnership results. The taxable years of such merging or consolidating partnerships which are considered terminated shall be closed in accordance with the provisions of section 706(c), and such partnerships shall file their returns for a taxable year ending upon the date of termination, *i.e.*, the date of merger or consolidation. The resulting partnership shall file a return for the taxable year of the merging or consolidating partnership that is considered as continuing. The return shall state that the resulting partnership is a continuation of such merging or consolidating partnership and shall include the names and addresses of the merged or consolidated partnerships. The respective distributive shares of the partners for the periods prior to and subsequent to the date of merger or consolidation shall be shown as a part of the return. The provisions of this subdivision may be illustrated by the following example:

Example. Partnership AB, in whose capital and profits A and B each own a 50-percent interest, and partnership CD, in whose capital and profits C and D each own a 50-percent interest, merge on September 30, 1955, and form partnership ABCD. Partners A, B, C, and D are on a calendar year; partnership AB is also on a calendar year; and partnership CD is on a fiscal year ending June 30th. After the merger, the partners have capital and profits interests as follows: A, 30 percent; B, 30 percent; C, 20 percent; and D, 20 percent. Since A and B together own an interest of more than 50 percent in the capital and profits of partnership ABCD, such partnership shall be considered a continuation of partnership AB and shall continue to file returns on a calendar year basis. Since C and D own an interest of less than 50 percent in the capital and profits of partnership ABCD, the taxable year of partnership CD closes as of September 30, 1955, the date of the merger, and CD partnership is terminated as of that date. Partnership ABCD is required to file a return for the taxable year January 1 to December 31, 1955, indicating thereon that, until September 30, 1955, it was partnership AB. Partnership CD is required to file a return for its final taxable year, July 1 through September 30, 1955.

(ii) Division of a partnership. Upon the division of a partnership into two or more partnerships, any resulting partnership or partnerships shall be considered a continuation of the prior partnership if its members had an interest of more than 50 percent in the capital and profits of the prior partnership. Any other resulting partnership will not be considered a continuation of the prior partnership but will be considered a new partnership. If the members of none of the resulting partnerships owned an interest of more than 50 percent in the capital and profits of the divided partnership, the divided partnership is terminated. Where members of a partnership which has been divided into two or more partnerships do not become members of a resulting partnership which is considered a continuation of the prior partner-

ship, such partner's interests shall be considered liquidated as of the date of the division. The resulting partnership that is regarded as continuing shall file a return for the taxable year of the partnership that has been divided. The return shall state that the partnership is a continuation of the divided partnership and shall set forth separately the respective distributive shares of the partners for the periods prior to and subsequent to the date of division. The provisions of this subdivision may be illustrated by the following example:

Example. Partnership ABCD is in the real estate and insurance business. A owns a 40-percent interest, and B, C, and D each owns a 20-percent interest, in the capital and profits of the partnership. The partnership and the partners report their income on a calendar year. They agree to separate the real estate and insurance business as of November 1, 1955, and to form two partnerships; partnership AB to take over the real estate business, and partnership CD to take over the insurance business. Since members of resulting partnership AB owned more than a 50-percent interest in the capital and profits of partnership ABCD (A, 40 percent, and B, 20 percent), partnership AB shall be considered a continuation of partnership ABCD. Partnership AB is required to file a return for the taxable year January 1 to December 31, 1955, indicating thereon that until November 1, 1955, it was partnership ABCD. In forming partnership CD, partners C and D may contribute the property distributed to them in liquidation of their entire interests in divided partnership ABCD. Partnership CD will be required to file a return for the taxable year it adopts pursuant to section 706(b) and paragraph (b) of § 1.706–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.709–1 Treatment of organization and syndication costs.

(a) General rule. Except as provided in paragraph (b) of this section, no deduction shall be allowed under Chapter 1 of the Code to a partnership or to any partner for any amounts paid or incurred, directly or indirectly, in partnership taxable years beginning after December 31, 1975, to organize a partnership, or to promote the sale of, or to sell, an interest in the partnership.

(b) Amortization of organization expenses. (1) Under section 709(b) of the Code, a partnership may elect to treat its organizational expenses (as defined in section 709(b)(2) and in § 1.709–2(a)) paid or incurred in partnership taxable years beginning after December 31, 1976, as deferred expenses. If a partnership elects to amortize organizational expenses, it must select a period of not less than 60 months, over which the partnership will amortize all such expenses on a straight line basis. This period must begin with the month in which the partnership begins business (as determined under § 1.709–2(c)). However, in the case of a partnership on the cash receipts and disbursements method of accounting, no deduction shall be allowed for a taxable year with respect to any such expenses that have not been paid by the end of that taxable year. Portions of such expenses which would have been deductible under section 709(b) in a prior taxable year if the expenses had been paid are deductible in the year of payment. The election is irrevocable and the period selected by the partnership in making its election may not be subsequently changed.

(2) If there is a winding up and complete liquidation of the partnership prior to the end of the amortization period, the unamortized amount of organizational expenses is a partnership deduction in its final taxable year to the extent provided under section 165 (relating to losses). However, there is no partnership deduction with respect to its capitalized syndication expenses.

(c) Time and manner of making election. The election to amortize organizational expenses provided by section 709(b) shall be made by attaching a statement to the partnership's return of income for the taxable year in which the partnership begins business. The statement shall set forth a description of each organizational expense incurred (whether or not paid) with the amount of the expense, the date each expense was incurred, the month in which the partnership began business, and the number of months (not less than 60) over which the expenses are to be amortized. A taxpayer on the cash receipts and disbursements method of accounting shall also indicate the amount paid before the end of the taxable year with respect to each such expense. Expenses less than $10 need not be separately listed, provided the total amount of these expenses is listed with the dates on which the first and last of such expenses were incurred, and, in the case of a taxpayer on the cash receipts and disbursements method of accounting, the aggregate amount of such expenses that was paid by the end of the taxable year is stated. In the case of a partnership which begins business in a taxable year that ends after March 31, 1983, the original return and statement must be filed (and the election made) not later than the date prescribed by law for filing the return (including any extensions of time) for that taxable year. Once an election has been made, an amended return (or returns) and statement (or statements) may be filed to include any organizational expenses not included in the partnership's original return and statement.

[T.D. 7891, 48 FR 20048, May 4, 1983]

§ 1.709–2 Definitions.

(a) Organizational expenses. Section 709(b)(2) of the Internal Revenue Code defines organizational expenses as expenses which:

(1) Are incident to the creation of the partnership;

(2) Are chargeable to capital account; and

(3) Are of a character which, if expended incident to the creation of a partnership having an ascertainable life, would (but for section 709(a)) be amortized over such life.

An expenditure which fails to meet one or more of these three tests does not qualify as an organizational expense for purposes of section 709(b) and this section. To satisfy the statutory requirement described in paragraph (a)(1) of this section, the expense must be incurred during the period beginning at a point which is a reasonable time before the partnership begins business and ending with the date prescribed by law for filing the partnership return (determined without regard to any extensions of time) for the taxable year the partnership begins business. In addition, the expenses must be for creation of the partnership and not for operation or starting operation of the partnership trade or business. To satisfy the statutory requirement described in paragraph (a)(3) of this section, the expense must be for an item of a nature normally expected to benefit the partnership throughout the entire life of the partnership. The following are examples of organizational expenses within the meaning of section 709 and this section: Legal fees for services incident to the organization of the partnership, such as negotiation and preparation of a partnership agreement; accounting fees for services incident to the organization of the partnership; and filing fees. The following are examples of expenses that are not organizational expenses within the meaning of section 709 and this section (regardless of how the partnership characterizes them): Expenses connected with acquiring assets for the partnership or transferring assets to the partnership; expenses connected with the admission or removal of partners other than at the time the partnership is first organized; expenses connected with a contract relating to the operation of the partnership trade or business (even where the contract is between the partnership and one of its members); and syndication expenses.

(b) **Syndication expenses.** Syndication expenses are expenses connected with the issuing and marketing of interests in the partnership. Examples of syndication expenses are brokerage fees; registration fees; legal fees of the underwriter or placement agent and the issuer (the general partner or the partnership) for securities advice and for advice pertaining to the adequacy of tax disclosures in the prospectus or placement memorandum for securities law purposes; accounting fees for preparation of representations to be included in the offering materials; and printing costs of the prospectus, placement memorandum, and other selling and promotional material. These expenses are not subject to the election under section 709(b) and must be capitalized.

(c) **Beginning business.** The determination of the date a partnership begins business for purposes of section 709 presents a question of fact that must be determined in each case in light of all the circumstances of the particular case. Ordinarily, a partnership begins business when it starts the business operations for which it was organized. The mere signing of a partnership agreement is not alone sufficient to show the beginning of business.

If the activities of the partnership have advanced to the extent necessary to establish the nature of its business operations, it will be deemed to have begun business. Accordingly, the acquisition of operating assets which are necessary to the type of business contemplated may constitute beginning business for these purposes. The term "operating assets", as used herein, means assets that are in a state of readiness to be placed in service within a reasonable period following their acquisition.

[T.D. 7891, 48 FR 20049, May 4, 1983]

Contributions, Distributions, and Transfers

Contributions to a Partnership

§ 1.721–1 Nonrecognition of gain or loss on contribution.

(a) No gain or loss shall be recognized either to the partnership or to any of its partners upon a contribution of property, including installment obligations, to the partnership in exchange for a partnership interest. This rule applies whether the contribution is made to a partnership in the process of formation or to a partnership which is already formed and operating. Section 721 shall not apply to a transaction between a partnership and a partner not acting in his capacity as a partner since such a transaction is governed by section 707. Rather than contributing property to

a partnership, a partner may sell property to the partnership or may retain the ownership of property and allow the partnership to use it. In all cases, the substance of the transaction will govern, rather than its form. See paragraph (c)(3) of § 1.731-1. Thus, if the transfer of property by the partner to the partnership results in the receipt by the partner of money or other consideration, including a promissory obligation fixed in amount and time for payment, the transaction will be treated as a sale or exchange under section 707 rather than as a contribution under section 721. For the rules governing the treatment of liabilities to which contributed property is subject, see section 752 and § 1.752-1.

(b)(1) Normally, under local law, each partner is entitled to be repaid his contributions of money or other property to the partnership (at the value placed upon such property by the partnership at the time of the contribution) whether made at the formation of the partnership or subsequent thereto. To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61. The amount of such income is the fair market value of the interest in capital so transferred, either at the time the transfer is made for past services, or at the time the services have been rendered where the transfer is conditioned on the completion of the transferee's future services. The time when such income is realized depends on all the facts and circumstances, including any substantial restrictions or conditions on the compensated partner's right to withdraw or otherwise dispose of such interest. To the extent that an interest in capital representing compensation for services rendered by the decedent prior to his death is transferred after his death to the decedent's successor in interest, the fair market value of such interest is income in respect of a decedent under section 691.

(2) To the extent that the value of such interest is: (i) Compensation for services rendered to the partnership, it is a guaranteed payment for services under section 707(c); (ii) compensation for services rendered to a partner, it is not deductible by the partnership, but is deductible only by such partner to the extent allowable under this chapter.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.722-1 Basis of contributing partner's interest.

The basis to a partner of a partnership interest acquired by a contribution of property, including money, to the partnership shall be the amount of money contributed plus the adjusted basis at the time of contribution of any property contributed. If the acquisition of an interest in partnership capital results in taxable income to a partner, such income shall constitute an addition to the basis of the partner's interest. See paragraph (b) of § 1.721-1. If the contributed property is subject to indebtedness or if liabilities of the partner are assumed by the partnership, the basis of the contributing partner's interest shall be reduced by the portion of the indebtedness assumed by the other partners, since the partnership's assumption of his indebtedness is treated as a distribution of money to the partner. Conversely, the assumption by the other partners of a portion of the contributor's indebtedness is treated as a contribution of money by them. See section 752 and § 1.752-1. The provisions of this section may be illustrated by the following examples:

Example (1). A acquired a 20-percent interest in a partnership by contributing property. At the time of A's contribution, the property had a fair market value of $10,000, an adjusted basis to A of $4,000, and was subject to a mortgage of $2,000. Payment of the mortgage was assumed by the partnership. The basis of A's interest in the partnership is $2,400, computed as follows:

Adjusted basis to A of property contributed ..	$4,000
Less portion of mortgage assumed by other partners which must be treated as a distribution (80 percent of $2,000)	1,600
Basis of A's interest	2,400

Example (2). If, in example (1) of this section, the property contributed by A was subject to a mortgage of $6,000, the basis of A's interest would be zero, computed as follows:

Adjusted basis to A of property contributed ..	$4,000
Less portion of mortgage assumed by other partners which must be treated as a distribution (80 percent of $6,000)	4,800
	(800)

Since A's basis cannot be less than zero, the $800 in excess of basis, which is considered as a distribution of money under section 752(b), is treated as capital gain from the sale or exchange or a partnership interest. See section 731(a).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.723-1 Basis of property contributed to partnership.

The basis to the partnership of property contributed to it by a partner is the adjusted basis of such property to the contributing partner at the time of the contribution. Since such property has the

same basis in the hands of the partnership as it had in the hands of the contributing partner, the holding period of such property for the partnership includes the period during which it was held by the partner. See section 1223(2). For elective adjustments to the basis of partnership property arising from distributions or transfers of partnership interests, see sections 732(d), 734(b), and 743(b).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

Distributions by a Partnership

§ 1.731–1 Extent of recognition of gain or loss on distribution.

(a) Recognition of gain or loss to partner—(1) Recognition of gain. (i) Where money is distributed by a partnership to a partner, no gain shall be recognized to the partner except to the extent that the amount of money distributed exceeds the adjusted basis of the partner's interest in the partnership immediately before the distribution. This rule is applicable both to current distributions (i.e., distributions other than in liquidation of an entire interest) and to distributions in liquidation of a partner's entire interest in a partnership. Thus, if a partner with a basis for his interest of $10,000 receives a distribution of cash of $8,000 and property with a fair market value of $3,000, no gain is recognized to him. If $11,000 cash were distributed, gain would be recognized to the extent of $1,000. No gain shall be recognized to a distributee partner with respect to a distribution of property (other than money) until he sells or otherwise disposes of such property, except to the extent otherwise provided by section 736 (relating to payments to a retiring partner or a deceased partner's successor in interest) and section 751 (relating to unrealized receivables and inventory items). See section 731(c) and paragraph (c) of this section.

(ii) For the purposes of sections 731 and 705, advances or drawings of money or property against a partner's distributive share of income shall be treated as current distributions made on the last day of the partnership taxable year with respect to such partner.

(2) Recognition of loss. Loss is recognized to a partner only upon liquidation of his entire interest in the partnership, and only if the property distributed to him consists solely of money, unrealized receivables (as defined in section 751(c)), and inventory items (as defined in section 751(d)(2)). The term "liquidation of a partner's interest", as defined in section 761(d), is the termination of the partner's entire interest in the partnership by means of a distribution or a series of distributions. Loss is recognized to the distributee partner in such cases to the extent of the excess of the adjusted basis of such partner's interest in the partnership at the time of the distribution over the sum of—

(i) Any money distributed to him, and

(ii) The basis to the distributee, as determined under section 732, of any unrealized receivables and inventory items that are distributed to him.

If the partner whose interest is liquidated receives any property other than money, unrealized receivables, or inventory items, then no loss will be recognized. Application of the provisions of this subparagraph may be illustrated by the following examples:

Example (1). Partner A has a partnership interest in partnership ABC with an adjusted basis to him of $10,000. He retires from the partnership and receives, as a distribution in liquidation of his entire interest, his share of partnership property. This share is $5,000 cash and inventory with a basis to him (under section 732) of $3,000. Partner A realizes a capital loss of $2,000, which is recognized under section 731(a)(2).

Example (2). Partner B has a partnership interest in partnership BCD with an adjusted basis to him of $10,000. He retires from the partnership and receives, as a distribution in liquidation of his entire interest, his share of partnership property. This share is $4,000 cash, real property (used in the trade or business) with an adjusted basis to the partnership of $2,000, and unrealized receivables having a basis to him (under section 732) of $3,000. No loss will be recognized to B on the transaction because he received property other than money, unrealized receivables, and inventory items. As determined under section 732, the basis to B for the real property received is $3,000.

(3) Character of gain or loss. Gain or loss recognized under section 731(a) on a distribution is considered gain or loss from the sale or exchange of the partnership interest of the distributee partner, that is, capital gain or loss.

(b) Gain or loss recognized by partnership. A distribution of property (including money) by a partnership to a partner does not result in recognized gain or loss to the partnership under section 731. However, recognized gain or loss may result to the partnership from certain distributions which, under section 751(b), must be treated as a sale or exchange of property between the distributee partner and the partnership.

(c) Exceptions. (1) Section 731 does not apply to the extent otherwise provided by—

(i) Section 736 (relating to payments to a retiring partner or to a deceased partner's successor in interest) and

(ii) Section 751 (relating to unrealized receivables and inventory items).

For example, payments under section 736(a), which are considered as a distributive share or guaranteed payment, are taxable as such under that section.

(2) The receipt by a partner from the partnership of money or property under an obligation to repay the amount of such money or to return such property does not constitute a distribution subject to section 731 but is a loan governed by section 707(a). To the extent that such an obligation is canceled, the obligor partner will be considered to have received a distribution of money or property at the time of cancellation.

(3) If there is a contribution of property to a partnership and within a short period:

(i) Before or after such contribution other property is distributed to the contributing partner and the contributed property is retained by the partnership, or

(ii) After such contribution the contributed property is distributed to another partner,

such distribution may not fall within the scope of section 731. Section 731 does not apply to a distribution of property, if, in fact, the distribution was made in order to effect an exchange of property between two or more of the partners or between the partnership and a partner. Such a transaction shall be treated as an exchange of property.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.732–1 Basis of distributed property other than money.

(a) Distributions other than in liquidation of a partner's interest. The basis of property (other than money) received by a partner in a distribution from a partnership, other than in liquidation of his entire interest, shall be its adjusted basis to the partnership immediately before such distribution. However, the basis of the property to the partner shall not exceed the adjusted basis of the partner's interest in the partnership, reduced by the amount of any money distributed to him in the same transaction. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Partner A, with an adjusted basis of $15,000 for his partnership interest, receives in a current distribution property having an adjusted basis of $10,000 to the partnership immediately before distribution, and $2,000 cash. The basis of the property in A's hands will be $10,000. Under sections 733 and 705, the basis of A's partnership interest will be reduced by the distribution to $3,000 ($15,000 less $2,000 cash, less $10,-000, the basis of the distributed property to A).

Example (2). Partner R has an adjusted basis of $10,000 for his partnership interest. He receives a current distribution of $4,000 cash and property with an adjusted basis to the partnership of $8,000. The basis of the distributed property to partner R is limited to $6,000 ($10,000, the adjusted basis of his interest, reduced by $4,000, the cash distributed).

(b) Distribution in liquidation. Where a partnership distributes property (other than money) in liquidation of a partner's entire interest in the partnership, the basis of such property to the partner shall be an amount equal to the adjusted basis of his interest in the partnership reduced by the amount of any money distributed to him in the same transaction. Application of this rule may be illustrated by the following example:

Example. Partner B, with a partnership interest having an adjusted basis to him of $12,000, retires from the partnership and receives cash of $2,000, and real property with an adjusted basis to the partnership of $6,000 and a fair market value of $14,000. The basis of the real property to B is $10,000 (B's basis for his partnership interest, $12,000, reduced by $2,000, the cash distributed).

(c) Allocation of basis among properties distributed to a partner. (1) Under section 732(a)(2) or (b), the basis to be allocated to properties distributed to a partner shall be allocated first to any unrealized receivables (as defined in section 751(c)) and inventory items (as defined in section 751(d)(2)) included in the distribution. However, such receivables or inventory items may not take a higher basis in the hands of the partner than their common adjusted basis to the partnership immediately before the distribution, unless such distribution is treated as a sale or exchange under section 751(b), or unless the distributee partner has a special basis adjustment for the distributed property under sections 732(d) or 743(b). Any basis not allocated to unrealized receivable or inventory items shall be allocated to any other properties distributed to the partner in the same transaction, in proportion to the bases of such other properties in the hands of the partnership before distribution. The provisions of this subparagraph may be illustrated by the following example:

Example. Partner A, whose partnership interest in partnership ABC has an adjusted basis of $15,000, receives as a distribution in liquidation of his entire interest inventory items having a basis to the partnership of $6,000. In addition, he receives cash of $5,000, and two parcels of real property with adjusted bases to the partnership of $6,000 and $2,000, respectively. Basis in the amount of $10,000 ($15,000 basis, less $5,000 cash received) is allocated $6,000 to inventory items,

and $3,000 (6,000/8,000×$4,000) and $1,000 (2,000/8,000×$4,000), respectively, to the two parcels of real property.

(2) If the adjusted basis to the partnership of the unrealized receivables and inventory items distributed to a partner is greater than the partner's adjusted basis of his interest (reduced by the amount of money distributed to him in the same transaction), the amount of the basis to be allocated to such unrealized receivables and inventory items shall be allocated in proportion to the adjusted bases of such properties in the hands of the partnership. If the basis of the partner's interest to be allocated upon a distribution in liquidation of his entire interest is in excess of the adjusted basis to the partnership of the unrealized receivables and inventory items distributed, and if there is no other property distributed to which such excess can be allocated, the distributee partner sustains a capital loss under section 731(a)(2) to the extent of the unallocated basis of his partnership interest. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Partner C, whose interest in partnership ABC has an adjusted basis to him of $9,000, receives as a distribution in liquidation cash of $6,000, inventory items having an adjusted basis to the partnership of $6,000, and real property having a basis to the partnership of $4,000. The cash payment reduces C's basis to $3,000, which is allocated entirely to inventory items. The real property has a zero basis in C's hands. The partnership bases not carried over to C for the distributed properties are lost unless an election under section 754 is in effect requiring the partnership to adjust the bases of remaining partnership properties under section 734(b).

Example (2). Partner B, whose interest in partnership ABC has an adjusted basis to him of $9,000, receives as a distribution in liquidation cash of $1,000 and inventory items having a basis to the partnership of $6,000. The cash payment reduces B's basis to $8,000, which can be allocated only to the extent of $6,000 to the inventory items. The remaining $2,000 basis, not allocable to distributed property, constitutes a capital loss in that amount to partner B under section 731(a)(2). If the election under section 754 is in effect, see section 734(b) for adjustment of the basis of undistributed partnership property.

(d) Special partnership basis to transferee under section 732(d). **(1)(i)** A transfer of a partnership interest occurs upon a sale or exchange of an interest or upon the death of a partner. Section 732(d) provides a special rule for the determination of the basis of property distributed to a transferee partner who acquired any part of his partnership interest in a transfer with respect to which the election under section 754 (relating to the optional adjustment to basis of partnership property) was not in effect.

(ii) Where an election under section 754 is in effect, see section 743(b) and paragraph (b) of § 1.743–1 and § 1.732–2.

(iii) If a transferee partner receives a distribution of property (other than money) from the partnership within 2 years after he acquired his interest or part thereof in the partnership by a transfer with respect to which the election under section 754 was not in effect, he may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the adjustment provided in section 743(b) were in effect.

(iv) If an election under section 732(d) is made upon a distribution of property to a transferee partner, the amount of the adjustment with respect to the transferee partner is not diminished by any depletion or depreciation of that portion of the basis of partnership property which arises from the special basis adjustment under section 732(d), since depletion or depreciation on such portion for the period prior to distribution is allowed or allowable only if the optional adjustment under section 743(b) is in effect.

(v) If property is distributed to a transferee partner who elects under section 732(d), and if such property is not the same property which would have had a special basis adjustment, then such special basis adjustment shall apply to any like property received in the distribution, provided that the transferee, in exchange for the property distributed, has relinquished his interest in the property with respect to which he would have had a special basis adjustment. This rule applies whether the property in which the transferee has relinquished his interest is retained or disposed or by the partnership. (For shift of transferee's special basis adjustment to like property, see paragraph (b)(2)(ii) of § 1.743–1.)

(vi) The provisions of this subparagraph may be illustrated by the following example:

Example. The basis to transferee partner K of his one-fourth interest in partnership WJKS is $17,000. At the time he acquired such interest by purchase, the election under section 754 was not in effect and the partnership inventory had a basis to the partnership of $14,000 and a value of $16,000. K's purchase price reflected $500 of this difference. Thus, $4,000 of the $17,000 paid by K for his one-fourth interest was attributable to his share of partnership inventory with a basis of $3,500. Within 2 years after acquiring his interest, K retired from the partnership and received in liquidation of his entire interest cash of $1,500, inventory with a basis to the partnership of $3,500, property X (a capital asset), with an adjusted basis to the partnership of $2,000, and property Y (a depreciable asset), with an adjusted basis to the partnership of $4,000. The value of the inventory received by K was one-fourth of the value of all partnership inventory and was his share of such property. It is immaterial whether the inventory K received was on hand when K acquired his interest. In accordance with K's election under section 732(d), the amount of his share of partnership basis which is attributable to partnership inventory

is increased by $500 (one-fourth of the $2,000 difference between the value of such property, $16,000, and its $14,000 basis to the partnership at the time K acquired his interest). This adjustment under section 732(d) applies only for purposes of distributions to partner K, and not for purposes of partnership depreciation, depletion, or gain or loss on disposition. Thus, the amount to be allocated among the properties received by K in the liquidating distribution is $15,500 ($17,000, K's basis for his interest, reduced by the amount of cash received, $1,500). This amount is allocated as follows: The basis of the inventory items received is $4,000, consisting of the $3,500 common partnership basis for such items, plus the special basis adjustment of $500 which K would have had under section 743(b). The remaining basis of $11,500 ($15,500 minus $4,000) is to be allocated to the remaining property distributed to K in proportion to their adjusted bases to the partnership. Since the adjusted basis to the partnership of property X is $2,000, and that of property Y is $4,000, the $11,500 is allocated $3,833 (2,000/6,000×$11,500) to X, and $7,667 (4,000/6,000×$11,5-00) to Y.

(2) A transferee partner who wishes to elect under section 732(d) shall make the election with his tax return—

(i) For the year of the distribution, if the distribution includes any property subject to the allowance for depreciation, depletion, or amortization, or

(ii) For any taxable year no later than the first taxable year in which the basis of any of the distributed property is pertinent in determining his income tax, if the distribution does not include any such property subject to the allowance for depreciation, depletion or amortization.

(3) A taxpayer making an election under section 732(d) shall submit with the return in which the election is made a schedule setting forth the following:

(i) That under section 732(d) he elects to adjust the basis of property received in a distribution; and

(ii) The computation of the special basis adjustment for the property distributed and the properties to which the adjustment has been allocated. For rules of allocation, see section 755.

(4) A partner who acquired any part of his partnership interest in a transfer to which the election provided in section 754 was not in effect, is required to apply the special basis rule contained in section 732(d) to a distribution to him, whether or not made within 2 years after the transfer, if at the time of his acquisition of the transferred interest—

(i) The fair market value of all partnership property (other than money) exceeded 110 percent of its adjusted basis to the partnership.

(ii) An allocation of basis under section 732(c) upon a liquidation of his interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and

(iii) A special basis adjustment under section 743(b) would change the basis to the transferee partner of the property actually distributed.

The application of the rule presented in this subparagraph may be illustrated by the following examples:

Example (1). Partnership ABC owns three parcels of land, each of which has an adjusted basis to the partnership of $5,000 and is worth $55,000, and depreciable property with an adjusted basis and value of $150,000. D purchases A's partnership interest for $105,000 when the election under section 754 is not in effect. At the time of D's purchase, the fair market value of all partnership property (other than money) is $315,000, which exceeds 110 percent of $165,000, its adjusted basis to the partnership. Four years later, the partnership is dissolved. D receives one of the three parcels of land which has a basis to the partnership of $5,000, and one-third of the depreciable property with an adjusted basis to the partnership at that time of $45,000, one-third of $135,000 ($150,000 basis, minus $15,000 depreciation computed on the partnership basis. See subparagraph (1)(iv) of this paragraph.) If D's adjusted basis for his interest at the time of the distribution was $100,000 and was allocated under section 732(c) to the property received by him in proportion to their respective bases to the partnership, the basis to him for the distributed land would be $10,000 (5,000/50,000×$100,000) and the basis of the depreciable property would be $90,000 (45,000/50,000×$100,000). In effect, D would be attributing to the basis of the depreciable property a portion of the cost of his partnership interest properly attributable to appreciation in nondepreciable property. The application of section 743(b) to the transfer of the interest would have resulted in a different basis to D for the property actually distributed. Therefore, the special basis adjustment under section 732(d) must be made so that D must increase the basis of the land by a special basis adjustment of $50,000 ($55,000 fair market value less $5,000 partnership basis), making the basis of his interest therein $55,000 (55,000/-100,000×$100,000). D's basis for the depreciable property will then be $45,000 (45,000/100,000×$100,000).

Example (2). Assume the same facts as in example (1) of this subparagraph, except that the partnership does not dissolve but distributes one parcel of land to each of the partners in a current distribution. Since the conditions of this subparagraph have been met, D's basis for the distributed land is the adjusted basis such land would have if the adjustment provided in section 743(b) were in effect with respect to the partnership property. Therefore, D's basis for the land is $55,000 ($5,000 basis of the land to the partnership, plus $50,000 special basis adjustment under section 732(d)). D's basis for his partnership interest is reduced by $55,000, his basis for the property distributed.

(e) Exception. When a partnership distributes unrealized receivables (as defined in section 751(c)) or substantially appreciated inventory items (as defined in section 751(d)) in exchange for any part of a partner's interest in other partnership property (including money), or, conversely, part-

nership property (including money) other than unrealized receivables or substantially appreciated inventory items in exchange for any part of a partner's interest in the partnership's unrealized receivables or substantially appreciated inventory items, the distribution will be treated as a sale or exchange of property under the provisions of section 751(b). In such case, section 732 (including subsection(d) thereof) applies in determining the partner's basis of the property which he is treated as having sold to or exchanged with the partnership (as constituted after the distribution). The partner is considered as having received such property in a current distribution and, immediately thereafter, as having sold or exchanged it. See section 751(b) and paragraph (b) of § 1.751–1. However, section 732 does not apply in determining the basis of that part of property actually distributed to a partner which is treated as received by him in a sale or exchange under section 751(b). Consequently, the basis of such property shall be its cost to the partner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.732–2 Special partnership basis of distributed property.

(a) Adjustments under section 734(b). In the case of a distribution of property to a partner, the partnership bases of the distributed properties shall reflect any increases or decreases to the basis of partnership property which have been made previously under section 734(b) (relating to the optional adjustment to basis of undistributed partnership property) in connection with previous distributions.

(b) Adjustments under section 743(b). In the case of a distribution of property to a partner who acquired any part of his interest in a transfer as to which an election under section 754 was in effect, then, for the purposes of section 732 (other than subsection (d) thereof), the adjusted partnership bases of the distributed property shall take into account, in addition to any adjustments under section 734(b), the transferee's special basis adjustment for the distributed property under section 743(b). The application of this paragraph may be illustrated by the following example:

Example. Partner D acquired his interest in partnership ABD from a previous partner. Since the partnership had made an election under section 754, a special basis adjustment with respect to D is applicable to the basis of partnership property in accordance with section 743(b). One of the assets of the partnership at the time D acquired his interest was property X, which is later distributed to D in a current distribution. Property X has an adjusted basis to the partnership of $1,000 and with respect to D it has a special basis adjustment of $500. Therefore, for purposes of section 732(a)(1), the adjusted basis of such property to the partnership with respect to D immediately before its distribution is $1,500. However, if property X is distributed to partner A, a nontransferee partner, its adjusted basis to the partnership for purposes of section 732(a)(1) is only $1,000. In such case, D's $500 special basis adjustment may shift over to other property. See paragraph (b)(2)(ii) of § 1.743–1.

(c) Adjustments to basis of distributed inventory and unrealized receivables. Under section 732, the basis to be allocated to distributed properties shall be allocated first to any unrealized receivables and inventory items. If the distributee partner is a transferee of a partnership interest and has a special basis adjustment for unrealized receivables or inventory items under either section 743(b) or section 732(d), then the partnership adjusted basis immediately prior to distribution of any unrealized receivables or inventory items distributed to such partner shall be determined as follows: If the distributee partner receives his entire share of the fair market value of the inventory items or unrealized receivables of the partnership, the adjusted basis of such distributed property to the partnership, for the purposes of section 732, shall take into account the entire amount of any special basis adjustment which the distributee partner may have for such assets. If the distributee partner receives less than his entire share of the fair market value of partnership inventory items or unrealized receivables, then, for purposes of section 732, the adjusted basis of such distributed property to the partnership shall take into account the same proportion of the distributee's special basis adjustment for unrealized receivables or inventory items as the value of such items distributed to him bears to his entire share of the total value of all such items of the partnership. The provisions of this paragraph may be illustrated by the following example:

Example. Partner C acquired his 40-percent interest in partnership AC from a previous partner. Since the partnership had made an election under section 754, C has a special basis adjustment to partnership property under section 743(b). C retires from the partnership when the adjusted basis of his partnership interest is $3,000. He receives from the partnership in liquidation of his entire interest, $1,000 cash, certain capital assets, depreciable property, and certain inventory items and unrealized receivables. C has a special basis adjustment of $800 with respect to partnership inventory items and of $200 with respect to unrealized receivables. The common partnership basis for the inventory items distributed to him is $500 and for the unrealized receivables is zero. If the value of inventory items and the unrealized receivables distributed to C in his 40 percent share of the total value of all partnership inventory items and unrealized receivables, then, for purposes of section 732, the adjusted basis of such property in C's hands will be $1,300 for the inventory items ($500 plus $800) and $200 for the unrealized receivables (zero plus $200). The remaining basis of $500, which constitutes the basis of the capital assets and depreciable property distributed to C, is determined as follows: $3,000 (total basis) less $1,000 cash, or $2,000 (the

amount to be allocated to the basis of all distributed property), less $1,500 ($800 and $200 special basis adjustments, plus $500 common partnership basis, the amount allocated to inventory items and unrealized receivables). However, if the value of the inventory items and unrealized receivables distributed to C consisted of only 20 percent of the total fair market value of such property (*i.e.*, only one-half of C's 40-percent share), then only one-half of C's special basis adjustment of $800 for partnership inventory items and $200 for unrealized receivables would be taken into account. In that case, the basis of the inventory items in C's hands would be $650 ($250, the common partnership basis for inventory items distributed to him, plus $400, one-half of C's special basis adjustment for inventory items). The basis of the unrealized receivables in C's hands would be $100 (zero plus $100, one-half of C's special basis adjustment for unrealized receivables).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.733–1 Basis of distributee partner's interest.

In the case of a distribution by a partnership to a partner other than in liquidation of a partner's entire interest, the adjusted basis to such partner of his interest in the partnership shall be reduced (but not below zero) by the amount of any money distributed to such partner and by the amount of the basis to him of distributed property other than money as determined under section 732 and §§ 1.732–1 and 1.732–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.734–1 Optional adjustment to basis of undistributed partnership property.

(a) General rule. A partnership shall not adjust the basis of partnership property as the result of a distribution of property to a partner, unless the election provided in section 754 (relating to optional adjustment to basis of partnership property) is in effect.

(b) Method of adjustment—(1) Increase in basis. Where an election under section 754 is in effect and a distribution of partnership property is made, whether or not in liquidation of the partner's entire interest in the partnership, the adjusted basis of the remaining partnership assets shall be increased by—

(i) The amount of any gain recognized under section 731(a)(1) to the distributee partner, or

(ii) The excess of the adjusted basis to the partnership immediately before the distribution of any property distributed (including adjustments under section 743(b) or section 732(d) when applied) over the basis under section 732 (including such special basis adjustments) of such property to the distributee partner.

The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Partner A has a basis of $10,000 for his one-third interest in partnership ABC. The partnership has no liabilities and has assets consisting of cash of $11,000 and property with a partnership basis of $19,000 and a value of $22,000. A receives $11,000 in cash in liquidation of his entire interest in the partnership. He has a gain of $1,000 under section 731(a)(1). If the election under section 754 is in effect, the partnership basis for the property becomes $20,000 ($19,-000 plus $1,000).

Example (2). Partner D has a basis of $10,000 for his one-third interest in partnership DEF. The partnership balance sheet before the distribution shows the following:

Assets

	Adjusted basis	Value
Cash	$4,000	$4,000
Property X	11,000	11,000
Property Y	15,000	18,000
Total	30,000	33,000

Liabilities and Capital

	Adjusted basis	Value
Liabilities	$0	$0
Capital:		
D	10,000	11,000
E	10,000	11,000
F	10,000	11,000
Total	30,000	33,000

In liquidation of his entire interest in the partnership, D received property X with a partnership basis of $11,000. D's basis for property X is $10,000 under section 732(b). Where the election under section 754 is in effect, the excess of $1,000 (the partnership basis before the distribution less D's basis for property X after distribution) is added to the basis of property Y. The basis of property Y becomes $16,000 ($15,000 plus $1,000). If the distribution is made to a transferee partner who elects under section 732(d), see § 1.734–2.

(2) Decrease in basis. Where the election provided in section 754 is in effect and a distribution is made in liquidation of a partner's entire interest, the partnership shall decrease the adjusted basis of the remaining partnership property by—

(i) The amount of loss, if any, recognized under section 731(a)(2) to the distributee partner, or

(ii) The excess of the basis of the distributed property to the distributee, as determined under section 732 (including adjustments under section 743(b) or section 732(d) when applied) over the adjusted basis of such property to the partnership (including such special basis adjustments) immediately before such distribution.

The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Partner G has a basis of $11,000 for his one-third interest in partnership GHI. Partnership assets con-

sist of cash of $10,000 and property with a basis of $23,000 and a value of $20,000. There are no partnership liabilities. In liquidation of his entire interest in the partnership, G receives $10,000 in cash. He has a loss of $1,000 under section 731(a)(2). If the election under section 754 is in effect, the partnership basis for the property becomes $22,000 ($23,000 less $1,000).

Example (2). Partner J has a basis of $11,000 for his one-third interest in partnership JKL. The partnership balance sheet before the distribution shows the following:

ASSETS

	Adjusted basis	Value
Cash	$5,000	$5,000
Property X	10,000	10,000
Property Y	18,000	15,000
Total	33,000	30,000

LIABILITIES AND CAPITAL

	Adjusted basis	Value
Liabilities	$0	$0
Capital:		
J	11,000	10,000
K	11,000	10,000
L	11,000	10,000
Total	33,000	30,000

In liquidation of his entire interest in the partnership, J receives property X with a partnership basis of $10,000. J's basis for property X under section 732(b) is $11,000. Where the election under section 754 is in effect, the excess of $1,000 ($11,000 basis of property X to J, the distributee, less its $10,000 adjusted basis to the partnership immediately before the distribution) decreases the basis of property Y in the partnership. Thus, the basis of property Y becomes $17,000 ($18,000 less $1,000). If the distribution is made to a transferee partner who elects under section 732(d), see § 1.734–2.

(c) Allocation of basis. For allocation among the partnership properties of basis adjustments under section 734(b) and paragraph (b) of this section, see section 755 and § 1.755–1.

(d) Returns. A partnership which must adjust the bases of partnership properties under section 734 shall attach a statement to the partnership return for the year of the distribution setting forth the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.734–2 Adjustment after distribution to transferee partner.

(a) In the case of a distribution of property by the partnership to a partner who has obtained all or part of his partnership interest by transfer, the adjustments to basis provided in section 743(b) and section 732(d) shall be taken into account in applying the rules under section 734(b). For determining the adjusted basis of distributed property to the partnership immediately before the distribution where there has been a prior transfer of a partnership interest with respect to which the election provided in section 754 or section 732(d) is in effect, see §§ 1.732–1 and 1.732–2.

(b)(1) If a transferee partner, in liquidation of his entire partnership interest, receives a distribution of property (including money) with respect to which he has no special basis adjustment, in exchange for his interest in property with respect to which he has a special basis adjustment, and does not utilize his entire special basis adjustment in determining the basis of the distributed property to him under section 732, the unused special basis adjustment of the distributee shall be applied as an adjustment to the partnership basis of the property retained by the partnership and as to which the distributee did not use his special basis adjustment. The provisions of this subparagraph may be illustrated by the following example:

Example. Upon the death of his father, partner S acquires by inheritance a half-interest in partnership ACS. Partners A and C each have a one-quarter interest. The assets of the partnership consist of $10,000 cash and land used in farming worth $10,000 with a basis of $1,000 to the partnership. Since the partnership had made the election under section 754 at the time of transfer, partner S had a special basis adjustment of $4,500 under section 743(b) with respect to his undivided half-interest in the real estate. The basis of S's partnership interest, in accordance with section 742, is $10,000. S retires from the partnership and receives $10,000 in cash in exchange for his entire interest. Since S has received no part of the real estate, his special basis adjustment of $4,500 will be allocated to the real estate, the remaining partnership property, and will increase its basis to the partnership to $5,500.

(2) The provisions of this paragraph do not apply to the extent that certain distributions are treated as sales or exchanges under section 751(b)(relating to unrealized receivables and substantially appreciated inventory items). See section 751(b) and paragraph (b) of § 1.751–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.735–1 Character of gain or loss on disposition of distributed property.

(a) Sale or exchange of distributed property—(1) **Unrealized receivables.** Any gain realized or loss sustained by a partner on a sale or exchange or other disposition of unrealized receivables (as defined in paragraph (c)(1) of § 1.751–1) received by him in a distribution from a partnership shall be considered gain or loss from the sale or exchange of property other than a capital asset.

(2) **Inventory items.** Any gain realized or loss sustained by a partner on a sale or exchange of inventory items (as defined in section 751(d)(2))

received in a distribution from a partnership shall be considered gain or loss from the sale or exchange of property other than a capital asset if such inventory items are sold or exchanged within 5 years from the date of the distribution by the partnership. The character of any gain or loss from a sale or exchange by the distributee partner of such inventory items after 5 years from the date of distribution shall be determined as of the date of such sale or exchange by reference to the character of the assets in his hands at that date (inventory items, capital assets, property used in a trade or business, etc.).

(b) Holding period for distributed property. A partner's holding period for property distributed to him by a partnership shall include the period such property was held by the partnership. The provisions of this paragraph do not apply for the purpose of determining the 5-year period described in section 735(a)(2) and paragraph (a)(2) of this section. If the property has been contributed to the partnership by a partner, then the period that the property was held by such partner shall also be included. See section 1223(2). For a partnership's holding period for contributed property, see § 1.723–1.

(c) Effective date. Section 735(a) applies to any property distributed by a partnership to a partner after March 9, 1954. See section 771(b)(2) and paragraph (b)(2) of § 1.771–1. However, see section 771(c).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8574, July 7, 1965]

§ 1.736–1 Payments to a retiring partner or a deceased partner's successor in interest.

(a) Payments considered as distributive share or guaranteed payment. (1)(i) Section 736 and this section apply only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. See section 761(d). Section 736 and this section do not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Section 736 and this section apply only to payments made by the partnership and not to transactions between the partners. Thus, a sale by partner A to partner B of his entire one-fourth interest in partnership ABCD would not come within the scope of section 736.

(ii) A partner retires when he ceases to be a partner under local law. However, for the purposes of subchapter K, chapter 1 of the Code, a retired partner or a deceased partner's successor will be treated as a partner until his interest in the partnership has been completely liquidated.

(2) When payments (including assumption of liabilities treated as a distribution of money under section 752) are made to a withdrawing partner, that is, a retiring partner or the estate or other successor in interest of a deceased partner, the amounts paid may represent several items. In part, they may represent the fair market value at the time of his death or retirement of the withdrawing partner's interest in all the assets of the partnership (including inventory) unreduced by partnership liabilities. Also, part of such payments may be attributable to his interest in unrealized receivables and part to an arrangement among the partners in the nature of mutual insurance. When a partnership makes such payments, whether or not related to partnership income, to retire the withdrawing partner's entire interest in the partnership, the payments must be allocated between (i) payments for the value of his interest in assets, except unrealized receivables and, under some circumstances, good will (section 736(b)), and (ii) other payments (section 736(a)). The amounts paid for his interest in assets are treated in the same manner as a distribution in complete liquidation under sections 731, 732, and, where applicable, 751. See paragraph (b)(4)(ii) of § 1.751–1. The remaining partners are allowed no deduction for these payments since they represent either a distribution or a purchase of the withdrawing partner's capital interest by the partnership (composed of the remaining partners).

(3) Under section 736(a), the portion of the payments made to a withdrawing partner for his share of unrealized receivables, good will (in the absence of an agreement to the contrary), or otherwise not in exchange for his interest in assets under the rules contained in paragraph (b) of this section will be considered either—

(i) A distributive share of partnership income, if the amount of payment is determined with regard to income of the partnership; or

(ii) A guaranteed payment under section 707(c), if the amount of the payment is determined without regard to income of the partnership.

(4) Payments, to the extent considered as a distributive share of partnership income under section 736(a)(1), are taken into account under section 702 in the income of the withdrawing partner and thus reduce the amount of the distributive shares of the remaining partners. Payments, to

the extent considered as guaranteed payments under section 736(a)(2), are deductible by the partnership under section 162(a) and are taxable as ordinary income to the recipient under section 61(a). See section 707(c).

(5) The amount of any payments under section 736(a) shall be included in the income of the recipient for his taxable year with or within which ends the partnership taxable year for which the payment is a distributive share, or in which the partnership is entitled to deduct such amount as a guaranteed payment. On the other hand, payments under section 736(b) shall be taken into account by the recipient for his taxable year in which such payments are made. See paragraph (b)(4) of this section.

(6) A retiring partner or a deceased partner's successor in interest receiving payments under section 736 is regarded as a partner until the entire interest of the retiring or deceased partner is liquidated. Therefore, if one of the members of a 2-man partnership retires under a plan whereby he is to receive payments under section 736, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's entire interest is liquidated, since the retiring partner continues to hold a partnership interest in the partnership until that time. Similarly, if a partner in a 2-man partnership dies, and his estate or other successor in interest receives payments under section 736, the partnership shall not be considered to have terminated upon the death of the partner but shall terminate as to both partners only when the entire interest of the decedent is liquidated. See section 708(b).

(b) Payments for interest in partnership. (1) Payments made in liquidation of the entire interest of a retiring partner or deceased partner shall, to the extent made in exchange for such partner's interest in partnership property (except for unrealized receivables and good will as provided in subparagraphs (2) and (3) of this paragraph), be considered as a distribution by the partnership (and not as a distributive share or guaranteed payment under section 736(a)). Generally, the valuation placed by the partners upon a partner's interest in partnership property in an arm's length agreement will be regarded as correct. If such valuation reflects only the partner's net interest in the property (*i.e.*, total assets less liabilities), it must be adjusted so that both the value of the partner's interest in property and the basis for his interest take into account the partner's share of partnership liabilities. Gain or loss with respect to distributions under section 736(b) and this paragraph will be recognized to the distributee to the extent provided in section 731 and, where applicable, section 751.

(2) Payments made to a retiring partner or to the successor in interest of a deceased partner for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, shall not be considered as made in exchange for such partner's interest in partnership property. Such payments shall be treated as payments under section 736(a) and paragraph (a) of this section. For definition of unrealized receivables, see section 751(c).

(3) For the purposes of section 736(b) and this paragraph, payments made to a retiring partner or to a successor in interest of a deceased partner in exchange for the interest of such partner in partnership property shall not include any amount paid for the partner's share of good will of the partnership in excess of its partnership basis, including any special basis adjustments for it to which such partner is entitled, except to the extent that the partnership agreement provides for a reasonable payment with respect to such good will. Such payments shall be considered as payments under section 736(a). To the extent that the partnership agreement provides for a reasonable payment with respect to good will, such payments shall be treated under section 736(b) and this paragraph. Generally, the valuation placed upon good will by an arm's length agreement of the partners, whether specific in amount or determined by a formula, shall be regarded as correct.

(4) Payments made to a retiring partner or to a successor in interest of a deceased partner for his interest in inventory shall be considered as made in exchange for such partner's interest in partnership property for the purposes of section 736(b) and this paragraph. However, payments for an interest in substantially appreciated inventory items, as defined in section 751(d), are subject to the rules provided in section 751(b) and paragraph (b) of § 1.751–1. The partnership basis in inventory items as to a deceased partner's successor in interest does not change because of the death of the partner unless the partnership has elected the optional basis adjustment under section 754. But see paragraph (b)(3)(iii) of § 1.751–1.

(5) Where payments made under section 736 are received during the taxable year, the recipient must segregate that portion of each such payment which is determined to be in exchange for the

partner's interest in partnership property and treated as a distribution under section 736(b) from that portion treated as a distributive share or guaranteed payment under section 736(a). Such allocation shall be made as follows—

(i) If a fixed amount (whether or not supplemented by any additional amounts) is to be received over a fixed number of years, the portion of each payment to be treated as a distribution under section 736(b) for the taxable year shall bear the same ratio to the total fixed agreed payments for such year (as distinguished from the amount actually received) as the total fixed agreed payments under section 736(b) bear to the total fixed agreed payments under section 736 (a) and (b). The balance, if any, of such amount received in the same taxable year shall be treated as a distributive share or a guaranteed payment under section 736(a)(1) or (2). However, if the total amount received in any one year is less than the amount considered as a distribution under section 736(b) for that year, then any unapplied portion shall be added to the portion of the payments for the following year or years which are to be treated as a distribution under section 736(b). For example, retiring partner W who is entitled to an annual payment of $6,000 for 10 years for his interest in partnership property, receives only $3,500 in 1955. In 1956, he receives $10,000. Of this amount, $8,500 ($6,000 plus $2,500 from 1955) is treated as a distribution under section 736(b) for 1956; $1,500, as a payment under section 736(a).

(ii) If the retiring partner or deceased partner's successor in interest receives payments which are not fixed in amount, such payments shall first be treated as payments in exchange for his interest in partnership property under section 736(b) to the extent of the value of that interest and, thereafter, as payments under section 736(a).

(iii) In lieu of the rules provided in subdivisions (i) and (ii) of this subparagraph, the allocation of each annual payment between section 736(a) and (b) may be made in any manner to which all the remaining partners and the withdrawing partner or his successor in interest agree, provided that the total amount allocated to property under section 736(b) does not exceed the fair market value of such property at the date of death or retirement.

(6) Except to the extent section 751(b) applies, the amount of any gain or loss with respect to payments under section 736(b) for a retiring or deceased partner's interest in property for each year of payment shall be determined under section 731. However, where the total of section 736(b) payments is a fixed sum, a retiring partner or a deceased partner's successor in interest may elect (in his tax return for the first taxable year for which he receives such payments), to report and to measure the amount of any gain or loss by the difference between—

(i) The amount treated as a distribution under section 736(b) in that year, and

(ii) The portion of the adjusted basis of the partner for his partnership interest attributable to such distribution (*i.e.*, the amount which bears the same proportion to the partner's total adjusted basis for his partnership interest as the amount distributed under section 736(b) in that year bears to the total amount to be distributed under section 736(b)).

A recipient who elects under this subparagraph shall attach a statement to his tax return for the first taxable year for which he receives such payments, indicating his election and showing the computation of the gain included in gross income.

(7) The provisions of this paragraph may be illustrated by the following examples:

Example (1). Partnership ABC is a personal service partnership and its balance sheet is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$13,000	$13,000
Unrealized receivables	0	30,000
Capital and section 1231 assets	20,000	23,000
Total	33,000	66,000

LIABILITIES AND CAPITAL

	Adjusted basis per books	Market value
Liabilities	$3,000	$3,000
Capital:		
A	10,000	21,000
B	10,000	21,000
C	10,000	21,000
Total	33,000	66,000

Partner A retires from the partnership in accordance with an agreement whereby his share of liabilities ($1,000) is assumed. In addition he is to receive $9,000 in the year of retirement plus $10,000 in each of the two succeeding years. Thus, the total that A receives for his partnership interest is $30,000 ($29,000 in cash and $1,000 in liabilities assumed). Under the agreement terminating A's interest, the value of A's interest in section 736(b) partnership property is $12,000 (one-third of $36,000, the sum of $13,000 cash and $23,000, the fair market value of capital and section 1231 assets). A's share in unrealized receivables is not included in his interest in partnership property described in section 736(b). Since the basis of A's interest is $11,000 ($10,000 plus $1,000, his share of partner-

ship liabilities), he will realize a capital gain of $1,000 ($12,000 minus $11,000) from the disposition of his interest in partnership property. The remaining $18,000 ($30,000 minus $12,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c). The payment for the first year is $10,000, consisting of $9,000 in cash, plus $1,000 in liability assumed (section 752(b)). Thus, unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, each annual payment of $10,000 will be allocated as follows: $6,000 (18,000/30,000 of $10,000) is a section 736(a)(2) payment and $4,000 (12,000/30,000 of $10,000) is a payment for an interest in section 736(b) partnership property. (The partnership may deduct the $6,000 guaranteed payment made to A in each of the 3 years.) The gain on the payments for partnership property will be determined under section 731, as provided in subparagraph (6) of this paragraph. A will treat only $4,000 of each payment as a distribution in a series in liquidation of his entire interest and, under section 731, will have a capital gain of $1,000 when the last payment is made. However, if A so elects, as provided in subparagraph (6) of this paragraph, he may treat such gain as follows: Of each $4,000 payment attributable to A's interest in partnership property, $333 is capital gain (one-third of the total capital gain of $1,000), and $3,667 is a return of capital.

Example (2). Assume the same facts as in example (1) of this subparagraph except that the agreement between the partners provides for payments to A for 3 years of a percentage of annual income instead of a fixed amount. Unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, all payments received by A up to $12,000 shall be treated under section 736(b) as payments for A's interest in partnership property. His gain of $1,000 will be taxed only after he has received his full basis under section 731. Since the payments are not fixed in amount, the election provided in subparagraph (6) of this paragraph is not available. Any payments in excess of $12,000 shall be treated as a distributive share of partnership income to A under section 736(a)(1).

Example (3). Assume the same facts as in example (1) of this subparagraph except that the partnership agreement provides that the payment for A's interest in partnership property shall include payment for his interest in the good will of the partnership. At the time of A's retirement, the partners determine the value of partnership good will to be $9,000. The value of A's interest in partnership property described in section 736(b) is thus $15,000 (one-third of $45,000, the sum of $13,000 cash, plus $23,000, the value of capital and section 1231 assets, plus $9,000 good will). From the disposition of his interest in partnership property, A will realize a capital gain of $4,000 ($15,000 minus $11,000) the basis of his interest. The remaining $15,000 ($30,000 minus $15,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

Example (4). Assume the same facts as in example (1) of this subparagraph except that the capital and section 1231 assets consist of an item of section 1245 property (as defined in section 1245(a)(3)). Assume further that under paragraph (c)(4) of § 1.751–1 the section 1245 property is an unrealized receivable to the extent of $2,000. Therefore, the value of A's interest in section 736(b) partnership property is only $11,333 (one-third of $34,000, the sum of $13,000 cash and $21,000, the fair market value of section 1245 property to the extent not an unrealized receivable). From the disposition of his interest in partnership property, A will realize a capital gain of $333 ($11,333 minus $11,000, the basis of his interest). The remaining $18,667 ($30,000 minus $11,333) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

(c) Cross reference. See section 753 for treatment of payments under section 736(a) as income in respect of a decedent under section 691.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8574, July 7, 1965]

Transfers Of Interests In A Partnership

§ 1.741–1 Recognition and character of gain or loss on sale or exchange.

(a) The sale or exchange of an interest in a partnership shall, except to the extent section 751(a) applies, be treated as the sale or exchange of a capital asset, resulting in capital gain or loss measured by the difference between the amount realized and the adjusted basis of the partnership interest, as determined under section 705. For treatment of selling partner's distributive share up to date of sale, see section 706(c)(2). Where the provisions of section 751 require the recognition of ordinary income or loss with respect to a portion of the amount realized from such sale or exchange, the amount realized shall be reduced by the amount attributable under section 751 to unrealized receivables and substantially appreciated inventory items, and the adjusted basis of the transferor partner's interest in the partnership shall be reduced by the portion of such basis attributable to such unrealized receivables and substantially appreciated inventory items. See section 751 and § 1.751–1.

(b) Section 741 shall apply whether the partnership interest is sold to one or more members of the partnership or to one or more persons who are not members of the partnership. Section 741 shall also apply even though the sale of the partnership interest results in a termination of the partnership under section 708(b). Thus, the provisions of section 741 shall be applicable (1) to the transferor partner in a 2-man partnership when he sells his interest to the other partner, and (2) to all the members of a partnership when they sell their interests to one or more persons outside the partnership.

(c) See section 351 for nonrecognition of gain or loss upon transfer of a partnership interest to a corporation controlled by the transferor.

(d) For rules relating to the treatment of liabilities on the sale or exchange of interests in a partnership see §§ 1.752–1 and 1.1001–2.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7741, 45 FR 81745, Dec. 12, 1980]

§ 1.742–1 Basis of transferee partner's interest.

The basis to a transferee partner of an interest in a partnership shall be determined under the general basis rules for property provided by part II (section 1011 and following), subchapter O, chapter 1 of the Code. Thus, the basis of a purchased interest will be its cost. The basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of his death or at the alternate valuation date, increased by his estate's or other successor's share of partnership liabilities, if any, on that date, and reduced to the extent that such value is attributable to items constituting income in respect of a decedent (see section 753 and paragraph (c)(3)(v) of § 1.706–1 and paragraph (b) of § 1.753–1) under section 691. See section 1014(c). For basis of contributing partner's interest, see section 722. The basis so determined is then subject to the adjustments provided in section 705.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.743–1 Optional adjustment to basis of partnership property.

(a) General rule. The basis of partnership property shall not be adjusted as the result of a transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, unless the election provided by section 754 (relating to optional adjustment to basis of partnership property) is in effect with respect to the partnership. However, whether or not the election provided in section 754 is in effect, the basis of partnership property shall not be adjusted as the result of a contribution of property, including money, to the partnership.

(b) Adjustment to basis of partnership property—(1) Determination of adjustment. In the case of a transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, a partnership as to which the election under section 754 is in effect shall:

(i) Increase the adjusted basis of partnership property by the excess of the transferee's basis for his partnership interest over his share of the adjusted basis to the partnership of all partnership property, or

(ii) Decrease the adjusted basis of partnership property by the excess of the transferee partner's share of the adjusted basis of all partnership property over his basis for his partnership interest. The amount of the increase or decrease constitutes an adjustment affecting the basis of partnership property with respect to the transferee partner only. Thus, for purposes of depreciation, depletion, gain or loss, and distributions, the transferee partner will have a special basis for those partnership properties which are adjusted under section 743(b) and this paragraph. This special basis is his share of the common partnership basis (*i.e.*, the adjusted basis of such properties to the partnership without regard to any special basis adjustments of any transferee) plus or minus his special basis adjustments. A partner's share of the adjusted basis of partnership property is equal to the sum of his interest as a partner in partnership capital and surplus, plus his share of partnership liabilities. Where an agreement with respect to contributed property is in effect under section 704(c)(2), such agreement shall be taken into account in determining a partner's share of the adjusted basis of partnership property. Generally, if a partner's interest in partnership capital and profits is one-third, his share of the adjusted basis of partnership property will be one-third of such basis. The provisions of this paragraph may be illustrated by the following examples:

Example (1). A is a member of partnership ABC in which the partners have equal interests in capital and profits. The partnership has made the election under section 754, relating to the optional adjustment to the basis of partnership property. A sells his interest to P for $22,000. The balance sheet of the partnership at the date of sale shows the following:

ASSETS

	Adjusted basis per books	Market value
Cash	$5,000	$5,000
Accounts receivable	10,000	10,000
Inventory	20,000	21,000
Depreciable assets	20,000	40,000
Total	55,000	76,000

LIABILITIES AND CAPITAL

	Adjusted basis per books	Market value
Liabilities	$10,000	$10,000
Capital:		
A	15,000	22,000
B	15,000	22,000
C	15,000	22,000
Total	55,000	76,000

The amount of the adjustment under section 743(b) is the difference between the basis of the transferee's interest in the partnership and his share of the adjusted basis of partnership property. Under section 742, the basis of P's interest is $25,333 (the cash paid for A's interest, $22,000, plus $3,333, P's share of partnership liabilities). P's share of the adjusted basis of partnership property is $18,333, *i.e.*, $15,000 plus

$3,333. The amount to be added to the basis of partnership property is, therefore, $7,000, the difference between $25,333 and $18,333. This amount will be allocated to partnership properties in accordance with the rules set forth in section 755 and § 1.755–1.

Example (2). D is a member of partnership DEF in which the partners have equal interests in profits, but not in capital. The partnership has made the election under section 754. D dies and his interest passes to W, his widow. The balance sheet of the partnership at the date of D's death shows the following:

ASSETS

	Adjusted basis per books	Market value
Cash	$7,000	$7,000
Accounts receivable	10,000	10,000
Inventory	20,000	24,000
Depreciable assets	20,000	40,000
Total	57,000	81,000

LIABILITIES AND CAPITAL

	Adjusted basis per books	Value
Liabilities	$10,000	$10,000
Capital:		
D	18,000	26,000
E	15,000	23,000
F	14,000	22,000
Total	57,000	81,000

The amount of the adjustment under section 743(b) is the difference between the basis of the transferee's interest in the partnership and her share of the adjusted basis of partnership property. Under section 742, the basis of W's interest is $29,333 (the fair market value of D's interest at his death, $26,000, plus $3,333, his share of partnership liabilities). W's share of the adjusted basis of partnership property is $21,333 (*i.e.*, $18,000 plus $3,333, her share of partnership liabilities). The amount to be added to the basis of partnership property is, therefore, $8,000, the difference between $29,333 and $21,333. This amount will be allocated to partnership properties in accordance with the rules set forth in section 755 and § 1.755–1.

Note that in examples (1) and (2) of this subparagraph the amount of the adjustment does not depend upon the adjusted basis to the transferor for his interest in partnership capital.

(2) Determination of partner's share of adjusted basis of partnership property. (i) Under the provisions of section 743(b), a partner's share of the adjusted basis of partnership property shall be determined by taking into account the effect of any partnership agreement with respect to contributed property as described in section 704(c)(2), or the effect of the contribution of undivided interests under section 704(c)(3). This rule may be illustrated by the following examples:

Example (1). A, B, and C form partnership ABC, to which A contributes land worth $1,000 (property X) with an adjusted basis to him of $400, and B and C each contributes $1,000 cash. Each partner has $1,000 credited to him on the books of the partnership as his capital contribution. The partners share in profits equally. During the partnership's first taxable year, property X appreciates in value to $1,300. A sells his one-third interest in the partnership to D for $1,100, when the election under section 754 is in effect. No agreement under section 704(c)(2) is in effect. The adjusted basis of the partnership property is increased with respect to D by the excess of his basis for his partnership interest, $1,100, over his share of the adjusted basis of partnership property, $800 (⅓ of $2,400, the total adjusted basis of partnership property). The amount of the adjustment, therefore, is $300 ($1,100 minus $800), which is an increase in the basis of partnership property with respect to D only. This special basis adjustment will be allocated to property X. (See section 755 and § 1.755–1.) If property X is sold for $1,600, the gain to the partnership is $1,200 ($1,600 received, less the adjusted common partnership basis of $400 for property X). Thus, each partner's distributive share of the gain on the sale is $400. However, D's recognized gain is only $100 (his $400 distributive share of the gain, reduced by $300, his special basis adjustment with respect to property X). If D purchased his interest from B or C, the partners who contributed cash, D's adjustment under section 743(b) would also be $300, computed in exactly the same manner as in the case of a purchase from A.

Example (2). Assume that partnership ABC described in example (1) of this subdivision has an agreement under section 704(c)(2) with respect to property X, stating that upon the sale of that property any gain, to the extent attributable to the precontribution appreciation of $600 (the difference between its value, $1,000, and its basis, $400, at the time of the contribution) is to be allocated entirely to A, who contributed property X. Upon the purchase of A's interest by D for $1,100, the computation of D's special basis would differ from that indicated in example (1) of this subdivision as follows: Under the partnership agreement, A's share of the $2,400 adjusted basis of partnership property is only $400 (his basis for property X prior to its contribution to the partnership), and B's and C's share is $1,000 each (the amount of the cash investment of each). The amount of the increase to D in the adjusted basis of partnership property under section 743(b)(1) is $700 (the excess of $1,100, D's cost basis for his interest, over $400, A's share of the adjusted basis of partnership property to which D succeeds). This amount constitutes an adjustment to the basis of partnership property with respect to D only. If X is sold by the partnership for $1,600, the gain is $1,200 ($1,600 received less the adjusted common partnership basis of $400). Under the partnership agreement, $600 of this gain, which is attributable to precontribution appreciation in value, is allocable to D, who is A's successor. The remaining $600 gain is not subject to the agreement and is allocable to the partners equally, $200 each. D's distributive share of the partnership gain is thus $600 plus $200, or $800. However, D has a special basis adjustment of $700 under section 743(b)(1), which reduces his gain from $800 to $100. B and C each has a gain of $200, which is unaffected by the transfer of A's interest to D.

Example (3). Assume the same facts as in example (2) of this subdivision, except that D has purchased his interest from B instead of from A. His special basis adjustment for partnership property in this case differs from that where he had purchased his interest from A, because of the effect of the agreement under section 704(c)(2). In this case, D is a successor to B, whose share of the adjusted basis of partnership property is $1,000, instead of A, whose share is only $400. As a result, the adjustment under section 743(b)(1) is the excess of D's cost basis for his interest, $1,100, over his share of the adjusted basis of partnership property, $1,000, or $100. In this

case, if property X is sold for $1,600, the partnership gain is $1,200 ($1,600 less the adjusted partnership basis of $400). Of this gain, $600, representing precontribution appreciation, is allocable to A under the partnership agreement. The remaining $600 is allocable in the amount of $200 to each partner. Since D as a transferee has a special basis adjustment of $100 under section 743(b)(1), his gain is reduced from $200 to $100.

(ii) If a partner receives a distribution of property with respect to which another partner has a special basis adjustment, the distributee shall not take into account the special basis adjustment of the other partner. However, the partner with the special basis adjustment will reallocate it under section 755 to remaining partnership property of a like kind or, if he receives a distribution of like property, to such distributed property. If a partner receives a distribution of property with respect to which he has a special basis adjustment, such basis adjustment will be taken into account when relevant under section 732. See paragraph (b) of § 1.732–2. If, at the time a partner receives property (whether or not he has a special basis adjustment with respect to such property), he relinquishes his interest in other property of a like kind with respect to which he has a special basis adjustment, the adjusted basis to the partnership of the distributed property shall include his special basis adjustment for the property in which he relinquished his interest. For the purposes of the preceding sentence, a partner will be considered as having relinquished his interest in any remaining partnership properties when his interest has been completely liquidated; however, when a partner receives a distribution not in liquidation, he will be considered as relinquishing his interest only in property distributed to other partners. For the purposes of this subdivision, like property means property of the same class, that is, stock in trade, property used in the trade or business, capital assets, etc. For certain adjustments to the basis of remaining partnership property after a distribution to a transferee partner, see paragraph (b) of § 1.734–2. The provisions of this subdivision may be illustrated by the following examples:

Example (1). C is a transferee partner in partnership BC. The partnership owns, among other assets, X, a depreciable asset with a common basis to the partnership of $1,000 and a special basis adjustment to C of $200, and Y, another depreciable asset with a common basis of $800 and a special basis adjustment to C of $300. B and C agree that B will receive a distribution of property Y, and C will receive a distribution of property X, with all other property to remain in the partnership. With respect to B, the partnership basis of property Y is $800, the common partnership basis. Y will, therefore, have a basis of $800 in B's hands under section 732(a) which provides for the use of a carryover basis in the case of current distributions. With respect to C, however, the partnership basis of property X is $1,500, the common partnership basis of $1,000, plus C's special basis adjustment of $200 for property X, plus C's additional special basis adjustment of $300 for property Y, in which he has relinquished his interest.

Example (2). (a) Partner D acquired his one-third interest in partnership BCD for $14,000 from a previous partner when an election under section 754 was in effect. Therefore, under section 743(b), D has a special basis adjustment for certain partnership property. Assume that at the time of the distribution in paragraph (b) of this example, the partnership assets consist of cash and rental property and that such assets and D's special basis adjustments under section 743(b) are as follows:

Item	Fair market value	Common partnership basis	D's share	D's special basis adjustment	Partnership basis to D
Cash	$12,000	$12,000	$4,000	......	$4,000
House:					
U	9,000	1,200	400	......	400
V	6,000	4,500	1,500	......	1,500
W	8,000	1,500	500	......	500
X	9,000	4,800	1,600	$2,000	3,600
Y	9,000	6,000	2,000	......	2,000
Z	7,000	3,000	1,000	1,000	2,000
Total ...	60,000	33,000	11,000	3,000	14,000

(b) Assume further that D receives $4,000 in cash and houses Y and Z in complete liquidation of his interest in partnership BCD. In determining the basis to D of houses Y and Z under section 732(b) and (c), D must allocate $10,000 basis ($14,000 basis for his interest, less $4,000 cash received) to houses Y and Z in proportion to their adjusted basis to the partnership. For purposes of section 732(c), the adjusted basis of house Y is $7,200 ($6,000 common partnership basis, plus $1,200, allocated share of D's special basis adjustment of $2,000 for house X, in which D relinquished his interest). The adjusted basis of house Z is $4,800 ($3,000 common partnership basis, plus $1,000, D's special basis for house Z, plus $800, allocated share of D's special basis of $2,000 for house X, in which D relinquished his interest). Under the rule of this subdivision, 6,000/10,000 of the $2,000 special basis adjustment for X is allocated to Y and 4,000/10,000 of such amount to Z. Therefore, $6,000 basis (7,200/12,000 of $10,000) is allocated to house Y and $4,000 basis (4,800/12,000 of $10,000) to house Z.

(c) Since houses Y and Z had $12,000 basis to the partnership, as computed in paragraph (b) of this example, and only $10,000 basis to D, as determined under section 732, the partnership, under section 734(b)(1)(B), must increase the basis of remaining partnership property (houses U, V, W, and X) by $2,000 (excess of $12,000 over $10,000). For allocation of this amount, see section 755 and § 1.755–1.

(iii) Where an adjustment is made under section 743(b) to the basis of partnership property subject to depletion, any depletion allowable shall be determined separately for each partner, including the transferee partner, based on his interest in such property. See paragraph (a)(8) of § 1.702–1. This rule may be illustrated by the following example:

Example. A, B, and C each contributes $5,000 cash to form partnership ABC, which purchases oil property for $15,000. C subsequently sells his partnership interest to D for $100,000 when the election under section 754 is in effect. D has a special basis adjustment for the oil property of $95,000 (the

difference between D's basis, $100,000, and his share of the basis of partnership property, $5,000). Assume that the depletion allowance computed under the percentage method would be $21,000 for the taxable year so that each partner would be entitled to $7,000 as his share of the deduction for depletion. However, under the cost depletion method, at an assumed rate of 10 percent, the allowance with respect to D's one-third interest which has a basis to him of $100,000 ($5,000, plus his special basis adjustment of $95,000) is $10,000, although the cost depletion allowance with respect to the one-third interest of A and B in the oil property, each of which has a basis of $5,000, is only $500. For partners A and B, the percentage depletion is greater than cost depletion and each will deduct $7,000 based on the percentage depletion method. However, as to D, the transferee partner, the cost depletion method results in a greater allowance and D will, therefore, deduct $10,000 based on cost depletion. See section 613(a).

(iv) Where there has been more than one transfer of partnership interests, the last transferee's special basis adjustment, if any, under section 743(b) shall be determined by reference to the partnership common basis for its property without regard to any prior transferee's special basis adjustment. For example, A, B, and C form a partnership. A and B each contributes $1,000 cash and C contributes land with a basis and value of $1,000. When the land has appreciated in value to $1,300, A sells his interest to D for $1,100 (⅓ of $3,300, the value of the partnership property). The election under section 754 is in effect; therefore, D has a special basis adjustment of $100 with respect to the land under section 743(b). After the land has further appreciated in value to $1,600, D sells his interest to E for $1,200 (⅓ of $3,600, the value of the partnership property). Under section 743(b), E has a special basis adjustment of $200. This amount is determined without regard to any special basis adjustment that D may have had in the partnership assets.

(3) **Returns.** A transferee partner who has a special basis adjustment under section 743(b) shall attach a statement to his income tax return for the first taxable year in which the basis of any partnership property subject to the adjustment is pertinent in determining his income tax, showing the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

(c) **Allocation of basis.** For the allocation of basis among partnership properties where section 743(b) applies, see section 755 and § 1.755-1.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

Provisions Common To Part II, Subchapter K, Chapter 1 Of The Code

§ 1.751-1 Unrealized receivables and inventory items.

(a) **Sale or exchange of interest in a partnership—(1) Character of amount realized.** To the extent that money or property received by a partner in exchange for all or part of his partnership interest is attributable to his share of the value of partnership unrealized receivables or substantially appreciated inventory items, the money or fair market value of the property received shall be considered as an amount realized from the sale or exchange of property other than a capital asset. The remainder of the total amount realized on the sale or exchange of the partnership interest is realized from the sale or exchange of a capital asset under section 741. For definition of "unrealized receivables" and "inventory items which have appreciated substantially in value", see section 751(c) and (d). Unrealized receivables and substantially appreciated inventory items are hereafter in this section referred to as "section 751 property". See paragraph (e) of this section.

(2) **Determination of gain or loss.** The income or loss realized by a partner upon the sale or exchange of his interest in section 751 property is the difference between (i) the portion of the total amount realized for the partnership interest allocated to section 751 property, and (ii) the portion of the selling partner's basis for his entire interest allocated to such property. Generally, the portion of the total amount realized which the seller and the purchaser allocate to section 751 property in an arm's length agreement will be regarded as correct. The portion of the partner's adjusted basis for his partnership interest to be allocated to section 751 property shall be an amount equal to the basis such property would have had under section 732 (including subsection (d) thereof) if the selling partner had received his share of such properties in a current distribution made immediately before the sale. See §§ 1.732-1 and 1.732-2. Such basis shall reflect the rules of section 704(c)(3), if applicable, or any agreement under section 704(c)(2). Any gain or loss recognized which is attributable to section 751 property will be ordinary gain or loss. The difference between the remainder, if any, of the partner's adjusted basis for his partnership interest and the balance, if any, of the amount realized is the transferor's capital gain or loss on the sale of his partnership interest.

(3) **Statement required.** A transferor partner selling or exchanging any part of his interest in a

partnership which has any section 751 property at the time of sale or exchange shall submit with his income tax return for the taxable year in which the sale or exchange occurs a statement setting forth separately the following information:

(i) The date of the sale or exchange, the amount of the transferor partner's adjusted basis for his partnership interest, and the portion thereof attributable to section 751 property under section 732; and

(ii) The amount of any money and the fair market value of any other property received or to be received for the transferred interest in the partnership, and the portion thereof attributable to section 751 property.

(iii) If the transferor partner computes his adjusted basis for section 751 property under the provisions of section 732(d), he must also include in the statement the information required by paragraph (d)(3) of § 1.732-1.

(iv) If the transferor partner has a special basis adjustment under section 743(b), he must also include in the statement the computation of his special basis adjustment and the partnership properties to which the adjustment has been allocated.

(b) Certain distributions treated as sales or exchanges—(1) In general. (i) Certain distributions to which section 751(b) applies are treated in part as sales or exchanges of property between the partnership and the distributee partner, and not as distributions to which sections 731 through 736 apply. A distribution treated as a sale or exchange under section 751(b) is not subject to the provisions of section 707(b). Section 751(b) applies whether or not the distribution is in liquidation of the distributee partner's entire interest in the partnership. However, section 751(b) applies only to the extent that a partner either receives section 751 property in exchange for his relinquishing any part of his interest in other property, or receives other property in exchange for his relinquishing any part of his interest in section 751 property.

(ii) Section 751(b) does not apply to a distribution to a partner which is not in exchange for his interest in other partnership property. Thus, section 751(b) does not apply to the extent that a distribution consists of the distributee partner's share of section 751 property or his share of other property. Similarly, section 751(b) does not apply to current drawings or to advances against the partner's distributive share, or to a distribution which is, in fact, a gift or payment for services or for the use of capital. In determining whether a partner has received only his share of either section 751 property or of other property, his interest in such property remaining in the partnership immediately after a distribution must be taken into account. For example, the section 751 property in partnership ABC has a fair market value of $100,000 in which partner A has an interest of 30 percent, or $30,000. If A receives $20,000 of section 751 property in a distribution, and continues to have a 30-percent interest in the $80,000 of section 751 property remaining in the partnership after the distribution, only $6,000 ($30,000 minus $24,000 (30 percent of $80,000)) of the section 751 property received by him will be considered to be his share of such property. The remaining $14,000 ($20,000 minus $6,000) received is in excess of his share.

(iii) If a distribution is, in part, a distribution of the distributee partner's share of section 751 property, or of other property (including money) and, in part, a distribution in exchange of such properties, the distribution shall be divided for the purpose of applying section 751(b). The rules of section 751(b) shall first apply to the part of the distribution treated as a sale or exchange of such properties, and then the rules of sections 731 through 736 shall apply to the part of the distribution not treated as a sale or exchange. See paragraph (b)(4)(ii) of this section for treatment of payments under section 736(a).

(2) Distribution of section 751 property (unrealized receivables or substantially appreciated inventory items). (i) To the extent that a partner receives section 751 property in a distribution in exchange for any part of his interest in partnership property (including money) other than section 751 property, the transaction shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the income or loss to the partnership will be measured by the difference between the adjusted basis to the partnership of the section 751 property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in other partnership property which he relinquished in the exchange. In computing the partners' distributive shares of such ordinary income or loss, the income or loss shall be allocated only

to partners other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes gain or loss measured by the difference between his adjusted basis for the property relinquished in the exchange (including any special basis adjustment which he may have) and the fair market value of the section 751 property received by him in exchange for his interest in other property which he has relinquished. The distributee's adjusted basis for the property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b). The character of the gain or loss to the distributee partner shall be determined by the character of the property in which he relinquished his interest.

(3) Distribution of partnership property other than section 751 property. (i) To the extent that a partner receives a distribution of partnership property (including money) other than section 751 property in exchange for any part of his interest in section 751 property of the partnership, the distribution shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes gain or loss on the sale or exchange of the property other than section 751 property. The amount of the gain to the partnership will be measured by the difference between the adjusted basis to the partnership of the distributed property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in section 751 property which he relinquished in the exchange. The character of the gain or loss to the partnership is determined by the character of the distributed property treated as sold or exchanged by the partnership. In computing the partners' distributive shares of such gain or loss, the gain or loss shall be allocated only to partners other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the distributee partner's income or loss shall be measured by the difference between his adjusted basis for the section 751 property relinquished in the exchange (including any special basis adjustment which he may have), and the fair market value of other property (including money) received by him in exchange for his interest in the section 751 property which he has relinquished. The distributee partner's adjusted basis for the section 751 property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b).

(4) Exceptions. (i) Section 751(b) does not apply to the distribution to a partner of property which the distributee partner contributed to the partnership. The distribution of such property is governed by the rules set forth in sections 731 through 736, relating to distributions by a partnership.

(ii) Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner's successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner's successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other property. Thus, payments to a retiring partner or to a deceased partner's successor in interest under section 736 must first be divided between payments under section 736(a) and section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736–1.

(5) Statement required. A partnership which distributes section 751 property to a partner in exchange for his interest in other partnership property, or which distributes other property in exchange for any part of the partner's interest in

section 751 property, shall submit with its return for the year of the distribution a statement showing the computation of any income, gain, or loss to the partnership under the provisions of section 751(b) and this paragraph. The distributee partner shall submit with his return a statement showing the computation of any income, gain, or loss to him. Such statement shall contain information similar to that required under paragraph (a)(3) of this section.

(c) **Unrealized receivables.** (1) The term "unrealized receivables", as used in Subchapter K, Chapter 1 of the Code, means any rights (contractual or otherwise) to payment for—

(i) Goods delivered or to be delivered (to the extent that such payment would be treated as received for property other than a capital asset), or

(ii) Services rendered or to be rendered,

to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Such rights must have arisen under contracts or agreements in existence at the time of sale or distribution, although the partnership may not be able to enforce payment until a later time. For example, the term includes trade accounts receivable of a cash method taxpayer, and rights to payment for work or goods begun but incomplete at the time of the sale or distribution.

(2) The basis for such unrealized receivables shall include all costs or expenses attributable thereto paid or accrued but not previously taken into account under the partnership method of accounting.

(3) In determining the amount of the sale price attributable to such unrealized receivables, or their value in a distribution treated as a sale or exchange, any arm's length agreement between the buyer and the seller, or between the partnership and the distributee partner, will generally establish the amount or value. In the absence of such an agreement, full account shall be taken not only of the estimated cost of completing performance of the contract or agreement, but also of the time between the sale or distribution and the time of payment.

(4)(i) With respect to any taxable year of a partnership beginning after December 31, 1962, the term "unrealized receivables," for purposes of this section and sections 731, 736, 741, and 751, also includes "potential section 1245 income." With respect to each item of partnership section 1245 property (as defined in sec. 1245(a)(3)), "potential section 1245 income" is the amount which would be treated as gain to which section 1245(a)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1245 property were sold by the partnership at its fair market value. See paragraph (e)(1) of § 1.1245-1. For example, if a partnership would recognize under section 1245(a)(1) gain of $600 upon a sale of one item of section 1245 property and gain of $300 upon a sale of its only other item of such property, the potential section 1245 income of the partnership would be $900.

(ii) With respect to any taxable year of a partnership ending after December 31, 1963, the term "unrealized receivables," for purposes of this section and sections 731, 736, 741, and 751, also includes "potential section 1250 income." With respect to each item of partnership section 1250 property (as defined in section 1250(c)), "potential section 1250 income" is the amount which would be treated as gain to which section 1250(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1250 property were sold by the partnership at its fair market value. See paragraph (f)(1) of § 1.1250-1.

(iii) For purposes of determining potential section 1245 income or potential section 1250 income, any arm's-length agreement between the buyer and seller, or between the partnership and distributee partner, will generally establish the fair market value of section 1245 property or section 1250 property (as the case may be).

(5) For purposes of Subtitle A of the Code, the basis of potential section 1245 income and of potential section 1250 income is zero.

(6)(i) If (at the time of the transaction referred to in subparagraph (4) of this paragraph) a partnership holds section 1245 (or 1250) property and if (a) a partner had a special basis adjustment under section 743(b) in respect of the property, or (b) the basis under section 732 of the property if distributed to the partner would reflect a special basis adjustment under section 732(d), or (c) on the date a partner acquires his partnership interest by way of a sale or exchange (or upon death of another partner) the partnership owned the property and an election under section 754 was in effect with respect to the partnership, then the partner's share of the potential section 1245 (or 1250) income of the partnership in respect of the

property shall be determined under subdivision (ii) of this subparagraph.

(ii) The partner's share of the potential section 1245 (or 1250) income of the partnership in respect of the property to which this subdivision applies shall be that amount of gain which the partner would recognize under paragraph (e)(3) of § 1.1245–1 (or paragraph (f) of § 1.1250–1) upon a sale of the property by the partnership, except that, for purposes of this subparagraph (a) the items which are allocated under (or in a manner consistent with the principles provided in) paragraph (e)(3)(ii) of § 1.1245–1 shall be allocated to the partner in the same manner as his share of partnership property is determined, and (b) the amount of a special basis adjustment under section 732(d) shall be treated as if it were the amount of a special basis adjustment under section 743(b).

(d) Inventory items which have substantially appreciated in value—(1) Substantial appreciation. Partnership inventory items shall be considered to have appreciated substantially in value if, at the time of the sale or distribution, the total fair market value of all the inventory items of the partnership exceeds 120 percent of the aggregate adjusted basis for such property in the hands of the partnership (without regard to any special basis adjustment of any partner) and, in addition, exceeds 10 percent of the fair market value of all partnership property other than money. The terms "inventory items which have appreciated substantially in value" or "substantially appreciated inventory items" refer to the aggregate of all partnership inventory items. These terms do not refer to specific partnership inventory items or to specific groups of such items. For example, any distribution of inventory items by a partnership the inventory items of which as a whole are substantially appreciated in value shall be a distribution of substantially appreciated inventory items for the purposes of section 751(b), even though the specific inventory items distributed may not be appreciated in value. Similarly, if the aggregate of partnership inventory items are not substantially appreciated in value, a distribution of specific inventory items, the value of which is more than 120 percent of their adjusted basis, will not constitute a distribution of substantially appreciated inventory items. For the purpose of this paragraph, the "fair market value" of inventory items has the same meaning as "market" value in the regulations under section 471, relating to general rule for inventories.

(2) Inventory items. The term "inventory items" as used in Subchapter K, Chapter 1 of the Code, includes the following types of property:

(i) Stock in trade of the partnership, or other property of a kind which would properly be included in the inventory of the partnership if on hand at the close of the taxable year, or property held by the partnership primarily for sale to customers in the ordinary course of its trade or business. See section 1221(1).

(ii) Any other property of the partnership which, on sale or exchange by the partnership, would be considered property other than a capital asset and other than property described in section 1231. Thus, accounts receivable acquired in the ordinary course of business for services or from the sale of stock in trade constitute inventory items (see section 1221(4)), as do any unrealized receivables.

(iii) Any other property retained by the partnership which, if held by the partner selling his partnership interest or receiving a distribution described in section 751(b), would be considered property described in subdivision (i) or (ii) of this subparagraph. Property actually distributed to the partner does not come within the provisions of section 751(d)(2)(C) and this subdivision.

(e) Section 751 property and other property. For the purposes of this section, "section 751 property" means unrealized receivables or substantially appreciated inventory items, and "other property" means all property (including money) except section 751 property.

(f) Effective date. Section 751 applies to gain or loss to a seller, distributee, or partnership in the case of a sale, exchange, or distribution occurring after March 9, 1954. For the purpose of applying this paragraph in the case of a taxable year beginning before January 1, 1955, a partnership or a partner may elect to treat as applicable any other section of Subchapter K, Chapter 1 of the Code. Any such election shall be made by a statement submitted not later than the time prescribed by law for the filing of the return for such taxable year, or August 21, 1956, whichever date is later (but not later than 6 months after the time prescribed by law for the filing of the return for such year). See section 771(b)(3) and paragraph (b)(3) of § 1.771–1. See also section 771(c) and paragraph (c) of § 1.771–1.

(g) Examples. Application of the provisions of section 751 may be illustrated by the following examples:

Example (1). C buys B's interest in personal service partnership AB for $15,000, when the balance sheet of the firm (reflecting a cash receipts and disbursements method of accounting) is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$3,000	$3,000
Loans receivable	10,000	10,000
Other assets	7,000	7,000
Unrealized receivables	0	12,000
Total	20,000	32,000

LIABILITIES AND CAPITAL

	Per books	Value
Liabilities	$2,000	$2,000
Capital:		
A	9,000	15,000
B	9,000	15,000
Total	20,000	32,000

Section 751(a) applies to the sale. The total amount realized by B is $16,000, consisting of the cash received, $15,000, plus $1,000, B's share of the partnership liabilities assumed by C. See section 752. B's undivided half interest in the partnership property includes a half-interest in the partnership's unrealized receivables which are worth $12,000. Consequently, $6,000 of the $16,000 realized by B shall be considered received in exchange for B's interest in the partnership attributable to its unrealized receivables. The remaining $10,000 realized by B is in exchange for a capital asset. B's basis for his partnership interest is $10,000 ($9,000, plus $1,000, B's share of partnership liabilities). No portion of this basis is attributable to B's share of the unrealized receivables of the partnership since such property has a zero basis in the hands of the partnership; therefore, B has a basis of zero for the unrealized receivables because the partnership basis for such receivables would have carried over to him under section 732 had they been distributed to him. The difference between the zero basis and the $6,000 B realized for the unrealized receivables is ordinary income to him. The entire $10,000 of B's basis is the basis for his interest in partnership property other than unrealized receivables and is applied against the remaining $10,000 ($16,000 minus $6,000) received from the sale of his interest. Therefore, B has no capital gain or loss. (If B's basis for his interest in partnership property, other than unrealized receivables, were $9,000, he would realize capital gain of $1,000. If his basis were $11,000, he would sustain a capital loss of $1,000).

Example (2). **(a) Facts.** Partnership ABC makes a distribution to partner C in liquidation of his entire one-third interest in the partnership. At the time of the distribution, the balance sheet of the partnership, which uses the accrual method of accounting, is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$15,000	$15,000
Accounts receivable	9,000	9,000
Inventory	21,000	30,000
Depreciable property	42,000	48,000
Land	9,000	9,000
Total	96,000	111,000

LIABILITIES AND CAPITAL

	Per books	Value
Current liabilities	$15,000	$15,000
Mortgage payable	21,000	21,000
Capital:		
A	20,000	25,000
B	20,000	25,000
C	20,000	25,000
Total	96,000	111,000

The distribution received by C consists of $10,000 cash and depreciable property with a fair market value of $15,000 and an adjusted basis to the partnership of $15,000.

(b) Presence of section 751 property. The partnership has no unrealized receivables, but the dual test provided in section 751(d)(1) must be applied to determine whether the inventory items of the partnership, in the aggregate, have appreciated substantially in value. The fair market value of all partnership inventory items, $39,000 (inventory $30,000, and accounts receivable $9,000), exceeds 120 percent of the $30,000 adjusted basis of such items to the partnership. The fair market value of the inventory items, $39,000, also exceeds 10 percent of the fair market value of all partnership property other than money (10 percent of $96,000 or $9,600). Therefore, the partnership inventory items have substantially appreciated in value.

(c) The properties exchanged. Since C's entire partnership interest is to be liquidated, the provisions of section 736 are applicable. No part of the payment, however, is considered as a distributive share or as a guaranteed payment under section 736(a) because the entire payment is made for C's interest in partnership property. Therefore, the entire payment is for an interest in partnership property under section 736(b), and, to the extent applicable, subject to the rules of section 751. In the distribution, C received his share of cash ($5,000) and $15,000 in depreciable property ($1,000 less than his $16,000 share). In addition, he received other partnership property ($5,000 cash and $12,000 liabilities assumed, treated as money distributed under section 752(b)) in exchange for his interest in accounts receivable ($3,000), inventory ($10,000), land ($3,000), and the balance of his interest in depreciable property ($1,000). Section 751(b) applies only to the extent of the exchange of other property for section 751 property (*i.e.*, inventory items, which include trade accounts receivable). The section 751 property exchanged has a fair market value of $13,000 ($3,000 in accounts receivable and $10,000 in inventory). Thus, $13,000 of the total amount C received is considered as received for the sale of section 751 property.

(d) Distributee partner's tax consequences. C's tax consequences on the distribution are as follows:

(1) The section 751(b) sale or exchange. C's share of the inventory items is treated as if he received them in a current distribution, and his basis for such items is $10,000 ($7,000 for inventory and $3,000 for accounts receivable) as determined under paragraph (b)(3)(iii) of this section. Then C is considered as having sold his share of inventory items to the partnership for $13,000. Thus, on the sale of his share of inventory items, C realizes $3,000 of ordinary income.

(2) The part of the distribution not under section 751(b). Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was $32,000 ($20,000 plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $10,000, the basis attributed to the section 751 property treated as distributed to C and sold by him to the partnership. Thus,

C has a basis of $22,000 for the remainder of his partnership interest. The total distribution to C was $37,000 ($22,000 in cash and liabilities assumed, and $15,000 in depreciable property). Since C received no more than his share of the depreciable property, none of the depreciable property constitutes proceeds of the sale under section 751(b). C did receive more than his share of money. Therefore, the sale proceeds, treated separately in subparagraph (1) of this paragraph of this example, must consist of money and therefore must be deducted from the money distribution. Consequently, in liquidation of the balance of C's interest, he receives depreciable property and $9,000 in money ($22,000 less $13,000). Therefore, no gain or loss is recognized to C on the distribution. Under section 732(b), C's basis for the depreciable property is $13,000 (the remaining basis of his partnership interest, $22,000, reduced by $9,000, the money received in the distribution).

(e) **Partnership's tax consequences.** The tax consequences to the partnership on the distribution are as follows:

(1) **The section 751(b) sale or exchange.** The partnership consisting of the remaining members has no ordinary income on the distribution since it did not give up any section 751 property in the exchange. Of the $22,000 money distributed (in cash and the assumption of C's share of liabilities), $13,000 was paid to acquire C's interest in inventory ($10,000 fair market value) and in accounts receivable ($3,000). Since under section 751(b) the partnership is treated as buying these properties, it has a new cost basis for the inventory and accounts receivable acquired from C. Its basis for C's share of inventory and accounts receivable is $13,000, the amount which the partnership is considered as having paid C in the exchange. Since the partnership is treated as having distributed C's share of inventory and accounts receivable to him, the partnership must decrease its basis for inventory and accounts receivable ($30,000) by $10,000, the basis of C's share treated as distributed to him, and then increase the basis for inventory and accounts receivable by $13,000 to reflect the purchase prices of the items acquired. Thus, the basis of the partnership inventory is increased from $21,000 to $24,000 in the transaction. (Note that the basis of property acquired in a section 751(b) exchange is determined under section 1012 without regard to any elections of the partnership. See paragraph (e) of § 1.732–1.) Further, the partnership realizes no capital gain or loss on the portion of the distribution treated as a sale under section 751(b) since, to acquire C's interest in the inventory and accounts receivable, it gave up money and assumed C's share of liabilities.

(2) **The part of the distribution not under section 751(b).** In the remainder of the distribution to C which was not in exchange for C's interest in section 751 property, C received only other property as follows: $15,000 in depreciable property (with a basis to the partnership of $15,000) and $9,000 in money ($22,000 less $13,000 treated under subparagraph (1) of this paragraph of this example). Since this part of the distribution is not an exchange of section 751 property for other property, section 751(b) does not apply. Instead, the provisions which apply are sections 731 through 736, relating to distributions by a partnership. No gain or loss is recognized to the partnership on the distribution. (See section 731(b).) Further, the partnership makes no adjustment to the basis of remaining depreciable property unless an election under section 754 is in effect. (See section 734(a).) Thus, the basis of the depreciable property before the distribution, $42,000, is reduced by the basis of the depreciable property distributed, $15,000, leaving a basis for the depreciable property in the partnership of $27,000. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) as follows: Since the adjusted basis of the distributed property to the partnership had been $15,000, and is only $13,000 in C's hands (see paragraph (d)(2) of this example), the partnership will increase the basis of the depreciable property remaining in the partnership by $2,000 (the excess of the adjusted basis to the partnership of the distributed depreciable property immediately before the distribution over its basis to the distributee). Whether or not an election under section 754 is in effect, the basis for each of the remaining partner's partnership interests will be $38,000 ($20,000 original contribution, plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities each assumed).

(f) **Partnership trial balance.** A trial balance of the AB partnership after the distribution in liquidation of C's entire interest would reflect the results set forth in the schedule below. Column I shows the amounts to be reflected in the records if an election is in effect under section 754 with respect to an optional adjustment under section 734(b) to the basis of undistributed partnership property. Column II shows the amounts to be reflected in the records where an election under section 754 is not in effect. Note that in column II, the total bases for the partnership assets do not equal the total of the bases for the partnership interests.

Example (3). (a) **Facts.** Assume that the distribution to partner C in example (2) of this paragraph in liquidation of his entire interest in partnership ABC consists of $5,000 in cash and $20,000 worth of partnership inventory with a basis of $14,000.

	I		II	
	Sec. 754, Election in effect		Sec. 754, Election not in effect	
	Basis	Fair market value	Basis	Fair market value
Cash	$5,000	$5,000	$5,000	$5,000
Accounts receivable	9,000	9,000	9,000	9,000
Inventory	24,000	30,000	24,000	30,000
Depreciable property	29,000	33,000	27,000	33,000
Land	9,000	9,000	9,000	9,000
	76,000	86,000	74,000	86,000
Current liabilities	15,000	15,000	15,000	15,000
Mortgage	21,000	21,000	21,000	21,000
Capital:				
....	20,000	25,000	20,000	25,000
....	20,000	25,000	20,000	25,000
	76,000	86,000	76,000	86,000

(b) **Presence of section 751 property.** For the same reason as stated in paragraph (b) of example (2), the partnership inventory items have substantially appreciated in value.

(c) **The properties exchanged.** In the distribution, C received his share of cash ($5,000) and his share of appreciated inventory items ($13,000). In addition, he received appreciated inventory with a fair market value of $7,000 (and with an adjusted basis to the partnership of $4,900) and $12,000 in money (liabilities assumed). C has relinquished his interest in $16,000 of depreciable property and $3,000 of land. Although C relinquished his interest in $3,000 of accounts receivable, such accounts receivable are inventory items and, therefore, that exchange was not an exchange of section 751 property for other property. Section 751(b) applies only to the extent of the exchange of other property for section 751 property (*i.e.*, depreciable property or land for inventory items). Assume that the partners agree that the $7,000 of inventory in excess of

C's share was received by him in exchange for $7,000 of depreciable property.

(d) Distributee partner's tax consequences. C's tax consequence on the distributions are as follows:

(1) The section 751(b) sale or exchange. C is treated as if he had received his 7/16ths share of the depreciable property in a current distribution. His basis for that share is $6,125 (42,000/48,000 of $7,000), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/16ths share of depreciable property to the partnership for $7,000, realizing a gain of $875.

(2) The part of the distribution not under section 751(b). Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was $32,000 ($20,000, plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $6,125, the basis of property treated as distributed to C and sold by him to the partnership. Thus, C will have a basis of $25,875 for the remainder of his partnership interest. Of the $37,000 total distribution to C, $30,000 ($17,000 in money, including liabilities assumed, and $13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory with a fair market value of $13,000 (which had an adjusted basis to the partnership of $9,100) is limited to $8,875, the amount of the remaining basis for his partnership interest, $25,875, reduced by $17,000, the money received. Thus, C's total aggregate basis for the inventory received is $15,875 ($7,000 plus $8,875), and not its $14,000 basis in the hands of the partnership.

(e) Partnership's tax consequences. The tax consequences to the partnership on the distribution are as follows:

(1) The section 751(b) sale or exchange. The partnership consisting of the remaining members has $2,100 of ordinary income on the sale of the $7,000 of inventory which had a basis to the partnership of $4,900 (21,000/30,000 of $7,000). This $7,000 of inventory was paid to acquire 7/16ths of C's interest in the depreciable property. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. Its basis for the depreciable property is $42,875 ($42,000 less $6,125, the basis of the 7/16ths share considered as distributed to C, plus $7,000, the partnership purchase price for this share).

(2) The part of the distribution not under section 751(b). In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 9/16ths interest in depreciable property which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been $9,100, and C's basis for such inventory after distribution is only $8,875. The basis of the inventory remaining in the partnership must be increased by $225. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be $39,050 ($20,000 original contribution, plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities now assumed, plus $1,050, each partner's share of ordinary income realized by the partnership upon that part of the distribution treated as a sale or exchange).

Example (4). (a) Facts. Assume the same facts as in example (3) of this paragraph, except that the partners did not identify the property which C relinquished in exchange for the $7,000 of inventory which he received in excess of his share.

(b) **Presence of section 751 property.** For the same reasons stated in paragraph (b) of example (2) of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) **The properties exchanged.** The analysis stated in paragraph (c) of example (3) of this paragraph is the same in this example, except that, in the absence of a specific agreement among the partners as to the properties exchanged, C will be presumed to have sold to the partnership a proportionate amount of each property in which he relinquished an interest. Thus, in the absence of an agreement, C has received $7,000 of inventory in exchange for his release of 7/19ths of the depreciable property and 7/19ths of the land. ($7,000, fair market value of property released, over $19,000, the sum of the fair market values of C's interest in the land and C's interest in the depreciable property.)

(d) Distributee partner's tax consequences. C's tax consequences on the distribution are as follows:

(1) The section 751(b) sale or exchange. C is treated as if he had received his 7/19ths shares of the depreciable property and land in a current distribution. His basis for those shares is $6,263 (51,000/57,000 of $7,000, their fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/19ths shares of depreciable property and land to the partnership for $7,000, realizing a gain of $737.

(2) The part of the distribution not under section 751(b). Section 751(b) does not apply to the balance of the distribution. Before the distribution C's basis for his partnership interest was $32,000 ($20,000 plus $12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by $6,263, the bases of C's shares of depreciable property and land treated as distributed to him and sold by him to the partnership. Thus, C will have a basis of $25,737 for the remainder of his partnership interest. Of the total $37,000 distributed to C, $30,000 ($17,000 in money, including liabilities assumed, and $13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory (with a fair market value of $13,000 and an adjusted basis to the partnership of $9,100) is limited to $8,737, the amount of the remaining basis for his partnership interest ($25,737 less $17,000), money received. Thus, C's total aggregate basis for the inventory he received is $15,737 ($7,000 plus $8,737), and not the $14,000 basis it had in the hands of the partnership.

(e) Partnership's tax consequences. The tax consequences to the partnership on the distribution are as follows:

(1) The section 751(b) sale or exchange. The partnership consisting of the remaining members has $2,100 of ordinary income on the sale of $7,000 of inventory which had a basis to the partnership of $4,900 (21,000/30,000 of $7,000). This $7,000 of inventory was paid to acquire 7/19ths of C's interest in the depreciable property and land. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. The bases of the depreciable property and land would be $42,737 and $9,000, respectively. The basis for the depreciable property is computed as follows: The common partnership basis of $42,000 is reduced by the $5,158 basis (42,000/48,000 of $5,895) for C's 7/19ths interest constructively distributed and increased by $5,895 (16,000/19,000 of $7,000), the part of the purchase price allocated to the depreciable property. The basis of the land would be computed in the same way. The $9,000 original partnership basis is reduced by $1,105 basis (9,000/9,000 of $1,105) of land constructively distributed to C, and increased by $1,105 (3,000/19,000 of $7,000), the portion of the purchase price allocated to the land.

(2) The part of the distribution not under section 751(b). In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 12/19ths interests in depreciable property and land which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been $9,100 and C's basis for such inventory after the distribution is only $8,737. The basis of the inventory remaining in the partnership must be increased by the difference of $363. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be $39,050 ($20,000 original contribution plus $12,000, each partner's original share of the liabilities, plus $6,000, the share of C's liabilities assumed, plus $1,050, each partner's share of ordinary income realized by the partnership upon the part of the distribution treated as a sale or exchange).

Example (5). (a) Facts. Assume that partner C in example (2) of this paragraph agrees to reduce his interest in capital and profits from one-third to one-fifth for a current distribution consisting of $5,000 in cash, and $7,500 of accounts receivable with a basis to the partnership of $7,500. At the same time, the total liabilities of the partnership are not reduced. Therefore, after the distribution, C's share of the partnership liabilities has been reduced by $4,800 from $12,000 (⅓ of $36,000) to $7,200 (⅕ of $36,000).

(b) Presence of section 751 property. For the same reasons as stated in paragraph (b) of example (2) of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) The properties exchanged. C's interest in the fair market value of the partnership properties before and after the distribution can be illustrated by the following table:

Item	C's interest Fair Market Value		C received		C relinquished
	One-third before	One-fifth after	Distribution of share	In excess of share	
Cash	$5,000	$2,000	$3,000	$2,000	....
Liabilities assumed	(12,000)	(7,200)	....	4,800	....
Inventory items:					
Accounts receivable	3,000	300	2,700	4,800	....
Inventory	10,000	6,000	....	....	$4,000
Depreciable property	16,000	9,600	....	....	6,400
Land	3,000	1,800	....	....	1,200
Total	25,000	12,500	5,700	11,600	11,600

Although C relinquished his interest in $4,000 of inventory and received $4,800 of accounts receivable, both items constitute section 751 property and C has received only $800 of accounts receivable for $800 worth of depreciable property or for an $800 undivided interest in land. In the absence of an agreement identifying the properties exchanged, it is presumed C received $800 for proportionate shares of his interests in both depreciable property and land. To the extent that inventory was exchanged for accounts receivable, or to the extent cash was distributed for the release of C's interest in the balance of the depreciable property and land, the transaction does not fall within section 751(b) and is a current distribution under section 732(a). Thus, the remaining $6,700 of accounts receivable are received in a current distribution.

(d) Distributee partner's tax consequences. C's tax consequences on the distribution are as follows:

(1) The section 751(b) sale or exchange. Assuming that the partners paid $800 worth of accounts receivable for $800 worth of depreciable property, C is treated as if he received the depreciable property in a current distribution, and his basis for the $800 worth of depreciable property is $700 (42,000/48,000 of $800, its fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his $800 share of depreciable property to the partnership for $800. On the sale of the depreciable property, C realizes a gain of $100. If, on the other hand, the partners had agreed that C exchanged an $800 interest in the land for $800 worth of accounts receivable, C would realize no gain or loss, because under paragraph (b)(2)(iii) of this section his basis for the land sold would be $800. In the absence of an agreement, the basis for the depreciable property and land (which C is considered as having received in a current distribution and then sold back to the partnership) would be $716 (51,000/57,000 of $800). In that case, on the sale of the balance of the $800 share of depreciable property and land, C would realize $84 of gain ($800 less $716).

(2) The part of the distribution not under section 751(b). Section 751(b) does not apply to the balance of the distribution. Under section 731, C does not realize either gain or loss on the balance of the distribution. The adjustments to the basis of C's interest are illustrated in the following table:

	If accounts receivable received for depreciable property	If accounts receivable received for land	If there is no agreement
Original basis for C's interest	$32,000	$32,000	$32,000
Less basis of property distributed prior to sec. 751(b) sale or exchange	–700	–800	–716
	31,300	31,200	31,284
Less money received in distribution	–9,800	–9,800	–9,800
	21,500	21,400	21,484
Less basis of property received in a current distribution under sec. 732	–6,700	–6,700	–6,700
Resulting basis for C's interest	14,800	14,700	14,784

C's basis for the $1,500 worth of accounts receivable which he received in the distribution will be $7,500, composed of $800 for the portion purchased in the section 751(b) exchange, plus $6,700, the basis carried over under section 732(a) for the portion received in the current distribution.

(e) Partnership's tax consequences. The tax consequences to the partnership on the distribution are as follows:

(1) The section 751(b) sale or exchange. The partnership realizes no gain or loss in the section 751 sale or exchange because it had a basis of $800 for the accounts receivable for which it received $800 worth of other property. If the partnership agreed to purchase $800 worth of depreciable property, the partnership basis of depreciable property becomes $42,100 ($42,000 less $700 basis of property constructively distributed to C, plus $800, price of property purchased). If the partnership purchased land with the accounts receivable, there would be no change in the basis of the land to the partnership because the basis of land distributed was equal to its purchase price. If there were no agreement, the basis of the depreciable property and land would be $51,084 (depreciable property, $42,084 and land $9,000). The basis for the depreciable property is computed as follows: The common partnership basis of $42,000 is reduced by the $590 basis (42,000/48,000 of $674) for C's $674 interest constructively distributed, and increased by $674 (6,400/7,600 of $800), the part of the purchase price allocated to the depreciable property. The basis of the land would be computed in the same way. The $9,000 original partnership basis is reduced by $126 basis (9,000/9,000 of $126) of the land constructively distributed to C, and increased by $126 (1,200/7,600 of $800), the portion of the purchase price allocated to the land.

(2) The part of the distribution not under section 751(b). The partnership will realize no gain or loss in the balance of the distribution under section 731. Since the property in C's hands after the distribution will have the same basis it had in the partnership, the basis of partnership property remaining in the partnership after the distribution will not be adjusted (whether or not an election under 754 is in effect).

Example (6). (a) **Facts.** Partnership ABC distributes to partner C, in liquidation of his entire one-third interest in the partnership, a machine which is section 1245 property with a recomputed basis (as defined in section 1245(a)(2)) of $18,000. At the time of the distribution, the balance sheet of the partnership is as follows:

ASSETS

	Adjusted basis per books	Market value
Cash	$3,000	$3,000
Machine (section 1245 property)	9,000	15,000
Land	18,000	27,000
Total	30,000	45,000

LIABILITIES AND CAPITAL

	Per books	Value
Liabilities	$0	$0
Capital:		
A	10,000	15,000
B	10,000	15,000
C	10,000	15,000
Total	30,000	45,000

(b) Presence of section 751 property. The section 1245 property is an unrealized receivable of the partnership to the extent of the potential section 1245 income in respect of the property. Since the fair market value of the property ($15,000) is lower than its recomputed basis ($18,000), the excess of the fair market value over its adjusted basis ($9,000), or $6,000, is the potential section 1245 income of the partnership in respect of the property. The partnership has no other section 751 property.

(c) The properties exchanged. In the distribution C received his share of section 751 property (potential section 1245 income of $2,000, *i.e.*, ⅓ of $6,000) and his share of section 1245 property (other than potential section 1245 income) with a fair market value of $3,000, *i.e.*, ⅓ of ($15,000 minus $6,000), and an adjusted basis of $3,000, *i.e.*, ⅓ of $9,000. In addition he received $4,000 of section 751 property (consisting of $4,000 ($6,000 minus $2,000) of potential section 1245 income) and section 1245 property (other than potential section 1245 income) with a fair market value of $6,000 ($9,000 minus $3,000) and an adjusted basis of $6,000 ($9,000 minus $3,000). C relinquished his interest in $1,000 of cash and $9,000 of land. Assume that the partners agree that the $4,000 of section 751 property in excess of C's share was received by him in exchange for $4,000 of land.

(d) Distributee partner's tax consequences. C's tax consequences on the distributions are as follows:

(1) The section 751(b) sale or exchange. C is treated as if he received in a current distribution ⁴⁄₉ths of his share of the land with a basis of $2,667 (18,000/27,000×$4,000). Then C is considered as having sold his ⁴⁄₉ths share of the land to the partnership for $4,000, realizing a gain of $1,333. C's basis for the remainder of his partnership interest after the current distribution is $7,333, *i.e.*, the basis of his partnership interest before the current distribution ($10,000) minus the basis of the land treated as distributed to him ($2,667).

(2) The part of the distribution not under section 751(b). Of the $15,000 total distribution to C, $11,000 ($2,000 of potential section 1245 income and $9,000 section 1245 property other than potential section 1245 income) is not within section 751(b). Under section 732(b) and (c), C's basis for his share of potential section 1245 income is zero (see paragraph (c)(5) of this section) and his basis for $9,000 of section 1245 property (other than potential section 1245 income) is $7,333, *i.e.*, the amount of the remaining basis for his partnership interest ($7,333) reduced by the basis for his share of potential section 1245 income (zero). Thus C's total aggregate basis for the section 1245 property (fair market value of $15,000) distributed to him is $11,333 ($4,000 plus $7,333). For an illustration of the computation of his recomputed basis for the section 1245 property immediately after the distribution, see example (2) of paragraph (f)(3) of § 1.1245-4.

(e) Partnership's tax consequences. The tax consequences to the partnership on the distribution are as follows:

(1) The section 751(b) sale or exchange. Upon the sale of $4,000 potential section 1245 income, with a basis of zero,

for ⅙ths of C's interest in the land, the partnership consisting of the remaining members has $4,000 ordinary income under sections 751(b) and 1245(a)(1). See section 1245(b)(3) and (6)(A). The partnership's new basis for the land is $19,333, *i.e.*, $18,000, less the basis of the ⅙ths share considered as distributed to C ($2,667), plus the partnership purchase price for this share ($4,000).

(2) The part of the distribution not under section 751(b). The analysis under this subparagraph should be made in accordance with the principles illustrated in paragraph (e)(2) of examples (3), (4), and (5) of this paragraph.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8575, July 7, 1965; T.D. 7084, 36 FR 268, Jan. 8, 1971]

§ 1.752-1 Treatment of certain liabilities.

(a) Increase in partner's liabilities. (1) Where the liabilities of a partnership are increased, and each partner's share of such liabilities is thereby increased, the amount of each partner's increase shall be treated as a contribution of money by that partner to the partnership. For example, partnership AB borrows $1,000. If A and B are equal partners, the basis of the partnership interest of each is increased by $500 since each is considered under section 752(a) to have contributed that amount of money to the partnership.

(2) Any increase in a partner's individual liabilities because of the assumption by him of partnership liabilities shall also be considered as a contribution of money by him to the partnership. For example, equal partnership AB owns real property with an adjusted basis to the partnership of $1,000, a fair market value of $800, and which is subject to a mortgage of $400 which the partnership has not assumed. The mortgage is considered as a liability of the partnership under section 752(c). Since A and B each share one-half thereof, under section 752(a) the liability of each has been increased $200. Under section 722 such $200 increase is reflected in the basis of each partner for his interest. The real property is distributed by the partnership to A. Under the provisions of section 733(2), there is a net decrease of $800 in A's basis for his partnership interest. This amount is computed as follows: The basis of A's partnership interest is decreased in the distribution by $1,000 (the partnership basis for the distributed property) and further decreased under section 752(b) by $200 (the decrease in A's share of partnership liabilities) and increased under section 752(a) by $400 (the increase in A's individual liability by reason of section 752(c)). Conversely, the basis of B's partnership interest is decreased by $200 since the distribution of the real property to A resulted in a decrease in B's share of the partnership liability under section 752(b).

(b) Decrease in partner's liabilities. (1) Where the liabilities of a partnership are decreased, and each partner's share of such liabilities is thereby decreased, the amount of the decrease shall be treated as a distribution of money to the partner by the partnership. For example, partnership AB, in which A and B are equal partners, repays an obligation of $10,000. The repayment reduces each partner's share of partnership liabilities by $5,000 and is considered a distribution of money which reduces the basis of each partner's interest in the partnership by that amount. For the effect of a discharge of indebtedness on the basis of partnership property, see sections 108 and 1017.

(2) Where a partnership assumes the separate liabilities of a partner or a liability to which property owned by such partner is subject (see paragraph (c) of this section), the amount of the decrease in such partner's liabilities is treated as a distribution of money by the partnership to such partner. For example, partner A contributes property with a basis of $1,000 to partnership ABC in exchange for a one-third interest in the partnership. The property is subject to a mortgage of $150. (It is immaterial whether the mortgage is assumed by the partnership. See section 752(c).) The basis of A's partnership interest is $900, computed as follows: $1,000, A's basis for the contributed property, reduced by $100, two-thirds of A's original liability of $150 now attributable to partners B and C and reflected in their bases under the provisions of paragraph (a) of this section.

(c) Liability to which property is subject. Where property subject to a liability is contributed by a partner to a partnership, or distributed by a partnership to a partner, the amount of the liability, to an extent not exceeding the fair market value of the property at the time of the contribution or distribution, shall be considered as a liability assumed by the transferee. For example, A contributes property with a basis to him of $1,000 to equal partnership AB. The property is subject to a mortgage of $2,500 and its value exceeds $2,500. Under paragraph (b) of this section, A will be treated as receiving a distribution in money of $1,250, one-half of the liability of $2,500 assumed by the partnership. Since the basis of A's partnership interest is $1,000 (the basis of the property contributed by him), the distribution to him of $1,250 results in his realizing a capital gain of $250 under section 731(a). A's basis for his partnership interest is zero. Although as a partner A

has a $1,250 share of the $2,500 partnership liability, this $1,250 is not added to the basis of A's partnership interest since it does not represent an increase in liabilities as to him.

(d) Sale or exchange of a partnership interest. Where there is a sale or exchange of an interest in a partnership, liabilities shall be treated in the same manner as liabilities in connection with the sale or exchange of property not associated with partnerships. For example, if a partner sells his interest in a partnership for $750 cash and at the same time transfers to the purchaser his share of partnership liabilities amounting to $250, the amount realized by the seller on the transaction is $1,000.

(e) Partner's share of partnership liabilities. A partner's share of partnership liabilities shall be determined in accordance with his ratio for sharing losses under the partnership agreement. In the case of a limited partnership, a limited partner's share of partnership liabilities shall not exceed the difference between his actual contribution credited to him by the partnership and the total contribution which he is obligated to make under the limited partnership agreement. However, where none of the partners have any personal liability with respect to a partnership liability (as in the case of a mortgage on real estate acquired by the partnership without the assumption by the partnership or any of the partners of any liability on the mortgage), then all partners, including limited partners, shall be considered as sharing such liability under section 752(c) in the same proportion as they share the profits. The provisions of this paragraph may be illustrated by the following example:

Example. G is a general partner and L is a limited partner in partnership GL. Each makes equal contributions of $20,000 cash to the partnership upon its formation. Under the terms of the partnership agreement, they are to share profits equally but L's liabilities are limited to the extent of his contribution. Subsequently, the partnership pays $10,000 for real property which is subject to a mortgage of $5,000. Neither the partnership nor any of the partners assume any liability on the mortgage. The basis of such property to the partnership is $15,000. The basis of G and L for their partnership interests is increased by $2,500 each, since each partner's share of the partnership liability (the $5,000 mortgage) has increased by that amount. However, if the partnership had assumed the mortgage so that G had become personally liable thereunder, G's basis for his interest would have been increased by $5,000 and L's basis would remain unchanged.

(f) Limitation. In determining the amount of liabilities for the purposes of section 752 and this section, the amount of an indebtedness is to be taken into account only once, even though a partner (in addition to his liability for such indebtedness as a partner) may be separately liable therefor in a capacity other than as a partner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.753–1 Partner receiving income in respect of decedent.

(a) Income in respect of a decedent under section 736(a). All payments coming within the provisions of section 736(a) made by a partnership to the estate or other successor in interest of a deceased partner are considered income in respect of the decedent under section 691. The estate or other successor in interest of a deceased partner shall be considered to have received income in respect of a decedent to the extent that amounts are paid by a third person in exchange for rights to future payments from the partnership under section 736(a). When a partner who is receiving payments under section 736(a) dies, section 753 applies to any remaining payments under section 736(a) made to his estate or other successor in interest.

(b) Other income in respect of a decedent. When a partner dies, the entire portion of the distributive share which is attributable to the period ending with the date of his death and which is taxable to his estate or other successor constitutes income in respect of a decedent under section 691. This rule applies even though that part of the distributive share for the period before death which the decedent withdrew is not included in the value of the decedent's partnership interest for estate tax purposes. See paragraph (c)(3) of § 1.706–1.

(c) Example. The provisions of this section may be illustrated by the following example:

Example. A and the decedent B were equal partners in a business having assets (other than money) worth $40,000 with an adjusted basis of $10,000. Certain partnership business was well advanced towards completion before B's death and, after B's death but before the end of the partnership year, payment of $10,000 was made to the partnership for such work. The partnership agreement provided that, upon the death of one of the partners, all partnership property, including unfinished work, would pass to the surviving partner, and that the surviving partner would pay the estate of the decedent the undrawn balance of his share of partnership earnings to the date of death, plus $10,000 in each of the three years after death. B's share of earnings to the date of his death was $4,000, of which he had withdrawn $3,000. B's distributive share of partnership income of $4,000 to the date of his death is income in respect of a decedent (although only the $1,000 undrawn at B's death will be reflected in the value of B's partnership interest on B's estate tax return). Assume that the value of B's interest in partnership property at the date of his death was $22,000, composed of the following items: B's one-half share of the assets of $40,000, plus $2,000, B's interest in partnership cash. It should be noted that B's $1,000 undrawn share of earnings to the date of his death is not a separate item but will be paid from partner-

ship assets. Under the partnership agreement, A is to pay B's estate a total of $31,000. The difference of $9,000 between the amount to be paid by A ($31,000) and the value of B's interest in partnership property ($22,000) comes within section 736(a) and, thus, also constitutes income in respect of a decedent. (However, the $17,000 difference between the $5,000 basis for B's share of the partnership property and its $22,000 value at the date of his death does not constitute income in respect of a decedent.) If, before the close of the partnership taxable year, A pays B's estate $11,000, of which they agree to allocate $3,000 as the payment under section 736(a), B's estate will include $7,000 in its gross income (B's $4,000 distributive share plus $3,000 payment under section 736(a)). In computing the deduction under section 691(c), this $7,000 will be considered as the value for estate tax purposes of such income in respect of a decedent, even though only $4,000 ($1,000 of distributive share not withdrawn, plus $3,000, payment under section 736(a)) of this amount can be identified on the estate tax return as part of the partnership interest.

(d) Effective date. The provisions of section 753 apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954. See section 771(b)(4) and paragraph (b)(4) of § 1.771–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.754–1 Time and manner of making election to adjust basis of partnership property.

(a) In general. A partnership may adjust the basis of partnership property under sections 734(b) and 743(b) if it files an election in accordance with the rules set forth in paragraph (b) of this section. An election may not be filed to make the adjustments provided in either section 734(b) or section 743(b) alone, but such an election must apply to both sections. An election made under the provisions of this section shall apply to all property distributions and transfers of partnership interests taking place in the partnership taxable year for which the election is made and in all subsequent partnership taxable years unless the election is revoked pursuant to paragraph (c) of this section.

(b) Time and method of making election. **(1)** An election under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b), with respect to a distribution of property to a partner or a transfer of an interest in a partnership, shall be made in a written statement filed with the partnership return for the taxable year during which the distribution or transfer occurs. For the election to be valid, the return must be filed not later than the time prescribed by paragraph (e) of § 1.6031–1 (including extensions thereof) for filing the return for such taxable year (or before August 23, 1956, whichever is later). Notwithstanding the preceding two sentences, if a valid election has been made under section 754 and this section for a preceding taxable year and not revoked pursuant to paragraph (c) of this section, a new election is not required to be made. The statement required by this subparagraph shall (i) set forth the name and address of the partnership making the election, (ii) be signed by any one of the partners, and (iii) contain a declaration that the partnership elects under section 754 to apply the provisions of section 734(b) and section 743(b). For rules regarding extensions of time for filing elections, see § 1.9100–1.

(2) The principles of this paragraph may be illustrated by the following example:

Example. A, a U.S. citizen, is a member of partnership ABC, which has not previously made an election under section 754 to adjust the basis of partnership property. The partnership and the partners use the calendar year as the taxable year. A sells his interest in the partnership to D on January 1, 1971. The partnership may elect under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b). Unless an extension of time to make the election is obtained under the provisions of § 1.9100–1, the election must be made in a written statement filed with the partnership return for 1971 and must contain the information specified in subparagraph (1) of this paragraph. Such return must be filed by April 17, 1972 (unless an extension of time for filing the return is obtained). The election will apply to all distributions of property to a partner and transfers of an interest in the partnership occurring in 1971 and subsequent years, unless revoked pursuant to paragraph (c) of this section.

(c) Revocation of election. A partnership having an election in effect under this section may revoke such election with the approval of the district director for the internal revenue district in which the partnership return is required to be filed. A partnership which wishes to revoke such an election shall file with the district director for the internal revenue district in which the partnership return is required to be filed an application setting forth the grounds on which the revocation is desired. The application shall be filed not later than 30 days after the close of the partnership taxable year with respect to which revocation is intended to take effect and shall be signed by any one of the partners. Examples of situations which may be considered sufficient reason for approving an application for revocation include a change in the nature of the partnership business, a substantial increase in the assets of the partnership, a change in the character of partnership assets, or an increased frequency of retirements or shifts of partnership interests, so that an increased administrative burden would result to the partnership from the election. However, no application for revocation of an election shall be approved when the purpose of the revocation is primarily to avoid

stepping down the basis of partnership assets upon a transfer or distribution.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972]

§ 1.755–1 Rules for allocation of basis.

(a) General rule. (1)(i) A partnership which has elected under section 754 must adjust the basis of partnership property under the provisions of section 734(b) (relating to the optional adjustment to the basis of undistributed partnership property) and section 743(b) (relating to the optional adjustment to the basis of partnership property where a partnership interest is transferred). The amount of the increase or decrease (as determined in those sections) in the adjusted basis of the partnership property shall first be divided, under paragraph (b) of this section, between the two classes of property described in section 755(b). Then, the portion of the increase or decrease allocated to each class shall be further allocated to the bases of the properties within the class in a manner which will reduce the difference between the fair market value and the adjusted basis of partnership properties. In the alternative, any increase or decrease may be allocated in any other manner approved by the district director under subparagraph (2) of this paragraph.

(ii) If there is an increase in basis to be allocated to partnership assets, such increase must be allocated only to assets whose values exceed their bases and in proportion to the difference between the value and basis of each. No increase shall be made to the basis of any asset the adjusted basis of which equals or exceeds its fair market value.

(iii) If there is a decrease in basis to be allocated to partnership assets, such decrease must be allocated to assets whose bases exceed their value and in proportion to the difference between the basis and value of each. No decrease shall be made to the basis of any asset, the fair market value of which equals or exceeds its adjusted basis.

(iv) The application of the rules with respect to the allocation of an adjustment in basis under subdivisions (ii) and (iii) of this subparagraph requires that a portion of such adjustment be allocated to partnership good will, to the extent that good will exists and is reflected in the value of the property distributed, the price at which the partnership interest is sold, or the basis of the partnership interest determined under section 1014, in accordance with the difference between such value of the good will and its adjusted basis at the time of the transaction.

(2) If a partnership (or a partner electing under section 732(d)) desires to adjust the basis of assets under section 734(b) or 743(b) in a manner other than that prescribed in subparagraph (1) of this paragraph, it must file an application for permission to use such method with the district director no later than 30 days after the close of the partnership taxable year in which the proposed adjustment is to be made. The application must describe the proposed adjustments in detail and set forth the reasons for the desired use of the other method. Under section 755(a)(2), the district director may permit the partnership to increase the bases of some partnership properties and decrease the bases of other partnership properties under section 734(b) or 743(b). Each increase or decrease to the basis of an asset must reduce or eliminate the difference between such basis and the value of the asset. The net amount of all such adjustments must equal the amount of the adjustment under section 734(b) or 743(b). Adjustments that both increase and decrease the basis of partnership assets will be permitted by the district director only upon a satisfactory showing of the values for partnership assets used by the parties to determine the price at which a partnership interest was sold, the value of the decedent's partnership interest at date of death (or at the alternate valuation date, if used), or the amount of a distribution.

(b) Special rules. For the purposes of applying section 755, all partnership property shall be classified into two categories: Capital assets and property described in section 1231(b) (certain property used in the trade or business), or any other property of the partnership.

(1) Distributions. **(i)** Where there is a distribution of partnership property resulting in an adjustment to the basis of undistributed partnership property under section 734(b)(1)(B) or (b)(2)(B), such adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose. Thus, when the partnership adjusted basis of distributed capital assets and section 1231(b) property immediately prior to distribution exceeds the basis of such property to the distributee partner (as determined under section 732), the basis of the undistributed capital assets and section 1231(b) property remaining in the partnership shall be increased by an amount equal to such excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital assets and section 1231(b) property exceeds the partnership adjusted basis of such property immediately prior to the

distribution, the basis of the undistributed capital assets and section 1231(b) property remaining in the partnership shall be decreased by an amount equal to such excess. Similarly, where there is a distribution of partnership property other than capital assets and section 1231(b) property, and the basis of such other property to the distributee partner (as determined under section 732) is not the same as the partnership adjusted basis of such property immediately prior to distribution, the adjustment shall be made only to undistributed property of the same category remaining in the partnership.

(ii) Where there is a distribution resulting in an adjustment under section 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, such adjustment must be allocated only to capital assets or section 1231(b) property.

(2) **Transfers.** Where there is a basis adjustment under section 743(b) arising from a transfer of an interest in a partnership by sale or exchange or upon the death of a partner, the amount of the adjustment shall be allocated between the two classes of property described in section 755(b) and then the amount allocated to each class shall be further allocated under the rules of paragraph (a)(1) of this section. Thus, to the extent that an amount paid by a purchaser of a partnership interest (or the basis of the partnership interest to the estate or other successor in interest of a deceased partner) is attributable to the value of capital assets and section 1231(b) property, any difference between the amount so attributable and the transferee partner's share of the partnership basis of such property shall constitute a special basis adjustment with respect to partnership capital assets and section 1231 (b) property. Similarly, any such difference attributable to any other property of the partnership shall constitute a special basis adjustment with respect to such property.

(3) **Limitation on decrease of basis.** Where a decrease in the basis of partnership assets is required under section 734(b)(2) and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of such property shall be reduced to zero (but not below zero), and the balance of the decrease in basis shall be made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(4) **Carryover of adjustment.** Where, in the case of a distribution, an increase or decrease required under paragraph (a) of this section in the basis of undistributed partnership property cannot be made because the partnership owns no property of the character required to be adjusted, or because the adjustment has been limited under subparagraph (3) of this paragraph, the adjustment shall be made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(c) **Examples.** The provisions of this section may be illustrated by the following examples:

Example (1). Assume that partnership ABC has three assets: X, a capital asset with an adjusted basis of $1,000 and a value of $1,500; Y, a depreciable asset with an adjusted basis of $1,000 and a value of $900; and Z, inventory items with an adjusted basis of $700 and a value of $600. A sells his interest to D (when an election under 754 is in effect) for $1,000 (⅓ of $3,000, the total value of partnership assets). D's share of the adjusted basis of partnership property is $900 (⅓ of $2,700). Therefore, under section 743(b), D has a special basis adjustment of $100 ($1,000 minus $900). This adjustment must be allocated entirely to property X, since such allocation will have the effect of reducing the difference between the value and basis of such asset. Therefore, D has a special basis adjustment of $100 with respect to property X, which now has a special basis to him of $1,100. No part of the adjustment is made to depreciable property Y or inventory items Z, since any such adjustment would increase the difference between the basis and value of each such asset.

Example (2). Assume the same facts as in example (1) of this paragraph, except that capital asset X has a value of $1,500, depreciable property Y has a value of $1,100, and inventory items Z have a value of only $400. Therefore, under section 743(b), D has a special basis adjustment of $100, the excess of D's basis for his interest in the partnership ($1,000) over his share of the adjusted basis of partnership property ($900). This $100 adjustment must be allocated entirely to capital asset X and depreciable property Y in proportion to the difference between the value and basis of each since such allocation has the effect of reducing the difference between the value and basis of each such asset. Therefore, D has a special basis adjustment of $83 ($500/$600 of $100) with respect to capital asset X, which now has a special basis to him of $1,083, and of $17 ($100/$600 of $100) with respect to depreciable property Y, which now has a special basis to him of $1,017. No part of the adjustment is made to inventory items Z, since any such adjustment would increase the difference between the basis of such asset and its value.

Example (3). Assume that partnership EFG has three assets: X, a capital asset with an adjusted basis of $1,000 and a value of $1,500; Y, a depreciable asset with an adjusted basis of $1,000 and a value of $700; and Z, inventory items with an adjusted basis of $700 and a value of $800. E sells his interest to H (when an election under section 754 is in effect) for $1,000 (⅓ of $3,000, the total value of the partnership assets). H's share of the adjusted basis of partnership is $900 (⅓ of $2,700). Therefore, H has a special basis adjustment of $100 ($1,000 minus $900) under section 743(b). Since, of the total $300 difference between the value and the adjusted basis of all partnership property, $200 ($500, appreciation in value of X, minus $300, depreciation in value of Y) is attributable to the class of capital assets and depreciable property, and $100 (appreciation in value of inventory items Z) to the class of other property, H's special basis adjustment of $100 must be allocated ⅔ to capital assets and depreciable property and ⅓ to other property (inventory). The $67 increase (⅔ of $100) to be

allocated to capital assets and depreciable property must further be allocated so as to reduce the difference between the value and basis of such assets. This can be done only by allocating the entire $67 increase to capital asset X (the basis of which is less than its value), and no part of the increase to depreciable property Y (the basis of which exceeds its value). Therefore, H has a special basis adjustment of $67 for capital asset X, which now has a special basis to him of $1,067; he has no special basis adjustment for depreciable property Y. H also has a special basis adjustment of $33 (⅓ of $100) for inventory items Z, the special basis of which is now $733.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.755–2T Coordination of sections 755 and 1060 (temporary).

(a) Coordination with section 1060—(1) In general. If there is a basis adjustment to which this section applies—

(i) The fair market value of each item of partnership property must be determined under this section; and

(ii) The rules of § 1.755-1 must be applied using the values so determined.

(2) Application of this section. This section applies to any basis adjustment made under section 743(b) (relating to certain transfers of interests in a partnership) or section 732(d) (relating to certain partnership distributions), if assets of the partnership constitute a trade or business for purposes of section 1060(c).

(b) Determining the fair market value of partnership property—(1) Property other than that in the nature of goodwill or going concern value. For purposes of this section, the fair market value of each item of partnership property (other than property in the nature of goodwill or going concern value) shall be determined on the basis of all the facts and circumstances.

(2) Property in the nature of goodwill or going concern value. For purposes of paragraph (a) of this section, the fair market value of partnership property in the nature of goodwill or going concern value (referred to hereinafter in this section as goodwill) shall be deemed to equal the amount (not below zero) which if assigned to such property would result in a liquidating distribution to the transferee partner equal to such partner's basis for the transferred partnership interest immediately after the transfer (reduced by the amount, if any, of such basis that is attributable to partnership liabilities) if—

(i) All partnership property were sold immediately after such transfer for an amount equal to the fair market value of such property (as determined under this section), and

(ii) The proceeds of that sale were, after the payment of all partnership liabilities (within the meaning of section 752 and the regulations thereunder), distributed to the partners.

(c) Cross-reference. See §§ 1.732-1(d)(3) and 1.743-1(b)(3) for rules requiring a transferee partner to attach a statement to such partner's return showing the computation of the special basis adjustment and the partnership properties to which the adjustment is allocated under section 755.

(d) Effective date. This section applies to any basis adjustment under section 743(b) made as a result of any transfer of a partnership interest made after May 6, 1986, unless such transfer is made pursuant to a binding contract that was in effect on May 6, 1986, and at all times thereafter prior to such transfer. However, the requirements of this section shall be deemed to be satisfied with respect to any transfer made on or before July 15, 1988, if the amount of any basis adjustment under section 743(b) or section 732(d) made as a result of such transfer that is allocated to each item of partnership property (other than goodwill) does not exceed the amount equal to the difference between the transferee partner's share of the partnership basis of such property and such partner's share of the fair market value of such property.

(e) Example. The provisions of this section may be illustrated by the following example which assumes that the assets of the partnership constitute a trade or business under section 1060 and that the partnership has an election in effect under section 754 at the time of the sale of the partnership interest.

Example (1). A is a member of partnership ABC. ABC has three assets: a building with a fair market value of $2,000,000, equipment with a fair market value of $800,000 and goodwill. ABC has no liabilities. A has a one-third interest in partnership capital and profits. A sells his partnership interest to D for $1,000,000. Under paragraph (b)(2) of this section, the fair market value of goodwill is deemed to equal the value that must be assigned to goodwill in order for the partnership to distribute $1,000,000 to D if it were to sell all of its property at fair market value (in the case of goodwill, its assigned value) and completely liquidate after D's purchase of A's partnership interest. In order for D, a one-third partner, to receive a liquidation distribution of $1,000,000, the partnership would have to sell all partnership property for a total of $3,000,000. The fair market value of partnership property other than goodwill is $2,800,000. Therefore, goodwill must be assigned a value of $200,000 ($3,000,000 - $2,800,000) in order for D to receive a liquidating distribution of $1,000,000. Accordingly, D's section 743(b) basis adjustment must be allocated under § 1.755-1 using a fair market value of $200,000 for goodwill.

[T.D. 8215, 53 FR 27044, July 18, 1988]

Definitions

§ 1.761–1 Terms defined.

(a) **Partnership.** The term "partnership" includes a syndicate, group, pool, joint venture, or other unincorporated organization through or by means of which any business, financial operation, or venture is carried on, and which is not a corporation or a trust or estate within the meaning of the Code. The term "partnership" is broader in scope than the common law meaning of partnership, and may include groups not commonly called partnerships. See section 7701(a)(2). See regulations under section 7701(a)(1), (2), and (3) for the description of those unincorporated organizations taxable as corporations or trusts. A joint undertaking merely to share expenses is not a partnership. For example, if two or more persons jointly construct a ditch merely to drain surface water from their properties, they are not partners. Mere coownership of property which is maintained, kept in repair, and rented or leased does not constitute a partnership. For example, if an individual owner, or tenants in common, of farm property lease it to a farmer for a cash rental or a share of the crops, they do not necessarily create a partnership thereby. Tenants in common, however, may be partners if they actively carry on a trade, business, financial operation, or venture and divide the profits thereof. For example, a partnership exists if coowners of an apartment building lease space and in addition provide services to the occupants either directly or through an agent. For rules relating to the exclusion of certain partnerships from the application of all or part of subchapter K of chapter 1 of the Code, see § 1.761–2.

(b) **Partner.** The term "partner" means a member of a partnership.

(c) **Partnership agreement.** For the purposes of subchapter K, a partnership agreement includes the original agreement and any modifications thereof agreed to by all the partners or adopted in any other manner provided by the partnership agreement. Such agreement or modifications can be oral or written. A partnership agreement may be modified with respect to a particular taxable year subsequent to the close of such taxable year, but not later than the date (not including any extension of time) prescribed by law for the filing of the partnership return. As to any matter on which the partnership agreement, or any modification thereof, is silent, the provisions of local law shall be considered to constitute a part of the agreement.

(d) **Liquidation of partner's interest.** The term "liquidation of a partner's interest" means the termination of a partner's entire interest in a partnership by means of a distribution, or a series of distributions, to the partner by the partnership. A series of distributions will come within the meaning of this term whether they are made in one year or in more than one year. Where a partner's interest is to be liquidated by a series of distributions, the interest will not be considered as liquidated until the final distribution has been made. For the basis of property distributed in one liquidating distribution, or in a series of distributions in liquidation, see section 732(b). A distribution which is not in liquidation of a partner's entire interest, as defined in this paragraph, is a current distribution. Current distributions, therefore, include distributions in partial liquidation of a partner's interest, and distributions of the partner's distributive share. See paragraph (a)(1)(ii) of § 1.731–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972]

§ 1.761–2 Exclusion of certain unincorporated organizations from the application of all or part of Subchapter K of Chapter 1 of the Code.

(a) **Exclusion of eligible unincorporated organizations—(1) In general.** Under conditions set forth in this section, an unincorporated organization described in subparagraph (2) or (3) of this paragraph may be excluded from the application of all or a part of the provisions of subchapter K of chapter 1 of the Code. Such organization must be availed of (i) for investment purposes only and not for the active conduct of a business, or (ii) for the joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted. The members of such organization must be able to compute their income without the necessity of computing partnership taxable income. Any syndicate, group, pool, or joint venture which is classifiable as an association, or any group operating under an agreement which creates an organization classifiable as an association, does not fall within these provisions.

(2) **Investing partnership.** Where the participants in the joint purchase, retention, sale, or exchange of investment property—

(i) Own the property as coowners,

(ii) Reserve the right separately to take or dispose of their shares of any property acquired or retained, and

(iii) Do not actively conduct business or irrevocably authorize some person or persons acting in a representative capacity to purchase, sell, or exchange such investment property, although each separate participant may delegate authority to purchase, sell, or exchange his share of any such investment property for the time being for his account, but not for a period of more than a year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section.

(3) Operating agreements. Where the participants in the joint production, extraction, or use of property—

(i) Own the property as coowners, either in fee or under lease or other form of contract granting exclusive operating rights, and

(ii) Reserve the right separately to take in kind or dispose of their shares of any property produced, extracted, or used, and

(iii) Do not jointly sell services or the property produced or extracted, although each separate participant may delegate authority to sell his share of the property produced or extracted for the time being for his account, but not for a period of time in excess of the minimum needs of the industry, and in no event for more than 1 year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section. However, the preceding sentence does not apply to any unincorporated organization one of whose principal purposes is cycling, manufacturing, or processing for persons who are not members of the organization.

(b) Complete exclusion from subchapter K—(1) Time for making election for exclusion. Any unincorporated organization described in subparagraph (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) not later than the time prescribed by paragraph (e) of § 1.6031–1 (including extensions thereof) for filing the partnership return for the first taxable year for which exclusion from subchapter K is desired. Notwithstanding the prior sentence such organization may be deemed to have made the election in the manner prescribed in subparagraph (2)(ii) of this paragraph.

(2) Method of making election. (i) Except as provided in subdivision (ii) of this subparagraph, any unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) in a statement attached to, or incorporated in, a properly executed partnership return, Form 1065, which shall contain the information required in this subdivision. Such return shall be filed with the internal revenue officer with whom a partnership return, Form 1065, would be required to be filed if no election were made. Where, for the purpose of determining such officer, it is necessary to determine the internal revenue district (or service center serving such district) in which the electing organization has its principal office or place of business, the principal office or place of business of the person filing the return shall be considered the principal office or place of business of the organization. The partnership return must be filed not later than the time prescribed by paragraph (e) of § 1.6031–1 (including extensions thereof) for filing the partnership return with respect to the first taxable year for which exclusion from subchapter K is desired. Such partnership return shall contain, in lieu of the information required by Form 1065 and by the instructions relating thereto, only the name or other identification and the address of the organization together with information on the return, or in the statement attached to the return, showing the names, addresses, and identification numbers of all the members of the organization; a statement that the organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section; a statement that all of the members of the organization elect that it be excluded from all of subchapter K; and a statement indicating where a copy of the agreement under which the organization operates is available (or if the agreement is oral, from whom the provisions of the agreement may be obtained).

(ii) If an unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section does not make the election provided in section 761(a) in the manner prescribed by subdivision (i) of this subparagraph, it shall nevertheless be deemed to have made the election if it can be shown from all the surrounding facts and circumstances that it was the intention of the members of such organization at the time of its formation to secure exclusion from all of subchapter K beginning with the first taxable

year of the organization. Although the following facts are not exclusive, either one of such facts may indicate the requisite intent:

(a) At the time of the formation of the organization there is an agreement among the members that the organization be excluded from subchapter K beginning with the first taxable year of the organization, or

(b) The members of the organization owning substantially all of the capital interests report their respective shares of the items of income, deductions, and credits of the organization on their respective returns (making such elections as to individual items as may be appropriate) in a manner consistent with the exclusion of the organization from subchapter K beginning with the first taxable year of the organization.

(3) Effect of election—(i) In general. An election under this section to be excluded will be effective unless within 90 days after the formation of the organization (or by October 15, 1956, whichever is later) any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such election is irrevocable as long as the organization remains qualified under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, or unless approval of revocation of the election is secured from the Commissioner. Application for permission to revoke the election must be submitted to the Commissioner of Internal Revenue, Attention: T:I, Washington, D.C. 20224, no later than 30 days after the beginning of the first taxable year to which the revocation is to apply.

(ii) Special rule. Notwithstanding subdivision (i) of this subparagraph, an election deemed made pursuant to subparagraph (2)(ii) of this paragraph will not be effective in the case of an organization which had a taxable year ending on or before November 30, 1972, if any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such notification to the Commissioner must be made on or before January 2, 1973 and must include the names and addresses of all of the members of the organization.

(c) Partial exclusion from subchapter K. An unincorporated organization which wishes to be excluded from only certain sections of subchapter K must submit to the Commissioner, no later than 90 days after the beginning of the first taxable year for which partial exclusion is desired, a request for permission to be excluded from certain provisions of subchapter K. The request shall set forth the sections of subchapter K from which exclusion is sought and shall state that such organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, and that the members of the organization elect to be excluded to the extent indicated. Such exclusion shall be effective only upon approval of the election by the Commissioner and subject to the conditions he may impose.

(d) Cross reference. For requirements with respect to the filing of a return on Form 1065 by a partnership, see § 1.6031–1.

[T.D. 7208, 37 FR 20687, Oct. 3, 1972; 37 FR 23161, Oct. 31, 1972]

Effective Date For Subchapter K, Chapter 1 Of The Code

§ 1.771–1 Effective date.

(a) General rule. Except as provided in paragraph (b) or (c) of this section, the provisions of Subchapter K, Chapter 1 of the Code, shall apply to any taxable year of a partnership beginning after December 31, 1954, and to any part of a partner's taxable year falling within such partnership taxable year. The provisions of the Internal Revenue Code of 1939 relating to partnerships shall apply to any taxable year of a partnership beginning before January 1, 1955, and to any part of a partner's taxable year falling within such partnership taxable year. If a partnership and the partners are on different taxable years, Subchapter K shall become effective at the same time both for the partnership and for the partners.

(b) Special rules. Certain provisions of section 771 apply after specific dates in 1954, as follows:

(1) Adoption of taxable year. Section 706(b) (relating to the adoption of taxable years by partners and partnerships), shall apply to any partnership which adopts or changes to, and any partner who changes to, a taxable year beginning on or after April 2, 1954. For the purpose of applying this subparagraph, the rules of section 708 (relating to the continuation of partnerships) shall ap-

ply. For example, if two or more partnerships merge after April 1, 1954, and the new partnership uses the taxable year of the partnership of which it is deemed to be the successor under section 708(b)(2)(A), it will not need prior approval to continue to use such taxable year even though such year may be different from the taxable years of the partners. Such a partnership is not "adopting" or "changing" its taxable year.

(2) Property distributed by a partnership. Section 735(a), relating to the character of gain or loss on disposition of property distributed by a partnership to a partner, shall apply only to property distributed after March 9, 1954. Although a partnership whose taxable year begins before January 1, 1955, generally will be subject to the provisions of the Internal Revenue Code of 1939, any unrealized receivables or inventory items distributed by any such partnership after March 9, 1954, will be subject to the provisions of section 735(a), and the gain or loss on the subsequent disposition of such property will be ordinary gain or loss rather than capital gain or loss. In the case of property distributed before March 10, 1954, section 735(a) will not apply, even though the property is disposed of by the distributee partner after that date, unless the partnership elects under paragraph (c) of this section to apply section 735.

(3) Unrealized receivables and inventory items. Section 751 (providing for the realization of ordinary income on certain transfers or distributions of unrealized receivables or substantially appreciated inventory items) shall be applicable to any such transfer or distribution occurring after March 9, 1954. For the purpose of applying section 751 in the case of a taxable year beginning before January 1, 1955, a partnership or partner may elect to treat as applicable any other section of Subchapter K. See paragraph (f) of § 1.751–1.

(4) Partner receiving income in respect of a decedent. Section 753, which provides that the amount includible in the gross income of a successor in interest of a deceased partner under section 736(a) shall be considered income in respect of a decedent under section 691, shall apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954.

(c) Optional treatment of certain distributions. (1) For a partnership taxable year beginning after December 31, 1953, and before January 1, 1955, a partnership may elect to apply the rules of certain sections of Subchapter K with respect to current distributions made by the partnership in such year. These sections are 731, 732(a), (c), and (e), 733, 735, and 751(b), (c), and (d). If an election is made, it shall apply to the partnership and all its members for all current distributions made by the partnership during the taxable year. Such distributions shall also be subject to the rules of section 705 (relating to determination of basis of a partner's interest), 752 (relating to treatment of certain liabilities), and 761(d) (relating to the definition of liquidation of a partner's interest), to the extent that such sections apply to current distributions.

(2) An election under this paragraph shall be made by a statement filed with the partnership return for the taxable year to which such election applies, or before August 23, 1956, whichever date is later. The statement shall be signed by all members of the partnership and the election once made shall be binding on the partnership and on all of its members.

Definition; Tax Imposed

§ 1.801–1 Definitions.

(a) Life insurance company. The term "life insurance company" as used in subtitle A of the Code is defined in section 801. For the purpose of determining whether a company is a "life insurance company" within the meaning of that term as used in section 801, it must first be determined whether the company is taxable as an insurance company under the Code. For the definition of an "insurance company", see paragraph (b) of this section. In determining whether an insurance company is a life insurance company, the life insurance reserves (as defined in section 803(b)) plus any unearned premiums and unpaid losses on noncancellable life, health, or accident policies, not included in "life insurance reserves" must comprise more than 50 percent of its total reserves (as defined in section 801). An insurance company writing only noncancellable life, health, or accident policies and having no "life insurance re-

serves" may qualify as a life insurance company if its unearned premiums and unpaid losses on such policies comprise more than 50 percent of its total reserves. A noncancellable insurance policy means a contract which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premium must be carried to cover that obligation. For the purpose of the preceding sentence, the term "unearned premium" means the amount which will cover the cost of carrying the insurance risk for the period for which the premium has been paid in advance. A burial or funeral benefit insurance company qualifying as a life insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services will be taxable under section 821 or section 831 as an insurance company other than life.

(b) **Insurance companies.** (1) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. A voluntary unincorporated association of employees formed for the purpose of relieving sick and aged members and the dependents of deceased members is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees is not required to file a separate return for such fund, but the income therefrom shall be included in the return of the corporation.

(2) Though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a corporation is authorized and intends to carry on, the character of the business actually done in the taxable year determines whether it is taxable as an insurance company under the Code. For example, during the year 1954 the M Corporation, incorporated under the insurance laws of the State of R, carried on the business of lending money in addition to guaranteeing the payment of principal and interest of mortgage loans. Of its total income for the year, one-third was derived from its insurance business of guaranteeing the payment of principal and interest of mortgage loans and two-thirds was derived from its noninsurance business of lending money. The M Corporation is not an insurance company for the year 1954 within the meaning of the Code and the regulations thereunder.

[T.D. 6513, 25 FR 12654, Dec. 10, 1960]

§ 1.801-2 Taxable years affected.

Section 1.801-1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.801-3 through 1.801-7 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). Section 1.801-8 is applicable only to taxable years beginning after December 31, 1961, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6513, 25 FR 12654, Dec. 10, 1960, as amended by T.D. 6886, 31 FR 8681, June 23, 1966]

§ 1.801-3 Definitions.

For purposes of Part I, Subchapter L, Chapter 1 of the Code, this section defines the following terms, which are to be used in determining if a taxpayer is a life insurance company (as defined in section 801(a) and paragraph (b) of this section):

(a) **Insurance company.** (1) The term "insurance company" means a company whose primary and predominant business activity during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies. Thus, though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a company is authorized and intends to carry on, it is the character of the business actually done in the taxable year which determines whether a company is taxable as an insurance company under the Internal Revenue Code.

(2) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. For taxable years beginning before January 1, 1970, a voluntary unincorporated association of employees, including an association fulfilling the requirements of section 801(b)(2)(B) (as in effect for such years), formed for the purpose of relieving sick and aged members and the dependents of deceased members, is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of

its employees is not an insurance company, and the income from such fund shall be included in the return of the corporation.

(b) Life insurance company. (1) The term "life insurance company", as used in subtitle A of the Code, is defined in section 801(a). For the purpose of determining whether a company is a "life insurance company" within the meaning of that term as used in section 801(a), it must first be determined whether the company is taxable as an insurance company (as defined in paragraph (a) of this section). An insurance company shall be taxed as a life insurance company if it is engaged in the business of issuing life insurance and annuity contracts (either separately or combined with health and accident insurance), or noncancellable contracts of health and accident insurance, and its life insurance reserves (as defined in section 801(b) and § 1.801–4), plus unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable life, health, or accident policies not included in life insurance reserves, comprise more than 50 percent of its total reserves (as defined in section 801(c) and § 1.801–5). For purposes of determining whether it satisfies the percentage requirements of the preceding sentence, a company shall first make any adjustments to life insurance reserves and total reserves required by section 806(a) (relating to adjustments for certain changes in reserves and assets) and then as required by section 801(d) (relating to adjustments in reserves for policy loans). For examples of the adjustments required under section 806(a), see paragraph (b)(4) of § 1.806–3. For an example of the adjustments required under section 801(d), see paragraph (c) of § 1.801–6. Furthermore, if an insurance company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such revalued basis shall be disregarded for purposes of section 801.

(2) An insurance company writing only noncancellable life, health, or accident policies and having no "life insurance reserves" may qualify as a life insurance company if its unearned premiums, and unpaid losses (whether or not ascertained), on such policies comprise more than 50 percent of its total reserves.

(3) Section 801(f) provides that a burial or funeral benefit insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services shall not be taxable under section 802 but shall be taxable under section 821 or section 831 as an insurance company other than life.

(c) Noncancellable life, health, or accident insurance policy. The term "noncancellable life, health, or accident insurance policy" means a health and accident contract, or a health and accident contract combined with a life insurance or annuity contract, which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Such a health and accident contract shall be considered noncancellable even though it states a termination date at a stipulated age, if, with respect to the health and accident contract, such age termination date is 60 or over. Such a contract, however, shall not be considered to be noncancellable after the age termination date stipulated in the contract has passed. However, if the age termination date stipulated in the contract occurs during the period covered by a premium received by the life insurance company prior to such date, and the company cannot cancel or modify the contract during such period, the age termination date shall be deemed to occur at the expiration of the period for which the premium has been received.

(d) Guaranteed renewable life, health, and accident insurance policy. The term "guaranteed renewable life, health, and accident insurance policy" means a health and accident contract, or a health and accident contract combined with a life insurance or annuity contract, which is not cancellable by the company but under which the company reserves the right to adjust premium rates by classes in accordance with its experience under the type of policy involved, and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Section 801(e) provides that such policies shall be treated in the same manner as noncancellable life, health, and accident insurance policies. For example, the age termination date requirements applicable to noncancellable health and accident insurance policies shall also apply to guaranteed renewable life, health, and accident insurance policies. See paragraph (c) of this section.

(e) Unearned premiums. The term "unearned premiums" means those amounts which shall cover the cost of carrying the insurance risk for the period for which the premiums have been paid in advance. Such term includes all unearned premiums, whether or not required by law.

(f) Life insurance reserves. For the definition of the term "life insurance reserves", see section 801(b) and § 1.801–4.

(g) Unpaid losses (whether or not ascertained). The term "unpaid losses (whether or not ascertained)" means a reasonable estimate of the amount of the losses (based upon the facts in each case and the company's experience with similar cases)—

(1) Reported and ascertained by the end of the taxable year but where the amount of the loss has not been paid by the end of the taxable year,

(2) Reported by the end of the taxable year but where the amount thereof has not been either ascertained or paid by the end of the taxable year, or

(3) Which have occurred by the end of the taxable year but which have not been reported or paid by the end of the taxable year.

(h) Total reserves. For the definition of the term "total reserves", see section 801(c) and § 1.801–5.

(i) Amount of reserves. For purposes of subsections (a), (b), and (c) of section 801 and this section, section 801(b)(5) provides that the amount of any reserve (or portion thereof) for any taxable year shall be the mean of such reserve (or portion thereof) at the beginning and end of the taxable year.

[T.D. 6513, 25 FR 12655, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, March 17, 1972]

§ 1.801–4 Life insurance reserves.

(a) Life insurance reserves defined. For purposes of Part I, Subchapter L, Chapter 1 of the Code, the term "life insurance reserves" (as defined in section 801(b)) means those amounts—

(1) Which are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest;

(2) Which are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies; and

(3) Which, except as otherwise provided by section 801(b)(2) and paragraphs (b) and (c) of this section, are required by law. For the meaning of the term "reserves required by law", see paragraph (b) of § 1.801–5.

For purposes of determining life insurance reserves, only those amounts shall be taken into account which must be reserved either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute. Moreover, such amounts must actually be held by the company during the taxable year for which the reserve is claimed. However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. For example, if an ordinary life policy with a reserve of $100 is reinsured in another solvent company on a yearly renewable term basis, and the reserve on such yearly renewable term policy is $10, the reinsured company shall include $90 ($100 minus $10) in determining its life insurance reserves. Generally, life insurance reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. For examples of reserves which qualify as life insurance reserves, see paragraph (d) of this section. For examples of reserves which do not qualify as life insurance reserves, see paragraph (e) of this section.

(b) Certain reserves which need not be required by law. Section 801(b)(2) sets forth certain reserves which, though not required by law, may still qualify as life insurance reserves, provided, however, that they first satisfy the requirements of section 801(b)(1)(A) and (B) and paragraph (a)(1) and (2) of this section. Thus, reserves need not be required by law—

(1) In the case of policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, and

(2) For taxable years beginning before January 1, 1970, in the case of policies issued by an organization which met the requirements of section 501(c)(9) (as it existed prior to amendment by the Tax Reform Act of 1969) other than the requirement of subparagraph (B) thereof.

(c) Assessment companies. Section 801(b)(3) provides that in the case of an assessment life insurance company or association, the term "life insurance reserves" includes—

(1) Sums actually deposited by such company or association with officers of a State or Territory pursuant to law as guaranty or reserve funds, and

(2) Any funds maintained, under the charter or articles of incorporation or association of such company or association (or bylaws approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

For purposes of part I, subchapter L, chapter 1 of the Code, the reserves described in this paragraph shall be included as life insurance reserves even though such reserves do not meet the requirements of section 801(b) and paragraph (a) of this section. However, for such reserves to be included as life insurance reserves, they must be deposited or maintained to liquidate future unaccrued claims arising from life insurance, annuity, or noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is deposited or maintained, life, health, or accident contingencies. The rate of interest assumed in calculating the reserves described in this paragraph shall be 3 percent, regardless of the rate of interest (if any) specified in the contract in respect of such reserves.

(d) Reserves which qualify as life insurance reserves. The following reserves, provided they meet the requirements of section 801(b) and paragraph (a) of this section, are illustrative of reserves which shall be included as life insurance reserves:

(1) Reserves held under life insurance contracts.

(2) Reserves held under annuity contracts (including reserves held under variable annuity contracts as described in section 801(g)(1)).

(3) Reserves held under noncancellable health and accident insurance contracts (as defined in paragraph (c) of § 1.801–3) and reserves held under guaranteed renewable health and accident insurance contracts (as defined in paragraph (d) of § 1.801–3).

(4) Reserves held either separately or combined under contracts described in subparagraphs (1), (2), or (3) of this paragraph.

(5) Reserves held under deposit administration contracts. Generally, the reserves held by a life insurance company on both the active and retired lives under deposit administration contracts will meet the requirements of section 801(b) and paragraph (a) of this section.

However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. See paragraph (a) of this section.

(e) Reserves and liabilities which do not qualify as life insurance reserves. The following are illustrative of reserves and liabilities which do not meet the requirements of section 801(b) and paragraph (a) of this section and, accordingly, shall not be included as life insurance reserves:

(1) Liability for supplementary contracts not involving at the time with respect to which the liability is computed, life, health, or accident contingencies.

(2) In the case of cancellable health and accident policies and similar cancellable contracts, the unearned premiums and unpaid losses (whether or not ascertained).

(3) The unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable life, health, or accident policies (and guaranteed renewable life, health, and accident policies) not included in life insurance reserves. (However, such amounts shall be taken into account under section 801(a)(2) for purposes of determining whether an insurance company is a life insurance company.)

(4) The deficiency reserve (as defined in section 801(b)(4)) for each individual contract, that is, that portion of the reserve for such contract equal to the amount (if any) by which—

(i) The present value of the future net premiums required for such contract, exceeds

(ii) The present value of the future actual premiums and consideration charged for such contract.

(5) Reserves required to be maintained to provide for the ordinary operating expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage.

(6) Liability for premiums received in advance.

(7) Liability for premium deposit funds.

(8) Liability for annual and deferred dividends declared or apportioned.

(9) Liability for dividends left on deposit at interest.

(10) Liability for accrued but unsettled policy claims whether known or unreported.

(11) A mandatory securities valuation reserve.

(f) Adjustments to life insurance reserves. In the event it is determined on the basis of the facts of a particular case that premiums deferred and uncollected and premiums due and unpaid are not properly accruable for the taxable year under section 809 and, accordingly, are not properly includible under assets (as defined in section 805(b)(4)) for the taxable year, appropriate reduction shall be made in the life insurance reserves. This reduction shall be made when the insurance company has calculated life insurance reserves on the assumption that the premiums on all policies are paid annually or that all premiums due on or prior to the date of the annual statement have been paid. [T.D. 6513, 25 FR 12656, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, March 17, 1972]

§ 1.801–5 Total reserves.

(a) Total reserves defined. For purposes of section 801(a) and § 1.801–3, the term "total reserves" is defined in section 801(c) as the sum of—

(1) Life insurance reserves (as defined in section 801(b) and § 1.801–4),

(2) Unearned premiums (as defined in paragraph (e) of § 1.801–3), and unpaid losses (whether or not ascertained) (as defined in paragraph (g) of § 1.801–3), not included in life insurance reserves, and

(3) All other insurance reserves required by law.

The term "total reserves" does not, however, include deficiency reserves (within the meaning of section 801(b)(4), and paragraph (e)(4) of § 1.801–4), even though such deficiency reserves are required by State law. In determining total reserves, a company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held during the taxable year for which the reserve is claimed. For example, during the taxable year 1958 a life insurance company sells life insurance and annuity contracts in States A and B. State A requires reserves of 10 against the life and 5 against the annuity business. State B requires reserves of 9 against the life and 7 against the annuity business. Assuming the company actually holds these reserves during the taxable year 1958, its highest aggregate reserve for such taxable year is the 16 required by State B. Thus, the company is not permitted to compute its highest aggregate reserve by taking State A's requirement of 10 against its life insurance business and adding it to State B's requirement of 7 against its annuity business.

(b) Reserves required by law defined. For purposes of Part I, Subchapter L, Chapter 1 of the Code, the term "reserves required by law" means reserves which are required either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute, and which are reported in the annual statement of the company and accepted by state regulatory authorities as held for the fulfillment of the claims of policyholders or beneficiaries.

(c) Information to be filed. In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. See section 6012 and paragraph (c) of § 1.6012–2. If the basis (for Federal income tax purposes) for determining the amount of any of the life insurance reserves as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year then the following information must be filed with respect to all such changes in basis:

(1) The nature of the life insurance reserve (*i.e.*, life, annuity, etc.);

(2) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the old basis, and the amount of such reserve at the beginning and close of the taxable year computed on the old basis;

(3) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the new basis, and the amount of such reserve at the close of the taxable year computed on the new basis;

(4) The deviation, if any, from recognized mortality or morbidity tables, or recognized methods of computation;

(5) The reasons for the change in basis of such reserve; and

(6) Whether such change in the reserve has been approved or accepted by the regulatory authorities of the State of domicile, and if so, a copy of the letter, certificate, or other evidence of such approval or acceptance.

(d) Illustration of principles. The provisions of section 801 relating to the percentage requirements for qualification as a life insurance company may be illustrated by the following example:

Example. The books of Y, an insurance company, selling life insurance, noncancellable health and accident insurance, and cancellable accident and health insurance, reflect (after adjustment under sections 806(a) and 801(d)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves	$3,000	$5,000	$4,000
2. Unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable accident and health insurance not included in life insurance reserves	400	600	500
3. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance........	1,800	2,200	2,000
4. All other insurance reserves required by law ...	900	1,100	1,000
5. Total reserves ..	....	....	7,500

The rules provided by section 801 require that the sum of the mean of the year figures in items 1 and 2 comprise more than 50 percent of the mean of the year figure in item 5 for an insurance company to qualify as a life insurance company. Thus, Y would qualify as a life insurance company for the taxable year 1958 as the sum of the mean of the year figures in items 1 and 2 ($4,500) comprise 60 percent of the mean of the year figure in item 5 ($7,500).

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

§ 1.801–6 Adjustments in reserves for policy loans.

(a) In General. Section 801(d) provides that for purposes only of determining whether or not an insurance company is a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), the life insurance reserves (as defined in section 801(b) and § 1.801–4), and the total reserves (as defined in section 801(c) and paragraph (a) of § 1.801–5), shall each be reduced by an amount equal to the mean of the aggregates, at the beginning and end of the taxable year, of the policy loans outstanding with respect to contracts for which life insurance reserves are maintained. Such reduction shall be made after any adjustments required under section 806(a) and § 1.806–3 have been made.

(b) Policy loans defined. The term "policy loans" includes loans made by the insurance company, by whatever name called, for which the reserve on a contract is the collateral.

(c) Illustration of principles. The provisions of section 801(d) and this section may be illustrated by the following example:

Example. The books of T, an insurance company, selling only life insurance and cancellable accident and health insurance, reflect (after adjustment under section 806(a)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves	$1,000	$2,000	$1,500
2. Policy loans ...	50	850	450
3. Life insurance reserves less policy loans	....	....	1,050
4. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance........	900	1,600	1,250
5. Total reserves adjusted for policy loans (item 3 plus item 4)	....	....	2,300

As the rules provided by section 801(a) and (d) require that the figure in item 3 ($1,050) be more than 50 percent of the mean of the year figure in item 5 ($2,300) for an insurance company to qualify as a life insurance company, T would not qualify as a life insurance company for the taxable year 1958.

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

§ 1.801–7 Variable annuities.

(a) In general. (1) Section 801(g)(1) provides that for purposes of Part I, Subchapter L, Chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) The reserves held with respect to the annuity contracts described in section 801(g)(1) and subparagraph (1) of this paragraph shall qualify as life insurance reserves within the meaning of sec-

tion 801(b)(1) and paragraph (a) of § 1.801–4 provided such reserves are required by law (as defined in paragraph (b) of § 1.801–5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing variable annuity contracts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of § 1.801–3.

(b) Special rules for variable annuities—(1) Adjusted reserves rate; assumed rate. The adjusted reserves rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section, and the rate of interest assumed by the taxpayer for any taxable year in calculating the reserve on any such contract, shall be a rate equal to the current earnings rate determined under section 801(g)(3) and subparagraph (2) of this paragraph. However, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a variable annuity contract for any taxable year which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810(d)(1) (relating to adjustment for change in computing reserves).

(2) Current earnings rate. (i) The current earnings rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section shall be the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805–5 with respect to such contracts, reduced by the percentage obtained by dividing (a) the amount of the actuarial margin charge on all such variable annuity contracts issued by the taxpayer, by (b) the mean of the reserves for such contracts.

(ii) For purposes of section 801(g)(3) and subdivision (i) of this subparagraph, the term "actuarial margin charge" means any amount retained by the company from gross investment income pursuant to the terms of the variable annuity contract in excess of any portion of the investment expenses which is attributable to such contract and which is deductible under section 804(c) and paragraph (b) of § 1.804–4.

(3) Increases and decreases in reserves. (i) Section 801(g)(4) provides that for purposes of section 810(a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of § 1.810–2 taken into account as of the close of the taxable year shall be adjusted—

(a) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves for variable annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section by reason of realized or unrealized appreciation in the value of the assets held in relation thereto, and

(b) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(ii) The application of section 801(g)(4) and subdivision (i) of this subparagraph may be illustrated by the following example:

Example. Company M, a life insurance company issuing only variable annuity contracts of the type described in section 801(g)(1) and paragraph (a)(1) of this section, increased its life insurance reserves held with respect to such contracts during the taxable year 1959 by $275,000. Of the total increase in the reserves, $100,000 was attributable to premium receipts, $50,000 to dividends and interest, $100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and $25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1959, the reserves held by company M with respect to all variable annuity contracts amounted to $1,275,000. However, under section 801(g)(4) and subdivision (i) of this subparagraph, this amount must be reduced by the $100,000 unrealized asset value appreciation and the $25,000 of realized capital gains. Accordingly, for purposes of section 810(a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1959 under section 810(c) is $1,150,000 ($1,275,000 less $125,000).

(c) Companies issuing variable annuities and other contracts. **(1)** In the case of a life insurance company which issues both annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section and other contracts, the policy and other contract liability requirements (as defined in section 805(a) and paragraph (b) of § 1.805–4) of such a company for any taxable year shall be considered to be the sum of—

(i) The policy and other contract liability requirements computed with respect to the items which relate to such variable annuity contracts, and

(ii) The policy and other contract liability requirements computed by excluding the items taken into account under subdivision (i) of this subparagraph.

(2) [Reserved for regulations to be issued under section 801(g)(5)(B).]

(d) Termination. Paragraphs (1), (2), (3), (4), and (5) of section 801(g) and paragraphs (a), (b), (c), and (d) of this section shall not apply with respect to any taxable year beginning after December 31, 1962.

[T.D. 6610, 27 FR 8717, Aug. 31, 1962]

§ 1.801–8 Contracts with reserves based on segregated asset accounts.

(a) Definitions—(1) Annuity contracts include variable annuity contracts. Section 801(g)(1)(A) provides that for purposes of part I, subchapter L, chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) Contracts with reserves based on a segregated asset account. (i) For purposes of part I, section 801(g)(1)(B) defines the term "contract with reserves based on a segregated asset account" as a contract (individual or group)—

(a) Which provides for the allocation of all or part of the amounts received under the contract to an account which, pursuant to State law or regulation, is segregated from the general asset accounts of the company,

(b) Which provides for the payment of annuities, and

(c) Under which the amounts paid in, or the amount paid as annuities, reflect the investment return and the market value of the segregated asset account.

(ii) The term "contract with reserves based on a segregated asset account" includes a contract such as a variable annuity contract, which reflects the investment return and the market value of the segregated asset account, even though such contract provides for the payment of an annuity computed on the basis of recognized mortality tables, but the term includes such contract only for the period during which it satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph. However, such term does not include a pension contract written on the basis of the so-called new-money concept. Thus, for example, such term does not include a pension contract whereby reserves are credited on the basis of the company's new high yield investments. Furthermore, such term does not include a contract which during the taxable year contains a right to participate in the divisible surplus of the company where such right merely reflects the company's investment return. Nevertheless, the term does include a contract which meets the requirements of section 801(g)(1)(B) and of this subparagraph even if part of the amounts received are, for example, allocated to reserves under provisions of the contract which are written on the basis of the new-money concept. However, such reserves do not qualify as a segregated asset account referred to in section 801(g) and this section.

(iii) If at any time during the taxable year a contract otherwise satisfying the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph ceases to reflect current investment return and current market value, such contract shall not be considered as meeting the requirements of section 801(g)(1)(B)(iii) and subdivision (i)(c) of this subparagraph after such cessation. Thus, a contract with reserves based on a segregated asset account includes a contract under which the reflection of investment return and market value terminates at the beginning of the annuity payments, but only for the period prior to such termination. For example, if the purchaser of a variable annuity contract which meets such requirements elects an option which provides for the payment of a fixed dollar annuity, then such contract shall be considered as satisfying such requirements only for the period prior to the time such contract ceases to reflect current investment return and current market value. Furthermore, a group annuity contract which satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph shall be considered as continuing to meet such requirements even though a certificate holder under the group contract elects an option which provides for the payment of a fixed dollar annuity. However, the annuity attributable to such certificate holder shall not be considered as satisfying such requirements as of the time such annuity ceases to reflect current investment return and current market value. On the other hand, a group annuity contract which does not reflect current market value shall not be considered as satisfying such requirements even though a certificate holder under the group contract elects an

option which provides for the payment of a variable annuity. However, the variable annuity attributable to such certificate holder shall be considered as satisfying such requirements as of the time such variable annuity commences to reflect current investment return and current market value.

(b) **Life insurance reserves.** Section 801(g)(2) provides that for purposes of section 801(b)(1)(A), the reflection of the investment return and the market value of the segregated asset account shall be considered an assumed rate of interest. Thus, the reserves held with respect to contracts described in section 801(g)(1) and paragraph (a) of this section shall qualify as life insurance reserves within the meaning of section 801(b)(1) and paragraph (a) of § 1.801–4 provided such reserves are required by law (as defined in paragraph (b) of § 1.801–5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts with reserves based on segregated asset accounts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing contracts with reserves based on segregated asset accounts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of § 1.801–3.

(c) **Separate accounting.** (1) For purposes of part I, section 801(g)(3) provides that a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3) which issues contracts with reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section) shall separately account for each and every income, exclusion, deduction, asset, reserve, and other liability item which is properly attributable to such segregated asset accounts. In those cases where such items are not directly accounted for, separate accounting shall be made—

(i) According to the method regularly employed by the company, if such method is reasonable, and

(ii) In all other cases in a manner which, in the opinion of the district director, is reasonable.

A method of separate accounting for such items as are not accounted for directly will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before issued contracts with reserves based on segregated asset accounts, the company initiates in the first taxable year for which it issues such contracts a reasonable method of separate accounting for such items and consistently follows such method thereafter. Ordinarily, a company regularly employs a method of accounting in accordance with the statute of the State, Territory, or the District of Columbia, in which it operates.

(2) Every life insurance company issuing contracts with reserves based on segregated asset accounts shall keep such permanent records and other data relating to such contracts as is necessary to enable the district director to determine the correctness of the application of the rules prescribed in section 301(g) and this section and to ascertain the accuracy of the computations involved.

(d) **Investment yield.** (1) For purposes of part I, section 801(g)(4)(A) provides that the policy and other contract liability requirements (as determined under section 805), and the life insurance company's share of investment yield (as determined under section 804(a) or 809(b)), shall be separately computed—

(i) With respect to the items separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section, and

(ii) Excluding the items taken into account under subdivision (i) of this subparagraph.

Thus, for purposes of determining both taxable investment income and gain or loss from operations, a life insurance company shall separately compute the life insurance company's share of the investment yield on the assets in its segregated asset account without regard to the policy and other contract liability requirements of, and the investment income attributable to, contracts with reserves that are not based on the segregated asset account. Such separate computations shall be made after any allocation required under section 801(g)(4)(B) and subparagraph (2) of this paragraph.

(2)(i) Section 801(g)(4)(B) provides that if the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), determined without regard to any separate computations under section 801(g)(4)(A) and subparagraph (1) of this paragraph, then such excess shall be allocated between section 801(g)(4)(A)(i) and (ii) and subparagraph (1)(i) and (ii) of this paragraph. Such allocation shall be in proportion to the respective contributions to such excess of the items taken into ac-

count under each such section and subparagraph. The allocation under this subparagraph shall be made before the separate computations prescribed by section 801(g)(4)(A) and subparagraph (1) of this paragraph.

(ii) The operation of the allocation required under section 801(g)(4)(B) and subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). For the taxable year 1962, T, a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on segregated asset accounts, had (without regard to section 801(g)(4)(A)) realized short-term capital gains of $10,000 and short-term capital losses of $10,000 attributable to its general asset accounts and realized short-term capital gains of $12,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain ($10,000+$12,000–$10,000, or $12,000) over the net long-term capital loss (0) was $12,000. Of the excess of $12,000, 100 percent was contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B), T would allocate the entire $12,000 to its segregated asset accounts for such taxable year.

Example (2). The facts are the same as in example (1), except that for the taxable year 1962, T had (without regard to section 801(g)(4)(A)) realized short-term capital losses of $8,000 attributable to its general asset accounts and realized long-term capital gains of $1,000 and long-term capital losses of $5,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain ($10,000+$12,000–$8,000, or $14,000) over the net long-term capital loss ($5,000–$1,000, or $4,000) was $10,000. Of the excess of $10,000, the general asset accounts contributed 20 percent ($2,000 ($10,000–$8,000)÷$10,000) and the segregated asset accounts contributed 80 percent ($8,000 ($12,000–$4,000)÷$10,000). Applying the provisions of section 801(g)(4)(B), T would allocate $2,000 ($10,000×20 percent) to its general asset accounts and $8,000 ($10,000×80 percent) to its segregated asset accounts for such taxable year.

Example (3). W is a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on either of two segregated asset accounts, Separate Account C or Separate Account D. For the taxable year 1962, W had (without regard to section 801(g)(4)(A)) realized short-term capital gains of $16,000 and long-term capital losses of $15,000 attributable to its general asset accounts, long-term capital gains of $12,000 and short-term capital losses of $6,000 attributable to Separate Account C and long-term capital gains of $7,000 and short-term capital losses of $5,000 attributable to Separate Account D. For the taxable year 1962, the excess of the net short-term capital gain ($16,000–$6,000–$5,000) over the net long-term capital loss (0) was $5,000. Of the $5,000 excess, 20 percent ($16,000–$15,000÷$5,000) was contributed by the general asset accounts, leaving 80 percent as the amount contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B) W would allocate $1,000 (20 percent of $5,000) to the general asset accounts, leaving $4,000 (80 percent of $5,000) to be allocated among the segregated asset accounts, Separate Account C and Separate Account D. W would allocate $3,000 of the $4,000 to Separate Account C computed as follows:

$$\$3{,}000 = \frac{(\$4{,}000)\times(\$12{,}000\text{–}\$6{,}000)}{(\$12{,}000\text{–}\$6{,}000)+(\$7{,}000\text{–}\$5{,}000)}$$

W would allocate $1,000 of the $4,000 to Separate Account D computed as follows:

$$\$1{,}000 = \frac{(\$4{,}000)\times(\$7{,}000\text{–}\$5{,}000)}{(\$12{,}000\text{–}\$6{,}000)+(\$7{,}000\text{–}\$5{,}000)}$$

(e) Policy and other contract liability requirements. **(1)** For purposes of part I, section 801(g)(5)(A) provides that with respect to life insurance reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section), the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed by the taxpayer for purposes of sections 805(c) and 809(a)(2), shall be a rate equal to the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805–5 with respect to the items separately accounted for in accordance with section 801(g)(3), reduced by the percentage obtained by dividing—

(i) Any amount retained with respect to all of the reserves based on a segregated asset account by the life insurance company from gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804–3) on segregated assets, to the extent such retained amount exceeds the deductions allowable under section 804(c) which are attributable to such reserves, by

(ii) The means of such reserves.

(2) For purposes of part I, section 801(g)(5)(B) provides that with respect to reserves based on segregated asset accounts other than life insurance reserves, there shall be included as interest paid within the meaning of section 805(e)(1) and paragraph (b)(1) of § 1.805–8, an amount equal to the product of the means of such reserves multiplied by the rate of interest assumed as defined in section 801(g)(5)(A) and subparagraph (1) of this paragraph.

(3) For purposes of this paragraph, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a contract with reserves based on a segregated asset account for any taxable year beginning after December 31, 1961, which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810(d)(1) (relating to adjustment for change in computing reserves).

(4) The provisions of section 801(g)(3) through (5) may be illustrated by the following example. For purposes of this example, it is assumed that all computations have been carried out to a sufficient

number of decimal places to insure substantial accuracy and to eliminate any significant error in the resulting tax liability.

Example. The books of R, a life insurance company, discloses the following facts with respect to items of investment yield, deductions, assets, and reserves for the taxable year 1962:

(a) Excerpts from Company Financial Statements.

(1) Investment yield	Company regular account	Separate account A	Separate account B
Interest wholly tax-exempt	$100,000	$3,000	$1,000
Interest—other	10,000,000	8,000	15,000
Dividends received	200.000	25,000	27,000
Other items of investment yield	100,000	2,000	1,000
Gross investment income	10,400,000	38,000	44,000
Less deductions (sec. 804(c))	1,000,000	4,000	4,400
Investment yield	9,400,000	34,000	39,600
(2) Assets and reserves:			
(i) Assets:			
Jan. 1, 1962	190,000,000	....	....
Dec. 31, 1962	210,000,000	1,600,000	1,800,000
Mean	200,000,000	800,000	900,000
(ii) Life insurance reserves:			
Jan. 1, 1962	152,000,000	....	....
Dec. 31, 1962	168,000,000	1,600,000	1,640,000
Mean	160,000,000	800,000	820,000
(iii) Reserves based on segregated asset accounts other than life insurance reserves:			
Jan. 1, 1962	....	....	....
Dec. 31, 1962	....	....	120,000
Mean	....	....	60,000

(b) Additional facts. In addition to the facts assumed in (a) above, assume the following: The company retained with respect to reserves based upon segregated asset accounts a total of $4,720 from gross investment income on Separate Account A and $5,720 from gross investment income on Separate Account B. With respect to the Company Regular Account computed without regard to the items in either of the separate accounts, the policy and other contract liability requirement is $6,580,000 and the required interest is $5,640,000. There are no items of interest paid with respect to the separate accounts other than those computed under section 801(g)(5)(B). Based on these facts, the current earnings rate (sec. 805(b)); adjusted reserves rate (sec. 805 (b)); and rate of interest assumed (secs. 805(c) and 809(a)(2)); and the policy and other contract liability requirements are determined for each of the Separate Accounts A and B (and the policy and other contract liability requirements for the Company Regular Account) as set forth in items (c) through (l) below.

(c) Separate Account A. The current earnings rate determined under section 805(b)(2) with respect to the items separately accounted for under Separate Account A, prior to the reduction provided for under section 801(g)(5)(A), is 4.25 percent (the investment yield, $34,000, divided by the mean of the assets, $800,000). The company retained with respect to such reserves from gross investment income on Separate Account A a total of $4,720. The company had deductions allowable under section 804(c) with respect to such account of $4,000. Accordingly, for purposes of section 801(g)(5)(A)(i), the amount retained by the company was $720 (the total amount retained of $4,720 less the deductions allowable under section 804(c) of $4,000). The reduction percentage for purposes of section 801(g)(5)(A) is 0.09 percent (the amount retained of $720 divided by the mean of the life insurance reserves of $800,000). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of sections 805(c) and 809(a)(2) is equal to 4.16 percent (the current earnings rate of 4.25 percent less the reduction percentage of 0.09 percent).

The policy and other contract liability requirements with respect to Separate Account A is determined as follows: For purposes of section 805(a)(1) and (2), the amount is $33,280 (the mean of the life insurance reserves, $800,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.16 percent). Thus, the policy and other contract liability requirement for Separate Account A is $33,280.

(d) Separate Account B. The current earnings rate determined under section 805(b)(2) with respect to the items separately accounted for under Separate Account B, prior to the reduction provided for under section 801(g)(5)(A), is 4.40 percent (the investment yield, $39,600 divided by the mean of the assets, $900,000). The company retained with respect to such reserves from gross investment income on Separate Account B a total of $5,720. The company had deductions allowable under section 804(c) with respect to such account of $4,400. Accordingly, for purposes of section 801(g)(5)(A)(i) the amount retained by the company was $1,320 (the total amount retained of $5,720 less the deductions allowable under section 804(c) of $4,400). The reduction percentage for purposes of section 801(g)(5)(A) is 0.15 percent (the amount retained of $1,320 divided by the mean of the reserves based on Separate Account B of $880,000 ($820,000 plus $60,000)). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of section 805(c) and 809(a)(2) is equal to 4.25 percent (the current earnings rate of 4.40 percent less the reduction percentage of 0.15 percent).

With respect to reserves based on segregated asset accounts other than life insurance reserves, Separate Account B had such reserves at December 31, 1962, of $120,000. The mean of such reserves was $60,000. The rate of interest assumed with respect to such reserves is 4.25 percent, as computed above. Accordingly, there shall be included as interest paid within the meaning of section 805(e)(1) the amount of $2,550 (the mean of such reserves, $60,000 multiplied by the rate of interest assumed of 4.25 percent).

The policy and other contract liability requirements with respect to Separate Account B is determined as follows:

(1) For purposes of section 805(a)(1) and (2), the amount is $34,850 (the mean of the life insurance reserves, $820,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.25 percent).

(2) For purposes of section 805(a)(3), the amount is $2,550 (the mean of the reserves based on Separate Account B other than life insurance reserves, $60,000, multiplied by the rate of interest assumed, as determined under section 801(g)(5)(A), 4.25 percent). It has been assumed that there was no other interest paid on Separate Account B within the meaning of section 805(e). If there was other interest paid with respect to Separate Account B that met the requirements of section 805(e), however, then such interest would be included under section 805(a)(3). Thus, the policy and other contract liability

requirement for Separate Account B is $37,400 ($34,850+$2,550).

(e) Company Regular Account. The policy and other contract liability requirements with respect to the Company Regular Account is $6,580,000 (this amount is determined by the company in the manner provided by section 805 (and the regulations thereunder) without regard to either Separate Account A or Separate Account B).

(f) Policyholders' share and company's share of investment yield—section 804. The policyholders' and company's share of investment yield and taxable investment income are computed as follows:

(1) Company Regular Account

Policyholders' share of investment yield.	70% ($6,580,000 ÷ $9,400,000).
Company's share of investment yield (100% less 70%).	30%.

(2) Separate Account A

Policyholders' share of investment yield.	97.8824% ($33,280 ÷ $34,000).
Company's share of investment yield (100% less 97.8824%).	2.1176%.

(3) Separate Account B

Policyholders' share of investment yield.	94.444% ($37,400 ÷ $39,600).
Company's share of investment yield (100% less 94.444%).	5.556%.

(g) The company's share of investment yield under section 804 is determined as follows:

Investment yield (from item (a)(1))	Company regular account (30 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item(a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt	$30,000	$63.53	$55.56
Interest—other	3,000,000	169.41	833.40
Dividends received	60,000	529.40	1,500.12
Other items of gross investment income	30,000	42.35	55.56
	3,120,000	804.69	2,444.64
Less deductions	300,000	84.70	244.46
Investment yield	2,820,000	719.99	2,200.18

(h) Taxable investment income. The company's taxable investment income (without regard to any excess of net long-term capital gain over net short-term capital loss) is determined as follows:

Life insurance company's share of investment yield ($2,820,000 + $719.99 + $2,200.18)		$2,822,920.17
Less:		
Company's share of interest wholly tax-exempt ($30,000 + $63.53 + $55.56) =	$30,119.09	
85 percent of company's share of dividends received (but not to exceed 85% of taxable investment income computed without regard to this deduction) (85% × $62,029.52) ($60,000 + $529.40 + $1,500.12) =	52,725.09	
Small business deduction (10% of investment yield, $9,473,600, not to exceed $25,000) =$25,000.00		107,844.18
Taxable investment income		2,715,075.99

(i) Required interest—section 809(a)(2)—(1) Separate Account A. The rate of interest assumed by the company, with respect to Separate Account A is 4.16 percent (see (c) above). The required interest for purposes of section 809(a)(2) is determined as follows:

Life insurance reserves: 4.16% (rate assumed) times $800,000 (mean of life insurance reserves)	$33,280.00

(2) Separate Account B. The rate of interest assumed by the company with respect to Separate Account B is 4.25 percent (see (d) above). The required interest for purposes of section 809(a)(2) is determined as follows:

(i) Life insurance reserves: 4.25% (rate assumed) times $820,000 (mean of life insurance reserves)	$34,850.00
(ii) Other section 810(c) reserves: 4.25% (rate assumed) times $60,000 (mean of reserves other than life insurance reserves)	$2,550.00
	$37,400.00

(3) Company Regular Account. The required interest with respect to the Company Regular Account is $5,640,000 (this amount is assumed for purposes of this example, but it would be determined by the company in the manner provided by section 809 without regard to either Separate Account A or Separate Account B).

(j) Policyholders' share and company's share of investment yield—section 809. The policyholders' share and the company's share of investment yield for purposes of section 809 is determined as follows:

(1) Company Regular Account:

Policyholders' share of investment yield	60% ($5,640,000 ÷ $9,400,000).
Company's share of investment yield (100 percent − 60%)	40%.

(2) Separate Account A:	
Policyholders' share of investment yield	97.8824% ($33,280 ÷ $34,000).
Company's share of investment yield (100% − 97.8824 percent)	2.1176%.
(3) Separate Account B:	
Policyholders' share of investment yield	94.444% ($37,400 ÷ $39,600).
Company's share of investment yield (100% − 94.444%)	5.556%.

(k) The company's share of investment yield under section 809 is determined as follows:

Investment yield (from item (a)(1))	Company regular account (40 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt	$40,000	$63.53	$55.56
Interest—other	4,000,000	169.41	833.40
Dividends received	80,000	529.40	1,500.12
Other items of gross investment income	40,000	42.35	55.56
	4,160,000	804.69	2,444.64
Less deductions	400,000	84.70	244.46
Investment yield	3,760,000	719.99	2,200.18

(*l*) Deductions under section 809(d)(8). For purposes of section 809(d)(8), the life insurance company's share of each of such items is determined as follows:

(1) Wholly tax-exempt interest ($40,000 + $63.53 + $55.56)	$40,119.09
(2) Dividends received 85% × $82,029.52 ($80,000 + $529.40 + $1,500.12) (it is assumed for purposes of this example that this amount does not exceed 85% of the gain from operations as computed under sec. 809(d)(8)(B))	69,725.09

(f) **Increases and decreases in reserves.** (1) Section 801(g)(6) provides that for purposes of section 810(a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of § 1.810–2 taken into account as of the close of the taxable year shall be adjusted—

(i) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section by reason of realized or unrealized appreciation in value of the assets held in relation thereto, and

(ii) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Company M, a life insurance company issuing only contracts with reserves based on segregated asset accounts as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section (other than contracts described in section 805(d)(1)(A), (B), (C), or (D)), increased its life insurance reserves held with respect to such contracts during the taxable year 1962 by $275,000. Of the total increase in the reserves, $100,000 was attributable to premium receipts, $50,000 to dividends and interest, $100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and $25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1962, the reserves held by company M with respect to all such contracts amounted to $1,275,000. However, under section 801(g)(6) and this subparagraph, this amount must be reduced by the $100,000 unrealized asset value appreciation and the $25,000 of realized capital gains. Accordingly, for purposes of section 810(a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1962 under section 810(c) is $1,150,000 ($1,275,000 less $125,000). However, for purposes of section 810(a) and (b), the amount of these reserves which is to be taken into account as of the beginning of the taxable year 1963 under section 810(c) is $1,275,000 (the amount as of the close of the taxable year 1962 before reduction of $125,000 for unrealized appreciation and realized capital gains).

(3)(i) Under section 801(g)(6), the deduction allowable for items described in section 809(d)(1) and (7) (relating to death benefits and assumption reinsurance, respectively) with respect to segregated asset accounts shall be reduced to the extent that the amount of such items is increased for the taxable year by appreciation (or shall be increased to the extent that the amount of such items is decreased for the taxable year by depreciation) not reflected in adjustments required to be made under subparagraph (1) of this paragraph.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. On June 30, 1962, X, a life insurance company, reinsured a portion of its insurance contracts with reserves based on segregated asset accounts with Y, a life insurance company, under an agreement whereby Y agreed to assume and become solely liable under the contracts reinsured. The re-

serves on the contracts reinsured by X were $90,000, of which $10,000 was attributable to unrealized appreciation in the value of the assets held in relation to such reserves. However, no amounts had been added to the reserves by reason of the unrealized appreciation of $10,000 and consequently, the $10,000 was not reflected in adjustments to reserves under section 809(g)(6) or subparagraph (1) of this paragraph. Under the reinsurance agreement, X made a payment of $90,000 in cash to Y for assuming such contracts. Applying the provisions of section 809(d)(7), and assuming no other such reinsurance transactions by X during the taxable year, X would have an allowable deduction of $90,000 as a result of this payment on June 30, 1962. However, applying the provisions of section 801(g)(6) and this subparagraph, the actual deduction allowed would be $80,000 ($90,000 less $10,000). See section 806(a) and § 1.806–3 for the adjustments in reserves and assets to be made by X and Y as a result of this transaction. For the treatment by Y of this $90,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of § 1.809–4.

(g) **Basis of assets held for certain pension plan contracts.** Section 801(g)(7) provides that in the case of contracts described in section 805(d)(1)(A), (B), (C), (D), or (E) (relating to the definition of pension plan reserves), the basis of each asset in a segregated asset account shall (in addition to all other adjustments to basis) be (i) increased by the amount of any appreciation in value, and (ii) decreased by the amount of any depreciation in value; but only to the extent that such appreciation and depreciation are reflected in the increases and decreases in reserves, or other items described in section 801(g)(6), with respect to such contracts. Thus, there shall be no capital gains tax payable by a life insurance company on appreciation realized on assets in a segregated asset account to the extent such appreciation has been reflected in reserves, or other items described in section 801(g)(6), for contracts described in section 805(d)(1)(A), (B), (C), (D), or (E) based on segregated asset accounts.

(h) **Additional separate computation—(1) Assets and total insurance liabilities.** A life insurance company which issues contracts with reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section) shall separately compute and report with its return the assets and total insurance liabilities which are properly attributable to all of such segregated asset accounts. Each foreign corporation carrying on a life insurance business which issues such contracts shall separately compute and report with its return assets held in the United States and total insurance liabilities on United States business which are properly attributable to all of such segregated asset accounts.

(2) **Foreign life insurance companies.** For adjustment under section 819 in the case of a foreign life insurance company which issues contracts based on segregated asset accounts under section 801(g), see § 1.819–2(b)(4).

[T.D. 6886, 31 FR 8681, June 23, 1966, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968; T.D. 7501, 42 FR 42341, Aug. 23, 1977]

§ 1.802(b)–1 Tax on life insurance companies.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, section 802(b) imposes a tax on the 1954 life insurance company taxable income of all life insurance companies (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801). The tax so imposed is equal to 3¾ percent of the amount of such income not in excess of $200,000, plus 6½ percent of the amount of such income in excess of $200,000. For the definition of the term "1954 life insurance company taxable income", see § 1.805–1.

(b) The taxable income of life insurance companies differs from the taxable income of other corporations. See section 803. Life insurance companies are entitled, in computing life insurance company taxable income, to the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. The gross income, the deduction under section 803(g)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. See section 803(i) and § 1.803–6. Such companies are not subject to the provisions of subchapter P (section 1201 and following), chapter 1 of the Code, relating to capital gains and losses, nor to the provisions of section 171 (amortizable bond premium).

(c) All provisions of the Code and of the regulations in this part not inconsistent with the specific provision of sections 801 to 807, inclusive, are applicable to the assessment and collection of the tax imposed by section 802, and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(d) Foreign life insurance companies not carrying on an insurance business within the United

States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.802-2 Taxable years affected.

Section 1.802(b)-1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.802-3 through 1.802-5 (other than paragraph (f)(2) of § 1.802-3), except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126). Paragraph (f)(2) of § 1.802-3 is applicable only to taxable years beginning after December 31, 1961, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), section 3 of the Act of October 23, 1962 (76 Stat. 1134) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126).

[T.D. 6513, 25 FR 12654, Dec. 10, 1960, as amended by T.D. 6845, 30 FR 9740, Aug. 5, 1965; T.D. 6886, 31 FR 8685, June 23, 1966]

§ 1.802-3 Tax imposed on life insurance companies.

(a) In general. For taxable years beginning after December 31, 1957, section 802(a)(1) imposes a tax on the life insurance company taxable income (as defined in section 802(b) and paragraph (a) of § 1.802-4) of every life insurance company (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801(a)). The tax imposed by section 802(a)(1) is payable upon the basis of returns rendered by the life insurance companies liable thereto. See subchapter A, chapter 61 (section 6001 and following) of the Code.

(b) Tax imposed. The tax imposed by section 802(a)(1) consists of a normal tax and a surtax computed as provided in section 11 as though the life insurance company taxable income (as defined in section 802(b)) were the taxable income referred to in section 11.

(c) Normal tax. The normal tax is computed by applying to the life insurance company taxable income the regular corporate normal tax rate (as in effect for the taxable year) provided by section 11(b).

(d) Surtax. The surtax is computed by applying the regular corporate surtax rate (as in effect for the taxable year) provided by section 11(c) to the amount by which the life insurance company taxable income exceeds the surtax exemption for the taxable year as determined under section 11(d). See sections 269 and 1551 and the regulations thereunder, for certain circumstances in which the surtax exemption may be disallowed in whole or in part.

(e) Special rule for 1959 and 1960. See section 802(a)(3) and paragraph (a) of § 1.802-5 for a transitional rule applicable in certain cases in determining tax liability for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3).

(f) Tax imposed in case of certain capital gains—(1) Taxable years beginning after December 31, 1958, and before January 1, 1962. For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes a separate tax equal to 25 percent of such excess. This separate 25 percent tax rate applies whether or not there is life insurance company taxable income, taxable investment income, or a gain or loss from operations for the taxable year. For taxable years beginning after December 31, 1958, and before January 1, 1962, only the excess (if any) of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) shall be taken into account in computing taxable investment income and gain or loss from operations. See sections 804(b) and 809(b). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization, and treatment thereof) shall apply with respect to life insurance companies.

(2) Alternative tax in case of capital gains for taxable years beginning after December 31, 1961. For taxable years beginning after December 31, 1961, if the net long-term capital gain (as defined

in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). The alternative tax is the sum of—

(i) A partial tax, computed as provided by section 802(a)(1), on the life insurance company taxable income determined by reducing the taxable investment income, and the gain from operations, by the amount of the excess of its net long-term capital gain over its net short-term capital loss, and

(ii)(a) In the case of a taxable year beginning before January 1, 1970, an amount equal to 25 percent of such excess, or

(b) In the case of a taxable year beginning after December 31, 1969, an amount determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201–1 on such excess.

In the computation of the partial tax, the deductions provided by sections 170 (as modified by section 809(a)(3)), 243, 244, 245 (as modified by sections 804 (a)(5) and 809(d)(8)(B)), and the limitation provided by section 809(f), shall not be recomputed as a result of the reduction of taxable investment income, and gain from operations, by the amount of such excess. Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization and treatment thereof) shall apply with respect to life insurance companies.

(g) Foreign life insurance companies. Foreign life insurance companies not carrying on an insurance business within the United States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

(h) Assessment and collection of tax imposed. All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of sections 801 to 820, inclusive, are applicable to the assessment and collection of the tax imposed by section 802(a), and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(i) Illustration of principles. The provisions of section 802(a), other than paragraph (3) thereof, and this section may be illustrated by the following example:

Example. For the taxable year 1959, T, a life insurance company, has life insurance company taxable income of $300,000 (including $25,000 of net short-term capital gain) and $80,000 of net long-term capital gain. The tax of T under section 802(a) for 1959 is $170,500 ($90,000 normal tax, $60,500 surtax, and $20,000 capital gains tax) computed as follows:

COMPUTATION OF NORMAL TAX

Life insurance company taxable income	$300,000
Normal tax (30% of $300,000)	90,000

COMPUTATION OF SURTAX

Life insurance company taxable income	$300,000
Less: Exemption from surtax	25,000
Excess of life insurance company taxable income subject to surtax	275,000
Surtax (22% of $275,000)	60,500

COMPUTATION OF CAPITAL GAINS TAX

Excess of net long-term capital gain over net short-term capital loss	$80,000
Capital gains tax (25% of $80,000)	20,000

(j) Cross reference. In the case of a taxable year of a life insurance company ending after December 31, 1963, for which an election under section 1562(a)(1) by a controlled group of corporations is effective, the additional tax imposed by section 1562 may apply. See section 1562 and the regulations thereunder.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960, as amended by T.D. 6845, 30 FR 9740, Aug. 5, 1965; T.D. 6886, 31 FR 8685, June 23, 1966; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

§ 1.802–4 Life insurance company taxable income.

(a) Life insurance company taxable income defined. Section 802(b) defines the term "life insurance company taxable income", for purposes of Part I, Subchapter L, Chapter 1 of the Code, as the sum of—

(1) The taxable investment income (as defined in section 804), or, if smaller, the gain from operations (as defined in section 809),

(2) If the gain from operations exceeds the taxable investment income, an amount equal to 50 percent of such excess, plus

(3) The amount subtracted from the policyholders surplus account for the taxable year, as determined under section 815.

If for any taxable year there is a loss from operations (as defined in section 809(b)(2)), the amount taken into account under paragraphs (1) and (2) of section 802(b) and subparagraphs (1) and (2) of

this paragraph shall be zero. However, even in such a case, there may still be an amount includible in life insurance company taxable income (and hence an amount subject to tax) by reason of an amount includible under section 802(b)(3) and subparagraph (3) of this paragraph.

(b) Illustration of principles. The provisions of section 802(b) and this section may be illustrated by the following examples:

Example (1). For the taxable year 1959, Y, a life insurance company, has taxable investment income of $250,000, and a gain from operations of $175,000. Y made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, Y has life insurance company taxable income of $175,000.

Example (2). The facts are the same as in example (1) except that for the taxable year 1959, Y has a gain from operations of $400,000. For the taxable year 1959, Y has life insurance company taxable income of $325,000, computed by adding taxable investment income ($250,000) and 50 percent ($75,000) of the amount ($150,000) by which the gain from operations ($400,000) exceeds the taxable investment income ($250,000).

Example (3). For the taxable year 1959, W, a life insurance company, has taxable investment income of zero (0) and a gain from operations of $90,000. W made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, W has life insurance company taxable income of $45,000, computed by adding taxable investment income (0) and 50 percent ($45,000) of the amount ($90,000) by which the gain from operations ($90,000) exceeds the taxable investment income (0).

Example (4). For the taxable year 1961, Z, a life insurance company, has taxable investment income of $100,000, a policyholders surplus account of $50,000 as of the beginning of such taxable year, a loss from operations (as defined in section 809(b)(2)) of $25,000, and subtractions from the policyholders surplus account in the amount of $20,000. For the taxable year 1961, Z has life insurance company taxable income of $20,000, as only the amount ($20,000) subtracted from the policyholders surplus account is taken into account.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960]

§ 1.802–5 Special rule for 1959 and 1960.

(a) Transitional rule. Section 802(a)(3) provides a transitional rule for the determination of the tax liability of a life insurance company for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3). Except as limited by section 802(a)(3) and paragraph (b) of this section, any increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) is taken into account only to the extent of one-third and two-thirds for the taxable years 1959 and 1960, respectively. To the extent there is an increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the transitional rule provided by section 802(a)(3) and this paragraph, such amounts shall be included in "other accounts" under section 815(a)(3). For taxable years commencing after December 31, 1960, the full amount of any increase in tax due to the operation of section 802(b)(3) shall be imposed without any further transitional reduction.

(b) Limitations. The transitional rule provided by section 802(a)(3) is limited solely to an increase in tax under section 802(b)(3) that is occasioned by the operation of section 815(c)(3) (relating to subtractions from the policyholders surplus account by reason of distributions to shareholders). This rule is further limited to actual distributions that are made by life insurance companies in 1959 or 1960 and does not extend to other distributions that are treated under section 815(d)(2)(B) as made by life insurance companies in 1959 or 1960. Furthermore, section 802(a)(3) shall not apply to any increase in tax under section 802(b)(3) that is attributable to other subtractions from the policyholders surplus account by reason of the operation of the special rules contained in section 815(d). However, the transitional rule provided by section 802(a)(3) does apply in the case of a distribution to which section 815(e)(1)(B)(ii) applies.

(c) Illustration of principles. The provisions of section 802(a)(3) and this section may be illustrated by the following example:

Example. For the taxable year 1960, X, a life insurance company, had taxable investment income of $9,000, gain from operations of $27,000, and subtractions from the policyholders surplus account of $22,000. Based upon these figures, X had life insurance company taxable income of $40,000 for 1960, of which $18,000 was includible under section 802(b)(1) and (2) and $22,000 under section 802(b)(3). Applying the tax imposed by section 802(a)(1) (at rates as in effect for 1960), without regard to the transitional rule of section 802(a)(3), X would have a tax liability of $15,300 ($40,000 multiplied by 52 percent, less $5,500). However, applying the transitional rule of section 802(a)(3), the actual tax liability of X, for 1960, would be $12,000, computed as follows:

(1) Total tax liability (without regard to sec. 802(a)(3))		$15,300
(2) Life insurance company taxable income	$40,000	
(3) Amount subtracted from policyholders surplus account	22,000	
(4) Item (2) less item (3)	18,000	
(5) Tax on amount includible under sec. 802(b)(1) and (2) (30% of $18,000)		5,400
(6) Tax attributable to sec. 802(b)(3) (item (1) less item (5))		9,900
(7) Less: 33⅓ percent of tax attributable to sec. 802(b)(3) (⅓ of $9,900)		3,300
(8) Tax liability for 1960 after application of sec. 802(a)(3) (item (1) less item (7))		12,000

[T.D. 6513, 25 FR 12659, Dec. 10, 1960]

§ 1.803–1 Life insurance reserves.

(a) The term "life insurance reserves" is defined in section 803(b). Generally, such reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. In the case of cancellable health and accident policies and similar cancellable contracts, the unearned premiums held to cover the risk for the unexpired period covered by the premiums are not included in life insurance reserves. Unpaid loss reserves for noncancellable health and accident policies are included in life insurance reserves if they are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest.

(b) In the case of an assessment life insurance company or association, life insurance reserves include sums actually deposited by such company or association with State or Territorial officers pursuant to law as guaranty or reserve funds, and any funds maintained under the charter or articles of incorporation or association of such company or association, or bylaws (approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

(c) Life insurance reserves, except as otherwise provided in section 803(b), must be required by law either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute but such requirement, without more, is not conclusive; for example, life insurance reserves do not include reserves required to be maintained to provide for the ordinary running expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage; nor do they include the net value of risks reinsured in other solvent companies; liability for premiums paid in advance; liability for annual and deferred dividends declared or apportioned; liability for dividends left on deposit as interest; liability for accrued but unsettled policy claims whether known or unreported; liability for supplementary contracts not involving, at the time with respect to which the liability is computed, life, health, or accident contingencies.

(d) In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. Only reserves which are required by law or insurance department ruling, which are peculiar to insurance companies, and which are dependent upon interest earnings for their maintenance will, except as otherwise specifically provided in section 803(b), be considered as life insurance reserves. A company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held.

(e) In the case of life insurance companies issuing policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, it is required that reserve funds thereon be based upon recognized mortality or morbidity tables covering disability benefits of the kind contained in policies issued by this particular class of companies but they need not be required by law.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803–2 Adjusted reserves.

For the purpose of determining "required interest" for taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, certain reserves computed on a preliminary term method are to be adjusted by increasing such reserves by 7 percent. The reserves to be thus adjusted are reserves computed on preliminary term methods, such as the Illinois Standard, or the Select and Ultimate methods. Only reserves on policies in the modification period are to be so adjusted. Where reserves under a preliminary term method are the same as on the level premium method, and in the case of reserves for extended or paid-up insurance, no adjustment is to be made. The reserves are thus adjusted, and the rate of interest on which they are computed, should be reported in Schedule A, Form 1120L.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803–3 Interest paid or accrued.

Interest paid or accrued is one of the elements to be used in computing the amount of "required interest" for purposes of determining the reserve interest credit provided in section 805. See § 1.805–1. Interest paid or accrued consists of (a) interest paid or accrued on indebtedness (except indebtedness incurred or continued to purchase or carry tax-exempt securities as set forth in section 803(f)(1)) and (b) amounts in the nature of interest paid or accrued on certain contracts, as provided

in section 803(f)(2). Interest on indebtedness includes interest on dividends held on deposit and surrendered during the taxable year but does not include interest paid or accrued on deferred dividends. Life insurance reserves as defined in § 1.803-1 are not indebtedness. Dividends left with the company to accumulate at interest are a debt and not a reserve liability. Amounts in the nature of interest include so-called excess-interest dividends as well as guaranteed interest paid or accrued within the taxable year on insurance or annuity contracts (or contracts arising out of insurance or annuity contracts) which, at the time of payment, do not involve life, health, or accident contingencies. It is immaterial whether the optional mode of settlement specified in the insurance or annuity contract arises from an option exercised by the insured during his or her lifetime or from an option exercised by a beneficiary after the policy has matured, frequently referred to as a supplementary contract not involving life contingencies; for example, a contract to pay the insurance benefit in 10 annual installments. No distinction is made based on the person choosing the method of payment, and the full amount of the interest paid or accrued and not merely the guaranteed interest is considered as interest paid or accrued.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803-4 Taxable income and deductions.

(a) In general. The taxable income of a life insurance company is its gross amount of income received or accrued during the taxable year from interest, dividends, and rents, less the deductions provided in section 803(g) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, and the special deductions provided in Part VIII (section 241 and following, except section 248), Subchapter B, Chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a life insurance company provided in section 803(h), the limitations on the adjustment for amortization of premium and accrual of discount provided in section 803(i), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 803(g)(2), life insurance companies are subject to the limitations on deductions relating to wholly tax-exempt income provided in section 265. Life insurance companies are not entitled to the net operating loss deduction provided in section 172.

(b) Wholly tax-exempt interest. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross income of a life insurance company by section 803(a)(2) is allowed as a deduction from gross income by section 803(g)(1).

(c) Investment expenses. (1) As used in the Code, the term "general expenses" means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. Any assignment of such expense to the investment department of the company for which a deduction is claimed under section 803(g)(2) subjects the entire deduction for investment expenses to the limitation provided in that section. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes.

(2) If no general expenses are assigned to or included in investment expenses the deduction may consist of investment expenses paid or incurred during the taxable year in which case an itemized schedule of such expenses must be appended to the return.

(3) Invested assets for the purpose of section 803(g)(2) and this section are those which are owned and used, and to the extent used, for the purpose of producing the income specified in section 803(a)(2). They do not include real estate owned and occupied, and to the extent owned and occupied, by the company. If general expenses are assigned to or included in investment expenses, the maximum allowance will not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses.

(d) Taxes and expenses with respect to real estate. The deduction for taxes and expenses under section 803(g)(3) includes taxes and expenses paid or accrued during the taxable year exclusively upon or with respect to real estate owned by the company and any sum representing taxes imposed upon a shareholder of the company upon his interest as shareholder which is paid or accrued by the company without reimbursement from the shareholder. No deduction shall be allowed, however, for taxes, expenses, and depreciation upon or with respect to any real estate owned by the company except to the extent used for the purpose of producing investment income. See paragraph (c) of this section. As to real estate

owned and occupied by the company, see § 1.803–5.

(e) Depreciation. The deduction allowed for depreciation is, except as provided in section 803(h), identical with that allowed other corporations by section 167. The amount allowed by section 167 in the case of life insurance companies is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 803(a)(2).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803–5 Real estate owned and occupied.

The amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a life insurance company is limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803–6 Amortization of premium and accrual of discount.

(a) Section 803(i) provides for certain adjustments on account of amortization of premium and accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases, and for accrual of discount increases, (1) the gross income, (2) the deduction for wholly tax-exempt interest, and (3) the deduction for partially tax-exempt interest.

(b) The premium for any such security is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, then its fair market value. The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest call date specified therein as a day certain, the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(c) The adjustments for amortization of premium and accrual of discount will be determined—

(1) According to the method regularly employed by the company, if such method is reasonable, or

(2) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(d) The method of amortization and accrual prescribed by this section is as follows:

(1) The premium (or discount) shall be determined in accordance with this section; and

(2) The appropriate amortization of premium (or accrual of discount) attributable to the taxable

year shall be an amount which bears the same ratio to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For the purpose of this section, a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered as a month.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.803–7 Taxable years affected.

Sections 1.803–1 through 1.803–6 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments.

[T.D. 6513, 25 FR 12660, Dec. 10, 1960]

Investment Income

§ 1.804–1 Taxable years affected.

Sections 1.804–2 through 1.804–4 (other than paragraph (d)(1)(ii) of § 1.804–2) are applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). Paragraph (d)(1)(ii) of § 1.804–2 is applicable only to taxable years beginning after December 31, 1961, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), section 3 of the Act of October 23, 1962 (Public Law 87–858, 76 Stat. 1134), and section 214(b)(3) of the Revenue Act of 1964 (78 Stat. 55).

[T.D. 6513, 25 FR 12660, Dec. 10, 1960, as amended by T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 826, Jan. 18, 1969]

§ 1.804–2 Taxable investment income.

(a) In general. Section 804 provides the rules for determining the taxable investment income of a life insurance company, which amount is necessary to determine life insurance company taxable income. In order to determine taxable investment income, a life insurance company must first determine its gross investment income (as defined in section 804(b) and § 1.804–3). After making such determination, the next step is to determine its investment yield (as defined in section 804(c) and § 1.804–4). After determining its investment yield, a company shall then determine the policyholders' share of each and every item of its investment yield (as computed under section 804(a)(1) and paragraph (b) of this section), as this share is excluded from taxable investment income (as defined in section 804(a)(2) and paragraph (d) of this section). Thus, only the life insurance company's share of the items comprising investment yield (less certain reductions) shall be taken into account in computing taxable investment income.

(b) Exclusion of policyholders' share of investment yield. Section 804(a)(1) provides that the policyholders' share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) of any life insurance company shall not be included in taxable investment income. For this purpose, the percentage used in determining the policyholders' share of each of these items comprising the investment yield shall be determined by dividing the policy and other contract liability requirements (as defined in section 805(a) and paragraph (b) of § 1.805–4) by the investment yield. The percentage thus obtained is then applied to each and every item of the investment yield so that the policyholders' share of each and every item of investment yield shall be excluded from taxable investment income. However, if in any case the policy and other contract liability requirements exceed the investment yield, then the policyholders' share of any item shall be 100 percent.

(c) Computation of life insurance company's share of investment yield. Section 804(a)(2) provides that the percentage used in determining the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be the percentage obtained by subtracting the percentage obtained under paragraph (b) of this section from 100 percent. Only the life insurance company's share of the items comprising investment yield (less certain reductions specified in section 804(a)(2) and paragraph (d)(1) of this section) shall be taken into account

in computing taxable investment income. For example, if the policyholders' percentage (as determined under section 804(a)(1) and paragraph (b) of this section) is 80 percent, then the life insurance company's share is 20 percent (100 percent minus 80 percent). In such a case, if the amount of a particular item is $1,000, then the life insurance company's share of such item included in determining taxable investment income is $200 ($1,000 multiplied by 20 percent) and the policyholders' share of such item (which is excluded from taxable investment income) is $800 ($1,000 multiplied by 80 percent).

(d) Taxable investment income of a life insurance company—(1) Definition. Section 804(a)(2) defines the term "taxable investment income", for purposes of Part I, as an amount (not less than zero) equal to the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, plus the sum of the life insurance company's share (as determined under paragraph (c) of this section) of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), reduced by the sum of—

(i) The life insurance company's share of interest which under section 103 is excluded from gross income,

(ii) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3) and subparagraph (2)(i) of this paragraph) computed with respect to the life insurance company's share of such interest,

(iii) The deduction for dividends received provided by sections 243, 244, and 245 (as modified by section 804(a)(5) and subparagraph (2)(ii) of this paragraph) computed with respect to the life insurance company's share of the dividends received, and

(iv) The small business deduction provided by section 804(a)(4). For purposes of Part I, such small business deduction shall be an amount equal to 10 percent of the investment yield for the taxable year, except that such amount shall not exceed $25,000, or, in the case of a component member of a controlled group of corporations (as defined in section 1563), the amount allowable under section 1561 (for taxable years beginning after December 31, 1974) or section 1564(a) (for taxable years beginning before January 1, 1975).

(2) Modifications—(i) Partially tax-exempt interest. For purposes of Part I, the deduction allowed by section 242 (relating to partially tax-exempt interest) shall be determined by applying to the life insurance company's share of such interest the ratio which the normal tax rate (as prescribed by section 11) for the taxable year bears to the sum of the normal tax rate and the surtax rate (as prescribed by section 11) for the taxable year. For example, if for the taxable year 1959 the life insurance company's share of partially tax-exempt interest is $104, the deduction provided by section 804(a)(2)(A)(ii) (as modified by this subdivision) is $60 (thirty fifty-seconds of such partially tax-exempt interest).

(ii) Application of section 246(b). The sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations) shall be limited to 85 percent of the taxable investment income (as defined in subparagraph (1) of this paragraph). The taxable investment income of the company for this purpose shall be computed without regard to the deductions provided in sections 243(a)(1), 244(a), and 245.

(e) Illustration of principles. The provisions of section 804(a)(1) through (5) and paragraphs (a) through (d) of this section may be illustrated by the following example:

Example. For the taxable year 1958, R, a life insurance company, had investment yield of $1,000,000, including $200,000 of dividends received from domestic corporations subject to taxation under Chapter 1 of the Code, $16,800 of wholly tax-exempt interest, and $83,200 of partial interest. For such taxable year, the policyholders' share of each and every item of investment yield was 75 percent and the company's share of each and every item of investment yield was 25 percent. Based upon these figures, R had taxable investment income of $166,300 for the taxable year 1958, computed as follows:

	Col. 1 Total	Col. 2 (75% Col. 1) Policyholders' share	Col. 3 (25% Col. 1) Company's share
Interest wholly tax-exempt	$16,800	$12,600	$4,200
Interest partially tax-exempt	83,200	62,400	20,800
Dividends received	200,000	150,000	50,000
Other items of investment yield	700,000	525,000	175,000
Investment yield	1,000,000	750,000	250,000
Less:			
Company's share of interest wholly tax-exempt		$4,200	....
30/52 of company's share of interest partially tax-exempt (30/52 × $20,800)		12,000	....

	Col. 1 Total	Col. 2 (75% Col. 1) Policyholders' share	Col. 3 (25% Col. 1) Company's share
85% of company's share of dividends received (but not to exceed 85% of taxable investment income computed without regard to this deduction) (85% × $50,000)		42,500	....
Small business deduction (10% of investment yield, not to exceed $25,000)		25,000	83,700
Taxable investment income			166,300

(f) Exception. (1) In accordance with section 804(a)(6), if it is established in any case to the satisfaction of the Commissioner, or by a determination of The Tax Court of the United States, or of any other court of competent jurisdiction, which has become final, that the application of the definition of taxable investment income contained in section 804(a)(2) results in the imposition of tax on—

(i) Any interest which under section 103 is excluded from gross income,

(ii) Any amount of interest which under section 242 (as modified by section 804(a)(3)) is allowable as a deduction, or

(iii) Any amount of dividends received which under sections 243, 244, and 245 (as modified by section 804(a)(5)) is allowable as a deduction,

adjustment shall be made to the extent necessary to prevent such imposition.

(2) For the date upon which a decision by the Tax Court becomes final, see section 7481. For the date upon which a judgment of any other court becomes final, see paragraph (c) of § 1.1313(a)–1.

[T.D. 6513, 25 FR 12660, Dec. 10, 1960, as amended by T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 826, Jan. 18, 1969; T.D. 7181, 37 FR 8067, April 25, 1972; T.D. 7528, 42 FR 64694, Dec. 28, 1977; T.D. 7528, 43 FR 2169, 4603, Jan. 16, 1978]

§ 1.804–3 Gross investment income of a life insurance company.

(a) Gross investment income defined. For purposes of Part I, Subchapter L, Chapter 1 of the Code, section 804(b) defines the term "gross investment income" of a life insurance company as the sum of the following:

(1) The gross amount of income from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(ii) Dividends, as described in § 1.61–9.

(iii) Rents and royalties, as described in § 1.61–8.

(iv) The entering into of any lease, mortgage, or other instrument or agreement from which the life insurance company may derive interest, rents, or royalties.

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph.

For example, gross investment income includes amounts received as commitment fees, as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage.

(2) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), and

(3) The gross income from any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner.

(b) No double inclusion of income. In computing the gross income from any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, any item described in section 804(b)(1) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business or partnership, but shall be taken into account under section 804(b)(1) and paragraph (a)(1) of this section.

(c) Exclusion of net long-term capital gains. Any net long-term capital gains from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the gross investment income of a life insurance company. However, section 804(b)(2) and paragraph (a)(2) of this section provide that the amount (if any) by which the net short-term capital gain exceeds the net long-term capital loss shall be

included in the gross investment income of a life insurance company.

[T.D. 6513, 25 FR 12661, Dec. 10, 1960]

§ 1.804–4 Investment yield of a life insurance company.

(a) Investment yield defined. Section 804(c) defines the term "investment yield" of a life insurance company for purposes of Part I, Subchapter L, Chapter 1 of the Code. Investment yield means gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804–3), less the deductions provided in section 804(c) and paragraph (b) of this section for investment expenses, real estate expenses, depreciation, depletion, and trade or business (other than an insurance business) expenses. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162, and under section 265, no deduction is allowable for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from taxation under Chapter 1 of the Code. A deduction shall not be permitted with respect to the same item more than once.

(b) Deductions from gross investment income—(1) Investment expenses. (i) Section 804(c)(1) provides for the deduction of investment expenses by a life insurance company in determining investment yield. "Investment expenses" are those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a life insurance company for which a deduction is claimed under section 804(c)(1) subjects the entire deduction for investment expenses to the limitation provided in that section and subdivision (iii) of this subparagraph. As used in section 804(c)(1), the term "general expenses" means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if real estate taxes, depreciation, or other expenses attributable to office space owned by the company and utilized by it in connection with its investment function are assigned to investment expenses, such items shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. Similarly, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expenses are allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 804(c)(1)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any. In cases where the investment expenses allowable as deductions under section 804(c)(1) exceed the limitation contained therein, see section 809(d)(9).

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 804(c)(1) shall not exceed the sum of—

(a) One-fourth of one percent of the mean of the assets (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805–5) held at the beginning and end of the taxable year,

(b) The amount of the mortgage service fees for the taxable year, plus

(c) Whichever of the following is the greater:

(1) One-fourth of the amount by which the investment yield (computed without any deduction for investment expenses allowed by section 804(c)(1)) exceeds 3¾ percent of the mean of the assets (as defined in section 805(b)(4)) held at the beginning and end of the taxable year, reduced by the amount of the mortgage service fees for the taxable year, or

(2) One-fourth of one percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no

mortgage service fees for the taxable year. For purposes of the preceding sentence, the term "mortgages held" refers to mortgages, and other similar liens, on real property which are held by the company as security for "mortgage loans". For purposes of section 804(c)(1)(B) and (C)(i) and (b) and (c)(1) of this subdivision, the term "mortgage service fees" includes mortgage origination fees. Such mortgage origination fees shall be amortized in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(iv) The operation of the limitation contained in section 804(c)(1) and subdivision (iii) of this subparagraph may be illustrated by the following example:

Example. The books of S, a life insurance company, reflect the following items for the taxable year 1958:

Investment expenses (including general expenses assigned to or included in investment expenses)	$ 125,000
Mean of the assets held at the beginning and end of the taxable year	20,000,000
Mortgage service fees	25,000
Investment yield computed without regard to investment expenses	1,200,000
Mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees	6,000,000

In order to determine the limitation on investment expenses, S would make up the following schedule:

1. Mean of the assets held at the beginning and end of the taxable year	$20,000,000	
2. One-fourth of 1 percent of item 1 (¼ of 1% of $20,000,000)	50,000	
3. Mortgage service fees	25,000	
4. The greater of (a) or (b)		
(a) (i) Investment yield computed without regard to investment expenses	$1,200,000	
(ii) Three and three-fourths percent of item 1 (3¾% × $20,000,000)	750,000	
(iii) Excess of (i) over (ii) ($1,200,000 minus $750,000)	450,000	
(iv) One-fourth of (iii) (¼ × $450,000)	112,500	
(v) Less: Mortgage service fees (item 3)	25,000	
(vi) Excess of (iv) over (v) ($112,500 minus $25,00)	$87,500	
(b) One-fourth of 1 percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees (¼ of 1% × $6,000,000) 15,000		
5. The greater of item 4(a) or (b)		$87,500
6. Limitation on investment expenses (items 2, 3, and 4(a))		162,500

As the investment expenses (including general expenses assigned to or included in investment expenses) of S for the taxable year 1958 ($125,000) do not exceed the limitation on such expenses ($162,500), S would be entitled to deduct the entire $125,000 under section 804(c)(1).

(2) **Real estate expenses and taxes.** The deduction for expenses and taxes under section 804(c)(2) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 804(c)(2) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 804(c)(2) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See subparagraph (4) of this paragraph for limitation of such deduction.

(3) **Depreciation.** The deduction allowed for depreciation is, except as provided in section 804(c)(3) and subparagraph (4) of this paragraph, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining investment yield is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). An election with respect to any of the methods of depreciation provided in section 167 shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). However, in appropriate cases, the method of depreciation may be changed with the consent of the Commissioner. See section 167(e) and § 1.167(e)–1. See subparagraph (4) of this paragraph for limitation of such deduction. See section 809(d)(12) and the regulations thereunder for the treatment of depreciable property used in the operation of a life insurance business.

(4) **Limitation on deductions allowable under section 804(c)(2) and (c)(3).** Section 804(c)(3) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied for insurance purposes in whole or in part by a life insurance company shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, T, a life insurance company, owns a twenty-story downtown home office building. The rental value of each floor of the building is identical. T

rents nine floors to various tenants, one floor is utilized by it in operating its investment department, and the remaining ten floors are occupied by it in carrying on its insurance business. Since floor space equivalent to eleven-twentieths, or 55 percent, of the rental value of the entire property is owned and occupied for insurance purposes by the company, the deductions allowable under section 804(c)(2) and (3) for taxes, depreciation, and other real estate expenses shall be limited to nine-twentieths, or 45 percent, of the taxes, depreciation, and other real estate expenses on account of the entire property. However, the portion of such allowable deductions attributable to the operation of the investment department (one-twentieth, or 5 percent) may be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitations of section 804(c)(1). Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company in carrying on its insurance business, together with the respective rental values thereof, must be shown in a schedule accompanying the return.

(5) Depletion. The deduction for depletion (and depreciation) provided in section 804(c)(4) is identical to that allowed other corporations by section 611. The amount allowed by section 611 in the case of a life insurance company is limited to depletion (and depreciation) sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). See section 611 and § 1.611–5 for special rules relating to the depreciation of improvements in the case of mines, oil and gas wells, other natural deposits, and timber.

(6) Trade or business deductions. (i) Under section 804(c)(5), the deductions allowed by Subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner are, subject to the limitations in subdivisions (ii), (iii), and (iv) of this subparagraph, allowable as deductions from the gross investment income of a life insurance company in determining its investment yield. Such deductions are allowable, however, only to the extent that they are attributable to the production of income which is included in the life insurance company's gross investment income by reason of section 804(b)(3). However, since any interest, dividends, rents, and royalties received by any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, is included in the life insurance company's gross investment income by reason of section 804(b)(1) and paragraph (b) of § 1.804–3, any expenses fairly chargeable against the production of such income may be deductible under section 804(c)(1), (2), (3), or (4). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 804(c)(5), there shall be excluded losses—

(a) From (or considered as from) sales or exchanges of capital assets,

(b) From sales or exchanges of property used in the trade or business (as defined in section 1231(b)), and

(c) From the compulsory or involuntary conversion (as a result of destruction, in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of property used in the trade or business (as so defined).

(iii) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if a life insurance company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(iv) The deduction for net operating losses provided in section 172, and the special deductions for corporations provided in Part VIII, Subchapter B, Chapter 1 of the Code, shall not be allowed.
[T.D. 6513, 25 FR 12662, Dec. 10, 1960]

§ 1.805–1 Tax on life insurance companies in the case of a taxable year beginning in 1954.

(a) Section 802(b) imposes a tax on the "1954 life insurance company taxable income" of all life insurance companies for taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954. See paragraph (a) of § 1.802(b)–1.

(b) For purposes of section 802(b), the term "1954 life insurance company taxable income"

means the taxable income (consisting of income computed as provided in § 1.803–4) for the taxable year beginning in 1954 plus eight times the amount of the adjustment for certain reserves computed as provided in section 806 (see § 1.806–1), and minus the reserve interest credit, if any, provided in section 805(b).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.805–2 Reserve interest credit.

(a) In computing 1954 life insurance company taxable income, a reserve interest credit is allowed where the "adjusted taxable income" of the company is less than 105 percent of its required interest. For the purpose of computing the reserve interest credit, the term "adjusted taxable income" means the taxable income of the company computed without the deductions provided in section 803(g)(1) or (5), less 50 percent of the adjustment for certain reserves on contracts other than life insurance or annuity contracts provided in section 806.

(b) The required interest for which a credit may be allowed consists of the total of—

(1) The sum of amounts obtained by multiplying each rate of interest assumed in computing life insurance reserves (see section 803(b) and § 1.803–1) by the means of the amounts of the adjusted reserves, as defined in section 803(c), computed at that rate at the beginning and the end of the taxable year;

(2) Two percent of the reserve for deferred dividends; and

(3) Interest paid or accrued.

(c) To determine the amount of the reserve interest credit, it is necessary to divide the amount of the adjusted taxable income by the amount of the required interest. If the adjusted taxable income is 100 percent or less of the required interest, the reserve interest credit is an amount equal to 50 percent of the life insurance company taxable income. If the adjusted taxable income is 105 percent or more of the required interest, the reserve interest credit is zero. If the adjusted taxable income is more than 100 percent and less than 105 percent of the required interest, the reserve interest credit is computed by multiplying the life insurance company taxable income by ten times the difference between 105 percent and the percentage established. Thus, if the adjusted taxable income of a life insurance company for the calendar year 1954 is $103,000 and the required interest for such year is $100,000, the adjusted taxable income is 103 percent of the required interest and the reserve interest, accordingly, is the life insurance company taxable income multiplied by 20 percent (10 times 2 percent, the difference between 105 percent and 103 percent).

(d) In determining the percentage of the adjusted taxable income to required interest for purposes of determining the reserve interest credit, the figures shall be computed to at least the nearest one-tenth of a percentage point.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.805–3 Taxable years affected.

Sections 1.805–1 and 1.805–2 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.805–4 through 1.805–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and the Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 809).

[T.D. 6513, 25 FR 12664, Dec. 10, 1960, as amended by T.D. 6886, 31 FR 8686, June 23, 1966]

§ 1.805–4 Policy and other contract liability requirements.

(a) Introduction. Section 805 relates to the determination of the policy and other contract liability requirements of a life insurance company. This determination furnishes the numerator of a fraction to be used in determining the policyholders' share of each and every item of the investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received). The denominator of this fraction is the investment yield (as determined under section 804(c) and § 1.804–4). The percentage obtained from this fraction is used in determining the policyholders' share of each and every item of the investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), which shall not be included in taxable investment income (as determined under section 804(a)(2) and paragraph (d) of § 1.804–2).

(b) Policy and other contract liability requirements defined. Section 805(a) defines the term "policy and other contract liability requirements"

of a life insurance company, for any taxable year, for purposes of Part I, Subchapter L, Chapter 1 of the Code, as the sum of—

(1) The adjusted life insurance reserves (as defined in section 805(c)(1)), multiplied by the adjusted reserves rate (as defined in section 805(b)(1)),

(2) The mean of the pension plan reserves (as defined in section 805(d)(1)) at the beginning and end of the taxable year, multiplied by the current earnings rate (as defined in section 805(b)(2)), and

(3) The interest paid (as defined in section 805(e)).

[T.D. 6513, 25 FR 12664, Dec. 10, 1960]

§ 1.805–5 Adjusted reserves rate and earnings rates.

(a) In general. For purposes of part I, subchapter L, chapter 1 of the Code, section 805(b) defines the terms "adjusted reserves rate", "current earnings rate", "average earnings rate", and "assets". These terms, with such meaning ascribed to them, are to be used in computing the policy and other contract liability requirements (as determined under section 805(a)). For the meaning of the term "current earnings rate" in the case of variable annuity contracts, see section 801(g)(3). The terms "adjusted reserves rate", "current earnings rate", "average earnings rate", and "assets" are defined as follows:

(1) Adjusted reserves rate. For any taxable year, the term "adjusted reserves rate" means the average earnings rate (as defined in section 805(b)(3) and subparagraph (3) of this paragraph), or, if lower, the current earnings rate (as defined in section 805(b)(2) and subparagraph (2) of this paragraph).

(2) Current earnings rate. For any taxable year, the term "current earnings rate" means the amount determined by dividing—

(i) The taxpayer's investment yield (as determined under section 804(c)) for such taxable year, by

(ii) The mean of the taxpayer's assets (as defined in section 805(b)(4) and subparagraph (4) of this paragraph) at the beginning and end of such taxable year.

(3) Average earnings rate—(i) Definition. For any taxable year, the term "average earnings rate" means the average of the current earnings rate for such taxable year and the current earnings rate for each of the 4 taxable years immediately preceding such taxable year (excluding any of such 4 taxable years for which the taxpayer was not an insurance company).

(ii) Special rules. For purposes of computing the 5-year average earnings rate under section 805(b)(3)(A) and subdivision (i) of this subparagraph, the following special rules are to be applied—

(a) The current earnings rate for any taxable year beginning before January 1, 1958, shall be determined as if part I (as in effect for 1958) and section 381(c)(22) applied to such taxable year;

(b) The current earnings rate for any taxable year of any company which, for such year, is an insurance company (but not a life insurance company as defined in section 801(a)) shall be determined as if part I applied to such company for such year; and

(c) A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) shall be a preceding taxable year for the purpose of determining the first, second, third, or fourth preceding taxable year. For the determination of the current earnings rate for such short taxable year, see section 818(d) and the regulations thereunder.

(4) Assets—(i) Definition. Section 805(b)(4) defines the term "assets" as meaning all assets of the life insurance company (including nonadmitted assets), other than real and personal property (excluding money) used by the life insurance company in carrying on an insurance trade or business. For purposes of the preceding sentence, the term "money" includes cash, currency, bank deposits (including time deposits) whether or not interest bearing, share accounts in savings and loan associations, checks (whether or not certified), drafts, money orders, and any other item of similar nature. The following items are the only ones to be excluded from the term "assets" as being considered "used by the life insurance company in carrying on an insurance trade or business":

(a) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(b) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company;

(c) Supplies, stationery, and printed matter used in the operations conducted in the home office and branch office buildings occupied by the life insur-

ance company where for tax purposes such items are inventoried; and

(d) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company. However, if any item, or portion thereof, of property falls within one of the above-listed groups and also is an "investment asset" (an asset from which gross investment income, as defined in section 804(b), is derived), such item, or portion thereof, shall not be excluded from the term "assets". Any item, or portion thereof, excluded from the definition of the term "assets" shall not be taken into account in computing the denominator used in determining the current earnings rate under section 805(b)(2) and subparagraph (2) of this paragraph. Conversely, any item or portion thereof, included in the term "assets" shall be taken into account in computing the denominator used in determining the current earnings rate.

(ii) Illustration of principles. The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). Included in the statement of assets of P, a life insurance company, are the following items: Bonds, stocks, mortgages, home office and branch office buildings owned and wholly occupied by the company, furniture and equipment owned by the company and used in the home office and branch office buildings occupied by the company, agents' debit balances, premiums deferred and uncollected and premiums due and unpaid, bank deposits (including time deposits), and share accounts in savings and loan associations. For purposes of section 805(b)(4) and this subparagraph, the home office and branch office buildings owned and wholly occupied by the company, and the furniture and equipment owned by the company and used by it in connection with the operations conducted in the home office and branch office buildings occupied by the company, shall be excluded from the term "assets" since such items are the only ones considered as being used by P in carrying on an insurance trade or business. Accordingly, since bonds, stocks, mortgages, agents' debit balances, premiums deferred and uncollected and premiums due and unpaid, bank deposits (including time deposits), and share accounts in savings and loan associations are not considered as being used by P in carrying on an insurance trade or business, they are included within the term "assets" and, therefore, shall be taken into account by P in determining its current earnings rate.

Example (2). M, a life insurance company, owns an eleven-story downtown home office building, the ground floor of which it rents to various tenants and the remaining ten floors of which are occupied by it in carrying on its insurance business and operating its investment department. Under the provisions of section 805(b)(4) and this subparagraph, the ten floors occupied by M in carrying on its insurance business and operating its investment department shall be excluded from the term "assets". However, the ground floor rented to various tenants is an "investment asset" and as such shall be included within the term "assets" and, therefore, shall be taken into account by M in determining its current earnings rate.

(iii) Valuation of assets. For purposes of section 805(b)(4)—

(a) The amount attributable to real property and to stock shall be the fair market value thereof, and

(b) The amount attributable to any other asset shall be the adjusted basis (determined without regard to fair market value on December 31, 1958) of such asset for purposes of determining gain on sale or other disposition.

In applying the provisions of section 805(b)(4) and this subdivision, the fair market value or the adjusted basis (as the case may be) shall not be reduced by the amount of any incumbrance, lien, mortgage, etc.

(iv) Special rules. (a) All items included within the term "assets" shall be valued at the beginning and end of the taxable year. If, during the taxable year, there is a change in life insurance reserves (either increases or decreases) attributable to the transfer between the taxpayer and another person of liabilities under contracts taken into account in computing such reserves, the mean of the assets shall be appropriately adjusted, on a daily basis, to reflect the amounts involved in such transfer. See section 806(a) and paragraph (b)(3) and (4) of § 1.806–3.

(b) In the case of real property, under appropriate circumstances the fair market value may be determined on the basis of a reasonable approximation of fair market value as shown to the satisfaction of the district director, rather than on the basis of an annual reappraisal.

(c) In determining the fair market value of stocks, any reasonable valuation method may be used. Such methods include the valuation methods described in § 20.2031–2 of this chapter (Estate Tax Regulations).

(b) Illustration of principles. The provisions of section 805(b) and paragraph (a) of this section may be illustrated by the following examples. For purposes of these examples, it is assumed that all computations have been carried out to a sufficient number of decimal places to insure substantial accuracy and to eliminate any significant error in the resulting tax liability.

Example (1). For the taxable year 1958, T, a life insurance company (as defined in section 801(a)) organized in 1951, had the following current earnings rate history:

Taxable year	*Current earnings rate*
1951	3.1
1952	3.3
1953	3.2
1954	3.3
1955	3.5
1956	3.8
1957	3.6
1958	3.8

For the taxable year 1958, T would have an average earnings rate of 3.6 percent, computed by taking into account only the current earnings rates for the taxable year 1958 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3.6 percent since the average earnings rate of 3.6 percent is lower than the 1958 current earnings rate of 3.8 percent.

Example (2). The facts are the same as in example (1) except that the taxable year in issue is 1959, and the current earnings rate for such taxable year was 2.8 percent. For the taxable year 1959, T would have an average earnings rate of 3.5 percent, computed by taking into account only the current earnings rates for the taxable year 1959 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 2.8 percent since the current earnings rate of 2.8 percent for 1959 is lower than the average earnings rate of 3.5 percent.

Example (3). For the taxable year 1959, P, a life insurance company (as defined in section 801(a)) organized in 1957, had the following current earnings rate history:

Taxable year	*Current earnings rate*
1957	3.1
1958	3.3
1959	3.8

For the taxable year 1959, P would have an average earnings rate of 3.4 percent. Since P has been in existence for only 3 years, the average earnings rate is computed on the basis of the current earnings rate for the taxable year 1959 and the 2 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3.4 percent.

Example (4). Y was organized as an insurance company (other than life) in 1954. In 1957, Y qualified as a life insurance company (as defined in section 801(a)) and has remained a life insurance company since that date. Since its formation, Y has had the following current earnings rate history:

Taxable year	*Current earnings rate*
1954	3.1
1955	3.3
1956	3.5
1957	3.4
1958	3.6
1959	3.7

For the taxable year 1959, Y would have an average earnings rate of 3.5 percent, computed by taking into account the current earnings rate for the year 1959 and the 4 taxable years immediately preceding such taxable year. The taxable years 1956 and 1955 are included in this computation since Y was an insurance company (though not a life insurance company) during such taxable years. The adjusted reserves rate for such taxable year would be 3.5 percent.

Example (5). The facts are the same as in example (4) except that prior to becoming a life insurance company in 1957, Y was an ordinary corporation. For the taxable year 1959, Y would have an average earnings rate of 3.57 percent, computed by taking into account only the current earnings rates for those taxable years during which Y was a life insurance company (1957, 1958, 1959). The adjusted reserves rate for such taxable year would be 3.57 percent.

[T.D. 6513, 25 FR 12665, Dec. 10, 1960]

§ 1.805–6 Adjusted life insurance reserves.

(a) Adjusted life insurance reserves defined. For purposes of part I, subchapter L, chapter 1 of the Code, section 805(c)(1) defines the term "adjusted life insurance reserves" as—

(1) The mean of the life insurance reserves (as defined in section 801(b)), other than pension plan reserves (as defined in section 805(d)), at the beginning and end of the taxable year, multiplied by

(2) That percentage which equals 100 percent—

(i) Increased by that percentage which is 10 times the average rate of interest assumed by the taxpayer (as determined under section 805(c)(2) and paragraph (b) of this section) in calculating such reserves, and

(ii) Reduced by that percentage which is 10 times the adjusted reserves rate (as defined in section 805(b)(1) and paragraph (a)(1) of § 1.805–5).

(b) Average rate of interest assumed defined. For purposes of part I, section 805(c)(2) defines the term "average rate of interest assumed" by the company in calculating reserves, as the rate determined by—

(1) Multiplying each assumed rate of interest by the means of the amounts of such reserves computed at that rate at the beginning and end of the taxable year, and

(2) Dividing the sum of the products ascertained under subparagraph (1) of this paragraph by the mean of the total of such reserves at the beginning and end of the taxable year.

(c) Special rule. For purposes of section 805(c) and this section, the amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves comput-

ed on a preliminary term basis), and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets). However, no adjustment shall be made under section 806(b) (relating to change in basis in computing reserves) for the year in which the change occurs, since such adjustment is not taken into account until the beginning of the next taxable year.

(d) Illustration of principles. The provisions of section 805(c) and this section may be illustrated by the following examples:

Example (1). The books of R, a life insurance company, reflect the following:

Mean of the life insurance reserves (other than pension plan reserves)	$800,000
Company's current earnings rate	4%
Company's average earnings rate (for the current and 4 prior years)	3.5%
Company's average assumed rate (as defined in section 805(c)(2))	2.5%

In order to determine the amount of its adjusted life insurance reserves, R would first determine its adjusted reserves rate. This rate would be 3.5 percent since R's average earnings rate (3.5 percent) is lower than its current earnings rate (4 percent). R would then make up the following schedule:

1. Mean of the life insurance reserves (other than pension plan reserves)		$800,000
2. Item 1 multiplied by:		
(a) That percentage which equals	100%	
(b) Increased by 10 times the average rate of interest assumed (10 × 2.5%)	25%	
(c) Total	125%	
(d) Less: 10 times the adjusted reserves rate (10 × 3.5%)	35%	
(e) Item 2(c) minus item 2(d) (125% minus 35%)	90%	
3. Adjusted life insurance reserves (800,000 multiplied by 90%)		$720,000

Example (2). The books of S, a life insurance company, reflect the following items:

Col. 1	Col. 2	Col. 3	Col. 4	Col. 5
Reserves at beginning of year	Reserves at end of year	Means of reserves	Assumed rate of interest (*Percent*)	(Col. 3 × Col. 4) Product
$850,000	$1,150,000	$1,000,000	2	20,000
750,000	1,250,000	1,000,000	2.5	25,000
300,000	500,000	400,000	2.25	9,000
Total		2,400,000	......	54,000

For purposes of section 805(c), the average rate of interest assumed for the taxable year would be 2.25 percent (54,-000 ÷ 2,400,000).

[T.D. 6513, 25 FR 12666, Dec. 10, 1960]

§ 1.805–7 Pension plan reserves.

(a) In general. One of the elements to be taken into account in computing the amount of the policy and other contract liability requirements (as defined in section 805(a) and paragraph (b) of § 1.805–4) of a life insurance company is the investment income attributable to pension plan reserves (as defined in section 805(d)(1) and paragraph (b) of this section). The amount of this element to be included in the policy and other contract liability requirements shall be determined by multiplying the mean of such pension plan reserves at the beginning and end of the taxable year by the current earnings rate (as defined in section 805(b)(2)) of the company. However, the amount of such reserves taken into account must be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets) before applying the current earnings rate thereto. Reserves held by a life insurance company under deposit administration contracts shall be included in pension plan reserves if they qualify as life insurance reserves (as defined in section 801(b) and paragraph (a) of § 1.801–4) and otherwise meet the definition of pension plan reserves.

(b) Pension plan reserves defined. For purposes of part I, subchapter L, chapter 1 of the Code, section 805(d)(1) defines the term "pension plan reserves" as that portion of the life insurance reserves (as defined in section 801(b)) which is allocable to contracts—

(1) Purchased under contracts entered into with trusts which (as of the time the contracts were entered into) were deemed to be trusts described in section 401(a) and exempt from tax under section 501(a) of the Internal Revenue Code of 1954, or trusts exempt from tax under section 165 of the Internal Revenue Code of 1939 (prior to, or after, the 1942 amendments) or the corresponding provisions of prior revenue laws;

(2) Purchased under contracts entered into under plans which (as of the time the contracts were entered into) were deemed to be plans—

(i) Meeting the requirements of section 165(a)(3), (4), (5), and (6) of the Internal Revenue Code of 1939, for taxable years beginning before January 1, 1954, and ending before August 17, 1954, or

(ii) Described in section 403(a) of the Internal Revenue Code of 1954;

(3) Provided for employees of the life insurance company under a plan which for the taxable year meet the requirements of section 401(a)(3), (4), (5), (6), (7), (8), (11), (12), (13), (14), (15), (16), and (19) for the taxable year to which such paragraphs apply. For the purposes of this paragraph, the term "employees" includes full-time life insurance salesmen treated as employees under section 7701(a)(20);

(4) Purchased to provide retirement annuities. (i) For its employees by an organization which (as of the time the contracts were purchased) was an organization described in section 501(c)(3) which was exempt from tax under section 501(a) or was an organization exempt from tax under section 101(6) of the Internal Revenue Code of 1939 or the corresponding provisions of prior revenue laws, or

(ii) For taxable years beginning after December 31, 1963, for employees described in section 403(b)(1)(A)(ii) by an employer which is a State, a political subdivision of a State, or an agency or instrumentality of any one or more of the foregoing.

The definition of pension plan reserves described in paragraph (b)(4)(i) of this section includes only life insurance reserves held under contracts purchased by those organizations described in section 501(c)(3) and exempt from tax under section 501(a), and does not include life insurance reserves held under contracts purchased by organizations described under any other provision of section 501(c). Accordingly, the reserves held under contracts purchased by such other exempt organizations, or by entities not subject to Federal income tax (such as a State, municipality, etc.) shall not be treated as pension plan reserves unless they qualify as such under section 805(d)(1), (2), (3), or (5) or paragraph (b)(4)(ii) of this section.

(5) Purchased under contracts entered into with trusts which (at the time the contracts were entered into) were individual retirement accounts described in section 408(a) or under contracts entered into with individual retirement annuities described in section 408(b).

[T.D. 6513, 25 FR 12667, Dec. 10, 1960, as amended by T.D. 6886, 31 FR 8686, June 23, 1966; T.D. 7326, 39 FR 35353, Oct. 1, 1974; T.D. 7501, 42 FR 42341, Aug. 23, 1977; T.D. 7531, 43 FR 1065, Jan. 6, 1978]

§ 1.805–8 Interest paid.

(a) In general. Section 805(e) provides four categories of interest items the sum of which constitutes the "interest paid" for any taxable year. Interest paid is one of the elements of the policy and other contract liability requirements of a life insurance company. The amount of the policy and other contract liability requirements is used in determining the policyholders' share of each and every item of investment yield which is not included in taxable investment income. See section 804(a) and § 1.804–2. Interest paid includes interest on indebtedness, discounts on prepaid premiums, and interest on insurance or annuity contracts for which no provision is made in the life insurance reserves. Interest paid does not include dividends to policyholders (as defined in section 811(a) and paragraph (a) of § 1.811–2) or amounts derived from mortality savings or expense savings. In computing the interest paid for any taxable year the same item may not be included more than once.

(b) Interest paid defined. For purposes of part I, subchapter L, chapter 1 of the Code, the term "interest paid" as used in section 805(e) means the sum of—

(1) All interest for the taxable year on indebtedness, except on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from tax under chapter 1 of the Code. Indebtedness does not include reserves such as life insurance reserves (as defined in section 801(b) and § 1.801–4) nor does it include deferred dividends. Interest on indebtedness includes interest on deferred policy and contract benefit funds as well as interest on a mortgage. See section 163 and the regulations thereunder.

(2) All amounts in the nature of interest, whether or not guaranteed, for the taxable year on insurance or annuity contracts (including contracts supplementary thereto) which do not involve, at the time of accrual, life, health, or accident contingencies. Amounts in the nature of interest do not include amounts derived from or representing mortality gains, expense savings, underwriting profits, or other items not in the nature of interest. Amounts in the nature of interest include so-called excess-interest dividends as well as guaranteed interest accrued within the taxable year on such contracts. A contract to pay insurance benefits in installments over a specified period, for example, a contract to pay the insurance benefit in 10 annual installments, is considered as a supplementary contract not involving life contingencies. It is immaterial whether the optional mode of settlement

specified in the insurance or annuity contract arises from an option exercised by the insured during his or her lifetime or from an option exercised by either the insured or a beneficiary after the policy matured. Thus, no distinction is made based on the person choosing the method of payment, and the full amount of the interest accrued, and not merely the guaranteed interest, is considered as interest paid. Amounts in the nature of interest include interest on dividends left on deposit with the company and interest on premiums paid in advance.

(3) All amounts accrued for the taxable year for discounts in the nature of interest, whether or not guaranteed, on premiums or other consideration paid in advance on insurance or annuity contracts. Such accrual shall be determined in accordance with the rules prescribed in section 818(b) and the regulations thereunder. For example, if at the beginning of the taxable year 1958 a life insurance company granted a discount in the nature of interest of $40 as the result of the prepayment of life insurance premiums for 5 years, the company may, under the straight line method, accrue $8 in 1958 and each of the four succeeding taxable years ($40÷5=$8) and include this $8 as interest paid for each such taxable year.

(4) Interest for the taxable year on special contingency reserves under contracts of group term life insurance or group health and accident insurance which are established and maintained for the provision of insurance on retired lives, for premium stabilization, or for a combination thereof.

[T.D. 6513, 25 FR 12667, Dec. 10, 1960, as amended by T.D. 7163, 37 FR 4189, Feb. 29, 1972]

§ 1.806–1 Adjustment for certain reserves.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, a life insurance company writing contracts other than life insurance or annuity contracts (either separately or combined with noncancellable health and accident insurance contracts) must add to its life insurance company taxable income (as a factor in determining 1954 adjusted taxable income) an amount equal to eight times the amount of the adjustment for certain reserves provided in paragraph (b) of this section.

(b) The adjustment for certain reserves referred to in paragraph (a) of this section shall be an amount equal to 3¼ percent of the mean of the unearned premiums and unpaid losses at the beginning and end of the taxable year on such other contracts as are not included in life insurance reserves. If such unearned premiums, however, are less than 25 percent of the net premiums written during the taxable year on such other contracts, then the adjustment shall be 3¼ percent of 25 percent of the net premiums written during the taxable year on such other contracts plus 3¼ percent of the mean of the unpaid losses at the beginning and end of the taxable year on such other contracts. As used in this section, the term "unearned premiums" has the same meaning as in section 832(b)(4) and § 1.832–1.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.806–2 Taxable years affected.

Section 1.806–1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.806–3 and 1.806–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6513, 25 FR 12668, Dec. 10, 1960]

§ 1.806–3 Certain changes in reserves and assets.

(a) *In general.* For purposes of Part I, Subchapter L, Chapter 1 of the Code, section 806(a) provides that if there is a change in life insurance reserves (as defined in section 801(b)), during the taxable year, which is attributable to the transfer between the taxpayer and another person of liabilities under contracts taken into account in computing such life insurance reserves, then the means of such reserves, and the mean of the assets, shall be appropriately adjusted to reflect the amounts involved in such transfer. For example, the adjustments required under section 806(a) are applicable to transfers in which one life insurance company purchases or acquires a part or all of the business of another life insurance company under an arrangement whereby the purchaser or transferee becomes solely liable on the contracts transferred. This provision shall apply in the case of assumption reinsurance but not in the case of indemnity reinsurance or reinsurance ceded. Thus, no adjustments shall be required under section 806(a) when, in the ordinary course of business, an indemnity reinsurance contract is entered into with another company (on a yearly renewable term

basis, on a coinsurance basis, or otherwise) whereby there is a sharing of risks under one or more individual contracts. It will be necessary for each life insurance company participating in a transfer described in section 806(a) to make the adjustments required by such section. Such adjustments shall be made without regard to whether or not the transferor of the liabilities was the original insurer.

(b) Manner in which adjustments shall be made—(1) Daily basis. The means of the life insurance reserves, and the mean of the assets, shall be appropriately adjusted, on a daily basis, to reflect the amounts involved in a transfer described in section 806(a) and paragraph (a) of this section. The transferor and the transferee shall be treated as having held such life insurance reserves and assets for a fraction of the year in which the transfer occurs.

(2) Determination of period held. In determining the fraction which represents the fractional year that such reserves and assets were held, the numerator shall be the number of days during the taxable year which such reserves and assets were actually held, and the denominator shall be the number of days in the calendar year of the transfer. In computing the period held for purposes of the numerator, the day on which such reserves and assets are transferred is included by the transferor and excluded by the transferee.

(3) Adjustments to the means of life insurance reserves and assets not transferred. All life insurance reserves and assets transferred during the taxable year, within the meaning of section 806(a), shall be excluded from the beginning and end of the taxable year balances of the transferor and transferee, respectively. The amount of assets to be excluded from the beginning of the taxable year balance of the transferor shall be an amount equal to the value of such reserves at the beginning of the taxable year. The amount of assets to be excluded from the end of the taxable year balance of the transferee shall be an amount equal to the value of such reserves at the end of the taxable year. The means of the life insurance reserves and assets not so transferred shall be determined in the ordinary manner, that is, the arithmetic means. There shall be added to these means an amount to appropriately adjust them, on a daily basis, for the life insurance reserves and assets that were transferred during the taxable year. This adjustment shall be determined by multiplying (i) the mean of the transferred life insurance reserves (or assets, as the case may be) at the beginning of the taxable year (or, if acquired later, at the beginning of the period held as defined in subparagraph (2) of this paragraph) and the end of the period held as defined in subparagraph (2) of this paragraph (or at the end of the taxable year, if held at such time) by (ii) the fraction determined under subparagraph (2) of this paragraph.

(4) Examples. The application of this paragraph may be illustrated by the following examples:

Example (1). On March 14, 1958, the M Company, a life insurance company, transferred to the N Company, a life insurance company, pursuant to an assumption reinsurance agreement, all of its life insurance reserves, and related assets, on one block of policies. The reserves (and assets) for this block were held by the M Company on January 1, 1958, and totaled $60,000; on March 14, the reserves (and assets) totaled $64,000. The M Company had life insurance reserves of $1,000,000 at the beginning of 1958 (including those subsequently transferred) and $1,040,000 at the end of 1958. The M Company had assets of $1,300,000 at the beginning of 1958 (including those subsequently transferred) and $1,380,000 at the end of 1958. The mean of M's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1-1-58	$1,000,000	
Exclude reserves (at beginning of year) on contracts transferred to N	60,000	
Recomputed amount at 1-1-58		$940,000
Reserves at 12-31-58		1,040,000
Sum		1,980,000
Mean		990,000
Adjustment for reserves transferred on 8-14-58:		
Reserves at 1-1-58 on contracts transferred to N	$60,000	
Reserves at 3-14-58 on such contracts	64,000	
Sum	124,000	
Mean	62,000	
Fraction taken into account	73/365	
Adjustment (73/365 × $62,000)		$12,400
Mean of M's life insurance reserves after section 806(a) adjustment		1,002,400

Example (2). Assuming the facts to be the same as in example (1), the mean of M's assets for the taxable year 1958 is computed as follows:

Assets at 1-1-58	$1,300,000	
Exclude assets (at beginning of year) on contracts transferred to N	60,000	
Recomputed amount at 1-1-58		$1,240,000
Assets at 12-31-58		1,380,000
Sum		2,620,000
Mean		1,310,000
Adjustments for assets transferred on 3-14-58:		
Assets at 1-1-58 on contracts transferred to N	$60,000	
Assets at 3-14-58 on such contracts	64,000	

Sum	$124,000	
Mean	62,000	
Fraction taken into account	73/365	
Adjustment (73/365 × $62,000)		$12,400
Mean of M's assets after section 806(a) adjustment		1,322,400

Example (3). Assume the facts are the same as in example (1). At the end of 1958, N Company had life insurance reserves (and assets) of $80,000 on the contracts transferred on March 14, 1958. The N Company had life insurance reserves of $6,000,000 at the beginning of 1958 and $6,400,000 at the end of 1958 (including those transferred). The N Company had assets of $6,800,000 at the beginning of 1958 and $7,300,000 at the end of 1958 (including those on the contracts transferred). The mean of N's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1–1–58		$6,000,000
Reserves at 12–31–58	$6,400,000	
Exclude reserves (at end of year) on contracts transferred from M	80,000	
Recomputed amount at 12–31–58		6,320,000
Sum		12,320,000
Mean		6,160,000
Adjustment for reserves transferred on 3–14–58:		
Reserves at 3–14–58 on contracts transferred from M	$64,000	
Reserves at 12–31–58 on such contracts	80,000	
Sum	144,000	
Mean	72,000	
Fraction taken into account	292/365	
Adjustment (292/365 × $72,000)		$57,600
Mean of N's life insurance reserves after section 806(a) adjustment		6,217,600

Example (4). Assuming the facts to be the same as in example (3), the mean of N's assets for the taxable year 1958 is computed as follows:

Assets at 1–1–58		$6,800,000
Assets at 12–31–58	$7,300,000	
Exclude assets (at end of year) on contracts transferred from M	80,000	
Recomputed amount at 12–31–58		7,220,000
Sum		14,020,000
Mean		7,010,000
Adjustments for assets transferred on 3–14–58:		
Assets at 3–14–58 on contracts transferred from M	$64,000	
Assets at 12–31–58 on such contracts	80,000	
Sum	144,000	
Mean	72,000	
Fraction taken into account	292/365	
Adjustment (292/365 × $72,000)		$57,600
Mean of N's assets after section 806(a) adjustment		7,067,600

Example (5). The facts are the same as in example (1), except that on October 19, 1958, company N transfers to company P, a life insurance company, all of the life insurance reserves, and related assets, on the block of policies it had received from company M on March 14, 1958. The reserves (and assets) for this block totaled $76,000 on October 19, 1958. The means of company M's life insurance reserves and assets, as computed in examples (1) and (2), respectively, would be unchanged by the transfer of October 19, 1958. Since company N did not own this block of policies at either the beginning or end of the taxable year, it would not have to recompute its beginning or end of the taxable year reserves or assets. Company N will, however, have to adjust (or increase) the mean of its life insurance reserves and assets on account of the policies it received from company M. This adjustment will be $42,000, which is determined by multiplying the means of the life insurance reserves (or assets) on these policies as of March 15, 1958, and October 19, 1958, $70,000 ($64,000+$76,000=$140,000÷2) by the fraction 219/365 (the numerator of 219 is determined by excluding the day of the transfer to N, March 14, 1958, and including the day of the transfer from N to P, October 19, 1958). Company P will have to recompute its end of the year life insurance reserves and assets (in the same manner as illustrated in examples (3) and (4)). Assuming the end of the year reserves (and assets) on this block of policies is $80,000, company P will have an adjustment under section 806(a) of $15,600, which is determined by multiplying the means of the reserves on these policies as of October 20, 1958, and December 31, 1958, $78,000 ($76,000+$80,000=$156,000÷2) by the fraction 73/365.

[T.D. 6513, 25 FR 12663, Dec. 10, 1960]

§ 1.806–4 Change of basis in computing reserves.

(a) **In general.** For purposes of Subpart B, Part I, Subchapter L, Chapter 1 of the Code, section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) (relating to items taken into account) as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then in determining taxable investment income the amount of the item as of the close of the taxable year shall be the amount computed on the old basis, and the amount of the item as of the beginning of the next taxable year shall be the amount computed on the new basis. For purposes of the preceding sentence, an election under section 818(c) shall not be treated as a change in basis for determining the amount of an item referred to in section 810(c). A change of basis in computing any of the items referred to in section 810(c) is not a change of accounting method requiring the consent of the Secretary or his delegate under section 446(e).

(b) **Illustration of change of basis in computing reserves.** The application of section 806(b) and paragraph (a) of this section may be illustrated by the following examples:

Example (1). Assume that the life insurance reserves of Y, a life insurance company, at the beginning of the taxable year 1959 are $100 and that during such taxable year a portion of the reserves is strengthened (by reason of a change in mortality

or interest assumptions, or otherwise), so that at the end of the taxable year 1959 the reserves (computed on the new basis) are $130 but computed on the old basis would be $120. Assume further that at the close of the next taxable year, 1960, the reserves (computed on the new basis) are $142. Under the provisions of section 806(b) and paragraph (a) of this section, the mean of such reserves for the taxable year of the reserve strengthening, namely 1959, is $110 (the mean of $100, the balance at the beginning of the taxable year 1959, and $120, the balance at the end of the taxable year 1959 computed on the old basis). The mean of such reserves for the next taxable year, 1960, is $136 (the mean of $130, the balance at the beginning of the taxable year 1960 computed on the new basis, and $142, the balance at the end of the taxable year 1960 computed on the new basis).

Example (2). The life insurance reserves of S, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to $50 on January 1, 1959, and $80 on December 31, 1959. For the taxable year 1959, S elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to $60 on January 1, 1959, and $96 on December 31, 1959. Under the provisions of paragraph (a) of this section, the mean of such reserves for the taxable year 1959 is $78 (the mean of $60), the balance at the beginning of the taxable year 1959 computed under section 818(c), and $96, the balance at the end of the taxable year 1959 computed under section 818(c).

[T.D. 6513, 25 FR 12669, Dec. 10, 1960]

§ 1.807–1 Foreign life insurance companies.

A foreign life insurance company carrying on a life insurance business within the United States, if with respect to its United States business it would qualify as a life insurance company under section 801, is taxable on its income received during the taxable year from interest, dividends, and rents, from sources within and without the United States, pertaining to its United States business. Such a company is taxable in the same manner as a domestic life insurance company except that the determinations necessary for the purposes of subtitle A, such as gross income, the adjustment for certain reserves, deductions and limitations on deductions, amortization of premiums and accrual of discount, and the deductions allowed the company in Part VIII, Subchapter B, Chapter 1 of the Code, shall be made on the basis of the income, disbursements, assets, and liabilities reported in the annual statement for the taxable year of the United States business of such company on the form approved for life insurance companies by the National Association of Life Insurance Commissioners. This statement is presumed to reflect the income, disbursements, assets, and liabilities of the United States business of the company and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.807–1T Mortality and morbidity tables (temporary).

Q-1. What mortality and morbidity tables must be used to compute reserves under section 807 (d)(2) for insurance contracts for which no commissioners' standard tables are applicable when the contract is issued?

A-1. The following tables must be used:

Type of Contract	Table
1. Group term life insurance (active life reserves).	1960 Commissioners' Standard Group Mortality Table.
2. Group life insurance (active life reserves); accidental death benefits.	1959 Accidental Death Benefits Table.
3. Permanent and paid-up group life insurance (active life reserves).	Same table as are applicable to males for ordinary life insurance.
4. Group life insurance (active life reserves); disability income benefits.	The tables of period 2 disablement rates and the 1930 to 1950 termination rates of the 1952 Disability Study of the Society of Actuaries.
5. Group life insurance; survivor income benefits insurance.	Same tables as are applicable to group annuities.
6. Group life insurance; extended death benefits for disabled lives.	1970 Intercompany Group Life Disability Valuation Table.
7. Credit life insurance	1958 Commissioners' Extended Term Table.
8. Supplementary contracts involving life contingencies.	Same tables as are applicable to individual immediate annuities.
9. Noncancellable accident and health insurance (active life reserves); benefits issued before 1984.	Tables used for NAIC annual statement reserves as of December 31, 1983.
10. Noncancellable accident and health insurance (active life reserves); disability benefits issued after 1983.	1964 Commissioners' Disability Tables.
11. Noncancellable accident and health insurance (active life reserves); accidental death benefits issued after 1983.	1959 Accidental Death Benefits Tables.
12. Noncancellable accident and health insurance (active life reserves); all benefits issued after 1983 other than disability and accidental death.	Tables used for NAIC annual statement reserves.
13. Noncancellable accident and health insurance (claim reserves); disability benefits for all years of issue.	1964 Commissioners' Disability Tables.
14. Noncancellable accident and health insurance (claim reserves); all benefits other than disability for all years of issue.	Tables used for annual statement reserves.

Q-2. May the tables specified in A-1 of this section be adjusted to reflect the risks (such as substandard risks) incurred under the contract which are not otherwise taken into account.

A-2. Yes. Appropriate adjustment may be made for such risks.

Q-3. For what taxable years must the tables in A-1 be used?

A-3. The tables in A-1 must be used for taxable years beginning after December 31, 1983.

[T.D. 8120, 52 FR 39, Jan. 2, 1987]

§ 1.807–2 Taxable years affected.

Section 1.807–1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments.

[T.D. 6535, 26 FR 524, Jan. 20, 1961]

Gain And Loss From Operations

§ 1.809–1 Taxable years affected.

Sections 1.809 through 1.809–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of June 27, 1961 (75 Stat. 120), the Act of October 10, 1962 (76 Stat. 808); the Act of October 23, 1962 (76 Stat. 1134), and section 214(b)(4) of the Revenue Act of 1964 (78 Stat. 55).

[T.D. 6535, 26 FR 524, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 827, Jan. 18, 1969]

§ 1.809–2 Exclusion of share of investment yield set aside for policyholders.

(a) In general. Section 809 provides the rules for determining the gain or loss from operations of a life insurance company, which amount is necessary to determine life insurance company taxable income. In order to determine gain or loss from operations, a life insurance company must first determine the share of each and every item of its investment yield (as defined in section 804(c) and paragraph (a) of § 1.804–4) set aside for policyholders (as computed under section 809(a)(1) and paragraph (b) of this section), as this share is excluded from gain or loss from operations (as defined in section 809(b)(1) and (2) and paragraphs (a) and (b) of § 1.809–3, respectively). The life insurance company shall then add its share of each and every item of its investment yield to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of § 1.809–4). In addition, the life insurance company shall, for taxable years beginning after December 31, 1961, add the amount (if any) by which its net long-term capital gain exceeds its net short-term loss. From the sum so computed (which includes the capital gains item only for taxable years beginning after December 31, 1961) there shall then be subtracted the deductions provided in section 809(d) and paragraph (a) of § 1.809–5. The amount thus obtained is the gain or loss from operations for the taxable year.

(b) Computation of share of investment yield set aside for policyholders. Section 809(a)(1) provides that the share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) of any life insurance company set aside for policyholders shall not be included in gain or loss from operations. For this purpose, the percentage used in determining the share of each of these items comprising the investment yield set aside for policyholders shall be determined by dividing the required interest (as defined in section 809(a)(2) and paragraph (d) of this section) by the investment yield (as defined in section 804(c) and paragraph (a) of § 1.804–4). The percentage thus obtained is then applied to each and every item of the investment yield so that the share of each and every item of investment yield set aside for policyholders shall be excluded from gain or loss from operations. However, if in any case the required interest exceeds the investment yield, then the share of any item set aside for policyholders shall be 100 percent.

(c) Computation of life insurance company's share of investment yield. For purposes of subpart C, part I, subchapter L, chapter 1 of the Code, section 809(b)(3) provides that the percentage used in determining the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be

obtained by subtracting the percentage obtained under paragraph (b) of this section from 100 percent. For example, if the policyholders' percentage (as determined under section 809(a)(1) and paragraph (b) of this section) is 72.38 percent, then the life insurance company's share is 27.62 percent (100 percent minus 72.38 percent). In such a case, if the amount of a particular item is $200, then the life insurance company's share of such item included in determining gain or loss from operations is $55.24 ($200 multiplied by 27.62 percent) and the share of such item set aside for policyholders (which is excluded from gain or loss from operations) is $144.76 ($200 multiplied by 72.38 percent). For purposes of determining gain or loss from operations, the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be added to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of § 1.809–4).

(d) Required interest defined. (1) For purposes of part I, section 809(a)(2) defines the term "required interest" for any taxable year as the sum of the products obtained by multiplying (i) each rate of interest required, or assumed by the taxpayer, in calculating the reserves described in section 810(c), by (ii) the means of the amount of such reserves computed at that rate at the beginning and end of the taxable year. In the case of the reserves described in section 810(c)(1), such rate of interest shall be the same as that used by the taxpayer for purposes of paragraph (b) of § 1.801–5 (relating to the definition of reserves required by law) with respect to such reserves. In the case of the reserves described in section 810(c)(2) through (5), such rate of interest shall be the same as that actually paid, credited, or accrued by the taxpayer with respect to such reserves. Thus, the required interest for any taxable year includes the elements of interest paid (as defined in section 805(e)) with respect to the reserves described in section 810(c).

(2) For purposes of computing required interest under section 809(a)(2) and subparagraph (1) of this paragraph, the amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets) before applying the rate of interest required, or assumed by the taxpayer, thereto. However, in the case of the adjustments required by section 810(d) as a result of a change in the basis of computing reserves, the adjustments to any of the reserves described in section 810(c) shall be taken into account in accordance with the rules prescribed in section 810(d) and § 1.810–3.

[T.D. 6535, 26 FR 525, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 23, 1966]

§ 1.809–3 Gain and loss from operations defined.

(a) Gain from operations. For purposes of part I, subchapter L, chapter 1 of the Code, section 809(b)(1) defines the term "gain from operations" as the excess of the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of § 1.809–4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, over the sum of the deductions provided by section 809(d) and § 1.809–5.

(b) Loss from operations. For purposes of part I, section 809(b)(2) defines the term "loss from operations" as the excess of the sum of the deductions provided by section 809(d) and § 1.809–5 over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of § 1.809–4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss.

(c) Illustration of principles. The provisions of section 809(b)(1) through (3) and paragraphs (a) and (b) of this section may be illustrated by the following example:

Example. For the taxable year 1958, T, a life insurance company, had investment yield of $900,000, including $150,000 of dividends received from domestic corporations subject to taxation under chapter 1 of the Code, $10,000 of wholly tax-exempt interest, and $78,000 of partially tax-exempt interest. T also had items of gross amount under section 809(c) in the amount of $12,000,000 and deductions under section 809(d) of $6,963,500 (exclusive of any deductions for wholly tax-exempt interest, partially tax-exempt interest, and dividends received). For such taxable year, the share of each and every item of investment yield set aside for policyholders was 80 percent and the company's share of each and every item of investment yield was 20 percent. Based upon these figures, T

had a gain from operations of $5,180,000 for the taxable year 1958, computed as follows:

	Col. 1	Col. 2 (80% × Col. 1) exclusion of policyholder's share	Col. 3 (20% × Col. 1) company's share
Interest wholly tax-exempt	$10,000	$8,000	$2,000
Interest partially tax-exempt	78,000	62,400	15,600
Dividends received	50,000	120,000	30,000
Other items of investment yield ...	662,000	529,600	132,400
Investment yield	900,000	720,000	180,000

Gross amount (sum of items under sec. 809(c))		$12,000,000
Total		12,180,000
Less:		
Deductions under sec. 809(d)(8):		
Company's share of interest wholly tax-exempt........	$2,000	
30/52 of company's share of interest partially tax-exempt (30/52 × $15,600)........	9,000	
85% of company's share of dividends received (but not to exceed 85% of gain from operations as computed under sec. 809(d)(8)(B)) (85% × $30,000).........	25,500	
All other deductions under sec. 809(d)	6,963,500	
		7,000,000
Gain from operations................		5,180,000

(d) Exception. (1) In accordance with section 809(b)(4), if it is established in any case to the satisfaction of the Commissioner, or by a determination of The Tax Court of the United States, or of any other court of competent jurisdiction, which has become final, that the application of the definition of gain from operations contained in section 809(b)(1) results in the imposition of tax on—

(i) Any interest which under section 103 is excluded from gross income,

(ii) Any amount of interest which under section 242 (as modified by section 804(a)(3)) is allowable as a deduction, or

(iii) Any amount of dividends received which under sections 243, 244, and 245 (as modified by section 809(d)(8)(B)) is allowable as a deduction,

adjustment shall be made to the extent necessary to prevent such imposition.

(2) For the date upon which a decision by the Tax Court becomes final, see section 7481. For the date upon which a judgment of any other court becomes final, see paragraph (c) of § 1.1313(a)–1.

[T.D. 6535, 26 FR 526, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 28, 1966]

§ 1.809–4 Gross amount.

(a) Items taken into account. For purposes of determining gain or loss from operations under section 809(b)(1) and (2), respectively, section 809(c) specifies three categories of items which shall be taken into account. Such items are in addition to the life insurance company's share of the investment yield (as determined under section 809(a)(1) and paragraph (c) of § 1.809–2), and the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (such capital gains item is included in determining gain or loss from operations only for taxable years beginning after December 31, 1961). The additional three categories of items taken into account are:

(1) Premiums. (i) The gross amount of all premiums and other consideration on insurance and annuity contracts (including contracts supplementary thereto); less return premiums and premiums and other consideration arising out of reinsurance ceded. The term "gross amount of all premiums" means the premiums and other consideration provided in the insurance or annuity contract. Thus, the amount to be taken into account shall be the total of the premiums and other consideration provided in the insurance or annuity contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction as defined in paragraph (a)(7)(ii) of § 1.809–5). The term also includes amounts a life insurance company charges itself representing premiums with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)).

(ii) The term "return premiums" means amounts returned or credited which are fixed by contract and do not depend on the experience of the company or the discretion of the management. Thus, such term includes amounts refunded due to policy cancellations or erroneously computed premiums. Furthermore, amounts of premiums or other consideration returned to another life insurance company in respect of reinsurance ceded shall be included in return premiums. For the treatment of amounts which do not meet the requirements of return premiums, see section 811 (relating to dividends to policyholders).

(iii) For purposes of section 809(c)(1) and this subparagraph, the term "reinsurance ceded" means an arrangement whereby the taxpayer (the reinsured) remains solely liable to the policyholder, whether all or only a portion of the risk has been transferred to the reinsurer. Such term includes indemnity reinsurance transactions but does not include assumption reinsurance transactions. See paragraph (a)(7)(ii) of § 1.809–5 for the definition of assumption reinsurance.

(2) Decreases in certain reserves. Each net decrease in reserves which is required by section 810(a) and (d)(1) or 811(b)(2) to be taken into account for the taxable year as a net decrease for purposes of section 809(c)(2).

(3) Other amounts. All amounts, not included in computing investment yield and not otherwise taken into account under section 809(c)(1) or (2), shall be taken into account under section 809(c)(3) to the extent that such amounts are includible in gross income under subtitle A of the Code. See section 61 (relating to gross income defined) and the regulations thereunder.

(b) Treatment of net long-term capital gains. For taxable years beginning before January 1, 1962, any net long-term capital gains (as defined in section 1222(7)) from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the determination of gain or loss from operations of a life insurance company. On the other hand, with respect to taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (as defined in section 1222(6)) shall be taken into account in determining gain or loss from operations under section 809. However, for any taxable year beginning after December 31, 1958, the excess of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) is included in computing investment yield (as defined in section 804(c)) and, to that extent, is taken into account in determining gain or loss from operations under section 809.

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962, T.D. 6886, 31 FR 8687, June 23, 1966]

§ 1.809–5 Deductions.

(a) Deductions allowed. Section 809(d) provides the following deductions for purposes of determining gain or loss from operations under section 809(b)(1) and (2), respectively:

(1) Death benefits, etc. All claims and benefits accrued (less reinsurance recoverable), and all losses incurred (whether or not ascertained), during the taxable year on insurance and annuity contracts (including contracts supplementary thereto). The term "all claims and benefits accrued" includes, for example, matured endowments and amounts allowed on surrender. The term "losses incurred (whether or not ascertained)" includes a reasonable estimate of the amount of the losses (based upon the facts in each case and the company's experience with similar cases) incurred but not reported by the end of the taxable year as well as losses reported but where the amount thereof cannot be ascertained by the end of the taxable year.

(2) Increases in certain reserves. The net increase in reserves which is required by section 810(b) and (d)(1) to be taken into account for the taxable year as a net increase for purposes of section 809(d)(2).

(3) Dividends to policyholders. The deduction for dividends to policyholders as determined under section 811(b) and § 1.811–2. Except as provided in section 809(d)(3) and this subparagraph, no amount shall be allowed as a deduction in respect of dividends to policyholders under section 809(d). See section 809(f) and § 1.809–7 for limitation of such deduction.

(4) Operations loss deduction. The operations loss deduction as determined under section 812.

(5) Certain nonparticipating contracts. (i) An amount equal to the greater of:

(a) 10 percent of the increase for the taxable year in certain life insurance reserves for nonparticipating contracts (other than group contracts); or

(b) 3 percent of the premiums for the taxable year attributable to nonparticipating contracts (other than group contracts) which are issued or renewed for periods of 5 years or more.

(ii) For purposes of section 809(d)(5) and this subparagraph, the term "nonparticipating contracts" means those contracts which during the taxable year contain no right to participate in the divisible surplus of the company. For example, if at any time during the taxable year for which the deduction allowed under section 809(d)(5) and this subparagraph is claimed such contracts have rights to dividends or similar distributions (as defined in section 811(a) and paragraph (a) of § 1.811–2), such contracts shall no longer be deemed nonparticipating contracts and, therefore, no deduction shall be allowed. Thus, if a class of contracts having no right to participate in the divisible surplus of the company is in force for nine years and on March 10, 1958, it is announced that such contracts shall be accorded dividend rights as of August 1, 1958, no deduction shall be allowed under section 809(d)(5) and this subparagraph for the taxable year 1958 or any succeeding taxable year, whether or not dividends are actually paid on such contracts. However, if the announcement of March 10, 1958, states that such contracts shall be accorded dividend rights as of January 1, 1959, a deduction under section 809(d)(5) and this subparagraph shall be allowed for the taxable year 1958 but not for any succeeding taxable year.

(iii) For purposes of section 809(d)(5) and this subparagraph, the term "reserves for nonparticipating contracts" means such part of the life insurance reserves (as defined in section 801(b) and § 1.801–4), other than that portion of such reserves which is allocable to annuity features, as relates to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph). The amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets). In the case of the adjustments required by section 810(d) (relating to adjustment for change in computing reserves), the increase in life insurance reserves attributable to reserve strengthening shall be taken into account in accordance with the rules prescribed in section 810(d) and § 1.810–3.

(iv) For purposes of section 809(d)(5) and this subparagraph, the term "premiums" means the net amount of the premiums and other consideration attributable to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph) which are taken into account under section 809(c)(1). For this purpose, premiums include only such amounts attributable to such contracts which are issued or renewed for periods of 5 years or more, but does not include that portion of the premiums which is allocable to annuity features. No portion of a premium shall be deemed allocable to annuity features solely because a contract, such as an endowment contract, provides that at maturity the insured shall have an option to take an annuity. The determination of whether a contract meets the 5-year requirement shall be made as of the date the contract is issued, or as of the date it is renewed, whichever is applicable. Thus, a 20-year nonparticipating endowment policy shall qualify for the deduction under section 809(d)(5), even though the insured subsequently dies at the end of the second year, since the policy is issued for a period of 5 years or more. However, a 1-year renewable term contract shall not qualify, since as of the date it is issued (or of any renewal date) it is not issued (or renewed) for a period of 5 years or more. In like manner, a policy originally issued for a 3-year period and subsequently renewed for an additional 3-year period shall not qualify. However, if this policy is renewed for a period of 5 years or more, the policy shall qualify for the deduction under section 809(d)(5) from the date it is renewed.

(v) The provisions of section 809(d)(5) and this subparagraph may be illustrated by the following example:

Example. Assume the following facts with respect to X, a life insurance company, for the taxable year 1958:

Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1–1–58	$150,000
Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12–31–58	225,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 1–1–58	48,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 12–31–58	57,000
Premiums on nonparticipating contracts without annuity features (other than group contracts) issued or renewed for 5 years or more	85,000
Premiums on nonparticipating contracts allocable to annuity features (other than group contracts) issued or renewed for 5 years or more	14,000
Return premiums on nonparticipating contracts without annuity features (other than group contracts)	5,000

In order to determine the deduction under section 809(d)(5) (without regard to the limitation of section 809(f)), X would make up the following schedule:

(1) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12-31-58..	$225,000	
(2) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1-1-58....	150,000	
(3) Excess of item (1) over item (2) ($225,000 minus $150,000)....	75,000	
(4) 10 percent of item (3) (10% × $75,000)		7,500
(5) Net premiums on nonparticipating contracts without annuity features issued or renewed for 5 years or more (other than group contracts) (gross premiums on such contracts ($85,000) minus return premiums ($5,000) on such contracts)	80,000	
(6) 3 percent of item (5) (3% × $80,000)		2,400
(7) The greater of item (4) or item (6)		7,500
(8) Tentative deduction under sec. 809(d)(5) (computed without regard to the limitation of sec. 809(f))		7,500

(vi) See section 809(f) and § 1.809-7 for limitation of the deduction provided by this subparagraph.

(6) Certain accident and health insurance and group life insurance. (i) For taxable years beginning before January 1, 1963, an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, group accident and health insurance contracts, or group accident and health insurance contracts with a life feature. For taxable years beginning after December 31, 1962, the deduction shall be an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, accident and health insurance contracts (other than those to which section 809(d)(5) applies), or accident and health insurance contracts with a life feature (other than those to which section 809(d)(5) applies). For purposes of section 809(d)(6) and this subparagraph, the term "premiums" means the net amount of the premiums and other consideration attributable to such contracts taken into account under section 809(c)(1). The deduction allowed by section 809(d)(6) and this subparagraph for the taxable year and all preceding taxable years shall not exceed 50 percent of the net amount of the premiums attributable to such contracts for the taxable year. For example, assume that premiums attributable to group life insurance and group accident and health insurance contracts are $103,000 for the taxable year 1962. Assume further that there are $3,000 of return premiums attributable to such contracts for the taxable year. Under the provisions of section 809(d)(6) and this subparagraph, a deduction (determined without regard to section 809(f) of $2,000 (2 percent of $100,000 ($103,000–$3,000)) is allowed. Assuming that the company continues to receive net premiums of $100,000 attributable to such contracts for 15 years, the cumulative amount of these deductions is $30,000 ($2,000 for 15 years). If, in the sixteenth year, net premiums attributable to such contracts amount to $60,000, no deduction shall be allowed under section 809(d)(6) and this subparagraph since the cumulative amount of these deductions ($30,000) equals 50 percent of the current year's premiums ($60,000) from such contracts.

(ii) In computing the deduction under section 809(d)(6), the determination as to when the 50 percent limitation on such deduction has been reached shall be based upon the amount allowed as a deduction for the taxable year and all preceding taxable years after the application of the limitation provided in section 809(f) and § 1.809-7. Thus, if in the example set forth in paragraph (c) of § 1.809-7 the application of the limitation provided by section 809(f) limited the deduction allowed for the taxable year under section 809(d)(6) to $3,250,000, then for purposes of determining the 50 percent limitation on such deduction, only $3,250,000 (the amount allowed) shall be taken into account.

(iii) For purposes of determining whether the 50 percent limitation applies to any taxable year, the deduction provided by section 809(d)(6) for all preceding taxable years shall be taken into account, irrespective of whether or not the life insurance company claimed a deduction for these amounts for such preceding taxable years.

(iv) See section 809(f) and § 1.809-7 for limitation of the deduction provided by this subparagraph.

(7) Assumption by another person of liabilities under insurance, etc., contracts. (i) The consideration (other than consideration arising out of reinsurance ceded as defined in paragraph (a)(1)(iii) of § 1.809-4) in respect of the assumption by another person of liabilities under insurance and annuity contracts (including contracts supplementary thereto) of the taxpayer.

(ii) For purposes of section 809(d)(7) and this subparagraph, the term "assumption reinsurance" means an arrangement whereby another person (the reinsurer) becomes solely liable to the policy-

holders on the contracts transferred by the taxpayer. Such term does not include indemnity reinsurance or reinsurance ceded (as defined in paragraph (a)(1)(iii) of § 1.809–4).

(iii) The provisions of section 809(d)(7) and this subparagraph may be illustrated by the following example:

Example. During the taxable year 1958, T, a life insurance company, transferred a block of insurance policies and made a payment of $50,000 to R, a life insurance company, under an arrangement whereby R became solely liable to the policyholders on the policies transferred by T. Under the provisions of section 809(d)(7) and this subparagraph, T is allowed a deduction of $50,000 for the taxable year 1958. For the treatment by R of this $50,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of § 1.809–4. See section 806(a) and § 1.806–3 for the adjustments in reserves and assets to be made by T and R as a result of this transaction.

(8) Tax-exempt interest, dividends, etc. (i) Each of the following items:

(a) The life insurance company's share of interest which under section 103 is excluded from gross income;

(b) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3) and paragraph (d)(2)(i) of § 1.804–2) computed with respect to the life insurance company's share of such interest; and

(c) The deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B) and subdivision (ii) of this subparagraph) computed with respect to the life insurance company's share of the dividends received.

(ii) The modification contained in section 809(d)(8)(B) provides the method for applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of section 809(d)(8)(A)(iii) and subdivision (i)(c) of this subparagraph. Under this method, the sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations) shall be limited to 85 percent of the gain from operations computed without regard to:

(a) The deductions provided by section 809(d)(3), (5), and (6);

(b) The operations loss deductions provided by section 812; and

(c) The deductions allowed by sections 243(a)(1), 244(a), and 245.

If a life insurance company has a loss from operations (as determined under sec. 812) for the taxable year, the limitation provided in section 809(d)(8)(B) and this subdivision shall not be applicable for such taxable year. In that event, the deductions provided by sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the life insurance company for such taxable year without regard to such limitation. If the life insurance company does not have a loss from operations for the taxable year, however, the limitation shall be applicable for all tax purposes for such taxable year. In determining whether a life insurance company has a loss from operations for the taxable year under section 812, the deductions allowed by sections 243(a)(1), 244(a), and 245 shall be computed without regard to the limitation provided in section 809(d)(8)(B) and this subdivision.

(9) Investment expenses, etc. (i) The amount of investment expenses to the extent not allowed as a deduction under section 804(c)(1) in computing investment yield. For example, if a deduction in the amount of $100,000 is claimed for investment expenses, which amount includes general expenses assigned to or included in investment expenses, and due to the operation of the limitation provided by section 804(c)(1) only $85,000 is allowed, then the excess ($15,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(ii) The amount (if any) by which the sum of the deductions allowable under section 804(c) exceeds the gross investment income. For example, if gross investment income under section 804(b) equals $400,000, and the sum of the deductions allowable under section 804(c) equals $425,000, then the excess ($25,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(iii) In determining the amount of the deductions allowed under subdivisions (i) and (ii) of this subparagraph, a life insurance company shall first take such deductions to the full extent allowable under section 804(c)(1), and any amount which is allowed as a deduction under section 804(c) shall not again be allowed as a deduction under section 809(d)(9).

(10) Small business deduction. The small business deduction as determined under section 804(a)(4).

(11) Certain mutualization distributions. The amount of distributions to shareholders actually made by the life insurance company in 1958, 1959,

1960, and 1961 in acquisition of stock pursuant to a plan of mutualization adopted by the company before January 1, 1958. If such deduction is claimed, there must be attached to the return of the company claiming such deduction a certified copy of the plan of mutualization and proof that such plan was adopted prior to January 1, 1958. See section 809(g) and § 1.809–8 for limitation of such deduction.

(12) Other deductions. Except as modified by section 809(e) and § 1.809–6, all other deductions allowed under subtitle A of the Code for purposes of computing taxable income to the extent not allowed as a deduction in computing investment yield. For example, a life insurance company shall be allowed a deduction under section 809(d)(12) and this subparagraph for amounts representing premiums charged itself with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)) in accordance with the rules prescribed in sections 162 and 404 and the regulations thereunder, to the extent that a deduction for such amounts is not allowed under section 804(c)(1) and paragraph (b)(1) of § 1.804–4 or section 809(d)(9) and subparagraph (9) of this paragraph.

(b) Denial of double deduction. Nothing in section 809(d) shall permit the same item to be deducted more than once in determining gain or loss from operations. For example, if an item is allowed as a deduction for the taxable year by reason of its being a loss incurred within such taxable year (whether or not ascertained) under section 809(d)(1), such item, or any portion thereof, shall not also be allowed as a deduction for such taxable year under section 809(d)(2).

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962; T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 827, Jan. 18, 1969]

§ 1.809–6 Modifications.

Under section 809(e), the deductions allowed under section 809(d)(12) and paragraph (a)(12) of § 1.809–5 (relating to other deductions) are subject to the following modifications—

(a) Interest. No deduction shall be allowed under section 163 for interest in respect of items described in section 810(c) since such interest is taken into account in the determination of required interest under section 809.

(b) Bad debts. No deduction shall be allowed for an addition to reserves for bad debts under section 166(c). However, a deduction for specific bad debts shall be allowed to the extent that such deduction is allowed under section 166 and the regulations thereunder. In the case of a loss incurred on the sale of mortgaged or pledged property, see § 1.166–6 of this chapter.

(c) Charitable, etc., contributions and gifts. (1) The deduction by a life insurance company in any taxable year for a charitable contribution (as defined in section 170(c)) shall be limited to 5 percent of the gain from operations (as determined under section 809(b)(1)), computed without regard to any deductions for:

(i) Charitable contributions under section 170;

(ii) Dividends to policyholders under section 811(b);

(iii) Certain nonparticipating contracts under section 809(d)(5);

(iv) Group life insurance contracts and group accident and health insurance contracts under section 809(d)(6);

(v) Tax-exempt interest, dividends, etc., under section 809(d)(8); and

(vi) Any operations loss carryback to the taxable year under section 812.

(2) In applying the first sentence of section 170(b)(2) as contained in section 170 or, in the case of taxable years beginning after December 31, 1969, section 170(d)(2)(B) as contained in section 170A, any excess of the charitable contributions made by a life insurance company in a taxable year over the amount deductible in such year under the limitation contained in subparagraph (1) of this paragraph, shall be reduced to the extent that such excess:

(i) Reduces life insurance company taxable income (computed without regard to section 802(b)(3)) for the purpose of determining the offsets referred to in section 812(b)(2); and

(ii) Increases an operations loss carryover under section 812 for a succeeding taxable year.

(3) The application of the rules provided in section 809(e)(3) and this paragraph may be illustrated by the following example:

Example. Assume that life insurance company P is organized on January 1, 1958, and has a loss from operations for that year in the amount of $100,000 which is an operations loss carryover to 1959. In 1959, company P has a gain from operations and tax base (computed without regard to section 802(b)(3)) of $100,000 before the allowance of a deduction for a $5,000 charitable contribution made in 1959 and before the application of the operations loss carryover from 1958. Under

section 170(b)(2), the operations loss carryover from 1958 is first applied to eliminate the $100,000 gain from operations and tax base in 1959 and the $5,000 charitable contribution carryover would (except for the limitation contained in this paragraph) become a charitable contribution carryover to 1960. However, for the purpose of computing the offsets referred to in section 812(b)(2), the $5,000 charitable contribution is applied to reduce the gain from operations and tax base for 1959 to $95,000 before the application of the operations carryover from 1958. Since only $95,000 of the $100,000 loss from operations in 1958 is an offset for 1959, the remaining $5,000 becomes an operations loss carryover to 1960. Accordingly, under the limitation contained in this paragraph, the charitable contributions carryover provided under the second sentence of section 170(b)(2) is eliminated.

(d) **Amortizable bond premium.** No deduction shall be allowed under section 171 for the amortization of bond premiums since a special deduction for such premiums is specifically taken into account under section 818(b).

(e) **Net operating loss deduction.** No deduction shall be allowed under section 172 since section 812 allows an "operations loss deduction".

(f) **Partially tax-exempt interest.** No deduction shall be allowed under section 242 for partially tax-exempt interest since section 809(d)(8) allows a deduction for such interest.

(g) **Dividends received.** No deduction shall be allowed under sections 243, 244, and 245 for dividends received since section 809(d)(8) allows a deduction for such dividends.

[T.D. 6535, 26 FR 529, Jan. 20, 1961, as amended by T.D. 7207, 37 FR 20797, Oct. 5, 1972]

§ 1.809–7 Limitation on certain deductions.

(a) **In general.** Section 809(f)(1) limits the deductions under section 809(d)(3), (5), and (6), relating to deductions for dividends to policyholders, certain nonparticipating contracts, and group life, accident, and health insurance contracts, respectively. This limitation provides that the amount of such deductions shall not exceed the sum of (1) the amount (if any) by which the gain from operations for the taxable year (determined without regard to such deductions) exceeds the taxpayer's taxable investment income for such year, plus (2) $250,000.

(b) **Application of limitation.** Section 809(f)(2) provides a priority system for applying the limitation contained in section 809(f)(1) and paragraph (a) of this section. Under this priority system, the limitation shall be applied in the following order—

(1) For taxable years beginning before January 1, 1962:

(i) First to the amount of the deduction under section 809(d)(6) (relating to group life, accident, and health insurance);

(ii) Then to the amount of the deduction under section 809(d)(5) (relating to certain nonparticipating contracts); and

(iii) Finally to the amount of the deduction under section 809(d)(3) (relating to dividends to policyholders).

(2) For taxable years beginning after December 31, 1961, the limitation shall be applied in the following order:

(i) First to the amount of the deduction under section 809(d)(3);

(ii) Then to the amount of the deduction under section 809(d)(6); and

(iii) Finally to the amount of the deduction under section 809(d)(5).

Thus, for taxable years beginning after December 31, 1961, the limitation and priority system would operate first to disallow a deduction under section 809(d)(5), then a deduction under section 809(d)(6), and finally a deduction under section 809(d)(3). For purposes of applying the 50 percent limitation contained in section 809(d)(6) with respect to a taxable year beginning after December 31, 1961, the amount of the deductions for taxable years beginning before January 1, 1962, shall be determined by applying the priority system contained in subparagraph (1) of this paragraph.

(c) **Illustration of principles.** The operation of the limitation and priority system provided by section 809(f) and this section may be illustrated by the following examples:

Example (1). Assume the following facts with respect to M, a life insurance company, for the taxable year 1958:

Gain from operations computed without regard to the deductions under sec. 809(d)(3), (5), and (6)	$100,000,000
Taxable investment income	83,000,000
Tentative deduction for group life, accident, and health insurance under sec. 809(d)(6)	4,000,000
Tentative deduction for certain nonparticipating contracts under sec. 809(d)(5)	6,000,000
Tentative deduction for dividends to policyholders under sec. 809(d)(3)	10,000,000

In order to determine the limitation on the deductions under section 809(d)(3), (5), and (6), M would make up the following schedule:

(1) Statutory amount provided under sec. 809(f)(1)		$250,000
(2) Gain from operations computed without regard to the deductions under sec. 809(d)(3), (5), and (6)	$100,000,000	
(3) Taxable investment income	83,000,000	

(4) Excess of item (2) over item (3)	$17,000,000
(5) Limitation on deductions under sec. 809(d)(3), (5), and (6) (item (1) plus item (4))	17,250,000

Since the total tentative deductions under section 809(d)(3), (5), and (6) ($20,000,000) exceeds the limitation on such deductions ($17,250,000), M would make up the following schedule to determine the application of the priority system:

(6) Maximum possible deduction under sec. 809(d)(3), (5), and (6) (item (5))	$17,250,000
(7) Deduction for group life, accident, and health insurance under sec. 809(d)(6) (not in excess of item (6))	4,000,000
(8) Maximum possible deduction under sec. 809(d)(5) (item (6) less item (7))	13,250,000
(9) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (8))	6,000,000
(10) Maximum possible deduction under sec. 809(d)(3) (item (8) less item (9))	7,250,000
(11) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (10))	7,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1958, M shall be allowed a deduction of $4,000,000 under section 809(d)(6), $6,000,000 under section 809(d)(5), and only $7,250,000 of the $10,000,000 tentative deduction under section 809(d)(3).

Example (2). The facts are the same as in example (1), except that the taxable year is 1962. Since the total tentative deductions under section 809(d)(3), (5), and (6) ($20,000,000) exceeds the limitation on such deductions ($17,250,000), M would make up the following schedule to determine the application of the priority system:

(1) Maximum possible deductions under sec. 809(d)(3), (5), and (6) (item (5) in example (1))	$17,250,000
(2) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (1))	10,000,000
(3) Maximum possible deduction under sec. 809(d)(6) (item (1) less item (2))	7,250,000
(4) Deduction for certain accident, health, and group life insurance under sec. 809(d)(6) (not in excess of item (3))	4,000,000
(5) Maximum possible deduction under sec. 809(d)(5) (item (4) less item (5))	3,250,000
(6) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (5))	3,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1962, M shall be allowed a deduction of $10,000,000 under section 809(d)(3), $4,000,000 under section 809(d)(6), and only $3,250,000 of the $6,000,000 tentative deduction under section 809(d)(5).

[T.D. 6535, 26 FR 530, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8688, June 23, 1966]

§ 1.809–8 Limitation on deductions for certain mutualization distributions.

(a) Deduction not to reduce taxable investment income. Section 809(g)(1) limits the deduction under section 809(d)(11) for certain mutualization distributions. This limitation provides that such deduction shall not exceed the amount (if any) by which the gain from operations for the taxable year, computed without regard to such deduction (but after the application of the limitation contained in section 809(f) and § 1.809–7), exceeds the taxpayer's taxable investment income for such year.

(b) Deduction not to reduce tax below that imposed by 1957 law. Section 809(g)(2) further limits the deduction under section 809(d)(11). Under section 809(g)(2), such deduction shall be allowed only to the extent that it (after the application of all other deductions) does not reduce the tax imposed by section 802(a)(1) for the taxable year below the amount of tax which would have been imposed for such taxable year if the law in effect for 1957 applied for such taxable year. If such deduction is claimed for 1958 (or 1959), the company shall attach to its return a schedule showing what its tax for 1958 (or 1959) would have been had such tax been computed under the law in effect for 1957.

(c) Application of section 815. Section 809(g)(3) provides that any portion of a distribution which is allowed as a deduction under section 809(d)(11) shall not be treated as a distribution to shareholders for purposes of section 815; except that in the case of any distributions made in 1959, such portion shall be treated as a distribution with respect to which a reduction is required under section 815(e)(2)(B) (relating to adjustment in allocation ratio for certain distributions after December 31, 1958).

[T.D. 6535, 26 FR 530, Jan. 20, 1961]

§ 1.810–1 Taxable years affected.

Sections 1.810–2 through 1.810–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 531, Jan. 20, 1961]

§ 1.810–2 Rules for certain reserves.

(a) Adjustment for decrease or increase in certain reserve items—(1) Adjustment for decrease. Section 810(a) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year exceeds the sum of such items at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)), the amount of such excess shall be

taken into account as a net decrease referred to in section 809(c)(2) and paragraph (a)(2) of § 1.809–4 in determining gain or loss from operations.

(2) **Adjustment for increase.** Section 810(b) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)) exceeds the sum of such items at the beginning of the taxable year, the amount of such excess shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations.

(b) **Items taken into account.** The items described in section 810(c) and referred to in section 810(a) and (b) and paragraph (a) of this section are:

(1) The life insurance reserves (as defined in section 801(b) and § 1.801–4);

(2) The unearned premiums and unpaid losses included in total reserves under section 801(c)(2) and § 1.801–5;

(3) The amounts (discounted at the rates of interest assumed by the company) necessary to satisfy the obligations under insurance or annuity contracts (including contracts supplementary thereto), but only if such obligations do not involve (at the time with respect to which the computation is made under this subparagraph) life, health, or accident contingencies;

(4) Dividend accumulations, and other amounts, held at interest in connection with insurance or annuity contracts (including contracts supplementary thereto); and

(5) Premiums received in advance, and liabilities for premium deposit funds.

(6) Special contingency reserves under contracts of group term life insurance or group health and accident insurance which are established and maintained for the provision of insurance on retired lives, for premium stabilization, or for a combination thereof.

For purposes of this paragraph, the same item shall be counted only once and deficiency reserves (as defined in section 801(b)(4) and paragraph (e)(4) of § 1.801–4) shall not be taken into account.

(c) **Special rules.** For purposes of section 810(a) and (b) and paragraph (a) of this section, in determining whether there is a net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year, the following rules shall apply:

(1) **Computation of net increase or decrease in reserves.** The sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year shall be the aggregate of the sums of each of such items at the beginning of the taxable year. The sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year shall be the aggregate of the sums of each of such items at the end of the taxable year. However, in order to determine whether there is a net increase or decrease in such items for the taxable year, the aggregate of the sums of the items at the end of the taxable year must first be reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1).

(2) **Effect of change in basis in computing reserves.** Any increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810(a) or (b) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of § 1.810–3.

(3) **Effect of section 818(c) election.** If a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), the sum of such reserves at the beginning and end of all taxable years (including the first taxable year) for which the election applies shall be the sum of such reserves computed on such net level premium basis.

(4) **Cross references.** For taxable years beginning before January 1, 1970, see section 810(e) (as in effect for such years) and § 1.810–4 for special rules for determining the net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section in the case of certain voluntary employees' beneficiary associations. For similar special rules in the case of life insurance companies issuing variable annuity contracts, see section 801(g)(4) and the regulations thereunder.

(d) Illustration of principles. The provisions of section 810(a) and (b) and this section may be illustrated by the following examples:

Example (1). Assume the following facts with respect to R, a life insurance company:

Sum of items described in section 810(c)(1) through (6) at beginning of taxable year ...	$940
Sum of items described in section 810(c)(1) through (6) at end of taxable year.........	1,060
Required interest (as defined in section 809(a)(2))	70
Investment yield (as defined in section 804(c))	100
Amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)	70

In order to determine the adjustment for decrease or increase in the sum of the items described in section 810(c) for the taxable year, R must first reduce the sum of such items at the end of the taxable year ($1,060) by the amount of investment yield ($70) not included in gain or loss from operations for the taxable year by reason of section 809(a)(1). Since the adjusted sum of such items at the end of the taxable year, $990 ($1,060 minus $70), exceeds the sum of such items at the beginning of the taxable year, $940, the excess of $50 ($990 minus $940) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations.

Example (2). Assume the facts are the same as in example (1), except that the sum of the items described in section 810(c) at the beginning of the taxable year is $1000. Since the sum of the items described in section 810(c) at the beginning of taxable year, $1000, exceeds the sum of such items at the end of the taxable year after adjustment for the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), $990 ($1060 minus $70), the excess of $10 ($1000 minus $990) shall be taken into account as a net decrease under section 809(c)(2) and paragraph (a)(2) of § 1.809–4 in determining gain or loss from operations.

Example (3). Assume the following facts with respect to S, a life insurance company:

Sum of items described in section 810(c)(1) through (6) at beginning of taxable year ...	$1,970
Sum of items described in section 810(c)(1) through (6) at the end of taxable year	2,040
Required interest (as defined in section 809(a)(2))	60
Investment yield (as defined in section 804(c))	40
Amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1)	40

Under the provisions of section 809(a)(1), since the required interest ($60) exceeds the investment yield ($40), the share of each and every item of investment yield set aside for policyholders and not included in gain or loss from operations for the taxable year shall be 100 percent. Thus, applying the provisions of section 810(a) and (b), the sum of the items described in section 810(c) at the end of the taxable year ($2,040) must first be reduced by the entire amount of the investment yield ($40) in order to determine the net increase or decrease in the sum of such items for the taxable year. Since the adjusted sum of such items at the end of the taxable year, $2,000 ($2,040 minus $40), is greater than the sum of such items at the beginning of the taxable year, $1,970, the excess of $30 ($2,000 minus $1,970) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations. No additional deduction is allowed under section 809(d) for the amount ($20) by which the required interest exceeds the investment yield for the taxable year.

Example (4). Assume the facts are the same as in example (1), except that as a result of a change in the basis used in computing an item described in section 810(c) during the taxable year, the sum of such items at the end of the taxable year is $1,200. Under the provisions of paragraph (c)(2) of this section, any increase or decrease in the sum of the section 810(c) items for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810(a) and (b). Thus, for purposes of section 810(a) and (b), the sum of the items described in section 810(c) at the end of the taxable year shall be $1,060 (the amount computed without regard to the change in basis) and S shall treat the $50 computed in the manner described in example (1) as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining its gain or loss from operations for the taxable year. The amount of the increase in the section 810(c) items which is attributable to the change in basis during the taxable year, $140 ($1,200 minus $1,060), shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of § 1.810–3.

Example (5). The life insurance reserves of M, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to $100 on January 1, 1960, and $110 on December 31, 1960. For the taxable year 1960, M elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to $115 on January 1, 1960, and $127 on December 31, 1960. Under the provisions of paragraph (c)(3) of this section, a company which makes the section 818(c) election must use the net level premium basis in computing the sum of its life insurance reserves at the beginning and end of all taxable years for which the election applies. Thus, for purposes of section 810(a) and (b), in determining whether there is a net increase or decrease in the sum of the section 810(c) items for the taxable year 1960, M shall include $115 as its reserves with respect to such contracts under section 810(c)(1) at the beginning of the taxable year and $127 as its reserves with respect to such contracts under section 810(c)(1) at the end of the taxable year.

[T.D. 6535, 26 FR 531, Jan. 20, 1961, as amended by T.D. 7163, 37 FR 4189, Feb. 29, 1972; T.D. 7172, 37 FR 5619, March 17, 1972]

§ 1.810–3 Adjustment for change in computing reserves.

(a) Reserve strengthening or weakening. Section 810(d)(1) provides that if the basis for determining any item referred to in section 810(c) and paragraph (b) of § 1.810–2 at the end of any taxable year differs from the basis for such determination at the end of the preceding taxable year, then so much of the difference between—

(1) The amount of the item at the end of the taxable year, computed on the new basis, and

(2) The amount of the item at the end of the taxable year, computed on the old basis,

as is attributable to contracts issued before the taxable year shall be taken into account as follows:

(i) If the amount of the item at the end of the taxable year computed on the new basis exceeds the amount of the item at the end of the taxable year computed on the old basis, 1/10 of such excess shall be taken into account, for each of the succeeding 10 taxable years as a net increase to which section 809(d)(2) and paragraph (a)(2) of § 1.809–5 applies; or

(ii) If the amount of the item at the end of the taxable year computed on the old basis exceeds the amount of the item at the end of the taxable year computed on the new basis, 1/10 of such excess shall be taken into account, for each of the 10 succeeding taxable years, as a net decrease to which section 809(c)(2) and paragraph (a)(2) of § 1.809–4 applies.

(b) Illustration of principles. The provisions of section 810(d)(1) and paragraph (a) of this section may be illustrated by the following examples:

Example (1). Assume that the amount of an item described in section 810(c) of L, a life insurance company, at the beginning of the taxable year 1959 is $100. Assume that at the end of the taxable year 1959, as a result of a change in the basis used in computing such item during the taxable year, the amount of the item (computed on the new basis) is $200 but computed on the old basis would have been $150. Since the amount of the item at the end of the taxable year computed on the new basis, $200, exceeds the amount of the item at the end of the taxable year computed on the old basis, $150, by $50, 1/10 of the amount of such excess, or $5, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1959. Any increase (or decrease) in the sum of the section 810(c) items computed on the old basis at the end of the taxable year 1959 ($150) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items computed on the old basis at the beginning of the taxable year 1959 ($100), shall be taken into account in the manner prescribed in section 810(a) or (b) and § 1.810–2 for purposes of determining L's gain or loss from operations for 1959.

Example (2). Assume the facts are the same as in example (1), and that the sum of the items described in section 810(c) (computed on the new basis) is $200 on January 1, 1960, and $260 on December 31, 1960. Under the provisions of section 810(d)(1), as a result of the reserve strengthening attributable to the change in basis which occurred in 1959, L would include $5 (computed in the manner described in example (1)) as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining its gain or loss from operations for 1960. In addition to this amount, any increase (or decrease) in the sum of the items described in section 810(c) at the end of the taxable year 1960 ($260) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items at the beginning of the taxable year 1960 ($200), shall be taken into account in the manner prescribed in section 810(a) or (b) and § 1.810–2 for purposes of determining L's gain or loss from operations for 1960.

(c) Termination as life insurance company. Section 810(d)(2) provides, subject to the provisions of section 381(c)(22) and the regulations thereunder (relating to carryovers in certain corporate readjustments), that if for any taxable year a company which previously was a life insurance company no longer meets the requirements of section 801(a) and paragraph (b) of § 1.801–3 (relating to the definition of a life insurance company), the balance of any adjustments remaining to be made under section 810(d)(1) and paragraph (a) of this section shall be taken into account for the preceding taxable year.

(d) Illustration of principles. The provisions of section 810(d)(2) and paragraph (c) of this section may be illustrated by the following example:

Example. Assume the facts are the same as in example (1) of paragraph (b) of this section, except that for the taxable year 1962, L no longer meets the requirements of section 801(a) (relating to the definition of a life insurance company) and that the provisions of section 381(c)(22) are not applicable. Under the provisions of section 810(d)(2), the entire balance of the adjustment remaining to be made with respect to the change in basis which occurred in 1959, 8/10 of $50, or $40, shall be taken into account for the taxable year 1961, the last year L was a life insurance company. Thus, for the taxable year 1961, the total amount to be taken into account by L as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining its gain or loss from operations shall be $45. Of this amount, $5 (1/10 of $50) represents the amount determined under the provisions of section 810(d)(1), and $40 represents the amount determined under the provisions of section 810(d)(2).

(e) Effect of preliminary term election. (1) Section 810(d)(3) provides that if a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such election shall not be treated as a change in basis within the meaning of section 810(d)(1) and paragraph (a) of this section. Thus, any increase or decrease in reserves attributable to such election shall not be taken into account under section 810(d)(1) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810(a) and (b) and paragraph (a) of § 1.810–2. See paragraph (c)(3) of § 1.810–2.

(2) Section 810(d)(3) further provides that where an election under section 818(c) would apply to an item referred to in section 810(c) but for the fact that the basis used in computing such item has actually been changed, any increase or decrease in such item attributable to such actual change in basis shall be subject to the adjustment required under section 810(d)(1) and paragraph (a) of this section. In such a case, however, for

purposes of section 810(d)(1)(B) and paragraph (a)(2) of this section, the amount of such item at the end of the taxable year computed on the old basis shall be the amount of such item at the end of the taxable year computed as if the election under section 818(c) applied in respect of such item for the taxable year.

(f) Illustration of principles. The provisions of section 810(d)(3) and paragraph (e) of this section may be illustrated by the following examples:

Example (1). Assume that S, a life insurance company which computes its life insurance reserves on a 3-percent assumed rate and the Commissioner's reserve valuation method (one of the recognized preliminary term reserve methods), elects to revalue such reserves on a net level premium method under section 818(c) and that the significant facts are as follows:

	Jan. 1, 1958	Dec. 31, 1958
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	100	118
Reserves at 3-percent assumed rate, after restatement under section 818(c)	110	131

Under the provisions of section 810(d)(3), an election under section 818(c) is not treated as a change in basis for purposes of section 810(d)(1). Accordingly, the increase of $21 ($131 minus $110) attributable to such election shall not be subject to the adjustment provided by section 810(d)(1) but shall be taken into account in the manner prescribed in section 810(b). For purposes of determining the amount to be taken into account under section 810(b), the reserves with respect to the contracts subject to the section 818(c) election shall be $110 at the beginning of the taxable year 1958 and $131 at the end of the taxable year 1958. However, as a result of making the election under section 818(c), the difference ($10) between the reserves computed on the preliminary term basis on January 1, 1958 ($100) and the reserves restated on the net level premium basis on January 1, 1958 ($110) shall not be taken into account under section 809(d) for the year 1958, or for any subsequent taxable year.

Example (2). Assume the facts are the same as in example (1), except that during the taxable year 1959, S actually changed from the preliminary term basis to a net level premium basis which was identical with the net level premium basis used under the section 818(c) election and that the significant facts are as follows:

	Jan. 1, 1959	Dec. 31, 1959
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	118	127
Reserves at 3-percent assumed rate, after restatement under section 818(c)	131	142
Strengthened reserves at 3-percent assumed rate and net level premium method	......	142

Under the provisions of section 810(d)(3), if a company which has made an election under section 818(c) which has not been revoked actually changes the basis used by it in computing the reserves subject to such election, any increase or decrease in reserves attributable to such change in basis shall be taken into account in the manner prescribed in section 810(d)(1). Since S actually changed to the same basis which it used in computing its reserves under section 818(c), the reserves at the end of the taxable year computed on the new basis ($142) are the same as the reserves at the end of the taxable year computed on the old basis ($142), *i.e.*, the basis which would have applied under section 818(c) if the election applied for 1959. Accordingly, no adjustment under section 810(d)(1) is required.

Example (3). Assume the facts are the same as in example (1), except that during the taxable year 1960, S actually changed the basis used by it in computing its reserves on a certain block of contracts subject to the election under section 818(c) and that the significant facts with respect to this block of contracts are as follows:

	Jan. 1, 1960	Dec. 31, 1960
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method	50	63
Reserves at 3-percent assumed rate, after restatement under section 818(c)	60	75
Strengthened reserves at 2-percent assumed rate and net level premium method	......	95

Under the provisions of section 810(d)(3), the amount of the reserves subject to the section 818(c) election at the end of the taxable year computed on the old basis shall be the amount of such reserves at the end of the taxable year determined under section 818(c) ($75). Since the reserves at the end of the taxable year computed on the new basis, $95, exceed the reserves at the end of the taxable year computed on the old basis, $75, by $20, 1/10 of the excess of $20, or $2, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1960. For purposes of determining whether there is a net increase or decrease in the sum of the items described in section 810(c) for the taxable year 1960 under section 810(a) or (b), the sum of the reserves with respect to such block of contracts shall be $60 at the beginning of the taxable year and $75 at the end of the taxable year (the amount of such reserves computed under section 818(c) at the beginning and end of the taxable year). The difference ($10) between the reserves computed on the preliminary term basis on January 1, 1960 ($50) and the reserves restated on the net level premium basis on January 1, 1960 ($60) shall not be taken into account under section 809(d) for the year 1960, or for any subsequent taxable year.

[T.D. 6535, 26 FR 532, Jan. 20, 1961]

§ 1.810–4 Certain decreases in reserves of voluntary employees' beneficiary associations.

(a) Decreases due to voluntary lapses of policies issued before January 1, 1958. (1) Section 810(e) provides that if for any taxable year a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes an election in the

manner provided in section 810(e)(3) and paragraph (b) of this section, only 11½ percent of any decrease in life insurance reserves (as defined in section 801(b) and § 1.801–4) attributable to the voluntary lapse on or after January 1, 1958, of any policy issued prior to that date shall be taken into account under section 810(a) or (b) and paragraph (a) of § 1.810–2 in determining the net increase or decrease in the sum of the items described in section 810(c) during the taxable year. In applying the preceding sentence, the decrease in the reserve for any policy shall be determined by reference to the amount of such reserve at the beginning of the taxable year, reduced by any amount allowable as a deduction under section 809(d)(1) and paragraph (a)(1) of § 1.809–5 in respect of such policy by reason of such lapse. The election under section 810(e) shall be adhered to in computing the company's gain or loss from operation for the taxable year for which the election is made and for all subsequent taxable years, unless consent to revoke such election is obtained from the Commissioner.

(2) The application of the election provided under section 810(e) and subparagraph (1) of this paragraph may be illustrated by the following example:

Example. For the taxable year 1960, M, a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes the election under section 810(e). Assume the following facts with respect to a policy issued in 1955 which voluntarily lapsed during the taxable year:

(1) Life insurance reserve on January 1, 1960	$600
(2) Amount allowable as a deduction under sec. 809(d)(1)	200
(3) Decrease in life insurance reserves for sec. 810(e) purposes (item (1) minus item (2))	400
(4) Amount taken into account under sec. 810(a) and (b) by reason of sec. 810(e) election (11½% × $400)	46

Under the provisions of section 810(e) and subparagraph (1) of this paragraph, M would include $46 as its life insurance reserve with respect to such policy under section 810(c)(1) at the beginning of the taxable year 1960 for purposes of determining the net increase or decrease in the sum of the items described in section 810(c) for the taxable year under section 810(a) or (b).

(b) Time and manner of making election. The election provided by section 810(e)(3) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before January 20, 1961, the election provided by section 810(e)(3) may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before April 21, 1961. The statement shall indicate that the company meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, and has made the election provided under section 810(e) and paragraph (a) of this section. The statement shall set forth the following information with respect to each policy described in paragraph (a) of this section which has voluntarily lapsed during such year:

(1) Type of policy.

(2) Date issued.

(3) Date lapsed.

(4) Reason for lapse.

(5) Policy reserve as of beginning of taxable year.

(6) Deduction allowable under section 809(d)(1) and paragraph (a)(1) of § 1.809–5 during taxable year by reason of lapse.

(7) Decrease in policy reserve for section 810(e) purposes (excess of (5) over (6)).

In addition, the statement shall set forth the total of the amounts referred to in subparagraph (7) of this paragraph with respect to all policies described in paragraph (a) of this section which have voluntarily lapsed during the taxable year.

(c) Scope of election. An election made under section 810(e)(3) and paragraph (a) of this section shall be effective for the taxable year for which made and for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to January 20, 1961, a company may revoke the election provided by section 810(e)(3) without obtaining consent from the Commissioner by filing, before April 21, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) Disallowance of carryovers from pre-1958 losses from operations. For any taxable year for which the election provided under section 810(e)(3) and paragraph (b) of this section is

effective, the provisions of section 812(b)(1) and § 1.812–4 shall not apply with respect to any loss from operations for any taxable year beginning before January 1, 1958.

(e) Effective date; cross reference. The provisions of section 810(e) (as in effect for such years) and this section apply only with respect to taxable years beginning before January 1, 1970. For provisions relating to certain funded pension trusts applicable to taxable years beginning after December 31, 1969, see section 501(c)(18) and the regulations thereunder.

[T.D. 6535, 26 FR 533, Jan. 20, 1961, as amended by T.D. 7172, 37 FR 5619, March 17, 1972]

§ 1.811–1 Taxable years affected.

Section 1.811–2, except as otherwise provided therein, is applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

§ 1.811–2 Dividends to policyholders.

(a) Dividends to policyholders defined. Section 811(a) defines the term "dividends to policyholders", for purposes of Part I, Subchapter L, Chapter 1 of the Code, to mean dividends and similar distributions to policyholders in their capacity as such. The term includes amounts returned to policyholders where the amount is not fixed in the contract but depends on the experience of the company or the discretion of the management. In general, any payment not fixed in the contract which is made with respect to a participating contract (that is, a contract which during the taxable year contains a right to participate in the divisible surplus of the company) shall be treated as a dividend to policyholders. Similarly, any amount refunded or allowed as a rate credit with respect to either a participating or a nonparticipating contract shall be treated as a dividend to policyholders if such amount depends on the experience of the company. However, the term does not include interest paid (as defined in section 805(e) and paragraph (b) of § 1.805–8) or return premiums (as defined in section 809(c) and paragraph (a)(1)(ii) of § 1.809–4). Thus, so-called excess-interest dividends and amounts returned by one life insurance company to another in respect of reinsurance ceded shall not be treated as dividends to policyholders even though such amounts are not fixed in the contract but depend upon the experience of the company or the discretion of the management.

(b) Amount of deduction—(1) In general. Section 811(b)(1) provides, subject to the limitation of section 809(f), that the deduction for dividends to policyholders for any taxable year shall be an amount equal to the dividends to policyholders paid during the taxable year—

(i) Increased by the excess of the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, or

(ii) Decreased by the excess of the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year.

For the rule as to when dividends are considered paid, see section 561 and the regulations thereunder. For the determination of the amounts held as reserves for dividends to policyholders, see paragraph (c) of this section. For special provisions relating to the treatment of dividends to policyholders paid with respect to policies reinsured under modified coinsurance contracts, see section 820(c)(5) and the regulations thereunder.

(2) Certain amounts to be treated as net decreases. Section 811(b)(2) provides that if the amount determined under subparagraph (1)(ii) of this paragraph exceeds the dividends to policyholders paid during the taxable year, the amount of such excess shall be a net decrease referred to in section 809(c)(2).

(c) Reserves for dividends to policyholders defined—(1) In general. The term "reserves for dividends to policyholders", as used in section 811(b)(1)(A) and (B) and paragraph (b)(1) of this section, means only those amounts—

(i) Actually held, or set aside as provided in subparagraph (2) of this paragraph and thus treated as actually held, by the company at the end of the taxable year, and

(ii) With respect to which, at the end of the taxable year or, if set aside, within the period prescribed in subparagraph (2) of this paragraph, the company is under an obligation, which is either fixed or determined according to a formula

which is fixed and not subject to change by the company, to pay such amounts as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following the taxable year.

(2) Amounts set aside. (i) In the case of a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), all amounts set aside before the 16th day of the 3rd month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(ii) In the case of a mutual savings bank subject to the tax imposed by section 594, all amounts set aside before the 16th day of the 4th month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(3) 1958 reserve for dividends to policyholders. For purposes of section 811(b) and paragraph (b) of this section, the amounts held at the end of 1957 as reserves for dividends to policyholders payable during 1958 shall be determined as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied for 1957. Any adjustment in the reserves for dividends to policyholders at the beginning of 1957 required as a result of an understatement or overstatement of such reserves by the company shall be made to the balance of such reserves as of the beginning of 1957. For example, if at the beginning of 1957 the reserves for dividends to policyholders are stated to be $100 and it is subsequently determined that such reserves should have been $90, the reserves at the beginning of 1957 shall be reduced by $10. Under no circumstances shall an adjustment required with regard to the beginning 1957 reserves be made to the reserves at the end of 1957.

(4) Information to be filed. Every company claiming a deduction for dividends to policyholders shall keep such permanent records as are necessary to establish the amount of dividends actually paid during the taxable year. Such company shall also keep a copy of the dividend resolution and any necessary supporting data relating to the amounts of dividends declared and to the amounts held or set aside as reserves for dividends to policyholders during the taxable year. The company shall file with its return a concise statement of the pertinent facts relating to its dividend policy for the year, the amount of dividends actually paid during the taxable year, and the amounts held or set aside as reserves for dividends to policyholders during the taxable year.

(d) Illustration of principles. The provisions of section 811(b) and this section may be illustrated by the following examples:

Example (1). On December 31, 1959, M, a life insurance company, held $200 as reserves for dividends to policyholders due and payable in 1960. On March 10, 1960, M set aside an additional $50 as reserves for dividends to policyholders due and payable in 1960. During the taxable year 1960, M paid $240 as dividends to its policyholders and at the end of the taxable year 1960, held $175 as reserves for dividends to policyholders due and payable in 1961. No additional amount was set aside before March 16, 1961, as reserves for dividends to policyholders due and payable in 1961. For the taxable year 1960, subject to the limitation of section 809(f), M's deduction for dividends to policyholders is $165, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1960		$240
(2) Decreased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12–31–59 (including amounts set aside as provided in paragraph (c)(2) of this section)	$250	
(b) Reserves for dividends to policyholders as of 12–31–60	175	
		75
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f))		$165

Example (2). On December 31, 1960, S, a life insurance company, held $100 as reserves for dividends to policyholders due and payable in 1961. During the taxable year 1961, S paid $125 as dividends to its policyholders and at the end of the taxable year 1961, held $110 as reserves for dividends to policyholders due and payable in 1962. No additional amount was set aside for dividends to policyholders as provided in paragraph (c)(2) of this section before March 16, 1961, or March 16, 1962. For the taxable year 1961, subject to the limitation of section 809(f), S's deduction for dividends to policyholders is $135, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961		$125
(2) Increased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12–31–61	$110	
(b) Reserves for dividends to policyholders as of 12–31–60	100	
		10
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f)).		$135

Example (3). Assume the facts are the same as in example (2), except that on December 31, 1960, the amount held as reserves for dividends to policyholders due and payable in 1961 is $250. For the taxable year 1961, S's deduction for dividends to policyholders is zero, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961		$125
(2) Decreased by the excess of item (a) over item (b):		
(a) Reserves for dividends to policyholders as of 12-31-60	$250	
(b) Reserves for dividends to policyholders as of 12-31-61	110	
		140
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f)).		$0

Under the provisions of section 811(b)(2) and paragraph (b)(2) of this section, since the decrease in the reserves for dividends to policyholders during the taxable year, $140 ($250 minus $110), exceeds the dividends to policyholders paid during the taxable year 1961, $125, S shall include $15 (the amount of such excess) as a net decrease under section 809(c)(2) and paragraph (a)(2) of § 1.809-4 in determining its gain or loss from operations for 1961.

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

§ 1.812-1 Taxable years affected.

Sections 1.812-2 through 1.812-8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6535, 26 FR 532, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.812-2 Operations loss deduction.

(a) **Allowance of deduction.** Section 812 provides that a life insurance company shall be allowed a deduction in computing gain or loss from operations for any taxable year beginning after December 31, 1957, in an amount equal to the aggregate of the operations loss carryovers and operations loss carrybacks to such taxable year. This deduction is referred to as the operations loss deduction. The loss from operations (computed under section 809), is the basis for the computation of the operations loss carryovers and operations loss carrybacks and ultimately for the operations loss deduction itself. Section 809(e)(5) provides that the net operating loss deduction provided in section 172 shall not be allowed a life insurance company since the operations loss deduction provided in section 812 and this paragraph shall be allowed in lieu thereof.

(b) **Steps in computation of operations loss deduction.** The three steps to be taken in the ascertainment of the operations loss deduction for any taxable year beginning after December 31, 1957, are as follows:

(1) Compute the loss from operations for any preceding or succeeding taxable year from which a loss from operations may be carried over or carried back to such taxable year.

(2) Compute the operations loss carryovers to such taxable year from such preceding taxable years and the operations loss carrybacks to such taxable year from such succeeding taxable years.

(3) Add such operations loss carryovers and carrybacks in order to determine the operations loss deduction for such taxable year.

(c) **Statement with tax return.** Every life insurance company claiming an operations loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the operations loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the operations loss deduction.

(d) **Ascertainment of deduction dependent upon operations loss carryback.** If a life insurance company is entitled in computing its operations loss deduction to a carryback which it is not able to ascertain at the time its return is due, it shall compute the operations loss deduction on its return without regard to such operations loss carryback. When the life insurance company ascertains the operations loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the operations loss deduction for the taxable year with the inclusion of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(e) **Law applicable to computations.** The following rules shall apply to all taxable years beginning after December 31, 1957—

(1) In determining the amount of any operations loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The loss from operations for any taxable year shall be determined under the law applicable

to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the operations loss deduction.

(3) The amount of the operations loss deduction which shall be allowed for any taxable year shall be determined under the law applicable for that year.

(f) **Special rules.** For purposes of taxable years beginning after December 31, 1954, and before January 1, 1958—

(1) The amount of any:

(i) Loss from operations;

(ii) Operations loss carryback; and

(iii) Operations loss carryover

shall be computed as if Part I, Subchapter L, Chapter 1 of the Code (as in effect for 1958) and section 381(c)(22) applied to such taxable years.

(2) A loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph) for such taxable years shall in no way affect the tax liability of any life insurance company for such taxable years. However, such loss may, to the extent allowed as an operations loss carryover under section 812, affect the tax liability of a life insurance company for a taxable year beginning after December 31, 1957. For example, for the taxable year 1956, X, a life insurance company, has a loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph). Such loss shall in no way affect X's tax liability for the taxable years 1956 (the year of the loss), 1955 (a year to which such loss shall be carried back), or 1957 (a year to which such loss shall be carried forward). However, to the extent allowed under section 812, any amount of the loss for 1956 remaining after such carryback and carryforward shall be taken into account in determining X's tax liability for taxable years beginning after December 31, 1957.

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

§ 1.812–3 Computation of loss from operations.

(a) **Modification of deductions.** A loss from operations is sustained by a life insurance company in any taxable year, if and to the extent that, for such year, there is an excess of the sum of the deductions provided by section 809(d) over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) as determined under section 809(b)(3), and (2) the sum of the items of gross amount taken into account under section 809(c). In determining the loss from operations for purposes of section 812—

(i) No deduction shall be allowed under section 812 for the operations loss deduction.

(ii) The 85 percent limitation on dividends received provided by section 246(b) as modified by section 809(d)(8)(B) shall not apply to the deductions otherwise allowed under—

(a) Section 243(a) in respect to dividends received by corporations,

(b) Section 244 in respect of dividends received on certain preferred stock of public utilities, and

(c) Section 245 in respect of dividends received from certain foreign corporations.

(b) **Illustration of principles.** The application of paragraph (a) of this section may be illustrated by the following example:

Example. For the taxable year 1960, X, a life insurance company, has items taken into account under section 809(c) amounting to $150,000, its share of the investment yield amounts to $250,000, and total deductions allowed by section 809(d) of $375,000, exclusive of any operations loss deduction and exclusive of any deduction for dividends received. In 1960, X received as its share of dividends entitled to the benefits of section 243(a) the amount of $100,000. These dividends are included in X's share of the investment yield. X has no other deductions to which section 812(c) applies. On the basis of these facts, X has a loss from operations for the taxable year 1960 of $60,000, computed as follows:

Deductions for 1960	$375,000
Plus: Deduction for dividends received computed without regard to the limitation provided by sec. 246(b), as modified by sec. 809(d)(8)(B) (85% of $100,000)	85,000
Total deductions as modified by sec. 812(c)	460,000
Less: Sum of sec. 809(c) items and X's share of investment yield (including $100,000 of dividends)	400,000
Loss from operations for 1960	(60,000)

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

§ 1.812–4 Operations loss carrybacks and operations loss carryovers.

(a) **In general—(1) Years to which loss may be carried.** In order to compute the operations loss deduction of a life insurance company the company must first determine the part of any losses from operations for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. Except as otherwise provided by this paragraph, a loss from operations for

taxable years beginning after December 31, 1954, shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 5 taxable years succeeding the loss year. Except as limited by section 812(e)(2) and paragraph (b) of § 1.812-6, if the life insurance company is a new company (as defined in section 812(e)(1)) for the loss year, the loss from operations shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 8 taxable years succeeding the loss year. In determining the span of years for which a loss from operations may be carried, taxable years in which a company does not qualify as a life insurance company (as defined in section 801(a)), or is not treated as a new company, shall be taken into account.

(2) **Special transitional rules.** (i) A loss from operations for any taxable year beginning before January 1, 1958, shall not be carried back to any taxable year beginning before January 1, 1955. Furthermore, a loss from operations for any taxable year beginning after December 31, 1957, shall not be carried back to any taxable year beginning before January 1, 1958.

(ii) If for any taxable year a life insurance company has made an election under section 810(e) (relating to certain decreases in reserves for voluntary employees' beneficiary associations) which is effective for such taxable year, the provisions of section 812(b)(1) and subparagraph (1) of this paragraph shall not apply with respect to any loss from operations for any taxable year beginning before January 1, 1958.

(3) **Illustration of principles.** The provisions of section 812(b)(1) and of this paragraph may be illustrated by the following examples:

Example (1). P, a life insurance company, organized in 1940, has a loss from operations of $1,000 in 1958. This loss cannot be carried back, but shall be carried forward to each of the 5 taxable years following 1958.

Example (2). Q, a life insurance company, organized in 1940, has a loss from operations of $1,200 in 1959. This loss shall be carried back to the taxable year 1958 and then shall be carried forward to each of the 5 taxable years following 1959.

Example (3). R, a life insurance company, organized in 1940, has a loss from operations of $1,300 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then shall be carried forward to each of the 5 taxable years following 1956. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied to such taxable years.

Example (4). S, a life insurance company, organized in 1958 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of $1,400 for the taxable year 1958. This loss cannot be carried back, but shall be carried forward to each of the 8 taxable years following 1958, provided, however, S is not a nonqualified corporation at any time during the loss year (1958) or any taxable year thereafter.

Example (5). T, a life insurance company, organized in 1954 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of $1,500 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then carried forward to each of the 8 taxable years following 1956, provided, however, T is not a nonqualified corporation at any time during the loss year (1956) or any taxable year thereafter. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I of subchapter L (as in effect for 1958) applied to such taxable years.

(4) **Periods of less than 12 months.** A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 812 the first, second, etc., preceding or succeeding taxable year. For the determination of the loss from operations for periods of less than 12 months, see section 818(d) and the regulations thereunder.

(5) **Amount of loss to be carried.** The amount which is carried back or carried over to any taxable year is the loss from operations to the extent it was not absorbed in the computation of gain from operations for other taxable years, preceding such taxable year, to which it may be carried back or carried over. For the purpose of determining the gain from operations for any such preceding taxable year, the various operations loss carryovers and carrybacks to such taxable year are considered to be applied in reduction of the gain from operations in the order of the taxable years from which such losses are carried over or carried back, beginning with the loss for the earliest taxable year.

(6) **Corporate acquisitions.** For the computation of the operations loss carryovers in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

(b) **Portion of loss from operations which is a carryback or a carryover to the taxable year in issue—(1) Manner of computation.** (i) A loss from operations shall first be carried back to the earliest taxable year permissible under section 812(b) and paragraph (a) of this section for which such loss is allowable as a carryback or a carryover. The entire amount of the loss from operation shall be carried back to such earliest year.

(ii) Section 812(b)(2) provides that the portion of the loss from operations which shall be carried to each of the taxable years subsequent to the earliest taxable year shall be the excess (if any) of

the amount of the loss from operations over the sum of the offsets (as defined in section 812(d) and paragraph (a) of § 1.812–5) for all prior taxable years to which the loss from operations may be carried.

(2) Illustration of principles. The application of this paragraph may be illustrated by the following example:

Example. T, a life insurance company (which is not a new company as defined in section 812(e)(1)), has a loss from operations for 1960. The entire amount of the loss from operations for 1960 shall first be carried back to 1958. The amount of the carryback to 1959 is the excess (if any) of the 1960 loss over the offset for 1958. The amount of the carryover to 1961 is the excess (if any) of the 1960 loss over the sum of the offsets for 1958 and 1959. The amount of the 1960 loss remaining (if any) to be carried over to 1962, 1963, or 1964 shall be computed in a like manner.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

§ 1.812–5 Offset.

(a) Offset defined. Section 812(d) defines the term "offset" for purposes of section 812(b)(2) and paragraph (b)(1)(ii) of § 1.812–4. For any taxable year the offset is only that portion of the increase in the operations loss deduction for the taxable year which is necessary to reduce the life insurance company taxable income (computed without regard to section 802(b)(3)) for such year to zero. For purposes of the preceding sentence, the offset shall be determined with the modifications prescribed in paragraph (b) of this section. Such modifications shall be made independently of, and without reference to, the modifications required by paragraph (a) of § 1.812–3 for purposes of computing the loss from operations itself.

(b) Modifications—(1) Operations loss deduction—(i) In general. Section 812(d)(2) provides that for purposes of section 812(d)(1) (relating to the definition of offset), the operations loss deduction for any taxable year shall be computed by taking into account only such losses from operations otherwise allowable as carryovers or as carrybacks to such taxable year as were sustained in taxable years preceding the taxable year in which the life insurance company sustained the loss from operations from which the offset is to be deducted. Thus, for such purposes the loss from operations for the loss year or for any taxable year thereafter shall not be taken into account.

(ii) Illustration of principles. The provisions of this subparagraph may be illustrated by the following example:

Example. In computing the operations loss deduction for 1960, Y, a life insurance company, has a carryover from 1958 of $9,000, a carryover from 1959 of $6,000, a carryback from 1961 of $18,000, and a carryback from 1962 of $10,000, or an aggregate of $43,000 in carryovers and carrybacks. Thus, the operations loss deduction for 1960, for purposes of determining the tax liability for 1960, is $43,000. However, in computing the offset for 1960 which is subtracted from the loss from operations for 1961 for the purpose of determining the portion of such loss which may be carried over to subsequent taxable years, the operations loss deduction for 1960 is $15,000, that is, the aggregate of the $9,000 carryover from 1958 and the $6,000 carryover from 1959. In computing the operations loss deduction for such purpose, the $18,000 carryback from 1961 and the $10,000 carryback from 1962 are disregarded. In computing the offset for 1960, however, which is subtracted from the loss from operations for 1962 for the purpose of determining the portion of such 1962 loss which may be carried over for subsequent taxable years, the operations loss deduction for 1960 is $33,000, that is, the aggregate of the $9,000 carryover from 1958, the $6,000 carryover from 1959, and the $18,000 carryback from 1961. In computing the operations loss deduction for such purpose, the $10,000 carryback from 1962 is disregarded.

(2) Recomputation of deductions limited by section 809(f)—(i) In general. If in any taxable year a life insurance company has deductions under section 809(d)(3), (5), and (6), as limited by section 809(f), and sustains a loss from operations in a succeeding taxable year which may be carried back as an operations loss deduction, such limitation and deductions shall be recomputed. This recomputation is required since the carryback must be taken into account for purposes of determining such limitation and deductions.

(ii) Illustration of principles. The provisions of this subparagraph may be illustrated by the following example:

(a) Facts. The books of P, a life insurance company, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1959......	$9,000,000	$10,000,000	....
1960..			($9,800,000)

The gain from operations thus shown is computed without regard to any operations loss deduction or deductions under section 809(d)(3), (5), and (6), as limited by section 809(f). Assume that for the taxable year 1959, P has (without regard to the limitation of section 809(f) or the operations loss deduction for 1959) a deduction under section 809(d)(3) of $2,500,000 for dividends to policyholders and no deductions under section 809(d)(5) or (6).

(b) Determination of section 809(f) limitation and deduction for dividends to policyholders without regard to the operations loss deduction for 1959. In order to determine gain or loss from operations for 1959, P must determine the deduction for dividends to policyholders for such year. Under the provisions of section 809(f), the amount of such deduction shall not exceed the sum of (1) the amount (if any) by which the gain from operations for such year (determined without regard to such deduction) exceeds P's taxable investment income for such year, plus (2) $250,000. Since the gain from operations as thus determined ($10,000,000) exceeds the taxable investment income ($9,000,000) by $1,000,000, the limitation on such deduc-

tion is $1,250,000 ($1,000,000 plus $250,000). Accordingly, only $1,250,000 of the $2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year is $8,750,000 ($10,000,000 minus $1,250,000).

(c) Recomputation of section 809(f) limitation and deduction for dividends to policyholders after application of the operations loss deduction for 1959. Since P has sustained a loss from operations for 1960 which shall be carried back to 1959 as an operations loss deduction, it must recompute the section 809(f) limitation and deduction for dividends to policyholders. Taking into account the $9,800,000 operations loss deduction for 1959 reduces gain from operations for such year to $200,000 ($10,000,000 minus $9,800,000). Since the gain from operations as thus determined ($200,000) is less than the taxable investment income ($9,000,000), the limitation on the deduction for dividends to policyholders is $250,000. Thus, only $250,000 of the $2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year as thus determined is $9,750,000 ($10,000,000 minus $250,000) since for purposes of this determination the operations loss deduction for 1959 is not taken into account (see section 812(c)(1)). Accordingly, the offset for 1959 is $9,750,000 (the increase in the operations loss deduction for 1959, computed without regard to the carryback for 1960, which reduces life insurance company taxable income for 1959 to zero); thus, the portion of the 1960 loss from operations which shall be carried forward to 1961 is $50,000 (the excess of the 1960 loss ($9,800,000) over the offset for 1959 ($9,750,000)).

(3) Minimum limitation. The life insurance company taxable income, as modified under this paragraph, shall in no case be considered less than zero.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

§ 1.812–6 New company defined.

Section 812(e) provides that for purposes of part I, subchapter L, chapter 1 of the Code, a life insurance company is a "new company" for any taxable year only if such taxable year begins not more than 5 years after the first day on which it (or any predecessor if section 381(c)(22) applies or would have applied if in effect) was authorized to do business as an insurance company.

[T.D. 6535, 26 FR 538, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 7326, 39 FR 35354, Oct. 1, 1974]

§ 1.812–7 Application of subtitle A and subtitle F.

Section 812(f) provides that except as modified by section 809(e) (relating to modifications of deduction items otherwise allowable under subtitle A of the Code) subtitles A and F of the Code shall apply to operations loss carrybacks and carryovers, and to the operations loss deduction, in the same manner and to the same extent that such subtitles apply in respect of net operation loss carrybacks, net operating loss carryovers, and the net operating loss deduction of corporations generally. For the computation of the operations loss carrybacks and carryovers, and of the operations loss deduction in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

[T.D. 6535, 26 FR 539, Jan. 20, 1961]

§ 1.812–8 Illustration of operations loss carrybacks and carryovers.

The application of § 1.812–4 may be illustrated by the following example:

(a) Facts. The books of M, a life insurance company, organized in 1940, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1958	$11,000	$15,000	....
1959	23,000	30,000	....
1960	....	....	($75,000)
1961	25,000	20,000	....
1962	....	....	(150,000)
1963	22,000	30,000	....
1964	40,000	35,000	....
1965	62,000	75,000	....
1966	25,000	17,000	....
1967	39,000	53,000	....

The gain from operations thus shown is computed without regard to any operations loss deduction. The assumption is also made that none of the other modifications prescribed in paragraph (b) of § 1.812–5 apply. There are no losses from operations for 1955, 1956, 1957, 1968, 1969, 1970.

(b) Loss sustained in 1960. The portions of the $75,000 loss from operations for 1960 which shall be used as carrybacks to 1958 and 1959 and as carryovers to 1961, 1962, 1963, 1964, and 1965 are computed as follows:

(1) Carryback to 1958. The carryback to this year is $75,000, that is, the amount of the loss from operations.

(2) Carryback to 1959. The carryback to this year is $60,000 (the excess of the loss for 1960 over the offset for 1958), computed as follows:

Loss from operations	$75,000
Less:	
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	15,000
Carryback	60,000

(3) Carryover to 1961. The carryover to this year is $30,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958 and 1959), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduc-		

tion of the carryback from 1960 or the carryback from 1962)	30,000	
Sum of offsets		45,000
Carryover		30,000

(4) **Carryover to 1962.** The carryover to this year is $10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, and 1961), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	80,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Sum of offsets		65,000
Carryover		10,000

(5) **Carryover to 1963.** The carryover to this year is $10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, 1961, and 1962), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	30,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Sum of offsets		65,000
Carryover		10,000

(6) **Carryover to 1964.** The carryover to this year is $0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, and 1963), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962)	30,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Offset for 1963 (the $30,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryover from 1962)	30,000	
Sum of offsets		95,000
Carryover		0

(7) **Carryover to 1965.** The carryover to this year is $0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, 1963, and 1964), computed as follows:

Loss from operations		$75,000
Less:		
Offset for 1958 (the $15,000 gain from operations for such year computed without the deduction of the carryback from 1960)	$15,000	
Offset for 1959 (the $30,000 gain from operations for such year computed without the deduction for the carryback from 1960 or the carryback from 1962)	30,000	
Offset for 1961 (the $20,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryback from 1962)	20,000	
Offset for 1962 (a year in which a loss from operations was sustained)	0	
Offset for 1963 (the $30,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryover from 1962)	30,000	
Offset for 1964 (the $35,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryover from 1962)	35,000	

Sum of offsets		$130,000
Carryover		0

(c) **Loss sustained in 1962.** The portions of the $150,000 loss from operations for 1962 which shall be used as carrybacks to 1959, 1960, and 1961 and as carryovers to 1963, 1964, 1965, 1966, and 1967 are computed as follows:

(1) **Carryback to 1959.** The carryback to this year is $150,000, that is, the amount of the loss from operations.

(2) **Carryback to 1960.** The carryback to this year is $150,000 (the excess, if any, of the loss from 1962 over the offset for 1959), computed as follows:

Loss from operations	$150,000
Less:	
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0
Carryback	150,000

(3) **Carryback to 1961.** The carryback to this year is $150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959 and 1960), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Sum of offsets		0
Carryback		150,000

(4) **Carryover to 1963.** The carryover to this year is $150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, and 1961), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Sum of offsets		0
Carryover		150,000

(5) **Carryover to 1964.** The carryover to this year is $130,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, and 1963), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Sum of offsets		20,000
Carryover		130,000

(6) **Carryover to 1965.** The carryover to this year is $95,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, and 1964), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960 the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the		

carryover from 1962 to 1964 not being taken into account)	$35,000	
Sum of offsets		$55,000
Carryover		95,000

(7) **Carryover to 1966.** The carryover to this year is $20,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, 1964, and 1965), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover for such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1964 not being taken into account)	35,000	
Offset for 1965 (the $75,000 gain from operations for such year reduced by the carryover to such year of $0 to 1960, the carryover from 1962 to 1965 not being taken into account)	$75,000	
Sum of offsets		$130,000
Carryover		20,000

(8) **Carryover to 1967.** The carryover to this year is $3,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, 1963, 1964, 1965, and 1966), computed as follows:

Loss from operations		$150,000
Less:		
Offset for 1959 (the $30,000 gain from operations for such year reduced by the carryback to such year of $60,000 from 1960, the carryback from 1962 to 1959 not being taken into account)	0	
Offset for 1960 (a year in which a loss from operations was sustained)	0	
Offset for 1961 (the $20,000 gain from operations for such year reduced by the carryover to such year of $30,000 from 1960, the carryback from 1962 to 1961 not being taken into account)	0	
Offset for 1963 (the $30,000 gain from operations for such year reduced by the carryover to such year of $10,000 from 1960, the carryover from 1962 to 1963 not being taken into account)	20,000	
Offset for 1964 (the $35,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1964 not being taken into account)	35,000	
Offset for 1965 (the $75,000 gain from operations for such year reduced by the carryover to such year of $0 from 1960, the carryover from 1962 to 1965 not being taken into account)	75,000	
Offset for 1966 (the $17,000 gain from operations for such year computed without the deduction of the carryover from 1962)	17,000	
Sum of offsets		147,000
Carryover		3,000

(d) **Determination of operations loss deduction for each year.** The carryovers and carrybacks computed under paragraphs (b) and (c) of this section are used as a basis for the computation of the operations loss deduction in the following manner:

Taxable year	Carryover From 1960	Carryover From 1962	Carryback From 1960	Carryback From 1962	Operations loss deductions
1958	....	....	$75,000	....	$75,000
1959	....	....	60,000	$150,000	210,000
1961	$30,000	....	....	150,000	180,000
1963	10,000	$150,000	....	....	160,000
1964	....	130,000	....	....	130,000
1965	....	95,000	....	....	95,000
1966	....	20,000	....	....	20,000
1967	....	3,000	....	....	3,000

[T.D. 6535, 26 FR 539, Jan. 20, 1961]

Distributions to Shareholders

§ 1.815–1 Taxable years affected.

Sections 1.815–2 through 1.815–6, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of October 10, 1962 (76 Stat. 808), and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6535, 26 FR 524, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.815–2 Distributions to shareholders.

(a) In general. Section 815 provides that every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain two special surplus accounts for Federal income tax purposes. These special accounts are the shareholders surplus account (as defined in section 815(b) and § 1.815–3) and the policyholders surplus account (as defined in section 815(c) and § 1.815–4). To the extent that a distribution to shareholders (as defined in paragraph (c) of this section) is treated as being made out of the shareholders surplus account, no tax is imposed on the company with respect to such distribution. However, to the extent that a distribution to shareholders is treated as being made out of the policyholders surplus account, the amount subtracted from the policyholders surplus account by reason of such distribution shall be taken into account in determining life insurance company taxable income under section 802(b).

(b) Priority system for distributions to shareholders. **(1)** For purposes of section 815 (other than subsection (e) thereof relating to certain mutualizations) and section 802(b)(3) (relating to the determination of life insurance company taxable income), any distribution made to shareholders after December 31, 1958, shall be treated in the following manner:

(i) Distributions shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and § 1.815–3);

(ii) Once the shareholders surplus account has been reduced to zero, distributions shall then be treated as being made out of the policyholders surplus account (as defined in section 815(c) and § 1.815–4) until that account has been reduced to zero; and

(iii) Finally, any distributions in excess of the amounts in the shareholders surplus account and the policyholders surplus account shall be treated as being made out of other accounts (as defined in § 1.815–5).

(2) For purposes of subparagraph (1) of this paragraph, in order to determine whether a distribution (or any portion thereof) shall be treated as being made out of the shareholders surplus account, policyholders surplus account, or other accounts, the amount in such accounts at the end of any taxable year shall be the cumulative balance in such accounts at the end of the taxable year, computed without diminution by reason of a distribution (or any portion thereof) during the taxable year which is treated as being made out of such accounts. For example, on January 1, 1960, S, a stock life insurance company, had $1,000 in its shareholders surplus account and $3,000 in its policyholders surplus account. On November 1, 1960, S distributed $4,000 to its shareholders. Under the provisions of section 815(b)(2) and paragraph (b) of § 1.815–3, S added $5,000 to its shareholders surplus account for the taxable year 1960. Since the distributions to shareholders during the taxable year 1960, $4,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions treated as made out of such account during the taxable year, $6,000 ($1,000 plus $5,000), the entire distribution is treated as being made out of the shareholders surplus account.

(3) Except in the case of a distribution in cash and as otherwise provided herein, the amount to be charged to the special surplus accounts referred to in subparagraph (1) of this paragraph with respect to any distributions to shareholders (as defined in section 815(a) and paragraph (c) of this section) shall be the fair market value of the property distributed, determined as of the date of distribution. However, for the amount of the adjustment to earnings and profits reflecting such distributions, see section 312 and the regulations thereunder. For a special rule relating to the determination of the amount to be charged to such special surplus accounts in the case of a distribution by a foreign life insurance company carrying on a life insurance business within the United States, see section 819(c)(1) and the regulations thereunder.

(c) **Distributions to shareholders defined.** (1) Except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, the term "distribution", as used in section 815(a) and paragraph (b) of this section, means any distribution of property made by a life insurance company to its shareholders. For purposes of the preceding sentence, the term "property" means any property (including money, securities, and indebtedness to the company) other than stock, or rights to acquire stock, in the company making the distribution. Thus, for example, the term includes a distribution which is considered a dividend under section 316, but is not limited to the extent that such distribution must be made out of the accumulated or current earnings and profits of the company making the distribution. For example, except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, there is a distribution within the meaning of this paragraph in any case in which a corporation acquires the stock of a shareholder in exchange for property in a redemption treated as a distribution in exchange for stock under section 302(a) or treated as a distribution of property under section 302(d). For special rules relating to distributions to shareholders in acquisition of stock pursuant to a plan of mutualization, see section 815(e) and paragraph (e) of § 1.815–6.

(2) The term "distribution", as used in section 815(a) and paragraph (b) of this section, does not (except for purposes of section 815(a)(3) and (e)(2)(B)) include any distribution in redemption of stock issued prior to January 1, 1958, where such stock was at all times on and after the date of its issuance and on and before the date of its redemption limited as to the amount of dividends payable and was callable, at the option of the issuer, at a price not in excess of 105 percent of the sum of its issue price plus the amount of contribution to surplus (if any) made by the original purchaser at the time of his purchase.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

§ 1.815–3 Shareholders surplus account.

(a) **In general.** Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a shareholders surplus account. This account shall be established as of January 1, 1958, and the beginning or opening balance of the shareholders surplus account on that date shall be zero.

(b) **Additions to shareholders surplus account.** (1) The amount added to the shareholders surplus account for any taxable year beginning after December 31, 1957, shall be the amount by which the sum of:

(i) The life insurance company taxable income (computed without regard to section 802(b)(3)),

(ii) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, reduced (in the case of a taxable year beginning after December 31, 1961) by the amount referred to in subdivision (i) of this subparagraph,

(iii) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3)), the deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B)), and the amount of interest excluded from gross income under section 103, and

(iv) The small business deduction provided by section 809(d)(10). Exceeds the taxes imposed for the taxable year by section 802(a), computed without regard to section 802(b)(3).

(c) **Subtractions from shareholders surplus account—(1) In general.** There shall be subtracted from the cumulative balance in the shareholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the taxable year, the amount which is treated as being distributed out of such account under section 815(a) and paragraph (b) of § 1.815–2.

(2) **Special rule; distributions in 1958.** There shall be subtracted from the shareholders surplus account (to the extent thereof) for any taxable year beginning in 1958 the amount of the distributions to shareholders made by the company during 1958. For example, assume S, a stock life insurance company, had additions to its shareholders surplus account (as determined under section 815(b)(2) and paragraph (b) of this section) for the taxable year 1958 of $10,000, and actually distributed as dividends to its shareholders $8,000 during the year 1958. The balance in S's shareholders surplus account as of January 1, 1959, shall be $2,000. If S had distributed $12,000 as dividends in 1958, the balance in its shareholders surplus account as of January 1, 1959, would be zero and the other accounts referred to in section 815(a)(3) and paragraph (b)(1)(iii) of § 1.815–2 would be reduced by $2,000.

(d) Illustration of principles. The application of section 815(b) and this section may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960.

Balance in shareholders surplus account as of 1–1–60	$5,000
Life insurance company taxable income computed without regard to sec. 802(b)(3)	4,000
Excess of net long-term capital gain over net short-term capital loss	1,700
Tax-exempt interest included in gross investment income under sec. 804(b)	100
Small business deduction (determined under sec. 809(d)(10))	200
Tax liability under sec. 802(a)(1) and (2) computed without regard to sec. 802(b)(3)	1,625
Amount distributed to shareholders	9,000

For purposes of determining the amount to be subtracted from its shareholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in shareholders surplus account as of 1–1–60		$5,000
(2) Additions to account:		
(a) Life insurance company taxable income computed without regard to sec. 802(b)(3)	$4,000	
(b) Excess of net long-term capital gain over net short-term capital loss	1,700	
(c) Tax-exempt interest included in gross investment income under sec. 804(b)	100	
(d) Small business deduction (determined under sec. 809(d)(10))	200	
Total	6,000	
Less:		
Tax liability under sec. 802(a)(1) and (2) computed without regard to sec. 802(b)(3)	1,625	
		4,375
(3) Cumulative balance in shareholders surplus account as of 12–31–60 (item (1) plus item (2))		9,375

Since the amount distributed to shareholders during the taxable year, $9,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year, $9,375, under the provisions of section 815(a), the entire distribution shall be treated as being made out of the shareholders surplus account. Thus, $9,000 shall be subtracted from the shareholders surplus account (leaving a balance of $375 in such account at the end of the taxable year) and S shall incur no additional tax liability by reason of the distribution to its shareholders during the taxable year 1960.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

§ 1.815–4 Policyholders surplus account.

(a) In general. Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a policyholders surplus account. This account shall be established as of January 1, 1959, and the beginning or opening balance of the policyholders surplus account on that date shall be zero.

(b) Additions to policyholders surplus account. The amount added to the policyholders surplus account for any taxable year beginning after December 31, 1958, shall be the sum of—

(1) An amount equal to 50 percent of the amount by which the gain from operations for the taxable year exceeds the taxable investment income,

(2) The deduction allowed or allowable under section 809(d)(5) (as limited by section 809(f)) for certain nonparticipating contracts, and

(3) The deduction allowed or allowable under section 809(d)(6) (as limited by section 809(f)) for taxable years beginning before January 1, 1963, for group life and group accident and health insurance contracts, and for taxable years beginning after December 31, 1962, for accident and health insurance and group life insurance contracts.

(c) Subtractions from policyholders surplus account—(1) In general. There shall be subtracted from the cumulative balance in the policyholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the taxable year, an amount equal to the sum of—

(i) The amount which (without regard to subdivision (ii) of this subparagraph) is treated under section 815(a) as distributed out of the policyholders surplus account for the taxable year, plus

(ii) The amount (determined without regard to section 802(a)(3)) by which the tax imposed for taxable years beginning before January 1, 1962, by section 802(a)(1), and for taxable years beginning after December 31, 1961, by section 802(a), is increased by reason of section 802(b)(3).

In addition, there shall be subtracted from the policyholders surplus account for the taxable year those amounts which, at the close of the taxable year, are subtracted or treated as subtracted from the policyholders surplus account under section 815(d)(1) and (4) and paragraphs (a) and (d) of § 1.815–6. For purposes of this paragraph, the subtractions from the policyholders surplus ac-

count shall be treated as made in the following order:

(a) First the amount determined under section 815(c)(3) by reason of distributions to shareholders during the taxable year which are treated as being made out of the policyholders surplus account;

(b) Next the amount elected to be subtracted from the policyholders surplus account for the taxable year under section 815(d)(1);

(c) Then the amount which is treated as a subtraction from the policyholders surplus account for the taxable year by reason of the limitation provided in section 815(d)(4); and

(d) Finally the amount taken into account upon termination as a life insurance company as provided in section 815(d)(2).

(2) Method of computing amount subtracted from policyholders surplus account—(i) Where life insurance company taxable income, computed without regard to section 802(b)(3), exceeds $25,000. If the life insurance company taxable income for any taxable year computed under section 802(b), computed without regard to section 802(b)(3), exceeds $25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate for the taxable year.

(ii) Where life insurance company taxable income does not exceed $25,000. If the life insurance company taxable income for any taxable year, computed under section 802(b), does not exceed $25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the normal tax rate for the taxable year.

(iii) Where life insurance company taxable income, computed without regard to section 802(b)(3) does not exceed $25,000, but computed with regard to section 802(b)(3) does exceed $25,000. If the life insurance company taxable income for any taxable year, computed without regard to section 802(b)(3) does not exceed $25,000, but computed with regard to section 802(b)(3) does exceed $25,000, the amount subtracted from the policyholders surplus account shall be determined in the following manner:

(a) First, determine the amount by which $25,000 exceeds the amount determined under section 802(b)(1) and (2);

(b) Then, multiply the amount determined under (a) by a ratio, the numerator of which is 100 percent minus the normal tax rate and the denominator of which is 100 percent;

(c) Next, determine the amount by which the amount treated as distributed out of the policyholders surplus account exceeds the amount determined under (b) and multiply such excess by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate; and

(d) Finally, add the amounts determined under (a) and (c).

(3) Illustration of principles. The application of section 815(c)(3) and subparagraph (2) of this paragraph may be illustrated by the following examples:

Example (1). The life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds $25,000 for the taxable year 1959. Assume that of the amount distributed by S to its shareholders during the taxable year, $9,600 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the sum of the normal tax rate (30%) and the surtax rate (22%) in effect for 1959 is 52 percent. S shall subtract $20,000 from its policyholders surplus account for the taxable year 1959, computed as follows:

$$\$9{,}600\times 100/(100\text{–}52)=\$9{,}600\times 100/48=\$20{,}000$$

Of this amount, $9,600 is due to the application of section 815(c)(3)(A) and $10,400 to the application of section 815(c)(3)(B).

Example (2). Assume that for the taxable year 1960, S, a stock life insurance company, has taxable investment income of $1,000 and a gain from operations of $2,000. Assume further that of the amount distributed by S to its shareholders during the taxable year, $3,500 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since S's life insurance company taxable income does not exceed $25,000 for the taxable year and the normal tax rate in effect for 1960 is 30 percent, S shall subtract $5,000 from its policyholders surplus account for the taxable year 1960, computed as follows:

$$\$3{,}500\times 100/(100\text{–}30)=\$3{,}500\times 100/70=\$5{,}000$$

Of this amount, $3,500 is due to the application of section 815(c)(3)(A), and $1,500 to the application of section 815(c)(3)(B).

Example (3). For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), is $10,000. Assume that of the amount distributed by S to its shareholders during the taxable year, $12,000 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the

life insurance company taxable income of S, computed with regard to section 802(b)(3), exceeds $25,000, in order to determine the amount to be subtracted from its policyholders surplus account, S would make up the following schedule:

(1) $25,000 minus life insurance company taxable income, computed without regard to sec. 802(b)(3) ($25,000 minus $10,000)	$15,000
(2) Item (1) multiplied by 100 percent minus the normal tax rate as in effect for 1960, over 100 percent ($15,000 × (100–30) ÷ 100)	10,500
(3) Amount by which the amount treated as distributed out of policyholders surplus account ($12,000) exceeds item (2) ($10,500), multiplied by 100 percent over 100 percent minus the sum of the normal tax rate and the surtax rate as in effect for 1960 ($1,500 × 100 ÷ (100–52))	3,125
(4) Item (1) plus item (3) ($15,000 plus $3,125)	18,125

For the taxable year 1960, S shall subtract $18,125 from its policyholders surplus account. Of this amount, $10,500 represents the distribution from the policyholders surplus account which is taxed at a 30 percent tax rate and $1,500 the distribution from the policyholders surplus account which is taxed at a 52 percent tax rate. Thus, of the amount subtracted from the policyholders surplus account for the taxable year 1960, $12,000 is due to the application of section 815(c)(3)(A), and $6,125 to the application of section 815(c)(3)(B).

(d) Illustration of principles. The application of section 815(c) and this section may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Taxable investment income	$25,000
Gain from operations	30,000
Tax base (sec. 802(b)(1) and (2))	27,500
Deduction for certain nonparticipating policies provided by sec. 809(d)(5) (as limited by sec. 809(f))	600
Deduction for group policies provided by sec. 809(d)(6) (as limited by sec. 809(f))	400
Amount distributed to shareholders	60,000
Cumulative balance in shareholders surplus account as of 12–31–60	36,000
Balance in policyholders surplus account as of 1–1–60	48,000

For purposes of determining the amount to be subtracted from its policyholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the policyholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in policyholders surplus account as of 1–1–60		$48,000
(2) Additions to account:		
(a) 50 percent of the amount by which the gain from operations ($30,000) exceeds the taxable investment income ($25,000) (½ × $5,000)	$2,500	
(b) The deduction for certain nonparticipating contracts provided by sec. 809(d)(5) (as limited by sec. 809(f))	$600	
(c) The deduction for group contracts provided by sec. 809(d)(6) (as limited by sec. 809(f))	400	
		$3,500
(3) Cumulative balance in policyholders account as of 12–31–60 (item (1) plus item (2))		51,500

Under the provisions of section 815(a), since the amount distributed to shareholders during the taxable year, $60,000, exceeds the cumulative balance in the shareholders surplus at the end of the taxable year, computed without diminution by reason of distributions during the taxable year, $36,000, the shareholders surplus account shall first be reduced to zero. The remaining $24,000 ($60,000 minus $36,000) of the distribution shall then be treated as made out of the policyholders surplus account. Thus, since the tax base under section 802(b)(1) and (2) is in excess of $25,000, the total amount to be subtracted from the policyholders surplus account at the end of the taxable year would be $50,000 ($24,000 × 100 ÷ (100–52)). Of this amount $26,000 ($50,000 minus $24,000) represents the tax on the portion of the distribution to shareholders which is treated as being out of the policyholders surplus account.

(e) Special rule for 1959 and 1960. For a special transitional rule applicable to any increase in tax liability under section 802(b)(3) for the taxable years 1959 and 1960 which is due solely to the operation of section 815(c)(3) and this section, see section 802(a)(3) and § 1.802–5.

[T.D. 6535, 26 FR 543, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.815–5 Other accounts defined.

The term "other accounts", as used in section 815(a)(3) and paragraph (b) of § 1.815–2, means all amounts which are not specifically included in the shareholders surplus account under section 815(b) and paragraph (b) of § 1.815–3, or in the policyholders surplus account under section 815(c) and paragraph (b) of § 1.815–4. Thus, for example, other accounts includes amounts representing the increase in tax due to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the special transitional rule provided in section 802(a)(3) and § 1.802–5, earnings and profits accumulated prior to January 1, 1958, paid-in surplus, capital, etc. To the extent that a distribution (or any portion thereof) is treated as being made out of other accounts, no tax is imposed on the company with respect to such distribution.

[T.D. 6535, 26 FR 544, Jan. 20, 1961]

§ 1.815–6 Special rules.

(a) Election to transfer amounts from policyholders surplus account to shareholders surplus account—(1) In general. Section 815(d)(1) per-

mits a life insurance company to elect, after the close of any taxable year for which it is a life insurance company, to subtract any amount (or any portion thereof) in its policyholders surplus account as of the close of the taxable year. The effect of such election is to subject the company to tax on the amounts elected to be subtracted for the taxable year for which the election applies. The amount so subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account as of the beginning of the taxable year following the taxable year for which the election applies and no further tax shall be imposed upon the company if the amount elected to be transferred to the shareholders surplus account is subsequently distributed to shareholders.

(2) Manner and effect of election. (i) The election provided by section 815(d)(1) and this section shall be made in a statement attached to the life insurance company's income tax return for any taxable year for which the company desires the election to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or his duly authorized representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. In addition, the statement shall indicate that the company has made the election provided under section 815(d)(1) for the taxable year and the amount elected to be subtracted from the policyholders surplus account.

(ii) An election made under section 815(d)(1)(B) and subdivision (i) of this subparagraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such an election has been made for any taxable year it may not be revoked.

(3) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds $25,000. Assume that S elects to subtract $20,000 from its policyholders surplus account under section 815(d)(1) for the taxable year. Since S is subject to a 52 percent tax rate, the tax on the amount elected to be subtracted from the policyholders surplus account (as of the close of the taxable year 1960) is $10,400 ($20,000 × 52 percent). Thus, the amount to be added to the shareholders surplus account as of January 1, 1961, is $9,600 (the amount subtracted from the policyholders surplus account by virtue of the section 815(d)(1) election, less the tax imposed upon such amount by reason of section 802(b)(3), or $20,000 minus $10,400).

(b) Termination as life insurance company—(1) Effect of termination. Except as provided in section 381(c)(22) (relating to carryovers in certain corporate readjustments), section 815(d)(2)(A) provides that if for any taxable year the taxpayer is not an insurance company (as defined in paragraph (a) of § 1.801–3), or if for any two successive taxable years the taxpayer is not a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), the amount taken into account under section 802(b)(3) for the last preceding year for which the company was a life insurance company shall be increased (after the application of section 815(d)(2)(B)) by the entire balance in the policyholders surplus account at the close of such last preceding taxable year.

(2) Effect of certain distributions. If for any taxable year the taxpayer is an insurance company (as defined in paragraph (a) of § 1.801–3) but is not a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801–3), section 815(d)(2)(B) provides that any distribution to shareholders during such taxable year shall be treated as having been made on the last day of the last preceding taxable year for which the company was a life insurance company.

(3) **Examples.** The application of section 815(d)(2) and this paragraph may be illustrated by the following examples:

Example (1). At the end of the taxable year 1959, the balance in the policyholders surplus account of S, a life insurance company within the meaning of section 801(a) and paragraph (b) of § 1.801–3, is $12,000. If S fails to qualify as an insurance company (as defined in paragraph (a) of § 1.801–3) for the taxable year 1960, and section 381(c)(22) does not apply, under the provisions of section 815(d)(2)(A), the entire balance of $12,000 in the policyholders surplus account at the end of 1959, the last year S was a life insurance company, shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

Example (2). Assume the facts are the same as in example (1), except that for the taxable years 1960 and 1961, S qualifies as an insurance company (as defined in paragraph (a) of § 1.801–3) but does not qualify as a life insurance company within the meaning of section 801(a) and paragraph (b) of § 1.801–3. Assume further that as a result of a distribution by S to its shareholders in 1960, $4,800 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Under the provisions of section 815(d)(2)(B), if section 381(c)(22) does not apply, any distribution to shareholders during the taxable years 1960 and 1961 shall be treated as having been made on December 31, 1959 (the last day of the last preceding taxable year for which S was a life insurance company). Thus, assuming S is subject to a 52 percent tax rate on additions to life insurance company taxable income, $10,000 ($4,800 plus $5,200, the tax on the portion of the distribution treated as made out of the policyholders surplus account) shall

be treated as being subtracted from the policyholders surplus account at the end of 1959 and shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959. Under the provisions of section 815(d)(2)(A), the entire balance of $2,000 ($12,000 minus $10,000) in the policyholders surplus account at the end of 1959 (after the application of section 815(d)(2)(B)), shall also be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

(c) Treatment of certain indebtedness. Section 815(d)(3) provides that if a taxpayer makes any payment in discharge of its indebtedness and such indebtedness is attributable to a distribution by the taxpayer to its shareholders after February 9, 1959, the amount of such payment shall be treated as a distribution in cash to shareholders both for purposes of section 802(b)(3) and section 815. However, this paragraph shall only apply to the extent that the distribution of such indebtedness to shareholders was treated as being out of accounts other than the shareholders and policyholders surplus accounts at the time of distribution.

(d) Limitation on amount in policyholders surplus account—(1) In general. Section 815(d)(4) provides a limitation on the amount that any life insurance company may accumulate in its policyholders surplus account. If the policyholders surplus account at the end of any taxable year (computed without regard to this paragraph) exceeds whichever of the following is the greatest—

(i) 15 percent of life insurance reserves (as defined in section 801(b) and paragraph (a) of § 1.801–4) at the end of the taxable year.

(ii) 25 percent of the amount by which the life insurance reserves at the end of the taxable year exceed the life insurance reserves at the end of 1958, or

(iii) 50 percent of the net amount of the premiums and other consideration taken into account for the taxable year under section 809(c)(1),

then such excess shall be treated as a subtraction from the policyholders surplus account as of the end of such taxable year. The amount so treated as subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account at the beginning of the succeeding taxable year.

(2) Example. The application of the limitation contained in subparagraph (1) of this paragraph may be illustrated by the following example:

Example. The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Balance in policyholders surplus account, computed without regard to sec. 815(d)(4), as of 12–31–60	$175
Life insurance reserves (as defined in sec. 801(b)) as of 12–31–60	4,500
Life insurance reserves (as defined in sec. 801(b)) as of 12–31–58	3,900
Premiums and other consideration taken into account for the taxable year under sec. 809(c)(1)	310

In order to determine the limitations on the amount that it may accumulate in its policyholders surplus account at the end of the taxable year under section 815(d)(4), S would make up the following schedule:

(1) 15 percent of life insurance reserves at the end of the taxable year (15% × $4,500)	$675
(2) 25 percent of amount by which life insurance reserves at the end of the taxable year ($4,500) exceed life insurance reserves as of 12–31–58 ($3,900) (25% × $600)	150
(3) 50 percent of premiums and other consideration taken into account under sec. 809(c)(1) for the taxable year (50% × $310)	155
(4) Limitation on policyholders surplus account (the greatest of items (1), (2), or (3))	675

Since the balance in the policyholders surplus account at the end of the taxable year 1960, $175, does not exceed the limitation provided by section 815(d)(4), $675, S is not required to make any further adjustment to its policyholders surplus account at the end of the taxable year.

(e) Special rule for certain mutualizations—(1) In general. Section 815(e) provides a rule for determining priorities which shall operate in place of section 815(a) and paragraph (b) of § 1.815–2 where a life insurance company makes any distribution to its shareholders after December 31, 1958, in acquisition of stock pursuant to a plan of mutualization. Section 815(e)(1) provides that such a distribution shall first be treated as being made out of paid-in capital and paid-in surplus, and, to the extent thereof, no tax shall be imposed on the company with respect to such distribution. Thereafter, distributions made pursuant to such plan of mutualization shall be treated as made in two allocable parts. One part shall be treated as being made out of other accounts (as defined in § 1.815–5) and the company shall incur no tax with respect to such portion of the distribution. The other part shall be treated as a distribution to which section 815(a) and paragraph (b) of § 1.815–2 applies. Thus, such portion of the distribution shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and § 1.815–3), to the extent thereof, and then out of the policyholders surplus account (as defined in section 815(c) and § 1.815–4), to the extent thereof. See paragraph (a) of § 1.815–2. For purposes of this paragraph, a distribution shall be considered as being made pursuant to a plan of mutualization only if the

requirements of applicable State law for the adoption of such plan (as, for example, approval by the requisite majority of the board of directors, shareholders, and policyholders) have been fulfilled.

(2) Allocation ratio. Section 815(e)(2)(A) provides an allocation ratio which when applied to the amount distributed under a plan of mutualization in excess of the balance in the paid-in capital and paid-in surplus accounts determines the portion of such excess to be treated as distributed out of the shareholders surplus account, policyholders surplus account, or other accounts. The numerator of this ratio is the excess of the assets of the company (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805–5) over the total liabilities (including reserves), both determined as of December 31, 1958, and adjusted in the manner provided in subparagraph (3) of this paragraph. The denominator of this ratio is the amount included in the numerator plus the amounts in the shareholders surplus account and policyholders surplus account, all determined as of the beginning of the year of the distribution.

(3) Adjustment for certain distributions. Section 815(e)(2)(B) provides that if between 1958 and the year of distribution the taxpayer has been treated as having made a distribution (under a plan of mutualization or otherwise) which is treated as a return of paid-in capital and paid-in surplus or as out of other accounts (as defined in § 1.815–5), the aggregate amount of any such prior distributions must be subtracted from the numerator and denominator in all cases where the allocation ratio provided by subparagraph (2) of this paragraph applies.

(f) Recomputation required as a result of a subsequent loss from operations under section 812—(1) In general. Any amounts added to or subtracted from the special surplus accounts referred to in section 815(a) and paragraph (b) of § 1.815–2 for any taxable year shall be adjusted to the extent necessary to properly reflect a subsequent loss from operations which under section 812 is carried back to the taxable year for which such additions or subtractions were made.

(2) Example. The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Assume that for the taxable years 1959 through 1961, the books of S, a stock life insurance company subject to a 30 percent tax rate for all taxable years involved, reflect the following items:

	1959	1960	1961
Taxable investment income	$40.00	$40.00	$40.00
Gain from operations	60.00	60.00	60.00
Tax base (sec. 802(b)(1) and (2))	50.00	50.00	50.00
Tax (sec. 802(b)(1) and (2) base)	15.00	15.00	15.00
Shareholders surplus account—			
At beginning of year	0	35.00	37.00
Added at beginning of year by reason of election under sec. 815(d)(1)	0	7.00	0
Added for year (without regard to election under sec. 815(d)(1))	35.00	35.00	35.00
Subtracted (distributions)	0	40.00	40.00
Policyholders surplus account—			
At beginning of year	0	0	10.00
Added for year	10.00	10.00	10.00
Subtracted (distributions)	0	0	0
Subtracted (by reason of election under sec. 815(d)(1))	10.00	0	0
Tax base (sec. 802(b)(3))	10.00	0	0
Tax (sec. 802(b)(3) base)	3.00	0	0

Assume further that S has a loss from operations for the taxable year 1962 of $25. Under the provisions of section 812, the $25 loss from operations would be carried back to the taxable year 1959 and would reduce the 1959 tax base under section 802(b)(1) and (2) to $35 ($60 minus $25). After adjustments reflecting the 1962 loss from operations, the results for the taxable years 1959 through the beginning of 1962 would be as follows:

	1959	1960	1961	1962
Taxable investment income	$40.00	$40.00	$40.00	.....
Gain from operations	35.00	60.00	60.00	.....
Tax base (sec. 802(b)(1) and (2))	35.00	50.00	50.00	.....
Tax (sec. 802(b)(1) and (2) base)	10.50	15.00	15.00	.....
Shareholders surplus account—				
At beginning of year	0	24.50	19.50	$14.50
Added for year (without regard to election under sec. 815(d)(1))	24.50	35.00	35.00	.....
Added by reason of election under sec. 815(d)(1)	0	0	0	.....
Subtracted (distributions)	0	40.00	40.00	.....

	1959	1960	1961	1962
Policyholders surplus account—				
At beginning of year	$0	$0	$10.00	$20.00
Added for year	0	10.00	10.00	.....
Subtracted (distributions)	0	0	0	.....
Subtracted (by reason of election under sec. 815(d)(1))	0	0	0	.....
Tax base (sec. 802(b)(3))	0	0	0	.....
Tax (sec. 802(b)(3) base)	0	0	0	.....

As a result of the loss from operations for 1962, the election under section 815(d)(1) for the taxable year 1959 has become inapplicable in its entirety since the balance in the policyholders surplus account at the end of 1959, as recomputed, is zero. Thus, S would be entitled to a total refund of $7.50 for the taxable year 1959. Of this amount, $4.50 is due to the recomputation of the section 802(b)(1) and (2) tax base and $3 to the amount of tax paid by reason of the election under section 815(d)(1).

[T.D. 6535, 26 FR 545, Jan. 20, 1961]

Miscellaneous Provisions

§ 1.817–1 Taxable years affected.

Except as otherwise provided therein, §§ 1.817–2 through 1.817–4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6558, 26 FR 2781, Apr. 4, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.817–2 Treatment of capital gains and losses.

(a) In general. For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) prior to its amendment by section 3 of the Act of October 23, 1962 (76 Stat. 1134), imposes a separate tax equal to 25 percent of such excess. For taxable years beginning after December 31, 1961, if the net long-term capital gain of any life insurance company exceeds its net short-term capital loss, section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses, such as Subchapter O (relating to gain or loss on disposition of property), Subchapter P (relating to capital gains and losses), etc., shall apply with respect to life insurance companies.

(b) Modification of section 1221 and 1231. **(1)** In the case of a life insurance company, section 817(a)(1) provides that for purposes of applying section 1231(a) (relating to property used in the trade or business and involuntary conversions), the term "property used in the trade or business" shall be treated as including only—

(i) Property used in carrying on an insurance business, of a character subject to the allowance for depreciation under section 167 (even though fully depreciated), held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), and real property used in carrying on an insurance business, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), and which is not—

(a) Property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year;

(b) Property held by the taxpayer primarily for sale to customers in the ordinary course of business; or

(c) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property held by a taxpayer described in section 1221(3). In the case of a letter, memorandum, or property similar to a letter or memorandum, this subdivision (c) applies only to sales and other dispositions occurring after July 25, 1969.

(ii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(2) In the case of a life insurance company, section 817(a)(2) provides that for purposes of applying section 1221(2) (relating to the exclusion of certain property from the term capital asset), the reference to property used in trade or business shall be treated as including only property used in carrying on an insurance business.

(3) Section 1231(a), as modified by section 817(a)(1) and subparagraph (1) of this paragraph, shall apply to recognized gains and losses from the following:

(i) The sale, exchange, or involuntary conversion of the following property, if held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977)—

(a) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(b) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company; and

(c) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(ii) The involuntary conversion of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(iii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(4) Section 1221(2), as modified by section 817(a)(2) and subparagraph (2) of this paragraph, shall include only the following property;

(i) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(ii) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company; and

(iii) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(5) If an asset described in subparagraph (3)(i)(a), (b), or (c) or subparagraph (4) of this paragraph, or any portion thereof, is also an "investment asset" (an asset from which gross investment income, as defined in section 804(b), is derived), such asset, or portion thereof, shall not be treated as an asset used in carrying on an insurance business. Accordingly, the gains or losses from the sale or exchange (or considered as from the sale or exchange) of depreciable assets attributable to any trade or business, other than the insurance trade or business, carried on by the life insurance company, such as operating a radio station, housing development, or a farm, or renting various pieces of real estate shall be treated as gains or losses from the sale or exchange of a capital asset unless such asset is involuntarily converted (within the meaning of paragraph (e) of § 1.123-1).

(c) **Illustration of principles.** The provisions of section 817(a) and this section may be illustrated by the following examples:

Example (1). L, a life insurance company, has recognized gains and losses for the taxable year 1959 from the sale or involuntary conversion of the following items:

	Gains	*Losses*
Stocks, held for more than 6 months	$100,000	....
Bonds, held for more than 6 months	....	$5,000
Housing development, held for more than 6 months	....	400,000
Branch office building owned and occupied by L, held for more than 6 months	....	115,000
Furniture and equipment used in the investment department, held for more than 6 months	30,000	....
Radio station, held for more than 6 months	200,000	....
Involuntary conversion of apartment building, held for more than 6 months	7,000	....

The recognized gains and losses from the sale of the stocks, bonds, housing development, and radio station shall be treated as gains and losses from the sale of capital assets since such items are capital assets within the meaning of section 1221 (as modified by section 817(a)(2)). Accordingly, the provisions of section 1231 shall not apply to the sale of such capital assets. However, the provisions of section 1231 (as modified by section 817(a)(1)) shall apply to the sale of the branch office building and the furniture and equipment, and the apartment building involuntarily converted. Since the aggregate of the recognized losses ($115,000) exceeds the aggregate of the recognized gains ($37,000), the gains and losses are treated as ordinary gains and losses.

Example (2). Y, a life insurance company, owns a twenty-story home office building, having an adjusted basis of $15,-000,000, ten floors of which it rents to various tenants, one floor of which is utilized by it in operating its investment department, and the remaining nine floors of which are occupied by it in carrying on its insurance business. If in 1960, Y sells the building for $10,000,000, Y must first apportion its basis between that portion of the building (one-half) used in carrying on an insurance business, and that portion of the building (one-half) classified as an "investment asset", before it can determine the character of the loss attributable to each portion of the building. For such purpose, the one floor utilized by Y in operating its investment department is treated

as used in carrying on an insurance business. Assuming that each portion of the building bears an equal (one-half) relation to the basis of the entire building, Y (without regard to section 817(b)) would have a $2,500,000 ordinary loss on that portion used in carrying on an insurance business (assuming that Y had no gains subject to section 1231), and a $2,500,000 capital loss on that portion of the building classified as an investment asset.

[T.D. 6558, 26 FR 2782, April 4, 1961, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 7369, 40 FR 29840, July 16, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.817–3 Gain on property held on December 31, 1958, and certain substituted property acquired after 1958.

(a) Limitation on gain recognized on property held on December 31, 1958. (1) Section 817(b)(1) limits the amount of gain that shall be recognized on the sale or other disposition of property other than insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property) if:

(i) The property was held (or treated as held within the meaning of paragraph (c)(1) of this section) by a life insurance company on December 31, 1958;

(ii) The taxpayer has been a life insurance company at all times on and after December 31, 1958, including the date of the sale or other disposition of the property; and

(iii) The fair market value of the property on December 31, 1958, exceeds the adjusted basis for determining gain as of such date.

The gain on the sale or other disposition of such property shall be limited to an amount (but not less than zero) equal to the amount by which the gain (determined without regard to section 817(b)(1)) exceeds the difference between fair market value of such property on December 31, 1958, and the adjusted basis for determining gain as of such date. Accordingly, the tax imposed under section 802(a) shall apply with respect to the amount of gain so limited. In addition, in the case of a stock life insurance company, the amount of such gain shall be taken into account under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to the shareholders surplus account (as defined in section 815(b) and § 1.815–3) for the taxable year. Furthermore, the amount of the gain (determined without regard to section 817(b)(1) and this paragraph) which is not taken into account under section 802(a) and under paragraph (f) of § 1.802–3 by reason of the application of section 817(b)(1) shall be included in other accounts (as defined in § 1.815–5) by such a company for the taxable year.

(2) Section 817(b)(1) and subparagraph (1) of this paragraph shall not apply for purposes of determining loss with respect to property held on December 31, 1958.

(b) Illustration of principles. The application of section 817(b)(1) and paragraph (a) of this section may be illustrated by the following examples:

Example (1). On December 31, 1958, J, a stock life insurance company, owned stock of Z Corporation and on such date the stock had an adjusted basis for determining gain of $5,000 and a fair market value of $6,000. On August 1, 1959, the company sells such stock for $8,000. Assuming J qualifies as a life insurance company for the taxable year 1959, and applying the provisions of section 817(b)(1) and paragraph (a) of this section, the gain recognized (assuming no adjustment to basis for the period since December 31, 1958) on the sale shall be limited to $2,000 (the amount by which the gain realized, $3,000, exceeds the difference, $1,000, between the fair market value, $6,000, and the adjusted basis, $5,000, for determining gain on December 31, 1958). Thus, J shall take into account $2,000 under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to its shareholders surplus account for the taxable year and shall include $1,000 in other accounts for the taxable year.

Example (2). The facts are the same as in example (1), except that the selling price is $5,800. In such case, no gain shall be recognized even though there is a realized gain of $800 since such realized gain does not exceed the difference ($1,000) between the fair market value ($6,000) and the adjusted basis ($5,000) for determining gain on December 31, 1958. Furthermore, no loss shall be realized or recognized as a result of this transaction. Thus, J shall include $800 in other accounts for the taxable year and shall not take into account any amount under section 815(b)(2)(A)(ii).

Example (3). The facts are the same as in example (1), except that the adjusted basis for determining loss is $5,000 and the selling price is $4,500. In such case, since J has sustained a loss, section 817(b)(1) does not apply.

(c) Certain substituted property acquired after December 31, 1958. Section 817(b)(2) provides that if a life insurance company acquires property after December 31, 1958, in exchange for property actually held by the company on December 31, 1958, and the property acquired has a substituted basis within the meaning of section 1016(b) and § 1.1016–10, the following rules shall apply:

(1) For purposes of section 817(b)(1), such acquired property shall be deemed as having been held continuously by the taxpayer since the beginning of the holding period thereof as determined under section 1223;

(2) The fair market value and adjusted basis referred to in section 817(b)(1) shall be that of that property for which the holding period taken into account includes December 31, 1958;

(3) Section 817(b)(1) shall apply only if the property or properties, the holding periods of which are taken into account, were held only by life insurance companies after December 31, 1958, during the holding periods so taken into account;

(4) The difference between the fair market value and adjusted basis referred to in section 817(b)(1) shall be reduced (but not below zero) by the excess of (i) the gain that would have been recognized but for section 817(b) on all prior sales or other dispositions after December 31, 1958, of properties referred to in section 817(b)(2)(C) over (ii) the gain that was recognized on such sales or other dispositions; and

(5) The basis of such acquired property shall be determined as if the gain which would have been recognized but for section 817(b) were recognized gain.

For purposes of section 817(b)(2) and this paragraph, the term "property" does not include insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property). Furthermore, the provisions of section 817(b)(1) and paragraph (a)(1) of this section shall not apply for purposes of determining loss with respect to property described in section 817(b)(2) and this paragraph.

(d) Illustration of principles. The application of section 817(b)(2) and paragraph (c) of this section may be illustrated by the following example:

Example. Assume that W, a life insurance company, owns property B on December 31, 1958, at which time its adjusted basis was $1,000 and its fair market value was $1,800. On January 31, 1960, in a transaction to which section 1031 (relating to exchange of property held for productive use or investment) applies, W receives property H having a fair market value of $1,700 plus $300 in cash in exchange for property B. The gain realized on the transaction, without regard to section 817(b) is $1,000 (assuming no adjustments to basis for the period since December 31, 1958). Under the provisions of section 817(b)(1) the gain is limited to $200. The entire $200 shall be recognized since such amount is less than the amount of gain ($300) which would be recognized under section 1031. Applying the provisions of section 817(b)(2) and paragraph (c) of this section, the basis of property H shall be determined as if the entire $300 of cash received is recognized gain. Thus, the basis of property H under section 1031 is $1,000 ($1,000) (the basis of property B) minus $300 (the amount of money received) plus $300 (the recognized gain of $200 plus $100 which would have been recognized but for section 817(b)). If W later sells property H for $2,200 cash, and assuming no further adjustments to its basis of $1,000, the gain realized is $1,200, but due to the application of section 817(b)(2) the amount of gain recognized is $500, computed as follows:

Selling price		$2,200
Less: Adjusted basis as of date of sale		1,000
Gain realized		1,200
Fair market value as of 12–31–58	$1,800	
Adjusted basis as of 12–31–58	1,000	
Excess of fair market value over adjusted basis	800	
Less: Excess of gain which would have been recognized on all prior dispositions but for sec. 817(b) over gain recognized on all prior dispositions ($300 minus $200)	100	$700
Gain recognized		$500

[T.D. 6558, 26 FR 2783, April 4, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

§ 1.817–4 Special rules.

(a) Limitation on capital loss carryovers. Section 817(c) provides that a net capital loss (as defined in section 1222(10)) for any taxable year beginning before January 1, 1959, shall not be taken into account. For any taxable year beginning after December 31, 1958, the provisions of Part II, Subchapter P, Chapter 1 of the Code (relating to the treatment of capital losses) shall be applicable to life insurance companies for purposes of determining the tax imposed by section 802(a) and § 1.802–3 (relating to the imposition of tax in case of capital gains).

(b) Gain on transactions occurring prior to January 1, 1959. For purposes of Part I, Subchapter L, Chapter 1 of the Code, section 817(d) provides that—

(1) There shall be excluded from tax any gain from the sale or exchange of a capital asset, and any gain considered as gain from sale or exchange of a capital asset, which results from sales or other dispositions of property prior to January 1, 1959; and

(2) Any gain after December 31, 1958, resulting from the sale or other disposition of property prior to January 1, 1959, which, but for this subparagraph would be taken into account under section 1231, shall not be taken into account under section 1231.

For example, if a life insurance company makes an installment sale of a capital asset prior to January 1, 1959, and payments are received after such date, any capital gain attributable to such sale shall not be taken into account for purposes of section 802(a). Furthermore, any gain referred to in subparagraphs (1) and (2) and the preceding sentence shall not be taken into account in determining the excess of the net short-term capital gain over the net long-term capital loss (and for taxable years

beginning after December 31, 1961, the excess of the net long-term capital gain over the net short-term capital loss) for purposes of computing taxable investment income under section 804(a)(2) or gain or loss from operations under section 809(b).

(c) Certain reinsurance transactions in 1958. For purposes of Part I, section 817(e) provides that where a life insurance company reinsures (or sells) all of its insurance contracts of a particular type, such as an entire industrial department, in either a single transaction, or in a series of related transactions, all of which occurred during 1958, and the reinsuring (or purchasing) company or companies assume all liabilities under such contracts, such reinsurance (or sale) shall be treated as the sale of a capital asset. However, such transaction shall be subject to the provisions of section 806(a) and § 1.806–3 (relating to adjustments for certain changes in reserves and assets).

(d) Certain other reinsurance transactions. (1) For any taxable year beginning after December 31, 1958, the reinsurance of all or a part of the insurance contracts of a particular type by a life insurance company, in either a single transaction, or in a series of related transactions, occurring in any such taxable year, whereby the reinsuring company or companies assume all liabilities under such contracts, shall not be treated as the sale or exchange of a capital asset but shall be subject to the provisions of section 806(a) and 809 and the regulations thereunder. However, if in connection with a transaction described in the preceding sentence the reinsured or reinsurer transfers an asset which is a capital asset within the meaning of section 1221 (as modified by section 817(a)(2)), such transfer shall be treated as the sale or exchange of a capital asset by the transferor.

(2)(i) The consideration paid by the reinsured to the reinsurer in connection with a transaction described in subparagraph (1) of this paragraph shall be treated as an item of deduction under section 809(d)(7). However any amount received by the reinsured from the reinsurer shall be applied against and reduce (but not below zero) the amount of such consideration, and to the extent that it exceeds such consideration, shall be treated as an item of gross amount under section 809(c)(3).

(ii) In connection with an assumption reinsurance (as defined in paragraph (a)(7)(ii) of § 1.809–5) transaction, a reinsurer shall in any taxable year beginning after December 31, 1957—

(A) Treat the consideration received from the reinsured in any such taxable year as an item of gross amount under section 809(c)(1), and

(B) Treat any amount paid to the reinsured for the purchase of such contracts, to the extent such amount meets the requirements of section 162, as a deferred expense that may be amortized over the reasonably estimated life (as defined in paragraph (d)(2)(iv) of this section) of the contracts reinsured and treat the portion of the expense so amortized in each taxable year as a deduction under section 809(d)(12) irrespective of the taxable year in which such amount was paid to the reinsured.

(iii) For purposes of paragraph (d)(2)(ii) of this section where the reinsured transfers to the reinsurer in connection with the assumption reinsurance transaction a net amount which is less than the increase in the reinsurer's reserves resulting from the transaction, the reinsurer shall be treated as—

(A) Having received from the reinsured consideration in an amount equal to the net amount of the increase in the reinsurer's reserves resulting from the transaction, and

(B) Having paid the reinsured an amount for the purchase of the contracts equal to the excess of the amount of such increase in the reinsurer's reserves over the net amount received from the reinsured.

(iv) For purposes of this subparagraph, the term "reasonably estimated life" means the period during which the contract reinsured remains in force. Such period shall be based on the facts in each case (such as age, health, and sex of the insured, type of contract reinsured, etc.) and the assuming company's experience (such as mortality, lapse rate, etc.) with similar risks.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). On June 30, 1959, X, a life insurance company, reinsured a portion of its insurance contracts with Y, a life insurance company, under an agreement whereby Y agreed to assume and to become solely liable under the contracts reinsured. The reserves on the contracts reinsured by X were $100,000. Under the reinsurance agreement X agreed to pay Y $100,000 for assuming such contracts and Y agreed to pay X $17,000 for the right to receive future premium payments under this block of contracts. Rather than exchange payments of money, X agreed to pay Y a net amount of $83,000 in cash. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, that there are no other insurance transactions by X or Y during the taxable year, and assuming that X and Y compute the reserves on the contracts reinsured on the same basis, X has income of $100,000 under section 809(c)(2) as a result of the net decrease in its reserves. X has a net deduction of $83,000 ($100,000–$17,000) under section

809(d)(7). For the taxable year 1959, Y has income of $100,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of $100,000 under section 809(d)(2) for the net increase in reserves and $1,000 ($17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining $16,000 shall be amortized over the next 16 succeeding taxable years (16×$1,000=$16,000) under section 809(d)(12) at the rate of $1,000 for each such taxable year.

Example (2). The facts are the same as in example (1), except X agreed to pay Y a consideration of $100,000 in cash for assuming these contracts and Y paid X a bonus of $17,000 in cash and that this bonus meets the requirements of section 162. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, X has income of $100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of $83,000 under section 809(d)(7) for the amount of the consideration ($100,000) paid to Y for assuming these contracts, reduced by the bonus ($17,000) received from Y. For the taxable year 1959, Y has income of $100,000 under section 809(c)(1) as a result of the consideration received from X and deductions of $100,000 under section 809(d)(2) for the net increase in reserves and $1,000 (the bonus of $17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining amount of the bonus ($16,000) shall be amortized over the next 16 succeeding taxable years (16×$1,000=$16,000) under section 809(d)(12) at the rate of $1,000 for each such taxable year.

Example (3). The facts are the same as in Example (1), except that the reinsurance agreement does not specifically provide that X agreed to pay Y $100,000 for assuming the contracts reinsured and Y agreed to pay X $17,000 for the right to receive future premium payments under such contracts. Instead, X agreed to pay Y a net amount of $83,000 in cash for assuming such contracts. Nevertheless, Y is treated as having received from X consideration equal to $100,000, the amount of the increase in Y's reserves, and as having paid $17,000 ($100,000 less $83,000) for the purchase of such contracts. Therefore, for the taxable year 1959, Y has income of $100,000 under section 809(c)(1). Y also has a deduction of $100,000 under section 809(d)(2) for the net increase in its reserves and an amortization deduction under section 809(d)(12) of $1,000 ($17,000 divided by 17, the reasonably estimated life of the contracts reinsured). The remaining $16,000 shall be amortized by Y over the next 16 succeeding years at the rate of $1,000 for each such year. For 1959, X has income of $100,000 under section 809(c)(2) as a result of the net decrease in its reserves and a deduction of $83,000 under section 809(d)(7) for the net amount of consideration paid to Y for assuming the contracts reinsured.

Example (4). The facts are the same as in example (1), except that X agreed to pay Y a consideration of $130,000 in cash for assuming such contracts. Based upon these facts, X has income of $100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of $130,000 under section 809(d)(7) for the amount of the consideration paid to Y for assuming these contracts. Y has income of $130,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of $100,000 under section 809(d)(2) for the net increase in its reserves.

Example (5). On August 1, 1960, R, a life insurance company, reinsured all of its insurance policies with S, a life insurance company, under an agreement whereby S agreed to assume and become solely liable under the contracts reinsured. The reserves on the contracts reinsured by R were $3,000,000. Under the reinsurance agreement, R agreed to pay S a consideration of $3,000,000 in stocks and bonds for assuming such contracts. Assuming no other insurance transactions by R or S during the taxable year, that R and S compute the reserves on the contracts reinsured on the same basis, and that R has a recognized gain (after the application of the limitation of section 817(b)(1)) of $20,000 due to appreciation in value of the assets transferred, the results to each company are as follows:

Company R (reinsured)

Net decrease in reserves (sec. 809(c)(2))	$3,000,000
Capital gain (as limited by sec. 817(b)(1)) to be taxed separately under sec. 802(a)(2)	20,000
Consideration paid by R to S in respect of S's assuming liabilities under contracts issued by R (sec. 809(d)(7))	$3,000,000

INCOME

Company S (reinsurer)

Consideration received by S in respect of assuming liabilities under contracts issued by R (sec. 809(c)(1))	$3,000,000

DEDUCTIONS

Net increase in reserves (sec. 809(d)(2))	$3,000,000

[T.D. 6558, 26 FR 2783, April 4, 1961, as amended by T.D. 6625, 27 FR 12543, Dec. 19, 1962; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 41 FR 5100, Feb. 4, 1976]

§ 1.817–5T Diversification requirements for variable annuity, endowment, and life insurance contracts.

(a) In general. For purposes of subchapter L, section 72, and section 7702 (a), a variable contract (as defined in section 817(d)), other than a pension plan contract (as defined in section 818(a)), which is based on one or more segregated asset accounts shall not be treated as an annuity, endowment, or life insurance contract for any period for which the investments of any such account are not adequately diversified. In addition, a variable contract that is not treated as an annuity, endowment, or life insurance contract for any period by reason of the preceding sentence shall not be treated as an annuity, endowment, or life insurance contract for any subsequent period even if the investments are adequately diversified for such subsequent period. See sections 7702 (g) and (h) for the treatment of a variable contract which is not treated as an annuity, endowment, or life insurance contract for Federal income tax purposes but which is a life insurance or endowment contract under other applicable (e.g., State or foreign) law.

(b) Diversification of investments—(1) In general. (i) Except as otherwise provided in this paragraph and paragraph (c) of this section, the investments of a segregated asset account shall be considered adequately diversified for purposes of this section and section 817(h) only if—

(A) No more than 55% of the value of the total assets of the account is represented by any one investment;

(B) No more than 70% of the value of the total assets of the account is represented by any two investments;

(C) No more than 80% of the value of the total assets of the account is represented by any three investments; and

(D) No more than 90% of the value of the total assets of the account is represented by any four investments.

(ii) For purposes of this section—

(A) All securities of the same issuer, all interests in the same real property project, and all interests in the same commodity are each treated as a single investment;

(B) All government securities are treated as securities of a single issuer; and

(C) The members of an affiliated group (within the meaning of section 1504(a), determined without regard to the exceptions in section 1504(b)) ordinarily are treated as a single issuer.

(2) Safe harbor. A segregated asset account will be considered adequately diversified for purposes of this section and section 817(h) if—

(i) The account meets the requirements of section 851(b)(4) and the regulations thereunder; and

(ii) No more than 55% of the value of the total assets of the account is attributable to cash, cash items (including receivables), Government securities, and securities of other regulated investment companies.

(3) Alternative diversification requirements for variable life insurance contracts. (i) A segregated asset account with respect to variable life insurance contracts will be considered adequately diversified for purposes of this section and section 817(h) if the requirements of paragraph (b)(1) or (b)(2) of this section are satisfied or if the assets of such account, other than Treasury securities, satisfy the percentage limitations prescribed in paragraph (b)(1) of this section increased by the product of (A) .5 and (B) the percentage of the value of the total assets of the account that is represented by Treasury securities. In determining whether the assets of an account, other than Treasury securities, satisfy the increased percentage limitations, such limitations are applied as if the Treasury securities were not included in the account (i.e., the increased percentage limitations are not applied to Treasury securities and the value of the total assets of the account is reduced by the value of the Treasury securities).

(ii) See paragraphs (f) and (g) of this section for circumstances in which a segregated asset account is treated as the owner of Treasury securities held indirectly through certain pass-through entities and corporations taxed under Subchapter M, chapter 1 of the Code.

(iii) The provisions of this paragraph (b)(3) may be illustrated by the following examples:

Example (1). On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,-000. The assets of the account are represented by Treasury securities having a total value of $90,000 and securities of Corporation A having a total value of $10,000. The 55% limit described in paragraph (b)(1)(i) of this section would be increased by 45% (0.5×90%) to 100%, and would then be applied to the assets of the account other than Treasury securities. Because no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporation A, the investments of the account will be considered adequately diversified.

Example (2). On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,-000. The assets of the account are represented by Treasury securities having a total value of $60,000, securities of Corporation A having a total value of $30,000, and securities of Corporation B having a total value of $10,000. The 55% and 70% limits described in paragraph (b)(1)(i) of this section would be increased by 30% (0.5×60%) to 85% and 100%, respectively, and would then be applied to the assets of the account other than Treasury securities. Securities of Corporation A represent 75%, and securities of Corporation B represent 25%, of the value of the assets of the account other than Treasury securities. Because no more than 85% of the value of the assets other than Treasury securities is represented by securities of Corporation A or B and no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporations A and B, the investments of the account will be considered adequately diversified.

(c) Periods for which an account is adequately diversified—(1) In general. A segregated asset account that satisfies the requirements of paragraph (b) of this section on the last day of a quarter of a calendar year (i.e., March 31, June 30, September 30, and December 31) or within 30 days after such last day shall be considered adequately diversified for such quarter.

(2) Start-up period. (i) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is not a real property account on its first anniversary shall be considered adequately diversified until such first anniversary.

(ii) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is a real property account on its first anniversary shall

be considered adequately diversified until the earlier of its fifth anniversary or the anniversary on which the account ceases to be a real property account.

(iii) For purposes of paragraph (c)(2) (i) and (ii) of this section, the anniversary of a segregated asset account is the anniversary of the date on which any amount received under a life insurance or annuity contract is first allocated to the account.

(iv) If more than 30 percent of the amount allocated to a segregated asset account as of any date is attributable to premium and investment income that was received more than one year before such date, paragraph (c)(2)(i) of this section shall not apply to the segregated asset account for any period after such date. Similarly, if more than 30 percent of the amount allocated to a segregated asset account as of any date is attributable to premium and investment income that was received more than 5 years before such date, paragraph (c)(2)(ii) of this section shall not apply to the segregated asset account for any period after such date. For this purpose, premium income is treated as received on the date on which such income is first received with respect to the variable contract (or with respect to any predecessor variable contract exchanged for the variable contract in a transaction to which section 1035 applied) and investment income is treated as received on the date on which such income is first credited to a segregated asset account on which such variable contract (or predecessor contract) is based. Also for this purpose, an amount allocated to a segregated asset account shall be treated as attributable to the most recently received premium and investment income.

(3) **Liquidated period.** A segregated asset account that satisfies the requirements of paragraph (b) of this section on the date a plan of liquidation is adopted shall be considered adequately diversified for—

(i) The one-year period beginning on the date the plan of liquidation is adopted if the account is not a real property account on such date; or

(ii) The two-year period beginning on the date the plan of liquidation is adopted if the account is a real property account on such date.

(d) **Aggregation of multiple accounts or funds.** Two or more accounts or funds are treated as a single segregated asset account for purposes of section 817(h) and this section only if the investment return and market value of each such account or fund must be allocated to the same variable contracts and in the identical proportions as the investment return and market value of each other such account or fund. This rule may be illustrated by the following example:

Example. Variable contracts are based on an account that consists of five sub-accounts. The contract provides that policyholders of variable contracts based on the account may specify what portion of each premium is to be invested in a particular sub-account, subject to the restriction that no more than 55% of any premium may be invested in any one sub-account, no more than 70% may be invested in any two sub-accounts, no more than 80% may be invested in any three sub-accounts, and no more than 90% may be invested in any four sub-accounts. The return on a variable contract based on this account will be computed with regard to the allocation of premiums among the sub-accounts. Thus, the investment return and market value of a sub-account may be allocated to different variable contracts or in different proportions than the investment return and market value of the other sub-accounts. Accordingly, each sub-account is treated as a separate segregated asset account for purposes of section 817(h) and this section. If any of the five sub-accounts fails to be adequately diversified, any variable contract based in part on the sub-account will not be treated as a variable annuity or life insurance contract.

(e) **Market fluctuations.** A segregated asset account that satisfies the requirements of paragraph (b) of this section at the end of any calendar quarter (or within 30 days after the end of such calendar quarter) shall not be considered nondiversified in a subsequent quarter because of a discrepancy between the value of its assets and the diversification requirements unless such discrepancy exists immediately after the acquisition of any asset and such discrepancy is wholly or partly the result of such acquisition.

(f) **Look-through rule for underlying investment company or trust—(1) In general.** If this paragraph applies, a beneficial interest in a regulated investment company, a real estate investment trust, or a trust that is treated under sections 671 through 679 as owned by the grantor or another person ("investment company or trust") shall not be treated as a single investment of a segregated asset account. Instead, a pro rata portion of each asset of the investment company or trust shall be treated, for purposes of this section, as an asset of the segregated asset account. In the case of a regulated investment company having one or more segregated portfolios of assets in respect of which a series of stock is preferred over all other series, each segregated portfolio of assets will be treated solely for purposes of this paragraph as a separate regulated investment company.

(2) **Applicability.** This paragraph shall apply if—

(i) All the beneficial interests in the investment company or trust (other than those described in

paragraph (f)(3) of this section) are held by one or more segregated asset accounts of one or more insurance companies; and

(ii) Public access to such investment company or trust is available exclusively (except as otherwise permitted in paragraph (f)(3) of this section) through the purchase of a variable contract.

(3) Interests not held by segregated asset accounts. The application of this paragraph shall not be prevented by reason of beneficial interests in the investment company or trust that are—

(i) Held by the general account of a life insurance company or a corporation related in a manner specified in section 267(b) to a life insurance company, but only if the return on such interests is computed in the same manner as for the related variable contracts, there is no intent to sell such interests to the public, and a segregated asset account of such life insurance company also holds or will hold a beneficial interest in the investment company or trust;

(ii) Held by the manager, or a corporation related in a manner specified in section 267(b) to the manager, of the investment company or trust, but only if the holding of the interests is in connection with the creation or management of the investment company or trust, the return on such interests is computed in the same manner as for the related variable contracts, and there is no intent to sell such interests to the public;

(iii) Held by the trustee of a qualified pension or retirement plan; or

(iv) Held by the public, or treated as owned by policyholders pursuant to Rev. Rul. 81-225, 1981-2 C.B. 12, but only if (A) the investment company or trust was closed to the public in accordance with Rev. Rul. 82-55, 1982-1 C.B. 12, (B) all the assets of the investment company or trust are attributable to premium payments made by policyholders prior to September 26, 1981, or (C) all the assets of the investment company or trust are attributable to premium payments made in connection with a qualified pension or retirement plan.

(g) Look-through rule for underlying partnership interest. If a segregated asset account holds a partnership interest, other than a partnership interest registered under a Federal or State law regulating the offering or sale of securities, the segregated asset account will be deemed to own its proportionate share of each of the assets of the partnership. For purposes of this section, the interest of a partner in a partnership's assets shall be determined in accordance with his capital interest in the partnership.

(h) Definitions. The terms defined below shall, for purposes of this section, have the meanings set forth in such definitions:

(1) Government security. The term "government security" shall mean any security issued or (to the extent of the guaranteed or insured amount) guaranteed or insured by the United States or an instrumentality of the United States; or any certificate of deposit for any of the foregoing. For purposes of this paragraph (h)(1), an instrumentality of the United States shall mean any person that is treated for purposes of 15 U.S.C. 80a-2(16), as amended, as a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States.

(2) Treasury security. The term "Treasury security" shall mean a security the direct obligor of which is the United States Treasury.

(3) Real property. The term "real property" shall mean any property that is treated as real property under § 1.856-3 (d) except that it shall not include interests in real property.

(4) Real property account. A segregated asset account is a real property account on an anniversary of the account (within the meaning of paragraph (c)(2)(iii) of this section) or on the date a plan of liquidation is adopted if not less than the applicable percentage of the total assets of the account is represented by real property or interests in real property on such anniversary or date. For this purpose, the applicable percentage is 40% for the period ending on the first anniversary of the date on which premium income is first received, 50% for the year ending on the second anniversary, 60% for the year ending on the third anniversary, 70% for the year ending on the fourth anniversary, and 80% thereafter.

(5) Commodity. The term "commodity" shall mean any type of personal property other than a security.

(6) Security. The term "security" shall include a cash item and any partnership interest registered under a Federal or State law regulating the offering or sale of securities. The term shall not include any other partnership interest, any interest in real property, or any interest in a commodity.

(7) Interest in real property. The term "interest in real property" shall include the ownership and

coownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term shall not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term "interest in real property" also shall include options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(8) Interest in a commodity. The term "interest in a commodity" shall include the ownership and coownership of any type of personal property other than a security, and any leaseholds thereof. Such term shall include mineral, oil, and gas royalty interests, including any fractional undivided interest therein. Such term also shall include any put, call, straddle, option, or privilege on any type of personal property other than a security.

(9) Value. The term "value" shall mean, with respect to investments for which market quotations are readily available, the market value of such investments; and with respect to other investments, fair value as determined in good faith by the managers of the segregated asset account.

(10) Terms used in section 851. To the extent not inconsistent with this paragraph (h) all terms used in this section shall have the same meaning as when used in section 851.

(i) Effective date—(1) In general. This section is effective for taxable years beginning after December 31, 1983.

(2) Exceptions. (i) If, at all times after December 31, 1983, an insurance company would be considered the owner of the assets of a segregated asset account under the principles of Rev. Rul. 81-225, 1981-2 C.B. 12, this section will not apply to such account until December 15, 1986.

(ii) This section will not apply to any variable contract to which Rev. Rul. 77-85, 1977-1 C.B. 12, or Rev. Rul. 81-225, 1981-2 C.B. 12, did not apply by reason of the limited retroactive effect of such rulings.

(iii) In determining whether a segregated asset account is adequately diversified for any calendar quarter ending before July 1, 1987, debt instruments that are issued, guaranteed or insured by the United States or an instrumentality of the United States shall not be treated as Government securities if such debt instruments are secured by a mortgage on real property (other than real property owned by the United States or an instrumentality of the United States) or represent an interest in a pool of debt instruments secured by such mortgages.

[T.D. 7989, 49 FR 43052, Oct. 26, 1984; T.D. 8101, 51 FR 32633, Sept. 15, 1986]

§ 1.818–1 Taxable years affected.

Sections 1.818–2 through 1.818–8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2785, April 4, 1961, as amended by T.D. 7469, 42 FR 12181, March 3, 1977]

§ 1.818–2 Accounting provisions.

(a) Method of accounting. (1) Section 818(a)(1) provides the general rule that all computations entering into the determination of taxes imposed by part I, subchapter L, chapter 1 of the Code, shall be made under an accrual method of accounting. Thus, the over-all method of accounting for life insurance companies shall be the accrual method. Except as otherwise provided in part I, the term "accrual method" shall have the same meaning and application in section 818 as it does under section 446 (relating to general rule for methods of accounting) and the regulations thereunder. For general rules relating to the taxable year for inclusion of income and deduction of expenses under an accrual method of accounting, see sections 451 and 461 and the regulations thereunder.

(2) Section 818(a)(2) provides that, to the extent permitted under this section, a life insurance company's method of accounting may be a combination of the accrual method with any other method of accounting permitted by chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. Thus, section 818(a)(2) specifically prohibits the use by a life insurance company of the cash receipts and disbursements method either separately or in combination with a permissible method of accounting. The term "method of accounting" includes not only the over-all method of accounting of the taxpayer but also the accounting treatment of any item. For purposes of section 818(a)(2), a life insurance company may elect to compute its taxable income under an over-all method of accounting consisting of the accrual method combined with the special methods of accounting for particular items of income and expense provided under

other sections of chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. These methods of accounting for special items include the accounting treatment provided for depreciation (section 167), research and experimental expenditures (section 174), soil and water conservation expenditures (section 175), organizational expenditures (section 248), etc. In addition, a life insurance company may, where applicable, use the crop method of accounting (as provided in the regulations under sections 61 and 162), and the installment method of accounting for sales of realty and casual sales of personalty (as provided in section 453(b)). To the extent not inconsistent with the provisions of the Internal Revenue Code of 1954 or the regulations thereunder and the method of accounting adopted by the taxpayer pursuant to this section, all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(3)(i) An election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provisions of the Internal Revenue Code of 1954 or prior revenue laws for purposes of determining a company's tax liabilities for prior years, shall have the same force and effect in determining the items of gross investment income under section 804(b) and the items of deduction under section 804(c) of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) as if such Act had not been enacted.

(ii) For purposes of determining gain or loss from operations under section 809(b), in computing the life insurance company's share of investment yield under section 809(b)(1)(A) and (2)(A), an election with respect to any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provision of the Internal Revenue Code of 1954 or prior revenue laws, shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

(iii) For purposes of determining gain or loss from operations under section 809(b), in computing the items of gross amount under section 809(c) and the deduction items under section 809(d), an election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph must be made in accordance with the specific statutory provisions of the sections containing such elections and the regulations thereunder. However, where a particular election may be made only with the consent of the Commissioner (either because the time for making the election without the consent of the Commissioner has expired or because the particular section contained no provision for making an election without consent), and the time prescribed by the applicable regulations for submitting a request for permission to make such an election for the taxable year 1958 has expired, a life insurance company may make such an election for the year 1958 at the time of filing its return for that year (including extensions thereof). For example, a life insurance company may elect any of the methods of depreciation prescribed in section 167 (to the extent permitted under that section and the regulations thereunder) with respect to those assets, or any portion thereof, for which no depreciation was allowable under prior revenue laws, for example, furniture and fixtures used in the underwriting department. Similarly, a life insurance company shall be permitted to make an election under section 461(c) (relating to the accrual of real property taxes) with respect to real property for which no deduction was allowable under prior revenue laws. Any such election shall be made in the manner and form prescribed in the applicable regulations.

(iv) For purposes of subdivision (ii) of this subparagraph, the method used under section 1016(a)(3)(C) (relating to adjustments to basis) in determining the amount of exhaustion, wear and tear, obsolescence, and amortization actually sustained shall not preclude a taxpayer from electing any of the methods prescribed in section 167 in accordance with the provisions of that section and the regulations thereunder for determining the amount of such exhaustion, wear and tear, obsolescence, and amortization for the year 1958. For example, if the amount of depreciation actually sustained, under section 1016(a)(3)(C), on a life insurance company's home office building (other than that portion for which depreciation was allowable under prior revenue laws) is determined on the straight line method, the life insurance company may elect for the year 1958 to use any of the methods prescribed in section 167 for determining its depreciation allowance for 1958. However, such election shall be binding for 1958, and for all subsequent taxable years, unless consent to change such election, if required, is obtained from the Commissioner in accordance with the provisions of section 167 and the regulations thereunder.

(4)(i) For purposes of section 805(b)(3)(B)(i) (relating to the determination of the current earn-

ings rate for any taxable year beginning before January 1, 1958), the determination for any year of the investment yield and the assets shall be made as though the taxpayer had been on the accrual method prescribed in subparagraph (1) of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in determining the investment yield and assets for the taxable year 1958. However, where the method used for determining the deduction under section 167 for the year 1958 differs from the method used in prior years, the amount of the deduction actually allowed or allowable for such prior years for purposes of section 1016(a)(2) (relating to adjustments to basis) shall be the amount to be taken into account in determining the current earnings rate under section 805(b)(3)(B)(i).

(ii) For purposes of section 812(b)(1)(C) (relating to operations loss carrybacks and carryovers for years prior to 1958), the determination for those years of the gain or loss from operations shall be made as though the taxpayer had been on the accrual method of accounting prescribed in subparagraph (1) of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in the determination of gain or loss from operations for the taxable year 1958. However, where any adjustment to basis is required under section 1016(a)(3)(C) on account of exhaustion, wear and tear, obsolescence, amortization, and depletion sustained, the amount actually sustained as determined under section 1016(a)(3)(C) for each of the years involved shall be the amount allowed in the determination of gain or loss from operations for purposes of section 812(b)(1)(C).

(b) Adjustments required if accrual method of accounting was not used in 1957. The items of gross amount taken into account under section 809(c) and the items of deductions allowed under section 809(d) for the taxable year 1958 shall be determined as though the taxpayer had been on the accrual method of accounting prescribed in paragraph (a) of this section for all prior years. Thus, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957, those items of gross amount which would have been properly taken into account for the year 1957 if the company had been on the accrual method described in section 818(a). Likewise, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957, those items of deductions which would have been properly allowed for the year 1957 if the company had been on the accrual method described in section 818(a). For example, if certain premium amounts were received during the year 1958 but such amounts would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be required to take such premium amounts into account for the year 1958. If, for example, certain claims, benefits, and losses were paid during the year 1958 but such items would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be permitted to deduct such expense items for the year 1958. For a special transitional rule applicable with respect to changes in method of accounting required by section 818(a) and paragraph (a) of this section, see section 818(e) and § 1.818–6.

(c) Change of basis in computing reserves. (1) Section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then for purposes of subpart B, part I, subchapter L, chapter 1 of the Code (relating to the determination of taxable investment income), the amount of such item shall be the amount computed on the old basis as of the close of the taxable year and the amount computed on the new basis as of the beginning of the next taxable year. Similarly, section 810(d)(1) provides rules for determining the amount of the adjustment to be made for purposes of Subpart C, Part I, Subchapter L, Chapter 1 of the Code (relating to the determination of gain or loss from operations), if the basis for determining any item referred to in section 810(c) as of the close of any taxable year differs from the basis for such determination as of the close of the preceding taxable year. Under an accrual method of accounting, a change in the basis or method of computing the amount of liability of any item referred to in section 810(c) occurs in the taxable year in which all the events have occurred which determine the change in the basis or method of computing the amount of such liability and, in which, the amount thereof (whether increased or decreased) can be determined with reasonable accuracy.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). Assume that during the taxable year 1960, M, a life insurance company, determines that the amount of its life insurance reserves held with respect to a particular block of contracts is understated on the present basis being used in valuing such liability and that such liability can be more accurately reflected by changing from the present basis to a particular new basis. Assume that M uses such new basis in computing its reserves under such contracts at the end of the taxable year 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine the change in basis and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy. Such change shall be treated as having occurred during the taxable year 1960 whether M determines that its liability under such contracts was understated for the first time during 1960, or that its liability under such contracts has, in fact, been understated for a number of prior years.

Example (2). Assume the facts are the same as in example (1), except that during the taxable year 1960 the insurance department of State X issues a ruling, pursuant to authority conferred by statute, requiring M to use the particular new basis which more accurately reflects its liability with respect to such contracts and that as a result of such ruling, M uses the new basis in computing its reserves under such contracts for the taxable years 1958, 1959, and 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine that a change in basis should be made and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy.

[T.D. 6558, 26 FR 2785, April 4, 1961]

§ 1.818–3 Amortization of premium and accrual of discount.

(a) In general. Section 818(b) provides that the appropriate items of income, deductions, and adjustments under Part I, Subchapter L, Chapter 1 of the Code, shall be adjusted to reflect the appropriate amortization of premium and the appropriate accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. The adjustment for accrual of discount increases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. However, for taxable years beginning after May 31, 1960, only the accrual of discount relating to issue discount will increase the exclusion and reduction for wholly tax-exempt interest. See section 103.

(b) Acquisitions before January 1, 1958. (1) In the case of any such security acquired before January 1, 1958, the premium is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, its then fair market value. The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(2) The adjustments for amortization of premium and accrual of discount will be determined—

(i) According to the method regularly employed by the company, if such method is reasonable, or

(ii) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(3) The method of amortization and accrual prescribed by this section is as follows:

(i) The premium (or discount) shall be determined in accordance with this section; and

(ii) The appropriate amortization of premium (or accrual of discount) attributable to the taxable year shall be an amount which bears the same ratio to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For purposes of this section, a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered a month.

(c) **Acquisitions after December 31, 1957.** (1) In the case of—

(i) Any bond, as defined in section 171(d), acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under section 171(b) and the regulations thereunder, as if the election set forth in section 171(c) had been made, and

(ii) Any bond, note, debenture, or other evidence of indebtedness not described in subdivision (i) of this subparagraph and acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under paragraph (b) of this section.

(2) In the case of any bond, note, debenture, or other evidence of indebtedness acquired after December 31, 1957, the amount of the discount and the accrual of discount attributable to the taxable year shall be determined under paragraph (b) of this section.

(d) **Convertible evidences of indebtedness.** Section 818(b)(2)(B) provides that in no case shall the amount of premium on a convertible evidence of indebtedness (including any bond, note, or debenture) include any amount attributable to the conversion features of the evidence of indebtedness. This provision is the same as the one contained in section 171(b), and the rules prescribed in paragraph (c) of § 1.171–2 shall be applicable for purposes of section 818(b)(2)(B). This provision is to be applied without regard to the date upon which the evidence of indebtedness was acquired. Thus, where a convertible evidence of indebtedness was acquired before January 1, 1958, and a portion or all of the premium attributable to the conversion features of the evidence of indebtedness has been amortized for taxable years beginning before January 1, 1958, no adjustment for such amortization will be required by reason of section 818(b)(2)(B). Such amortization will, however, require an adjustment to the basis of the evidence of indebtedness under section 1016(a)(17). For taxable years beginning after December 31, 1957, no further amortization of the premium attributable to the conversion features of such an evidence of indebtedness will be taken into account.

(e) **Adjustments to basis.** Section 1016(a)(17) (relating to adjustments to basis) provides that in the case of any evidence of indebtedness referred to in section 818(b) and this section, the basis shall be adjusted to the extent of the adjustments required under section 818(b) (or the corresponding provisions of prior income tax laws) for the taxable year and all prior taxable years. The basis of any evidence of indebtedness shall be reduced by the amount of the adjustment required under section 818(b) (or the corresponding provision of prior income tax laws) on account of amortizable premium and shall be increased by the amount of the adjustment required under section 818(b) on account of accruable discounts.

(f) **Denial of double inclusion.** Any amount which is includible in gross investment income by reason of section 818(b) and paragraph (a) of this section shall not be includible in gross income under section 1232(a) (relating to the taxation of bonds and other evidences of indebtedness). See section 1232(a)(2)(C) and the regulations thereunder.

[T.D. 6558, 26 FR 2786, April 4, 1961]

§ 1.818–4 Election with respect to life insurance reserves computed on preliminary term basis.

(a) **In general.** Section 818(c) permits a life insurance company issuing contracts with respect to which the life insurance reserves are computed on one of the recognized preliminary term bases to elect to revalue such reserves on a net level premium basis for the purpose of determining the amount which may be taken into account as life insurance reserves for purposes of part I, Subchapter L, Chapter 1 of the Code, other than section 801 (relating to the definition of a life insurance company). If such an election is made, the method to be used in making this revaluation of reserves shall be either the exact revaluation method (as described in section 818(c)(1) and paragraph (b)(1) of this section) or the approximate revalua-

tion method (as described in section 818(c)(2) and paragraph (b)(2) of this section).

(b) Revaluation of reserves computed on preliminary term basis. If a life insurance company makes an election under section 818(c) in the manner provided in paragraph (e) of this section, the amount to be taken into account as life insurance reserves with respect to contracts for which such reserves are computed on a preliminary term basis may be determined on either of the following bases:

(1) Exact revaluation method. As if the reserves for all such contracts had been computed on a net level premium basis (using the same mortality or morbidity assumptions and interest rates for both the preliminary term basis and the net level premium basis).

(2) Approximate revaluation method. The amount computed without regard to section 818(c)—

(i) Increased by $21 per $1,000 of insurance in force (other than term insurance) under such contracts, less 2.1 percent of reserves under such contracts, and

(ii) Increased by $5 per $1,000 of term insurance in force under such contracts which at the time of issuance cover a period of more than 15 years, less 0.5 percent of reserves under such contracts.

(c) Exception. If a life insurance company which makes an election under section 818(c)(2) and paragraph (b)(2) of this section has life insurance reserves with respect to both life insurance and noncancellable accident and health contracts for which such reserves are computed on a preliminary term basis, it shall use the approximate revaluation method for all its life insurance reserves other than that portion of such reserves held with respect to its noncancellable accident and health contracts, and shall use the exact revaluation method for all its life insurance reserves held with respect to such noncancellable accident and health contracts.

(d) Reserves subject to recomputation. (1) For the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the end of such taxable year on the basis elected under section 818(c) and paragraph (b) of this section. However, for purposes of the preceding sentence, an election under section 818(c) shall not apply with respect to such reserves which would not be treated as being computed on the preliminary term basis at the end of such taxable year except for the provisions of section 810(a) or (b). See paragraph (c)(2) of § 1.810–2. For example, if S, a life insurance company which computes its life insurance reserves on a recognized preliminary term basis at the beginning of the taxable year 1958, strengthens a portion of such reserves during the taxable year by actually changing to a net level premium basis in computing such reserves, and then makes the election under section 818(c) and paragraph (b) of this section for 1958, such election shall not apply with respect to the strengthened contracts.

(2) For any taxable year other than the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the beginning or end of the taxable year on the basis elected under section 818(c) and paragraph (b) of this section. For example, if M, a life insurance company which made a valid outstanding election under section 818(c) in the manner provided in paragraph (e) of this section for the taxable year 1959, sells a block of contracts subject to such election on September 1, 1960, M would value such contracts on the basis elected under section 818(c) and paragraph (b) of this section on January 1, 1960, for purposes of determining the net decrease or increase in the sum of the items described in section 810(c) for the taxable year under section 810 (a) or (b).

(3) For the effect of an election under section 818(c) and paragraph (b) of this section in determining gain or loss from operations for the taxable year, see paragraph (c)(3) of § 1.810–2 and paragraph (e) of § 1.810–3.

(e) Time and manner of making election. The election provided by section 818(c) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before April 4, 1961, the election provided by section

818(c) may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before July 4, 1961. The statement shall indicate whether the exact or the approximate method of revaluation has been adopted. The statement shall also set forth sufficient information as to mortality and morbidity assumptions; interest rates; the valuation method used; the amount of the reserves and the amount and type of insurance in force under all contracts for which reserves are computed on a preliminary term basis; and such other pertinent data as will enable the Commissioner to determine the correctness of the application of the revaluation method adopted and the accuracy of the computations involved in revaluing the reserves. The election to use either the exact revaluation method or the approximate revaluation method shall, except for the purposes of section 801, be adhered to in making the computations under part I for the taxable year for which such election is made and for all subsequent taxable years.

(f) Scope of election. An election made under section 818(c) and paragraph (b) of this section to use either the exact or the approximate method of revaluing the company's life insurance reserves shall be binding for the taxable year for which made, and, except as provided in paragraph (g) of this section, shall be binding for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 818(c) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(g) Special rule for 1958. If an election is made for a taxable year beginning in 1958 to use the approximate revaluation method described in section 818(c)(2) and paragraph (b)(2) of this section the company may, for its first taxable year beginning after 1958, elect to change to the exact revaluation method described in section 818(c)(1) and paragraph (b)(1) of this section without obtaining the consent of the Commissioner. In such case, the election to change shall be made in a statement attached to the company's income tax return for such taxable year and filed not later than the date prescribed by law (including extensions thereof) for filing the return for such year. The statement shall indicate that the company has elected to change from the approximate to the exact revaluation method for such taxable year and shall include such information and data referred to in paragraph (e) of this section as will enable the Commissioner to determine the correctness and accuracy of the computations involved.
[T.D. 6558, 26 FR 2787, April 4, 1961; 26 FR 3276, April 18, 1961]

§ 1.818–5 Short taxable years.

(a) In general. Section 818(d) provides that if any return of a corporation made under Part I, Subchapter L, Chapter 1 of the Code, is for a period of less than the entire calendar year, then section 443 (relating to returns for a period of less than 12 months) shall not apply. This section further provides certain rules to be used in determining the life insurance company taxable income for a period of less than the entire calendar year.

(b) Returns for periods of less than the entire calendar year. A return for a short period, that is, for a taxable year consisting of a period of less than the entire calendar year, shall be made only under the following circumstances:

(1) If a company which qualifies as a life insurance company is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence. For example, a life insurance company organized on August 1, is required to file a return for the short period from August 1 to December 31, and returns for each calendar year thereafter. Similarly, if a company which qualifies as a life insurance company completely dissolves during the taxable year it is required to file a return for the short period from January 1 to the date it goes out of existence. All items entering into the computation of taxable investment income and gain or loss from operations for the short period shall be determined on a consistent basis and in the manner provided in paragraph (c) of this section.

(2) A return must be filed for a short period resulting from the termination by the district director of a taxpayer's taxable year for jeopardy. See section 6851 and the regulations thereunder.

A company which was an insurance company for the preceding taxable year (but not a life insurance company as defined in section 801(a) and paragraph (b) of § 1.801–3) and which for the current taxable year qualifies as a life insurance company shall not file a return for the short period from the time during the taxable year that it first qualifies as a life insurance company to the end of the

taxable year. Similarly, an insurance company which was a life insurance company for the preceding taxable year but which for the current taxable year does not qualify as a life insurance company shall not file a return for the short period from the beginning of the taxable year to the time during the taxable year that it no longer qualifies as a life insurance company.

(c) Computation of life insurance company taxable income for short period. (1) If a return is made for a short period, section 818(d)(1) provides that the taxable investment income and the gain or loss from operations shall be determined on an annual basis by a ratable daily projection of the appropriate figures for the short period. The appropriate figures for the short period shall be determined on an annual basis by multiplying such figures by a fraction, the numerator of which is the number of days in the calendar year in which the short period occurs and the denominator of which is the number of days in the short period.

(2)(i) In computing taxable investment income for a short period, the investment yield, the policy and other contract liability requirements, the policyholders' share of each and every item of investment yield, and the company's share of any item of investment yield shall be determined on an annual basis.

(ii) For purposes of determining the investment yield on an annual basis, each item of gross investment income under section 804(b) and each item of deduction under section 804(c) shall be annualized in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 804(c), the limitation shall apply to the item of deduction computed on an annual basis.

(iii) The policy and other contract liability requirements shall be determined on an annual basis in the following manner:

(a) The interest paid (as defined in section 805(e) and § 1.805-8) for the short period shall be annualized in the manner prescribed in subparagraph (1) of this paragraph.

(b) The current earnings rate for the taxable year in which the short period occurs shall be determined by dividing the taxpayer's investment yield, as determined on an annual basis under subdivision (ii) of this subparagraph, by the means of the taxpayer's assets at the beginning and end of the short period. For purposes of section 805, any reference to the current earnings rate for the taxable year in which the short period occurs means the current earnings rate as determined under this subdivision.

(c) The adjusted life insurance reserves shall be determined as provided in section 805(c), and the pension plan reserves shall be determined as provided in section 805(d).

(iv) The policyholders' share of each and every item of investment yield (as defined in section 804(a)) shall be that percentage obtained by dividing the policy and other contract liability requirements, determined under subdivision (iii) of this subparagraph, by the investment yield, determined under subdivision (ii) of this subparagraph.

(v) The taxable investment income for the short period shall be an amount (not less than zero) equal to the life insurance company's share of each and every item of investment yield, as determined under subdivision (ii) of this subparagraph, reduced by the items described in section 804(a)(2)(A) and (B). In determining these reductions under section 804(a)(2)(A) the amount of the respective items shall be the amount that is determined on an annual basis under subdivision (ii) of this subparagraph. The small business deduction, under section 804(a)(2)(B) shall be an amount (not to exceed $25,000) equal to 10 percent of the investment yield, determined under subdivision (ii) of this subparagraph, for the short period.

(vi) Except as provided in this paragraph, the determination of taxable investment income under Subpart B, Part I, Subchapter L, Chapter 1 of the Code, shall be made in accordance with all the provisions of that subpart.

(3)(i) In computing gain or loss from operations for a short period, the share of each and every item of investment yield set aside for policyholders, the life insurance company's share of each and every item of investment yield, the items of gross amount, and the items of deduction shall, except as modified by this subparagraph, be determined on an annual basis in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 809, the limitation shall apply to the item of deduction computed on an annualized basis.

(ii) For purposes of sections 809 and 810, the investment yield shall be determined in the manner provided in subparagraph (2)(ii) of this paragraph. The share of any item of investment yield set aside for policyholders shall be that percentage obtained by dividing the required interest as deter-

mined under section 809(a)(2), by the investment yield, as determined in this subparagraph, except that if the required interest exceeds the investment yield then the share of any item of investment yield set aside for policyholders shall be 100 percent.

(iii) The items of gross amount and the items of deduction, other than the operations loss deduction under section 809(d)(4), shall be determined on an annual basis. See subdivision (iv) of this subparagraph for the manner in which the net decrease or net increase in reserves under section 810 shall be annualized.

(iv) For purposes of determining either a net decrease in reserves under section 810(a) or a net increase in reserves under section 810(b), the sum of the items described in section 810(c) as of the end of the short period shall be reduced by the amount of the investment yield not included in gain or loss from operations for the short period by reason of section 809(a)(1). The amount of investment yield excluded under section 809(a)(1) has been determined upon an annualized basis while the sum of the items described in section 180(c) at the end of the short period has been determined on an actual basis. In order to place these on the same basis, the amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1), determined under subdivision (ii) shall, for purposes of section 810(a) and section 810(b), be reduced to an amount which bears the same ratio to the full amount as the number of days in the short period bears to the number of days in the entire calendar year. The net decrease or the net increase of the items referred to in section 810(c) for the short period shall then be determined, as provided in section 810(a) and section 810(b), respectively, and the result annualized.

(4) The portion of the life insurance company taxable income described in section 802(b)(1) and (2) (relating to taxable investment income and gain or loss from operations) shall be determined on an annual basis by treating the amounts ascertained under subparagraph (2) of this paragraph as the taxable investment income, and the amount ascertained under subparagraph (3) of this paragraph as the gain or loss from operations, for the taxable year.

(5) The portion of the life insurance company taxable income described in section 802(b)(1) and (2) for the short period shall be the amount which bears the same ratio to the amount ascertained under section 818(d)(2) and subparagraph (4) of this paragraph as the number of days in the short period bears to the number of days in the entire year.

(d) **Special rules.** (1) For purposes of determining the average earnings rate (as defined in section 805(b)(3)) for subsequent taxable years, the current earnings rate for the taxable year in which the short period occurs shall be the rate determined under paragraph (c)(2) of this section.

(2) For purposes of determining an operations loss deduction under section 812, the loss from operations for the short period shall be the loss from operations determined under paragraph (c)(5) of this section.

[T.D. 6558, 26 FR 2788, April 4, 1961]

§ 1.818-6 Transitional rule for change in method of accounting.

(a) **In general.** Section 818(e) prescribes the rules to be followed in recomputing the taxes of a life insurance company for the taxable year 1957 in cases where the method of accounting required to be used in computing the company's taxes for 1958 under section 818(a) and paragraph (a) of § 1.818-2 is different from the method used in 1957.

(b) **Recomputation of 1957 taxes.** (1) For purposes of recomputing its taxes for 1957, a life insurance company must ascertain the net amount of those adjustments which are determined (as of the close of 1957) to be necessary solely by reason of the change to the method of accounting required by section 818(a) and paragraph (a) of § 1.818-2 in order to prevent amounts from being duplicated or omitted. Thus, for example, life insurance companies not on the accrual method of accounting for the year 1957 shall accrue, as of December 31, 1957, those items of gross investment income under section 803(b) and those items of deduction under section 803(c), as in effect for 1957, which would have been properly accruable for the year 1957 if the company had been on the accrual method of accounting.

(2) In the case of a change in the over-all method of accounting, the term "net amount of those adjustments" means the consolidation of adjustments (whether the amounts thereof represent increases or decreases in items of income or deductions) arising with respect to balances in the various accounts on December 31, 1957. In the case of a change in the treatment of a single material item, the amount of the adjustment shall be determined with reference only to the net dollar balances in that particular account.

(3)(i) The amount of the taxpayer's tax for 1957 shall be recomputed (under the law applicable to 1957, modified as provided in section 818(e)(4) and paragraph (e) of this section) by taking into account an amount equal to one-tenth of the net amount of the adjustments determined under subparagraph (1) of this paragraph. The increase or decrease in tax attributable to the adjustments for such year is the difference between the tax for such year computed with the allocation of one-tenth of the net amount of the adjustments to such taxable year over the tax computed without the allocation of any part of the adjustments to such year.

(ii) The amount of increase or decrease (as the case may be) referred to in section 818(e)(2) or (3) and paragraphs (c) or (d) of this section, shall be the amount of the increase or decrease in tax ascertained in the manner described in subdivision (i) of this subparagraph, multiplied by 10.

(c) Treatment of decrease. Section 818(e)(2) provides that for purposes of Subtitle F of the Code, if the recomputation under paragraph (b)(3)(ii) of this section results in a decrease, the amount of such decrease shall be treated as a decrease in the tax imposed for 1957; except that for purposes of computing the period of limitation on the making of refunds or the allowance of credits with respect to such overpayments, the amount of such decrease shall be treated as an overpayment of tax for 1959. No interest shall be paid, for any period before March 16, 1960, on any overpayment of the tax imposed for 1957 which is attributable to such decrease.

(d) Treatment of increase—(1) In general. Section 818(e)(3)(A) provides that for purposes of Subtitle F of the Code, other than section 6016 (relating to declarations of estimated income tax by corporations) and section 6655 (relating to failure by corporations to pay estimated income tax), if the recomputation under paragraph (b)(3)(ii) of this section results in an increase, the amount of such increase shall be treated as a tax imposed for 1959. Such tax shall be payable in 10 equal annual installments, beginning with March 15, 1960.

(2) Special rules. Section 818(e)(3)(B) provides that for purposes of section 818(e)(3)(A) and subparagraph (1) of this paragraph—

(i) No interest shall be paid on any installment described in section 818(e)(3)(A) and subparagraph (1) of this paragraph before the time prescribed therein for the payment of such installment.

(ii) Section 6152(c) (relating to proration of deficiencies to installments) and the regulations thereunder shall apply. However, section 6152(a) (relating to the election to make installment payments) and the regulations thereunder shall not apply.

(iii) In applying section 6502(a)(1) (relating to collection after assessment) and the regulations thereunder, the assessment of any installment described in section 818(e)(3)(A) and subparagraph (1) of this paragraph shall be treated as made at the time prescribed therein for the payment of such installment.

(iv) If for any taxable year the taxpayer is not a life insurance company, the amount of the increase in tax (as determined under paragraph (b)(3)(ii) of this section), to the extent not taken into account for prior taxable years, shall be payable on the date the return for such taxable year is due (determined without regard to any extensions of time for filing such return), unless such amount is required to be taken into account by the acquiring corporation under section 381(c)(22) and the regulations thereunder.

(e) Modifications of 1957 tax computation. Section 818(e)(4) provides that in recomputing the taxpayer's tax for 1957 for purposes of section 818(e)(1) and paragraph (b) of this section—

(1) Section 804(b), as in effect for 1957 (relating to the maximum reserve and other policy liability deduction), shall not apply with respect to any amount required to be taken into account by reason of section 818(e)(1) and paragraph (b) of this section; and

(2) The amount of the deduction allowed by section 805, as in effect for 1957 (relating to the special interest deduction), shall not be reduced by reason of any amount required to be taken into account under section 818(e)(1) and paragraph (b) of this section.

(f) Illustration of principles. The application of section 818(e) and this section may be illustrated by the following examples:

Example (1). For the taxable year 1957, the life insurance taxable income of M, a life insurance company, is $200,000 computed on the cash receipts and disbursements method of accounting. The net amount of the adjustments required under section 818(e)(1) by reason of the change to the accrual method of accounting for 1958, increases M's life insurance taxable income for 1957 by $50,000. The increase in tax attributable to the change in method of accounting required by section 818(a) is $26,000, computed as follows:

(1) Life insurance taxable income before adjustments	$200,000

(2) Adjustments required by sec. 818(e)(1) (1/10 × $50,000)	5,000
(3) Life insurance taxable income after adjustments (item (1) plus item (2))	205,000
(4) Tax liability after adjustments (52% × $205,000, minus $5,500)	101,100
(5) Tax liability before adjustments (52% × $200,000, minus $5,500)	98,500
(6) Excess of item (4) over item (5)	2,600
(7) Increase in tax for purposes of sec. 818(e)(3) (item (6) multiplied by 10)	26,000

Under the provisions of section 818(e)(3), one-tenth of the increase in tax for 1957 attributable to the change in method of accounting required by section 818(a), $2,600 ($\frac{1}{10}$×$26,000), was due and payable on March 15, 1960, and the balance, $23,400 ($\frac{9}{10}$×$26,000), is due and payable in equal installments on March 15th of the nine succeeding taxable years. However, if for the taxable year 1965, M is no longer a life insurance company, and section 381(c)(22) does not apply, the balance of the installments not paid in prior taxable years, $10,400 ($\frac{4}{10}$×$26,000), shall be due and payable on March 15, 1966.

Example (2). Assume the facts are the same as in example (1), except that the net amount of the adjustments required by section 818(e)(1) decreases M's life insurance taxable income for 1957 by $25,000. The decrease in tax attributable to the change in method of accounting required by section 818(a) is $13,000, computed as follows:

(1) Life insurance taxable income before adjustments	$200,000
(2) Adjustments required by sec. 818(e)(1) (1/10 × $25,000)	2,500
(3) Life insurance taxable income after adjustments (item (1) minus item (2))	197,500
(4) Tax liability after adjustments (52% × $197,500, minus $5,500)	97,200
(5) Tax liability before adjustments (52% × $200,000, minus $5,500)	98,500
(6) Excess of item (5) over item (4)	1,300
(7) Decrease in tax for purposes of sec. 818(e)(2) (item (6) multiplied by 10)	13,000

Under the provisions of section 818(e)(2), the entire $13,000 decrease in tax for 1957 attributable to the change in method of accounting required by section 818(a) shall be treated as an overpayment of tax for the taxable year 1959.

[T.D. 6558, 26 FR 2789, April 4, 1961]

§ 1.818–7 Denial of double deductions.

Section 818(f) provides that the same item may not be deducted more than once under Subpart B, Part I, Subchapter L, Chapter 1 of the Code (relating to the determination of taxable investment income), and more than once under subpart C, Part I, Subchapter L, Chapter 1 of the Code (relating to the determination of gain or loss from operations).

[T.D. 6558, 26 FR 2790, April 4, 1961]

§ 1.818–8 Special rules relating to consolidated returns and certain capital losses.

Section 818(g) provides that, in the case of a life insurance company filing or required to file a consolidated return under section 1501 for a taxable year, the computations of the policyholders' share of investment yield under Subparts B and C, Part I, Subchapter L, Chapter 1 of the Code (including all determinations and computations incident thereto) shall be made as if such company were not filing a consolidated return. Thus, for example, if X and Y are life insurance companies which are entitled to file a consolidated return for 1975 and X has paid dividends to Y during such taxable year, Y must include such dividends in the computation of gross investment income under section 804(b). For other rules relating to the filing of consolidated returns, see sections 1501 through 1504 and the regulations thereunder.

[T.D. 7469, 42 FR 12181, March 3, 1977]

§ 1.819–1 Taxable years affected.

Section 1.819–2 is applicable only to taxable years beginning after December 31, 1957, and all references to sections of Part I, Subchapter L, Chapter 1 of the Code, are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2791, April 4, 1961]

§ 1.819–2 Foreign life insurance companies.

(a) Carrying on United States insurance business. Section 819(a) provides that a foreign life insurance company carrying on a life insurance business within the United States, if with respect to its United States business it would qualify as a life insurance company under section 801, shall be taxable on its United States business under section 802 in the same manner as a domestic life insurance company. Thus, the life insurance company taxable income of such a foreign life insurance company shall not be determined in the manner provided by Part I, Subchapter N, Chapter 1 of the Code (relating to determination of sources of income), but shall be determined in the manner provided by Part I, Subchapter L, Chapter 1 of the Code (relating to life insurance companies). See section 842. Accordingly, in determining its life insurance company taxable income from its United States business, such a foreign life insurance company shall take into account the appropriate items of income irrespective of whether such items of income are from sources within or without the United States. A foreign life insurance company shall take into account the appropriate items of expenses, losses, and other deductions properly allocable to such items of income from its United

States business. To the extent not inconsistent with the provisions of this paragraph, section 818(a), and section 819(b), all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(b) Adjustment where surplus held in the United States is less than specified minimum—(1) In general. Section 819(b)(1) provides that if the minimum figure for the taxable year determined under section 819(b)(2) and subparagraph (2)(i) of this paragraph exceeds the surplus held in the United States as of the end of the taxable year (as defined in section 819(b)(2)(B) and subparagraph (2)(ii) of this paragraph) by a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, then—

(i) The amount of the policy and other contract liability requirements (determined under section 805 and § 1.805–4 without regard to this subparagraph), and

(ii) The amount of the required interest (determined under section 809(a)(2) and paragraph (d) of § 1.809–2 without regard to this subparagraph),

shall each be reduced by an amount determined by multiplying such excess by the current earnings rate (as defined in section 805(b)(2) and paragraph (a)(2) of § 1.805–5) of such company. Such current earnings rate shall be determined by reference to the assets held by the company in the United States.

(2) Definitions. For purposes of section 819(b)(1) and subparagraph (1) of this paragraph—

(i) The term "minimum figure", in the case of a taxable year beginning after December 31, 1957, but before January 1, 1959, means the amount obtained by multiplying the company's total insurance liabilities on United States business by 9 percent. In the case of any taxable year beginning after December 31, 1958, such term means the amount obtained by multiplying the company's total insurance liabilities on United States business by the percentage determined and proclaimed by the Secretary as being applicable for such year.

(ii) The term "surplus held in the United States" means the excess of the assets held in the United States (as of the end of the taxable year) over the total insurance liabilities on United States business (as of the end of the taxable year).

(iii) The term "total insurance liabilities" means the sum of the total reserves (as defined in section 801(c) and paragraph (a) of § 1.801–5) as of the end of the taxable year plus (to the extent not included in total reserves) the items referred to in section 810(c)(3), (4), and (5) of paragraph (b)(3), (4), and (5) of § 1.810–2 as of the end of the taxable year; and

(iv) The term "assets" shall have the same meaning as that contained in section 805(b)(4) and paragraph (a)(4) of § 1.805–5.

(3) Illustration of principles. The provisions of section 819(b) and this paragraph may be illustrated by the following example:

Example. For the taxable year 1958, P, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has total insurance liabilities on United States business (as of the end of the taxable year) of $940,000, assets held in the United States of $1,000,000 (as of the end of the taxable year), policy and other contract liability requirements in the amount of $30,000 required interest in the amount of $20,000, and a current earnings rate of 4 percent. In order to determine whether section 819(b) applies for the taxable year 1958, P must first compute its minimum figure, for if the minimum figure is less than the surplus held in the United States (as of the end of the taxable year), no section 819(b) adjustments need be made. Since the minimum figure, $84,600 ($940,000, the total insurance liabilities on United States business multiplied by 9 percent, the percentage applicable for 1958), exceeds the surplus held in the United States, $60,000 (the excess of the assets held in the United States, $1,000,000, over the total insurance liabilities on United States business, $940,000), by $24,600, section 819(b) applies for the taxable year 1958. Thus, the amount of the policy and other contract liability requirements, $30,000, and the amount of the required interest, $20,000, shall each be reduced by $984 ($24,600, the amount of such excess, multiplied by 4 percent, the current earnings rate).

(4) Segregated asset accounts. For taxable years beginning after December 31, 1967, pursuant to the provisions of section 801(g)—

(i) A foreign corporation carrying on a life insurance business which issues contracts based on segregated asset accounts shall separately compute in a manner consistent with this subparagraph the adjustment (if any) under section 819 to the amount of policy and other contract liability requirements and the amount of required interest properly attributable to each of such segregated asset accounts. The "minimum figure" used in section 819 in making the adjustment with respect to each of the segregated asset accounts shall be computed as provided in subdivision (ii) of this subparagraph in lieu of the manner provided in subparagraphs (1), (2), and (3) of this paragraph.

(ii) The minimum figure applicable to a segregated asset account referred to in subdivision (i) of

this subparagraph is the amount determined by multiplying the total insurance liabilities on U.S. business attributable to such a segregated asset account, by 1 percent.

(iii) The minimum figure as computed under subdivision (ii) of this subparagraph shall be compared only with the surplus held in the United States attributable to each segregated asset account referred to in subdivision (i) of this subparagraph. Such surplus is the excess of assets held in the United States properly attributable to such segregated asset account over the total insurance liabilities on U.S. business properly attributable to such account.

(iv) If the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States attributable to such other accounts, for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the company's overall excess, as defined in this subdivision. No adjustment under section 819 or this paragraph shall be made with respect to any account if there is no such overall excess. For purposes of this subdivision and of subdivision (v) of this subparagraph, the term "overall excess" means the amount, if any, by which the aggregate minimum figures applicable to segregated asset accounts plus the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States with respect to the company's entire U.S. life insurance business, including segregated asset accounts as well as other accounts.

(v) In the case of a company which issues contracts based on one or more than one segregated asset account, if the minimum figure applicable to a segregated asset account exceeds the surplus held in the United States attributable to such account, then for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the account limitation figure, as defined in this subdivision. Therefore, no adjustment under section 819 or under this subparagraph shall be made with respect to any segregated asset account if the aggregate of the account limitation figures is zero, but nothing in this subdivision shall preclude an adjustment under section 819 with respect to accounts other than segregated asset accounts. For purposes of this subdivision, the term "account limitation figure" is a segregated assets account's proportionate share of the aggregate of the account limitation figures. Such aggregate of the account limitation figures is equal to the lesser of either the company's overall excess as defined in subdivision (iv) of this subparagraph, or the amount, if any, by which the aggregate of the minimum figures applicable to segregated asset accounts exceeds the surplus held in the United States with respect to all such segregated asset accounts. For purposes of this subdivision, a segregated asset account's proportionate share of the aggregate of the account limitation figures is determined by multiplying the amount of such aggregate of account limitation figures by a percentage, the numerator of which is the amount by which the minimum figure applicable to such account exceeds the surplus held in the United States attributable to such account, and the denominator of which is the aggregate of the amounts by which the minimum figure applicable to each segregated asset account exceeds the surplus held in the United States attributable to such account.

(vi) Subdivisions (i), (ii), (iii), (iv), and (v) of this subparagraph may be illustrated by the following examples:

Example (1). (a) For the taxable year 1968, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has the following assets and total insurance liabilities with respect to such U.S. business:

	Regular account	Separate account A	Separate account B
Assets	$9,300,000	$1,810,000	$515,000
Total insurance liabilities	8,000,000	1,800,000	500,000

It is further assumed that the percentage determined and proclaimed by the Secretary under section 819(a)(2)(A) for the taxable year 1968 is 15 percent.

(b) In order to determine whether any adjustment under section 819 must be made, T must compute the minimum figure applicable to its Regular Account as well as each of its Separate Accounts. The minimum figure for the Regular Account is $1,200,000 (15 percent of $8,000,000). The minimum figure applicable to Separate Account A is $18,000 (1 percent of $1,800,000). The minimum figure applicable to Separate Account B is $5,000 (1 percent of $500,000). The aggregate of the minimum figures is $1,223,000 ($1,200,000+$18,000+$5,000). The surplus held in the United States with respect to the Regular Account is $1,300,000 ($9,300,000–$8,000,000), with respect to Separate Account A is $10,000 ($1,810,000–$1,800,000) and with respect to Separate Account B is $15,000 ($515,000–$500,000). The surplus held in the United States with respect to T's entire U.S. life insurance business is $1,325,000 ($1,300,000+$10,000+$15,000).

(c) Since the aggregate of the minimum figures ($1,223,000) does not exceed the surplus held in the United States attributable to T's entire U.S. life insurance business ($1,325,000), under subdivision (iv) of this subparagraph no adjustment under section 819 shall be made with respect to the Regular Account or either of the Separate Accounts.

Example (2). (a) The facts are the same as in example (1) except that the assets held in the United States with respect to the Regular Account is $8,300,000 instead of $9,300,000. Thus, the surplus held in the United States with respect to the Regular Account is $300,000 ($8,300,000–$8,000,000), and the

surplus held in the United States with respect to T's entire U.S. life insurance business is $325,000 ($300,000 + $10,000 + $15,000).

(b) Since the aggregate of the minimum figures with respect to the Separate Accounts, $23,000 ($18,000 + $5,000), does not exceed the surplus held in the United States with respect to both of such Separate Accounts, $25,000 ($10,000 + $15,000), under subdivision (v) of this subparagraph, no adjustment under section 819 must be made with respect to either of the Separate Accounts.

(c) The excess of the minimum figure for the Regular Account ($1,200,000) over the surplus held in the United States with respect to the Regular Account ($300,000) is equal to $900,000 ($1,200,000–$300,000). However, the company's overall excess as defined in subdivision (iv) of this subparagraph, is $898,000 ($1,223,000–$325,000). Under subdivision (iv) of this subparagraph the excess with respect to the Regular Account ($900,000) is limited to the amount of overall excess ($898,000). Thus, the amount of policy and other contract liability requirements with respect to T's Regular Account and the amount of required interest with respect to T's Regular Account (both computed without regard to section 819) shall each be reduced by an amount equal to the product of $898,000 and the current earnings rate computed only with respect to T's Regular Account.

(c) Distributions to shareholders—(1) In general. In the case of a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, section 819(c)(1) provides alternative methods for determining the amount of distributions to shareholders for purposes of section 815 (relating to distributions to shareholders) and section 802(b)(3) (relating to life insurance company taxable income). Such a foreign life insurance company may elect (in the manner provided by subparagraph (4) of this paragraph) for each taxable year whichever of the alternative methods provided by section 819(c)(1) and this subparagraph it desires, and the method elected for any one taxable year shall be effective only with respect to the taxable year for which the election is made. Such alternative methods are:

(i) The amount of the distributions to shareholders shall be the amount determined by multiplying the total amount of distributions to shareholders by the percentage which the minimum figure for the taxable year is of the excess of the assets of the company over the total insurance liabilities; or

(ii) The amount of the distributions for shareholders shall be the amount determined by multiplying the total amount of distributions for shareholders by the percentage which the total insurance liabilities on United States business for the taxable year is of the total insurance liabilities of the company.

(2) Definitions. For purposes of section 819(c)(1) and subparagraph (1) of this paragraph:

(i) The term "total amount of the distributions to shareholders" means all distributions (within the meaning of section 815 and § 1.815–2) by a foreign life insurance company to all of its shareholders whether or not in the United States;

(ii) The term "minimum figure for the taxable year" means the amount determined under section 819(b)(2)(A) and paragraph (b)(2) of this section;

(iii) The term "assets of the company" means all of the assets (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805–5) of the foreign life insurance company whether or not in the United States (as of the end of the taxable year); and

(iv) The term "total insurance liabilities of the company" means the total insurance liabilities (as defined in section 819(b)(2) and paragraph (b)(2) of this section) on all of its business whether or not in the United States (as of the end of the taxable year).

(3) Illustration of principles. The provisions of section 819(c)(1) and subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example (1). For the taxable year 1958, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has a minimum figure of $40,000, total amount of distributions to all shareholders (within the meaning of section 815) of $5,000, assets (as of the end of the year) of $500,000, total insurance liabilities (as of the end of the year) of $450,000, and total insurance liabilities on United States business (as of the end of the year) of $180,000. Based upon these facts, if T elects the method provided in section 819(c)(1)(A) and subparagraph (1)(i) of this paragraph, the amount of T's distributions to shareholders for the taxable year 1958 is $4,000, that is, $5,000 (the total amount of distributions to shareholders) multiplied by 80 percent (the percentage which the minimum figure for the taxable year, $40,000, is of $50,000, the excess of the assets of the company ($500,000) over the total insurance liabilities ($450,000)).

Example (2). The facts are the same as in example (1), except that for the taxable year 1958, T elects the method provided in section 819(c)(1)(B) and subparagraph (1)(ii) of this paragraph. Based upon these facts, the amount of T's distributions to shareholders for the taxable year 1958 is $2,000, that is, $5,000 (the total amount of distributions to shareholders) multiplied by 40 percent (the percentage which the total insurance liabilities on United States business ($180,000) is of the total insurance liabilities of the company ($450,000)).

(4) Manner and effect of election. (i) The election provided by section 819(c)(1) shall be made in a statement attached to the foreign life insurance company's income tax return for any taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including

extensions thereof) for filing the return for such taxable year. The statement shall indicate the method elected, the name and address of the taxpayer, and shall be signed by the taxpayer (or his duly authorized representative).

(ii) An election made under section 819(c)(1) and this paragraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such election has been made for any taxable year it may not be revoked. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 819(c)(1) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation and the selection of the other percentage must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(5) Application of section 815. Once the amount of distributions to shareholders is determined under the provisions of section 819(c)(1) and this paragraph, the rules of section 815 (relating to distributions to shareholders) shall apply to the shareholders surplus account and the policyholders surplus account of a foreign stock life insurance company in the same manner as they would apply to a domestic stock life insurance company.

(d) Distributions pursuant to certain mutualizations. Section 819(c)(2) provides that for purposes of applying section 815(e) and paragraph (e) of § 1.815–6 (relating to a special rule for certain mutualizations) in the case of a foreign life insurance company subject to tax under section 802—

(1) The paid-in capital and paid-in surplus referred to in section 815(e)(1)(A) of a foreign life insurance company is the portion of such capital and surplus determined by multiplying such amounts by the percentage selected for the taxable year under section 819(c)(1) and paragraph (c)(1) of this section; and

(2) The excess referred to in section 815(e)(2)(A)(i) (without the adjustment provided by section 815(e)(2)(B)), is whichever of the following is the greater:

(i) The minimum figure for 1958 determined under section 819(b)(2)(A); or

(ii) The surplus held in the United States (as defined in section 819(b)(2)(B)) determined as of December 31, 1958.

(e) No United States insurance business. Foreign life insurance companies not carrying on an insurance business within the United States shall not be taxable under part I, subchapter L, chapter 1 of the Code, but shall be taxable as other foreign corporations. See section 881 and the regulations thereunder.

[T.D. 6558, 26 FR 2791, April 4, 1961; 26 FR 3276, April 18, 1961, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968]

§ 1.820–1 Taxable years affected.

Sections 1.820–2 and 1.820–3 are applicable only to taxable years beginning after December 31, 1957, and all references to part I, subchapter L, chapter 1 of the Code, are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2793, April 4, 1961]

§ 1.820–2 Optional treatment of policies reinsured under modified coinsurance contracts.

(a) In general. Section 820(a) provides that an insurance or annuity policy that is reinsured under a modified coinsurance contract (as defined in section 820(b) and paragraph (d) of this section) shall, for purposes of part I, subchapter L, chapter 1 of the Code (other than for purposes of section 801), be treated as if such policy were reinsured under a conventional coinsurance contract, if the reinsured company and the reinsuring company (hereinafter referred to as the "reinsured" and the "reinsurer") each consent to such treatment. This optional treatment applies with respect to any insurance or annuity policy reinsured under a modified coinsurance contract only in the event that the reinsured and the reinsurer consent to such treatment for all such policies reinsured under such contract and also consent to the application of the rules prescribed in and under section 820(c) and § 1.820–3 (relating to special rules).

(b) Time and manner of giving consent. **(1)** The consent of the reinsured and reinsurer to the application of section 820(a)(1) and paragraph (a) of this section to all insurance or annuity policies reinsured under a modified coinsurance contract and to the application of the rules prescribed in and under section 820(c) and § 1.820–3 shall be given in a written statement attached to the life insurance company income tax returns of both the

reinsured and reinsurer for the first taxable year to which such consent is to apply. The return and statement shall be filed not later than the time prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which such consent is to apply falls before April 4, 1961, such consent may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before July 4, 1961. The statement shall be executed by both the reinsured and reinsurer and shall be signed on their behalf by a person authorized to sign returns under section 6062 and the regulations thereunder.

(2) In addition to the statement of consent, the following shall also be filed with the returns of the reinsured and reinsurer:

(i) A copy of the original modified coinsurance contract between the reinsured and reinsurer as in effect for the first taxable year for which consent to the application of section 820 is given;

(ii) A separate schedule for the items referred to in paragraphs (1) through (5) of section 820(c) and paragraph (a) of § 1.820–3 (to the extent not reflected in the permanent books of account of the taxpayer) which relate to all policies reinsured under such modified coinsurance contract showing, in detail, the extent to which such items are to be taken into account for the taxable year by the reinsured and reinsurer under the terms of such contract and the provisions of that section; and

(iii) Such other data as is necessary to enable the Commissioner to determine the correctness of the application of the rules prescribed in and under section 820 and to ascertain the accuracy of the computations involved.

The contract referred to in subdivision (i) of this subparagraph need only be submitted with the returns of the reinsured and reinsurer for the first taxable year for which consent to the application of section 820 is given. Furthermore, the reinsured and reinsurer shall maintain as part of their permanent books of account any subsequent amendments to such contract. The information and data referred to in subdivisions (ii) and (iii) of this subparagraph shall be submitted annually and shall be attached to the returns of the reinsured and reinsurer for each taxable year for which the consent to the application of section 820 remains in effect.

(c) Scope of consent. The consent referred to in section 820(a)(2) and paragraphs (a) and (b) of this section shall be binding upon the reinsured and reinsurer for the taxable year for which given, and for all succeeding taxable years, unless permission to rescind such consent is obtained from the Commissioner. However, for taxable years beginning prior to April 4, 1961, such consent may be rescinded without obtaining permission from the Commissioner by filing, before July 4, 1961, a statement that the reinsured and the reinsurer desire to rescind the consent under section 820. Such statement shall be executed by both the reinsured and the reinsurer and shall be signed on their behalf by a person authorized to sign returns under section 6062 and the regulations thereunder. An amended return of both the reinsured and reinsurer reflecting such rescission must accompany the statement for all taxable years for which returns have been filed with respect to such consent.

(d) Modified coinsurance contract defined. For purposes of section 820, the term "modified coinsurance contract" means an indemnity reinsurance contract in which—

(1) One life insurance company (the reinsurer) agrees to indemnify another life insurance company (the reinsured) against the risk, or part thereof, assumed by the reinsured company under the insurance or annuity policy reinsured under the contract of reinsurance,

(2) The reinsured company retains ownership of the assets in relation to the reserve on the policy reinsured,

(3) All or part of the gross investment income derived from such assets is paid by the reinsured company to the reinsuring company as a part of the consideration for the reinsurance of such policy, and

(4) The reinsurer company is obligated for expenses incurred, and for Federal income taxes imposed, in respect of such gross investment income.

[T.D. 6558, 26 FR 2793, April 4, 1961]

§ 1.820–3 Special rules.

(a) In general. For purposes of section 820(a)(1), section 820(c) provides special rules (to the extent not improper under the terms of the modified coinsurance contract under which such policy is reinsured) to be applied in respect of the amount of such policy reinsured. Both the reinsured and the reinsurer must consent to these

special rules, in the manner provided in paragraph (b) of § 1.820–2, in order to obtain the optional treatment provided by section 820(a)(1). Such special rules and the adjustments required thereunder are—

(1) Premiums (to the extent allocable to the participation of the reinsurer therein) received for the policy reinsured shall be treated as received by the reinsurer and not by the reinsured. Amounts returned by the reinsurer to the reinsured shall be treated as reductions in premium income of the reinsurer under section 809(c)(1) and as other amounts received by the reinsured under section 809(c)(1).

(2)(i) Gross investment income (to the extent allocable to the participation of the reinsurer therein) derived from the assets in relation to the reserve on the policy reinsured shall be treated as gross investment income of the reinsurer and not of the reinsured. The gross investment income so treated shall be considered as derived proportionately from each of the various sources of gross investment income of the reinsured. For this purpose, the percentage used in determining the reinsurer's share of each and every item of gross investment income (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be determined by dividing the amount of gross investment income allocable to the reinsurer under the modified coinsurance contract by the total gross investment income of the reinsured. The percentage thus obtained is then applied to each and every item of gross investment income of the reinsured. The percentage used in determining the reinsured's share of each and every item of gross investment income (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be the percentage obtained by subtracting the percentage obtained under the preceding sentence from 100 percent.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. For the taxable year 1958, R, a life insurance company, reinsures a block of its policies with S, a life insurance company, under a modified coinsurance contract. Assume that R and S have consented to the application of section 820 and that the amount of gross investment income allocable to S (under the terms of the modified coinsurance contract) is $100,000. Assume further that R has gross investment income of $500,000 for the taxable year 1958, including $5,000 of wholly tax-exempt interest, $300,000 of interest on notes, loans, etc., $35,000 of rental income, $60,000 of royalty income, and $100,000 of dividends received on stock of domestic corporations. Since the gross investment income of R to be treated as gross investment income of S is 20 percent of R's gross investment income ($100,000÷$500,000), R would make up the following schedule for purposes of determining the portion of each individual item of gross investment income to be taken into account by R and S:

	Col. 1 Gross investment income	Col. 2 (20% × Col. 1) S's share of gross investment income	Col. 3 (Col. 1–Col. 2) R's share of gross investment income
Interest wholly tax-exempt	$5,000	$1,000	$4,000
Interest on notes, loans, etc.	300,000	60,000	240,000
Rents	35,000	7,000	28,000
Royalties	60,000	12,000	48,000
Dividends on stock of domestic corporations	100,000	20,000	80,000
Total	500,000	100,000	400,000

(3)(i) Gains and losses from sales and exchanges of capital assets, and gains and losses considered as gains and losses from sales and exchanges of capital assets, of the reinsured company shall (to the extent of the participation therein by the reinsurer under the terms of the modified coinsurance contract) be treated as gains and losses from sales and exchanges of capital assets of the reinsurer and not of the reinsured. The character of the gains and losses so treated shall be the same for the reinsurer as it would be in the hands of the reinsured. The gains and losses so treated shall be considered as derived proportionately from each sale and exchange of a capital asset, and each gain and loss considered as a gain and loss from the sale and exchange of a capital asset, of the reinsured.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. For the taxable year 1959, L, a life insurance company, reinsures a block of its policies with N, a life insurance company, under a modified coinsurance contract. Assume that L and N have consented to the application of section 820 and that under the terms of such contract 20 percent of the gains and losses from the sales and exchanges of capital assets (and any gains and losses considered to be from sales and exchanges of capital assets under applicable law) of L are allocable to N. Assume further that for the taxable year 1959, L has a long-term capital gain of $5,000 from the sale of stock X, a short-term capital gain of $8,000 from the sale of stock Y, and a long-term capital loss of $4,000 from the sale of stock Z. Since 20 percent of such gains and losses of L are allocable to N, L would make up the following schedule for purposes of determining the portion of each of such gains and losses to be taken into account by L and N:

	Col. 1 Capital gain or loss	Col. 2 (20% × Col. 1) N's share of capital gain or loss	Col. 3 (Col. 1–Col. 2) L's share of capital gain or loss
Long-term capital gain	$5,000	$1,000	$4,000

	Col. 1 Capital gain or loss	Col. 2 (20% × Col. 1) N's share of capital gain or loss	Col. 3 (Col. 1–Col. 2) L's share of capital gain or loss
Short-term capital gain	$8,000	$1,600	$6,400
Long-term capital loss	4,000	800	3,200

(4) The reserve on the policy reinsured (to the extent allocable to the participation of the reinsurer therein) shall be treated as a part of the reserves of the reinsurer and not of the reinsured. Such reserve shall not be limited to the items taken into account under section 810(c).

(5) The assets in relation to the reserve referred to in section 820(c)(3) and in subparagraph (4) of this paragraph shall be treated as owned by the reinsurer and not by the reinsured.

(6)(i) The expenses (to the extent reimbursable by the reinsurer) incurred with respect to the policy reinsured which relate to the determination of gain or loss from operations under section 809(b) shall be treated as incurred by the reinsurer and not by the reinsured. Furthermore, any provision limiting the amount which shall be allowed as a deduction shall be applied after such adjustment has been made.

(ii) The expenses (to the extent reimbursable by the reinsurer) incurred with respect to the policy reinsured and with respect to the assets referred to in section 820(c)(3) and subparagraph (5) of this paragraph which relate to the determination of investment yield under section 804(c) shall be treated as incurred by the reinsurer and not by the reinsured. Furthermore, any provision limiting the amount which shall be allowed as a deduction shall be applied after such adjustment has been made. The expenses so treated shall be considered as incurred proportionately from each of the various sources of expenses incurred by the reinsured. For this purpose, the percentage used in determining the reinsurer's share of each and every item of such expenses shall be determined by dividing the amount of such expenses allocable to the reinsurer under the modified coinsurance contract by the total amount of such expenses. The percentage thus obtained is then applied to each and every item of such expenses. The percentage used in determining the reinsured's share of each and every item of such expenses shall be the percentage obtained by subtracting the percentage obtained under the preceding sentence from 100 percent.

(iii) The provisions of subdivision (ii) of this subparagraph may be illustrated by the following example:

Example. Assume the facts are the same as in the example contained in subparagraph (2)(ii) of this paragraph, except that R incurred expenses ($8,000 of which are reimbursable by S) relating to the determination of investment yield of $40,000, including investment expenses of $30,000, depreciation of $8,000, and real estate expenses of $2,000. Based upon these facts, R would make up the following schedule for purposes of determining the portion of each individual item of expense to be taken into account by R and S:

	Col. 1 Total	Col. 2 (20% × Col. 1) S's share of expenses	Col. 3 (Col. 1–Col. 2) R's share expenses
Investment expenses	$30,000	$6,000	$24,000
Depreciation	8,000	1,600	6,400
Real estate expenses	2,000	400	1,600
Expenses relating to determination of investment yield	40,000	8,000	32,000

(7) Dividends to policyholders (as defined in section 811(a) and paragraph (a) of § 1.811–2) paid in respect of the policy reinsured shall be treated as paid by the reinsurer and not by the reinsured. For purposes of the preceding sentence, the amount of dividends to policyholders treated as paid by the reinsurer shall be the amount paid, in respect of the policy reinsured, by the reinsurer to the reinsured as reimbursement for dividends to policyholders paid by the reinsured. This subparagraph shall apply also in respect of an insurance or annuity policy reinsured under a conventional reinsurance contract.

(8) Any amounts paid in 1958 or any subsequent year by the reinsurer to the reinsured as reimbursement for Federal income taxes imposed for a taxable year beginning in 1957 or any preceding taxable year shall not be taken into account by the reinsured as an item of gross amount under section 809(c) or taken into account by the reinsurer as an item of deduction under section 809(d).

(b) Denial of double deduction. In applying the special rules provided by section 820(c) and paragraph (a) of this section, an item shall be taken into account as income only once under subpart B, part I, subchapter L, chapter 1 of the Code, and only once under subpart C, part I, subchapter L, chapter 1 of the Code, by both the reinsured and the reinsurer, and an item shall be allowed as a deduction only once under such subpart B and only once under such subpart C to both the reinsured and the reinsurer.

[T.D. 6558, 26 FR 2793, April 4, 1961]

Mutual Insurance Companies (Other Than Life and Certain Marine Insurance Companies and Other Than Fire or Flood Insurance Companies Which Operate on Basis of Perpetual Policies or Premium Deposits)

§ 1.821–1 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.

(a) In general. (1) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 801 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821 (a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and § 1.822–3.

(3) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821(a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821(a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $3,000 or with gross amounts of income from interest, dividends, rents, and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of $75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $50,000 are subject to a tax computed under section 821(b).

(b) Rates of tax. (1) The normal tax under section 821(a)(1)(A) and 821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for purposes of the surtax in excess of $25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) Under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over $3,000 and not over $6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of

$3,000.[1] The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income from interest dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over $75,000 and not over $150,000 pay a tax equal to 2 percent of that portion in excess of $75,000.

(4) Under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over $50,000 and not over $100,000 pay a normal tax computed on that portion of such income in excess of $50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over $50,000 and not over $100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of $50,000.

(5) Section 821(c) provides for an adjustment of the amount computed under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable year from interest, dividends, rents, and premiums (including deposits and assessments) is over $75,000 and less than $125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over $75,000 bears to $50,000.

(c) Application. The application of section 821(a) to (c) inclusive, may be illustrated by the following examples:

Example (1). The W Company, a mutual casualty insurance company, for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of $5,500 and, due to partially tax-exempt interest of $800, has income for purposes of the normal tax of $4,700. The gross amount of income of the W Company from interest, dividends, rents and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $150,000. Its normal tax under section 821(a)(1) for the calendar year 1954 is 60 percent of $1,700 ($4,700 minus $3,000) or $1,020, since its income subject to normal tax is not over $6,000. It is not liable for surtax for the calendar year 1954 as its mutual insurance company taxable income for purposes of the surtax does not exceed $25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of $1,020. The tax under section 821(a)(2) is 2 percent of $75,000 ($150,000–$75,000), or $1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is $1,500, namely, that imposed by section 821(a)(2).

Example (2). If in example (1) the income for purposes of the normal tax was not over $3,000, the income for purposes of the surtax was not over $25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) was $90,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, was $70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

Example (3). The X Company, a mutual casualty insurance company, for the calendar year 1954 has mutual insurance company taxable income for surtax purposes of $28,000 and, due to partially tax-exempt interest of $5,000, has income for normal tax purposes of $23,000. The gross amount of income of the X Company from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1954 is 30 percent of $23,000, or $6,900, and the surtax is 22 percent of $3,000 ($28,000–$25,000), or $660. The combined tax under section 821(a)(1) is $7,560 ($6,900 plus $660). The tax under section 821(a)(2) is 1 percent of $1,200,000, or $12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is $12,000, namely, that imposed by section 821(a)(2).

Example (4). The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of $35,000 and, due to partially tax-exempt interest of $5,000, has income for purposes of the normal tax of $30,000. The gross amount received from interest, dividends, rents and premiums (including deposits and assessments) is $120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of $30,000, or $9,000, since this is less than $16,200, 60 percent of $27,000 (excess of $30,000 over $3,000); and the surtax would be 22 percent of $10,000 (excess of $35,000 over $25,000), or $2,200. The combined tax of $11,200 ($9,000 plus $2,200) would then be reduced by applying section 821(c), since the gross receipts are between $75,000 and $125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of $11,200, or $10,080, since $45,000 (excess of $120,000 over $75,000) is 90 percent of $50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of $25,000 (excess of $100,000 over $75,000), or $500, since this is less than $1,000, 1 percent of $100,000. Applying section 821(c) reduces this to $450, or 90 percent of $500. Since $10,080, the tax under section 821(a)(1), as adjusted, exceeds $450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal taxing and surtax of $10,080.

Example (5). The Z Exchange, an interinsurer, for the calendar year 1954 has mutual insurance company taxable income for purposes of the surtax of $60,000 and, due to partially tax-exempt interest of $12,000, has income for purposes of the normal tax of $48,000. The gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) is $2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar

[1] Pub.L. 87–834, Oct. 16, 1962, 76 Stat. 989 increased taxable income from $3,000 to $6,000 and increased gross amount from $75,000 but less than $125,000 to $150,000 but less than $250,000.

year 1954 as its mutual insurance company taxable income for purposes of the normal tax does not exceed $50,000. Its surtax is 33 percent of $10,000 ($60,000 minus $50,000), or $3,300, since that amount is less than $7,700, 22 percent of $35,000 (excess of $60,000 over $25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(a) is $3,300.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.821-2 Taxable years affected.

Section 1.821-1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Section 1.821-3 is applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.821-4 and 1.821-5 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to sections of the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6610, 27 FR 8718, Aug. 31, 1962, as amended by T.D. 6681, 28 FR 11110, Oct. 17, 1963]

§ 1.821-3 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.

(a) In general. **(1)** For taxable years beginning after December 31, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821(a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and § 1.822-7. However, for taxable years beginning after May 31, 1960, only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. In the case of any such evidence of indebtedness, adjustment shall be made to basis in the same manner as that made by life insurance companies under section 1016(a)(17) and the regulations thereunder.

(3) All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821(a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821(a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $3,000 or with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of $75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income

(computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over $50,000 are subject to a tax computed under section 821(b).

(b) Rates of tax. (1) For taxable years beginning before July 1, 1963, the normal tax under section 821(a)(1)(A) and 821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for the purposes of the surtax in excess of $25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) For taxable years beginning before July 1, 1963, under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over $3,000 and not over $6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of $3,000. The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over $75,000 and not over $150,000 pay a tax equal to 2 percent of that portion in excess of $75,000.

(4) For taxable years beginning before July 1, 1963, under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over $50,000 and not over $100,000 pay a normal tax computed on that portion of such income in excess of $50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over $50,000 and not over $100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of $50,000.

(5) Section 821(c) provides for an adjustment of the amount computed under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is over $75,000 and less than $125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over $75,000 bears to $50,000.

(c) Application. The application of section 821(a) to (c) inclusive, may be illustrated by the following examples:

Example (1). The W Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of $5,500 and, due to partially tax-exempt interest of $800, has income for purposes of the normal tax of $4,700. The gross amount of income of the W Company from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $150,000. Its normal tax under section 821(a)(1) for the calendar year 1958 is 60 percent of $1,700 ($4,700 minus $3,000) or $1,020, since its income subject to normal tax is not over $6,000. It is not liable for surtax for the calendar year 1958 as its mutual insurance company taxable income for purposes of the surtax does not exceed $25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of $1,020. The tax under section 821(a)(2) is 2 percent of $75,000 ($150,000–$75,000), or $1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is $1,500, namely, that imposed by section 821(a)(2).

Example (2). If in the above example the income for purposes of the normal tax were not over $3,000, the income for purposes of the surtax were not over $25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) were $90,000, and the gross amount of income from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest were $70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

Example (3). The X Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for surtax purposes of $28,000 and, due to partially tax-exempt interest of $5,000, has income for normal tax purposes of $23,000. The gross amount of income of the X Company received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1958 is 30 percent of $23,000, or $6,900, and the surtax is 22 percent of $3,000 ($28,000–$25,000), or $660. The combined tax under section 821(a)(1) is $7,560 ($6,900 plus $660). The tax under section 821(a)(2) is 1 percent of $1,200,000, or $12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is $12,000, namely, that imposed by section 821(a)(2).

Example (4). The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of $35,000 and, due to

partially tax-exempt interest of $5,000, has income for purposes of the normal tax of $30,000. The gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is $120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is $100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of $30,000, or $9,000, since this is less than $16,200, 60 percent of $27,000 (excess of $30,000 over $3,000); and the surtax would be 22 percent of $10,000 (excess of $35,000 over $25,000), or $2,200. The combined tax of $11,200 ($9,000 plus $2,200) would then be reduced by applying section 821(c), since the gross receipts are between $75,000 and $125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of $11,200, or $10,080, since $45,000 (excess of $120,000 over $75,000) is 90 percent of $50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of $25,000 (excess of $100,000 over $75,000), or $500, since this is less than $1,000, 1 percent of $100,000. Applying section 821(c) reduces this to $450, or 90 percent of $500. Since $10,080, the tax under section 821(a)(1), as adjusted, exceeds $450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal tax and surtax of $10,080.

Example (5). The Z Exchange, an interinsurer, for the calendar year 1958 has mutual insurance company taxable income for purposes of the surtax of $60,000 and, due to partially tax-exempt interest of $12,000, has income for purposes of the normal tax of $48,000. The gross amount received during the taxable year from the items described in section 822(b)(other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is $2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar year 1958 as its mutual insurance company taxable income for purposes of the normal tax does not exceed $50,000. Its surtax is 33 percent of $10,000 ($60,000 minus $50,000), or $3,300, since that amount is less than $7,700, 22 percent of $35,000 (excess of $60,000 over $25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(b) is $3,300.

[T.D. 6610, 27 FR 8718, Aug. 31, 1962]

§ 1.821-4 Tax on mutual insurance companies other than life insurance companies and other than fire, flood, or marine insurance companies, subject to tax imposed by section 831.

(a) In general—(1) Tax imposed. (i) For taxable years beginning after December 31, 1962, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831, and not specifically exempt under the provisions of section 501(c)(15), are subject either to the tax imposed by section 821(a) on mutual insurance company taxable income or, in the case of certain small companies, to the tax imposed by section 821(c) on taxable investment income. The determination of whether a mutual insurance company is taxable under section 821(a) or (c) for the taxable year is dependent upon the gross amount received by the company during such taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments). If such gross amount received exceeds $150,000, but does not exceed $500,000 for the taxable year, the company is subject to the tax imposed by section 821(c) on taxable investment income, unless (a) the company elects under section 821(d) in the manner provided in paragraph (f) of this section to be subject to the tax imposed by section 821(a), or (b) there is a balance in its protection against loss account at the beginning of the taxable year. A company having a gross amount received in excess of $500,000 is subject to the tax imposed by section 821(a). For exemption from income tax of companies having a gross amount received not in excess of $150,000, see section 501(c)(15). For the alternative tax, in lieu of the tax imposed by section 821(a) or (c), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder. For the definition of an insurance company, see paragraph (a) of § 1.801-3.

(ii) The term "premiums" as used in section 821 and this section has the same meaning as in section 501(c)(15) and § 1.501(c)(15)-1, and means the total amount of the premiums and other consideration provided in the insurance contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction), but does not include amounts received from other insurance companies for losses paid under reinsurance contracts.

(2) Tax base. The taxable income of mutual insurance companies taxable under section 821 differs from the taxable income of other corporations. See sections 821(b) and 822. Mutual insurance companies have special items of income and special deductions not provided for other cor-

porations. See, for example, sections 821(b)(1)(C), 822(d), 823(b), 824(a), and 825(a). Thus, the computation of mutual insurance company taxable income for a company taxable under section 821(a), and the computation of taxable investment income for a company taxable under section 821(c), must be made in strict accordance with the provisions of part II of subchapter L of the Code.

(3) **Applicability of other provisions.** All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of part II of subchapter L of the Code are applicable to the assessment and collection of the tax imposed by section 821(a) or (c), and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) **Certain foreign companies.** Foreign mutual insurance companies (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831) not carrying on an insurance business within the United States are not taxable under section 821(a) or (c), but are taxable as other foreign corporations. See section 881.

(b) **Rates of tax imposed by section 821(a)—(1) Normal tax.** For taxable years beginning before January 1, 1964, the normal tax imposed under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income, or 60 percent of the amount by which mutual insurance company taxable income exceeds $6,000. In the case of taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of mutual insurance company taxable income, or 44 percent of the amount by which mutual insurance company taxable income exceeds $6,000, whichever is the lesser. For example, a company subject to tax under section 821(a) will file a return but will pay no normal tax if mutual insurance company taxable income does not exceed $6,000. When mutual insurance company taxable income exceeds $6,000 but does not exceed $12,000, the company will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of the amount by which mutual insurance company taxable income exceeds $6,000. When mutual insurance company taxable income exceeds $12,000, the company will pay normal tax at the rate of 22 percent (30 percent in the case of taxable years beginning before Jan. 1, 1964), of such income.

(2) **Surtax—(i) Taxable years beginning before January 1, 1964.** For taxable years beginning before January 1, 1964, companies taxable under section 821(a) are subject to a surtax equal to 22 percent of so much of their mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) as exceeds $25,000. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the $25,000 surtax exemption otherwise provided by this subparagraph, and without regard to whether the company is liable for any normal tax under subparagraph (1) of this paragraph. See section 826(f) and § 1.826–2.

(ii) **Taxable years beginning after December 31, 1963.** For taxable years beginning after December 31, 1963, companies taxable under section 821(a) are subject to a surtax at the rates and with the exemptions provided in section 11(c) on their mutual insurance company taxable income. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the surtax exemption otherwise provided by section 11(d), and without regard to whether the company is liable for any normal tax under section 821(a)(1) and subparagraph (1) of this paragraph. See section 826(f) and § 1.826–2.

(c) **Mutual insurance company taxable income defined.** The tax imposed by section 821(a) with respect to any taxable year is computed upon mutual insurance company taxable income for the taxable year. Section 821(b) provides that in the case of a mutual insurance company subject to the tax imposed by section 821(a), mutual insurance company taxable income means the amount by which—

(1) The sum of—

(i) The taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of § 1.822–8).

(ii) The statutory underwriting income (as defined in section 823(a)(1) and paragraph (b)(1) of § 1.823–6), and

(iii) The amounts required by section 824(d) and paragraph (b)(3) of § 1.824–1 to be subtracted from the protection against loss account, exceeds

(2) The sum of—

(i) The investment loss (as defined in section 822(a)(2) and paragraph (a)(2) of § 1.822–8),

(ii) The statutory underwriting loss (as defined in section 823(a)(2) and paragraph (b)(2) of § 1.823–6), and

(iii) The unused loss deduction provided by section 825(a) and paragraph (a) of § 1.825–1.

If for any taxable year the amount determined under subparagraph (2) of this paragraph equals or exceeds the amount determined under subparagraph (1) of this paragraph, the mutual insurance company taxable income for such year shall be zero.

(d) **Examples.** The application of the tax imposed by section 821(a) may be illustrated by the following examples:

Example (1). (a) M, a mutual casualty insurance company, for the calendar year 1963 has gross receipts from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) in excess of $500,000, and therefore is subject to the tax imposed by section 821(a). M's taxable investment income, computed under section 822, is $30,000 and its statutory underwriting income, computed under section 823, is $15,000. M subtracts $3,000 from its protection against loss account in accordance with the computation made under section 824(d). M has no unused loss deduction. M received no partially tax exempt interest. If M is not subject to section 826, its mutual insurance company taxable income for the taxable year 1963 is $48,000, computed as follows:

(1) Taxable investment income	$30,000
(2) Statutory underwriting income	15,000
(3) Subtractions from protection against loss account	3,000
(4) Total income items	48,000
(5) Investment loss	0
(6) Statutory underwriting loss	0
(7) Unused loss deduction	0
(8) Total loss items	0
(9) Mutual insurance company taxable income (item (4) minus item (8))	$48,000

(b) Since M's mutual insurance company taxable income is in excess of $12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 30 percent. In addition, since M's mutual insurance company taxable income exceeds $25,000, M will pay surtax on such excess at a rate of 22 percent. M's total tax liability for the taxable year 1963 is $19,460, computed as follows:

(1) Mutual insurance company taxable income as computed in item (a)(9)	$48,000
(2) Normal tax; 30 percent of mutual insurance company taxable income	14,400
(3) Surtax exemption	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3))	23,000
(5) Surtax: 22 percent of mutual insurance company taxable income subject to the surtax	5,060
(6) Total tax (item (2) plus item (5))	19,460

Example (2). If in example (1), M's mutual insurance company taxable income for 1963 had been in excess of $6,000 but not in excess of $12,000, M would pay normal tax in an amount equal to 60 percent of the amount by which such income exceeded $6,000. Thus, if M had mutual insurance company taxable income of $11,000, M's total tax liability for the taxable year 1963 would be $3,000, computed as follows:

(1) Mutual insurance company taxable income	$11,000
(2) Mutual insurance company taxable income in excess of $6,000 ($11,000 minus $6,000)	5,000
(3) 30 percent of item (1)	3,800
(4) 60 percent of item (2)	3,000
(5) Normal tax (lesser of items (3) or (4))	3,000
(6) Surtax exemption	25,000

Since the surtax exemption exceeds the mutual insurance company taxable income for purposes of the surtax, there is no surtax liability. Since the normal tax under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income or 60 percent of the amount by which such income exceeds $6,000, M's normal tax (and total income tax liability) is $3,000. If M's mutual insurance company taxable income was not in excess of $6,000, M would be required to file a return, but would not be liable for any normal tax, since, in such a case, 60 percent of M's mutual insurance company taxable income in excess of $6,000 would be zero.

Example (3). Assume the same income as in example (1) in the 1965 calendar year and that M is not a corporation to which section 1561 (with respect to certain controlled corporations) applies. Since M's mutual insurance company taxable income is in excess of $12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 22 percent. In addition, since M's mutual insurance company taxable income exceeds the surtax exemption provided in section 11(d) of $25,000, M will pay a surtax on such excess at the rate provided in section 11(c), 26 percent. M's total liability for the taxable year 1964 is $16,540, computed as follows:

(1) Mutual insurance company taxable income as computed in example (1)	$48,000
(2) Normal tax: 22 percent of mutual insurance company taxable income for normal tax purposes	10,560
(3) Surtax exemption provided by section 11(d)	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3))	23,000
(5) Surtax: at rates provided in section 11(c): 26 percent of mutual insurance company taxable income subject to the surtax	5,980
(6) Total tax (item (2) plus item (5))	16,540

(e) **Alternative tax for certain small mutual insurance companies—(1) In general.** (i) Section 821(c) provides an alternative tax for certain small mutual insurance companies. This alternative tax, which is in lieu of the tax imposed by section 821(a), is imposed on taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of § 1.822–8) and consists of a normal tax and a surtax. The tax provided by section 821(c) is imposed on every mutual insurance company (other than a life insurance company and other than a fire, flood, or marine insurance company

subject to the tax imposed by section 831) which received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) a gross amount in excess of $150,000 but not in excess of $500,000, except a company which has properly elected under section 821(d) and paragraph (f) of this section to be subject to the tax imposed by section 821(a), or a company which has a balance in its protection against loss account at the beginning of the taxable year.

(ii) Any company which would be taxable under section 821(c) but for the presence of an amount in its protection against loss account at the beginning of the taxable year may elect to subtract the balance from such account. See section 824(d)(5) and § 1.824–3. If such an election is made in such a case, the company shall not be subject to the tax imposed by section 821(a), but shall be subject to the tax imposed by section 821(c).

(2) Rates of tax imposed by section 821(c)—(i) Normal tax. The normal tax for taxable years beginning before January 1, 1964, is the lesser of 30 percent of taxable investment income or 60 percent of the amount by which taxable investment income exceeds $3,000. For taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of taxable investment income, or 44 percent of the amount by which taxable investment income exceeds $3,000, whichever is the lesser. Thus, a company subject to tax under section 821(c) will file a return but will pay no tax if for the taxable year its taxable investment income does not exceed $3,000; or will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of taxable investment income in excess of $3,000 when such income exceeds $3,000 but does not exceed $6,000. When taxable investment income exceeds $6,000, the normal tax is imposed at the rate of 22 percent (30 percent in the case of taxable years beginning before Jan. 1, 1964) of such income.

(ii) Surtax. For taxable years beginning before January 1, 1964, a surtax is imposed at the rate of 22 percent of taxable investment income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) in excess of $25,000. For taxable years beginning after December 31, 1963, a surtax is imposed at the rate provided in section 11(c) on taxable investment income in excess of the surtax exemption provided in section 11(d).

(f) Election to be taxed under section 821(a)—(1) In general. Section 821(d) provides that any mutual insurance company taxable under section 821(c) may elect, in the manner provided by subparagraph (3) of this paragraph, to be taxed under section 821(a).

(2) Scope of election. Except as otherwise provided herein, an election made under section 821(d) and this paragraph to be taxable under section 821(a) shall be binding for the taxable year for which made and for all succeeding taxable years unless the Commissioner consents to a revocation of such election. If for any taxable year the gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) does not exceed $150,000, a company's prior election made under section 821(d) to be taxable under section 821(a) will automatically terminate and any balance in the protection against loss account will be taken into account for the preceding taxable year. (See section 824(d)(4) and § 1.824–2 for automatic termination of protection against loss account if company is not subject to the tax imposed by section 821(a).) If for any taxable year thereafter the gross amount received exceeds $150,000 but does not exceed $500,000, the company shall be taxable under section 821(c) unless it makes a new election to be taxable under section 821(a). If a company subject to tax under section 821(c) for a taxable year elects under section 821(d) and this section to be taxed under section 821(a) and, in a subsequent taxable year, the gross receipts of such company exceed $500,000, the election made for such earlier taxable year shall be considered as continuing in effect. Thus, such a company will continue to be taxable under section 821(a) notwithstanding that its gross receipts subsequently fall below $500,000 (so long as they do not fall below $150,000) unless the Commissioner consents to a revocation of the prior election. Whether revocation is permissible in any case will depend on the facts and circumstances of the particular case, but in no case will revocation be granted in the absence of a showing that the election creates an undue burden or material hardship on the company due to a substantial change in the character of its operations.

(3) Time and manner of making election. The election provided by section 821(d) shall be made in a statement attached to the company's income tax return for the first taxable year for which the election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized

representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year.

(g) **Examples.** The application of the tax imposed by section 821(c) may be illustrated by the following examples:

Example (1). M, a mutual casualty insurance company, for the calendar year 1963 has a gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of $400,000. Since M's gross amount received exceeds $150,000, but does not exceed $500,000, M is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed on mutual insurance company taxable income by section 821(a). M computes its taxable investment income under section 822 to be $35,000. In computing taxable investment income, M deducted $2,000 of partially tax-exempt interest under section 242. If M does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is $13,140 computed as follows:

(1) Taxable investment income as computed under section 822	$35,000
(2) 30 percent of taxable investment income	10,500
(3) 60 percent of taxable investment income in excess of $3,000	19,200
(4) Normal tax (lesser of items (2) or (3))	10,500
(5) Partially tax-exempt interest deducted in computing taxable investment income	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5))	37,000
(7) Surtax exemption	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7))	12,000
(9) Surtax (22 percent of item (8))	2,640
(10) Total tax liability (item (4) plus item (9))	13,140

Example (2). N, a mutual casualty insurance company, for the taxable year 1963 has a gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of $210,000. Since N's gross amount received exceeds $150,000 but does not exceed $500,000, N is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed by section 821(a). Furthermore, since the gross amount received by N does not exceed $250,000, N is entitled to the special tax reduction provided by section 821(c)(2). N computes its taxable investment income under section 822 to be $24,000. In computing taxable investment income, N deducted $2,000 of partially tax-exempt interest under section 242. If N does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is $4,452 computed as follows:

(1) Taxable investment income as computed under section 822	$24,000
(2) 30 percent of taxable investment income	7,200
(3) 60 percent of taxable investment income in excess of $3,000	12,600
(4) Normal tax (lesser of items (2) or (3))	7,200
(5) Partially tax-exempt interest deducted in computing taxable investment income	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5))	26,000
(7) Surtax exemption	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7))	$1,000
(9) Surtax 22 percent of item (8)	220
(10) Tax liability computed without regard to special reduction (item (4) plus item (9))	7,420
(11) Amount by which gross receipts exceed $150,000 ($210,000 gross receipts minus $150,000)	60,000
(12) Percentage which item (1) bears to $100,000 ($60,000 over $100,000)	0.60
(13) Tax as adjusted (percentage determined in item (12) applied to item (10))	4,452

If N's taxable investment income for purposes of the surtax did not exceed $3,000, N would file a return but would pay no tax. Had N elected (under section 821(d)) to be subject to tax under section 821(a), N would not be entitled to the special reduction afforded by section 821(c)(2), since that provision applies only to companies taxable under section 821(c).

[T.D. 6681, 28 FR 11110, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5333, March 20, 1971; 36 FR 5846, March 30, 1971]

§ 1.821–5 Special transitional underwriting loss.

(a) **In general.** Section 821(f) provides a special reduction in the statutory underwriting income (as defined by section 823(a)(1) and paragraph (b)(1) of § 1.823–6) of any company taxable under section 821(a) which was taxable under section 821 for the five taxable years immediately preceding January 1, 1962, and which incurred an underwriting loss (as defined in section 821(f)(3) and paragraph (c) of this section) for each of such five taxable years.

(b) **Amount of reduction.** In the case of a company described in section 821(f)(1) and paragraph (a) of this section the statutory underwriting income for the taxable year (determined without regard to this paragraph) shall be reduced by an amount equal to the amount by which—

(1) The sum of the underwriting losses of such company for the five taxable years immediately preceding January 1, 1962, exceeds

(2) The total amount by which the company's statutory underwriting income was reduced by reason of section 821(f) and this section for prior taxable years.

(c) **Underwriting loss defined.** For purposes of computing the amount of the reduction available under section 821(f) and paragraph (a) of this section, the term underwriting loss means statutory underwriting loss (as defined by section 823(a)(2) and paragraph (b)(2) of § 1.823–6) computed without any deduction under section 824(a) and paragraph (a) of § 1.824–1 (relating to deduction to provide protection against losses) and without any deduction under section 832(c)(11) (relat-

ing to dividends and similar distributions paid or declared to policyholders). For rules relating to the definition of dividends and similar distributions paid or declared to policyholders, see paragraph (a) of § 1.832–5.

(d) Years of applicability. Section 821(f)(4) provides that the special reduction of statutory underwriting income allowed by section 821(f)(2) and paragraph (b) of this section shall apply to any taxable year beginning after December 31, 1962, and before January 1, 1968, for which the taxpayer is subject to the tax imposed by section 821(a).

[T.D. 6681, 28 FR 11112, Oct. 17, 1963]

§ 1.822–1 Taxable income and deductions.

(a) In general. For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, the taxable income of a mutual insurance company subject to the tax imposed by section 821 is its gross investment income, namely, the gross amount of income during the taxable year from interest, dividends, rents, and gains from sales or exchanges of capital assets, less the deductions provided in section 822(c) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses to the extent provided in subchapter P (sec. 1201 and following), chapter 1 of the Code, and the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172.

(b) Wholly tax-exempt interest. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(c) Investment expenses. The deduction allowed by section 822(c)(2) for investment expenses is the same as that allowed life insurance companies by section 803(g)(2). See paragraph (c) of § 1.803–4.

(d) Taxes and expenses with respect to real estate. The deduction allowed by section 822(c)(3) for taxes and expenses with respect to real estate owned by the company is the same as that allowed life insurance companies by section 803(g)(3). See paragraph (d) of § 1.803–4.

(e) Depreciation. The deduction allowed by section 822(c)(4) for depreciation is the same as that allowed life insurance companies by section 803(g)(4). See paragraph (e) of § 1.803–4.

(f) Interest paid or accrued. The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(g) Capital losses. (1) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(2) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of interest, dividends, rents, and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(3) The application of section 822(c)(6) may be illustrated by the following examples:

Example (1). The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1954 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, rents of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of interest, dividends, rents, and net premiums received ($125,000) is $75,000. As the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income.

Example (2). If in example (1) the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of interest, dividends, rents, and net premiums received ($125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example (3). If in example (1) the X Company had mutual insurance company taxable income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1954, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,000 are added to capital gains of $10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable income for purposes of the surtax plus $20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(h) Special deductions. Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.822–2 Real estate owned and occupied.

The limitation in section 822(d)(1) on the amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 is the same as that provided in the case of life insurance companies by section 803(h). See § 1.803–5.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.822–3 Amortization of premium and accrual of discount.

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such amortization and accrual is the same as that provided for life insurance companies by section 803(i) and shall be determined in accordance with § 1.803–6, except that in determining the premium and discount of a mutual insurance company subject to the tax imposed by section 821 the basis provided in section 1012 shall be used in lieu of the acquisition value.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.822–4 Taxable years affected.

Sections 1.822–1 through 1.822–3 are applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.822–5 through 1.822–7 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.822–8 through 1.822–12 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6610, 27 FR 8720, Aug. 31, 1962, as amended by T.D. 6681, 28 FR 11113, Oct. 17, 1963]

§ 1.822–5 Mutual insurance company taxable income.

(a) Mutual insurance company taxable income defined. Section 822(a) defines the term "mutual insurance company taxable income" for purposes

of part II, subchapter L, chapter 1 of the Code. Mutual insurance company taxable income means gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than in insurance business) expenses, and depletion. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of Subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172, and a deduction shall not be permitted with respect to the same item more than once.

(b) Gross investment income defined. For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term "gross investment income" of a mutual insurance company subject to the tax imposed by section 821 as the sum of the following:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822–7;

(ii) Dividends, as described in § 1.61–9;

(iii) Rents and royalties, as described in § 1.61–8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses), Chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821, or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) Deductions from gross investment income—(1) Wholly tax-exempt interest. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) Investment expenses. (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subpara-

graph. As used in section 822(c)(2), the term "general expenses" means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c)(3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of—

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus.

(b) One-fourth of the amount by which mutual insurance company taxable income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 3¾ percent of the book value of the mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term "invested assets" means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate owned and occupied, and to the extent owned and occupied, by the company.

(3) Real estate expenses and taxes. The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See § 1.822–6 for limitation of such deduction.

(4) Depreciation. The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and § 1.822–6, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining mutual insurance company taxable income is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 822(b).

(5) Interest paid or accrued. The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(6) Capital losses. (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by

reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

Example (1). The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1958 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, royalties of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000) is $75,000. As the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income.

Example (2). If in example (1) the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example (3). If in example (1) the X Company had mutual insurance company taxable income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1958, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,000 are added to capital gains of $10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable income for purposes of the surtax plus $20,000 other capital losses under section 822(c)(6) plus the portion of capital losses

allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(7) **Special deductions.** Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

(8) **Trade or business deductions.** (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing mutual insurance company taxable income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b)(2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8)—

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) **Depletion.** The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of § 1.804–4.

[T.D. 6610, 27 FR 8720, Aug. 31, 1962, as amended by T.D. 6631, 28 FR 219, Jan. 9, 1963]

§ 1.822–6 Real estate owned and occupied.

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and

depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§ 1.822-7 Amortization of premium and accrual of discount.

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of § 1.818-3, except in the case of a mutual insurance company subject to the tax imposed by section 821, paragraph (b) of § 1.818-3 shall apply without regard to the date of acquisition and the basis provided in section 1012 shall be used in lieu of the acquisition value.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§ 1.822-8 Determination of taxable investment income.

(a) In general—(1) Taxable investment income defined. Section 822(a)(1) defines the term "taxable investment income" for purposes of part II, subchapter L, chapter 1 of the Code as the gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than an insurance business) expenses, and depletion. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code.

For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 (a) or (c) are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172. See, however, section 825 and paragraph (a) of § 1.825-1 for unused loss deduction allowed companies taxable under section 821(a). A deduction shall not be permitted with respect to the same item more than once.

(2) Investment loss defined. The term "investment loss" is defined by section 822(a)(2) as the amount by which the deductions allowable under section 822(c) and paragraph (c) of this section exceed the gross investment income (as defined in section 822(b) and paragraph (b) of this section).

(b) Gross investment income defined. For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term "gross investment income" of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) as the sum of the following:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822-10;

(ii) Dividends, as described in § 1.61-9;

(iii) Rents and royalties, as described in § 1.61-8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses) chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821 (a) or (c), or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) Deductions from gross investment income—(1) Wholly tax-exempt interest. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) Investment expenses. (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subparagraph. As used in section 822(c)(2), the term "general expenses" means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 (a) or (c) shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c)(3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of—

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus

(b) One-fourth of the amount by which taxable investment income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 3¾ percent of the book value of the mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term "invested assets" means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate

owned and occupied, and to the extent owned and occupied, by the company.

(3) **Real estate expenses and taxes.** The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e)(relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See § 1.822–9 for limitation of such deduction.

(4) **Depreciation.** The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and § 1.822–9, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining taxable investment income is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 822(b).

(5) **Interest paid or accrued.** The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163–1.

(6) **Capital losses.** (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

Example (1). The X Company, a mutual fire insurance company subject to tax under section 821, in the taxable year 1963 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are $60,000, resulting in losses of $20,-000. It pays dividends to policyholders of $150,000. It sustains losses of $25,000, and pays expenses of $25,000. It receives interest of $50,000, dividends of $5,000, royalties of $4,000, and net premiums of $66,000. The excess of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,000) is $75,-000. Since the gross receipts from the sale of capital assets ($60,000) do not exceed such excess ($75,000), the losses of $20,000 are allowable as a deduction from gross investment income in computing taxable investment income under section 822.

Example (2). If in example (1) the gross receipts were $76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of $2,000 and a loss of $500, the losses allowable as a deduction from gross investment income would be $19,750. The last sale made the gross receipts of $76,000 exceed by $1,000 the excess ($75,000) of the sum of dividends, losses, and expenses paid ($200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received ($125,-000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of $1,000 to the gross receipts of $2,000, or 50 percent. Fifty percent of the loss of $500 is deducted from the total loss of $20,000. The remaining gross receipts of $1,000 and the proportionate loss of $250 should be reported as capital losses under subchapter P.

Example (3). If in example (1) the X Company had taxable investment income for purposes of the surtax of $9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of $18,000 and capital gains of $10,000, the net capital loss for the taxable year 1963, in applying section 1212 for the purposes of section 822(c)(6), would be $8,000. This is determined by subtracting from total losses of $38,000 ($18,000 capital losses under subchapter P plus $20,000 other capital losses under section 822(c)(6)) the sum of capital gains of $10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of $20,000. Such losses of $20,-000 are added to capital gains of $10,000, since they are less than taxable investment income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of $29,750 ($9,750 taxable investment income for purposes of the surtax plus $20,000 other

capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of $10,000 minus capital gains under subchapter P of $10,000).

(7) Special deductions. Section 822(c)(7) allows a mutual insurance company the special deductions provided by Part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received. In applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of this subparagraph, the reference in such section to "taxable income" shall be treated as a reference to "taxable investment income".

(8) Trade or business deductions. (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing taxable investment income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b)(2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8)—

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) Depletion. The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of § 1.804–4.

[T.D. 6681, 28 FR 11113, Oct. 17, 1963]

§ 1.822–9 Real estate owned and occupied.

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 (a) or (c) shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.822–10 Amortization of premium and accrual of discount.

(a) In general. In computing taxable investment income for the taxable year, the gross amount of income from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are, under the provisions of section 822(d)(2), each to be decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821 (a) or (c). However, only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of § 1.818–3, except as provided by paragraph (b) of this section.

(b) Modifications. (1) Paragraph (b) of § 1.818–3 shall apply to mutual casualty insurance companies subject to the tax imposed by section 821 (a) or (c) without regard to the date of acquisition of the particular securities to which the

amortization of premium or accrual of discount is attributable.

(2) In computing the amount of premium or discount for purposes of section 822(d)(2) with respect to securities held by a company taxable under section 821, the basis provided by section 1012 shall be used in lieu of the acquisition value provided by paragraph (b) of § 1.818–3. In the case of a company subject to the tax imposed by section 821(c), adjustments to basis to reflect the accrual of discount and the amortization of premium shall be made in the manner provided by paragraphs (a) and (b) of § 1.818–3. However, for purposes of determining statutory underwriting income or loss for the taxable year under section 823, a company subject to the tax imposed by section 821(a) is not required to accrue discount or to amortize premium in computing its income under section 832 as if it were subject to the tax imposed by section 831. Thus, the accrual of discount and amortization of premium required in the computation of taxable investment income by a company subject to the tax imposed by section 821(a) neither increases nor decreases the mutual insurance company taxable income of such a company and, except to the extent such a company actually accrues discount or amortizes premium for purposes of making the section 832 computation, no adjustment shall be made to the basis of obligations held by it to reflect accrual of discount or amortization of premium.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.822–11 Net premiums.

The term "net premiums", defined in section 822(f)(1), includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 822(f)(2). Net premiums are used in sections 822(c)(6) and 832(c)(5) in determining the limitation on certain capital losses and in the application of section 1212.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.822–12 Dividends to policyholders.

(a) Dividends to policyholders are used in determining the "underwriting loss" for purposes of the special transitional underwriting loss deduction provided by section 821(f), and the limitation on capital losses under section 822(c)(6); in computing statutory underwriting income or loss under section 823, and the subtractions from the protection against loss account under section 824(d). The term "dividends to policyholders" is defined in section 822(f)(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 822(f)(1). Savings credited to the individual accounts of the subscribers of a reciprocal underwriter or interinsurer under section 823(b)(2) are not dividends paid or declared within the meaning of this paragraph. However, distributions in respect of such credits shall be considered as dividends paid. See section 823(b)(2) and paragraph (c)(2) of § 1.823–6. The term "paid or declared" is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed by adding the amount of dividends and similar distributions declared but unpaid at the end of the taxable year to dividends and similar distributions paid during the taxable year and deducting dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

§ 1.823–1 Net premiums.

Net premiums are one of the items used, together with interest, dividends, and rents, less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term "net premiums" is defined in section 823(1)

and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.823–2 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term "dividends to policyholders" is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term "paid or declared" is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows:

To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year.

If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.823–3 Taxable years affected.

Sections 1.823–1 and 1.823–2 are applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of Part II, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.823–4 and 1.823–5 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of Part II, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.823–6 through 1.823–8 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of Parts II and III, Subchapter L, Chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6610, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6681, 28 FR 11116, Oct. 17, 1963]

§ 1.823–4 Net premiums.

Net premiums are one of the items used, together with the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof), less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term "net premiums" is defined in section 823(1) and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§ 1.823–5 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term "dividends to policyholders" is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such

amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term "paid or declared" is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows: To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

§ 1.823–6 Determination of statutory underwriting income or loss.

(a) In general. Section 823(a) and this section provide that for purposes of determining statutory underwriting income or loss for the taxable year, a mutual insurance company subject to the tax imposed by section 821(a) must first take into account the same gross income and deduction items (except as modified by section 823(b) and paragraph (c) of this section) as a taxpayer subject to tax under section 831 would take into account for purposes of determining its taxable income under section 832. These items are then reduced to the extent that they include amounts which are included in determining taxable investment income or loss under section 822(a) and § 1.822–8. In addition, in computing its statutory underwriting income or loss for the taxable year, a company taxable under section 821(a) is allowed to deduct the amount determined under section 824(a) (relating to deduction to provide protection against losses) and, if its gross amount received is less than $1,100,000, is allowed to deduct the amount determined under section 823(c) and paragraph (d) of this section (relating to special deduction for certain small companies), subject to the limitations provided therein.

(b) Definitions—(1) Statutory underwriting income defined. Section 823(a)(1) defines the term "statutory underwriting income" for purposes of Part II of Subchapter L of the Code. Subject to the modifications provided by section 823(b) and paragraph (c) of this section, statutory underwriting income is defined as the amount by which—

(i) The gross income which would be taken into account in computing taxable income under section 832 if the taxpayer were subject to the tax imposed by section 831, reduced by the gross investment income (as determined under section 822(b)), exceeds

(ii) The sum of—

(a) The deductions which would be taken into account in computing taxable income if the taxpayer were subject to the tax imposed by section 831, reduced by the deductions provided in section 822(c) (relating to deductions allowed in computing taxable investment income), plus

(b) The deductions provided in section 823(c) (relating to special deduction for small company having gross amount of less than $1,100,000) and section 824(a)(relating to deduction to provide protection against losses).

For purposes of subdivision (ii)(a) of this subparagraph, the limitations on the amounts deductible under paragraphs (9) (relating to charitable, etc., contributions) and (12) (relating to partially tax-exempt interest and to dividends received) of section 832(c) shall be computed by reference to taxable income as defined by section 832(a), and as modified by section 823(b) and paragraph (c) of this section.

(2) Statutory underwriting loss defined. "Statutory underwriting loss" is defined in section 823(a)(2) as the amount by which the amount determined under section 823(a)(1)(B) and subparagraph (1)(ii) of this paragraph exceeds the amount determined under section 823(a)(1)(A) and subparagraph (1)(i) of this paragraph.

(c) Modifications—(1) Net operating losses. In applying section 832 for purposes of determining statutory underwriting income or loss under sec-

tion 823(a) and paragraph (b) of this section, the deduction for net operating losses provided by section 172 is not allowed. However, see section 825(a) and § 1.825–1 for unused loss deduction allowed companies taxable under section 821(a) in computing mutual insurance company taxable income under section 821(b).

(2) Interinsurers and reciprocal underwriters—(i) In general. Section 823(b)(2) provides that in computing the statutory underwriting income or loss of a mutual insurance company which is an interinsurer or reciprocal underwriter, there shall be allowed as a deduction the increase for the taxable year in savings credited to subscriber accounts, or there shall be included as an item of gross income the decrease for the taxable year in savings credited to subscriber accounts. For purposes of this subparagraph, the term "savings credited to subscriber accounts" means such portion of the surplus for the taxable year as is credited to the individual accounts of subscribers before the 16th day of the third month following the close of the taxable year, but only if the company would be obligated to pay such amount promptly to such subscriber if he terminated his contract at the close of the company's taxable year, and only if the company mails notification to such subscriber of the amount credited to his individual account in the manner provided by subdivision (v) of this subparagraph.

(ii) Limitations. Amounts representing return premiums (as defined in paragraph (a)(1)(ii) of § 1.809–4) which the company would be obligated to pay to any subscriber terminating his contract at the close of the company's taxable year are not savings credited to subscriber accounts within the meaning of section 823(b)(2) and subdivision (i) of this subparagraph. The deduction for savings credited to individual subscriber accounts is allowed only in the case of reciprocal underwriters or interinsurers where the subscriber or policyholder has not only a legally enforceable right to receive the amount so credited if he withdraws from the exchange, but where the amounts credited, as a matter of actual practice, are paid to subscribers or policyholders who terminate their contracts. Thus, no deduction shall be allowed for savings credited to subscriber accounts if such savings are not in fact promptly returned to subscribers when they terminate their contracts.

(iii) Computation of increase or decrease in savings credited to subscriber accounts. For purposes of determining the increase or decrease for the taxable year in savings credited to subscriber accounts, every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this section shall establish and maintain an account for savings credited to subscriber accounts. The opening balance in such account for the first taxable year for which a deduction is claimed under section 823(b)(2) and this section shall be zero. In each taxable year there shall be added to such account the total amount of savings credited to subscriber accounts for the taxable year, and there shall be subtracted from such account the total amount of savings subtracted from subscriber accounts for the taxable year. However, in no case may the amount added to the account exceed the total amount of savings to subscribers for the taxable year, irrespective of the amount of savings credited to subscriber accounts for the taxable year. Credits made to subscriber accounts after the close of the taxable year and before the 16th day of the third month following the close of the taxable year will be taken into account as if such amounts had been credited on the last day of the taxable year to the extent such amounts would have become fixed and determinable legal obligations due subscribers if such subscribers had terminated their contracts on the last day of the company's taxable year unless, at the time the amounts are credited, the company specifically designates such amounts as being from surplus for the taxable year in which the amounts were actually credited. Such a designation, once made, shall be irrevocable. However, if a company credited savings to subscriber accounts after December 31, 1962, and before March 16, 1963, and failed to designate such credits as being from surplus for the taxable year 1963, such company may designate such credits as being from surplus for the taxable year 1963 for purposes of determining the total amount of credits to subscriber accounts for such year. In determining the total amount of savings subtracted from subscriber accounts for the taxable year, only amounts subtracted from savings credited for taxable years beginning with the first taxable year for which a deduction was claimed under section 823(b)(2) and this subparagraph will be taken into account. The method of accounting regularly employed by the taxpayer in keeping its books of account will be used for purposes of determining whether the amounts subtracted from the subscriber accounts are from savings for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings for taxable years beginning with such first taxable year. Where the method of accounting regularly employed by the taxpayer in keeping its books of account does not clearly

indicate whether an amount was subtracted from savings credited to subscriber accounts for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings credited for such first taxable year and subsequent taxable years, the amount subtracted will be deemed to have come from savings credited to subscriber accounts for all taxable years, on a pro rata basis. Where an amount is subtracted from a subscriber's account for record purposes, but such subtraction does not reflect the discharge of the company's legal obligation to pay the amount subtracted promptly to the subscriber if he terminates his contract, then such subtraction shall not be taken into account for purposes of section 823(b)(2) and this subparagraph. On the other hand, where the company ceases to be under a legal obligation to pay promptly to any subscriber the amount credited to his individual account, then such amount shall be considered as having been subtracted from such subscriber's account at the time such obligation ceased to exist. For purposes of section 823(b)(2) and this subparagraph, the increase (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the taxable year exceeds the balance in such account as of the close of the preceding taxable year; and the decrease (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the preceding taxable year exceeds the balance in such account as of the close of the taxable year.

(iv) **Legal obligation.** For purposes of this subparagraph, the existence of a legal obligation on the part of the company to pay to the subscriber the savings credited to him will be determined under the insurance contract pursuant to which the credits are made. Where it appears that the company is otherwise legally obligated to pay amounts credited to its subscribers, the requisite legal obligation will not be considered absent merely because a subscriber's credits remain subject to absorption by future losses incurred if left on deposit with the company.

(v) **Notification to subscribers.** Every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this subparagraph for amounts credited to the individual accounts of its subscribers must mail to each such subscriber written notification of the amount credited to the subscriber's account for the taxable year, the date on which such amount was credited, and the date on which the subscriber's right to such amount first would have become fixed if such subscriber had terminated his contract at the close of the company's taxable year. As an alternative to providing each subscriber with specific information relating to the amount of savings credited to his individual account, the notification required by this subdivision may be provided in the form of a table or formula mailed to the subscribers. However, a table or formula may not be used in lieu of the specific notification required by this subdivision unless such table or formula has been approved by the Commissioner. Generally, a table or formula will be approved if it enables the subscriber to simply and readily ascertain the amount of savings credited to his individual account for the taxable year, the date on which such amount was credited, and the date on which his right to such amount first would have become fixed if he had terminated his contract at the close of the company's taxable year. A reciprocal underwriter or interinsurer which desires to use such a table or formula should direct a written request for approval of such table or formula to the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C., 20224. Such request must set forth a copy of the table or formula proposed to be used, together with sufficient information to permit the Commissioner to determine the basis upon which such table or formula was prepared and the manner in which the subscribers will use such table or formula in determining the amounts credited to their individual accounts. Once a table or formula has been approved, the use of such table or formula with respect to savings credited for subsequent taxable years will not require further approval unless the basis upon which such table or formula was prepared, or the manner in which such table or formula is to be applied, is substantially changed. The table or formula method of notification may be used with respect to all or less than all of the company's subscribers. For example, the company might provide the notification required by this subdivision to one class of subscribers in the form of a table or formula mailed to the individual subscribers, while providing another class of subscribers with specific statements of the amounts credited to their individual accounts. The notification required by this subdivision must be mailed before the 16th day of the third month following the close of the reciprocal's taxable year for which the account was credited. Where for any taxable year a reciprocal underwriter or interinsurer claims a deduction under section 823(b) and this subpara-

graph and fails to give notice as required by this subdivision, such deduction shall not be allowed unless the reciprocal establishes to the satisfaction of the district director that the failure to mail such notice within the prescribed period was due to reasonable cause.

(d) Special deduction for small company having gross amount of less than $1,100,000—(1) In general. In the case of a taxpayer subject to the tax imposed by section 821(a), section 823(c) provides that if the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is less than $1,100,000, then, subject to the limitation provided in section 823(c)(2) and subparagraph (2) of this paragraph, there shall be allowed an additional deduction for purposes of determining statutory underwriting income or loss under section 823(a) for the taxable year. The amount of the additional deduction is $6,000; except that if the gross amount received for the taxable year exceeds $500,000, the additional deduction is limited to an amount equal to 1 percent of the amount by which $1,100,000 exceeds such gross amount.

(2) Limitation. The amount of the deduction provided by section 823(c)(1) may not exceed the statutory underwriting income for the taxable year, computed without regard to the deduction allowed under section 823(c)(1) and subparagraph (1) of this paragraph, and the deduction allowed under section 824(a) (relating to deduction for protection against losses).

(3) Example. The application of section 823(c) and this paragraph may be illustrated by the following example:

M, a mutual insurance company subject to the tax imposed by section 821(a), has the following items for the taxable year 1963:

Gross amount for purposes of section 823(c)(1)	$800,000
Gross investment income (including capital gains)	150,000
Capital gains	100,000
Gross income under section 832	900,000
Deductions under section 822(c)	22,000
Deductions under section 832 (as modified by section 823(b)(2))	746,000

Under the provisions of section 823(c), M's special small company deduction for the taxable year 1963 would be $3,000, computed as follows:

(1) Gross amount for purposes of section 823(c)(1)	$800,000
(2) Amount by which $1,100,000 exceeds item (1) ($1,100,000 minus $800,000)	300,000
(3) 1 percent of item (2) (not to exceed $6,000)	3,000
(4) Gross income under section 832, reduced by gross investment income ($900,000 minus $150,000)	$750,00
(5) Deductions under section 832 (as modified by section 823(b)), reduced by deductions under section 822(c) ($746,000 minus $22,000)	724,000
(6) Limitation on deduction under section 823(c)(1) (excess, if any, of item (4) over item (5))	26,000
(7) Deduction under section 823(c)(1) (item (3) or item (6), whichever is the lesser)	3,000

[T.D. 6681, 28 FR 11116, Oct. 17, 1963]

§ 1.823–7 Subscribers of reciprocal underwriters and interinsurers.

A subscriber or policyholder of a reciprocal underwriter or interinsurer entitled to the deduction allowed by section 823(b)(2) and paragraph (c)(2) of § 1.823–6 shall treat amounts representing savings credit to his individual account for the taxable year as a dividend paid or declared for purposes of computing his taxable income. If a reciprocal credits savings to subscriber accounts after the close of its taxable year, but before the 16th day of the third month following the close of the taxable year, and the reciprocal takes such credits into account as if they had been made on the last day of its taxable year, the subscribers of such reciprocal must take such savings into account as if they had in fact been credited on the last day of the company's taxable year. The subscriber shall take savings credited to his account into account without regard to whether the amounts credited are actually distributed to him in cash. To the extent the insurance premium constituted a deductible expense when paid or accrued, the subscriber's taxable income for the taxable year will be increased and any loss for the taxable year will be decreased, by the amount credited to his account. Amounts credited to a subscriber's account which are taken into income by him and which subsequently are used to absorb losses of the reciprocal shall be treated by the subscriber as an additional insurance expense for the taxable year in which the amounts are absorbed. Such amounts may be deducted in computing taxable income to the extent insurance constitutes an otherwise properly deductible expense for such taxable year.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

§ 1.823–8 Special transitional underwriting loss; cross reference.

With respect to taxable years beginning after December 31, 1962, and before January 1, 1968, section 821(f) provides, for any company subject to the tax imposed by section 821(a), a special reduction in the statutory underwriting income if such

company was subject to tax under section 821 for the five taxable years immediately preceding January 1, 1962, and incurred an underwriting loss in each of such five taxable years. For rules relating to the determination of the amount of such reduction, see section 821(f) and § 1.821–5.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

§ 1.824–1 Adjustments to provide protection against losses.

(a) Allowance of deduction—(1) In general. Except as otherwise provided in section 824(d), section 824(a) provides that in determining statutory underwriting income or loss (as defined in section 823(a)) for any taxable year, a mutual insurance company subject to the tax imposed by section 821(a) is allowed a deduction in an amount equal to the sum of—

(i) 1 percent of the losses incurred during the taxable year (as determined under section 832(b)(5) and § 1.832–4);

(ii) 25 percent of the underwriting gain for the taxable year (as defined in subparagraph (2)(i) of this paragraph); and

(iii) If the concentrated windstorm, etc., premium percentage (as defined in subparagraph (2)(ii) of this paragraph) for the taxable year exceeds 40 percent, an amount determined by applying so much of such percentage as exceeds 40 percent to the underwriting gain for the taxable year.

(2) Definitions—(i) Underwriting gain. For purposes of this section and section 824(a)(1), the term "underwriting gain" means statutory underwriting income, computed under section 823(a) without regard to the deduction provided by section 824(a)(1) and subparagraph (1) of this paragraph.

(ii) Concentrated windstorm, etc., premium percentage. For purposes of this section and section 824(a), the term "concentrated windstorm, etc., premium percentage" means, with respect to any taxable year, the percentage obtained by dividing—

(a) The amount of the premiums earned on insurance contracts during the taxable year (as defined in section 832(b)(4) and paragraph (a) of § 1.832–1), to the extent attributable to insuring against losses arising either in any one State or within 200 miles of any fixed point selected by the taxpayer from windstorm, hail, flood, earthquake, or similar hazards, by

(b) The amount of the premiums earned on insurance contracts during the taxable year.

The term "similar hazards" as used in section 824(a) and this section includes tornadoes, cyclones, hurricanes and similar natural phenomena, but does not include insurance against fires, explosions, or riots. Where a company issues contracts insuring against a combination of risks, some of which are included in the definition of what constitutes concentrated windstorm, etc., coverage risks, and some of which are not so included, the taxpayer shall make a reasonable allocation of the premiums earned for the taxable year for purposes of determining such company's concentrated windstorm, etc., premium percentage for the taxable year. Where such an allocation is made, the taxpayer shall submit with his income tax return sufficient information to enable the district director to determine the basis upon which the allocation was made and the reasonableness thereof.

(3) Concentrated risk companies; selection of geographical area—(i) Manner of making selection. Section 824(a)(2)(A) permits a mutual insurance company taxable under section 821(a) to make an annual selection of the geographical area to be used in determining its concentrated windstorm, etc., premium percentage for the taxable year. The geographical area selected shall be indicated in a statement attached to the taxpayer's return for the taxable year for which such selection is to apply. Such statement shall include the name and address of the taxpayer, and shall set forth the computation by which the concentrated windstorm, etc., premium percentage was determined. In addition, the taxpayer shall furnish such other information as the district director may require in determining the correctness of the taxpayer's computation.

(ii) Scope of selection. The selection of a geographical area under section 824(a)(2)(A) shall be effective only with respect to the taxable year for which such selection is made and the area selected may be changed within the period of limitation allowed. Thus, the taxpayer must indicate the State or other geographical area selected for each taxable year for which an amount is deducted under section 824(a)(1)(C) and this paragraph.

(b) Protection against loss account—(1) In general. Section 824(b) requires every insurance company subject to the tax imposed by section 821(a) for any taxable year to establish and maintain a protection against loss account. This account is to be established for taxable years begin-

ning after December 31, 1962. The opening balance in such account shall be zero.

(2) Additions to the protection against loss account. Section 824(c) provides that in the case of a company subject to the tax imposed by section 821(a), there shall be added to the protection against loss account for each taxable year an amount equal to the amount allowable as a deduction for the taxable year under section 824(a)(1) and paragraph (a)(1) of this section.

(3) Subtractions from the protection against loss account—(i) In general. Section 824(d)(1) provides that, after making the additions to the protection against loss account required by section 824(c) and subparagraph (2) of this paragraph, certain amounts shall be subtracted from such account for the taxable year. The amounts subtracted are taken into account under section 821(b)(1)(C) for purposes of determining mutual insurance company taxable income for the taxable year. The amounts to be subtracted are—

(a) First, an amount equal to the excess (if any) of the protection against loss deduction allowed under section 824(a) and paragraph (a) of this section for the taxable year over the underwriting gain (as defined in section 824(a)(1)) for the taxable year,

(b) Then, the amount (if any) by which the sum of the investment loss for such year and the statutory underwriting loss (reduced by the amount referred to in section 824(d)(1)(A) and (a) of this subdivision) for such year, exceeds the sum of the statutory underwriting income for the taxable year and the taxable investment income for such taxable year,

(c) Next (in the order in which the losses occurred), amounts equal to the unused loss carryovers to such year,

(d) Next, any amount remaining which was added to the account for the fifth preceding taxable year, minus one-half of the amount remaining in the account for such taxable year which was added by reason of section 824(a)(1)(B), and

(e) Finally, the amount by which the total amount in the account exceeds the greater of 10 percent of premiums earned on insurance contracts during the taxable year (as defined in section 832(b)(4) and § 1.832–4) less dividends to policyholders (as defined in section 832(c)(11) and § 1.832–5), or the total amount in the account at the close of the preceding taxable year.

(ii) Rules for determining ceiling on protection against loss account. Section 824(d)(2) provides that for purposes of determining the ceiling on the protection against loss account under section 824(d)(1)(E), the total amount in the protection against loss account is to be determined after the subtractions required under section 824(d) but without regard to paragraph (1)(E) thereof (relating to the ceiling on such account), and without regard to amounts remaining in the account which were added, with respect to all taxable years, under section 824(a)(1)(C)(relating to additional deduction to provide protection against losses for certain companies having concentrated windstorm, etc., risks). Thus, the limitation provided in section 824(d)(1)(E) does not apply to amounts added to the protection against loss account by concentrated risk companies to the extent such amounts are attributable to the additional deduction allowed such companies under section 824(a)(1)(C). In no case does the limitation of section 824(d)(1)(E) require a taxpayer to reduce the balance in its protection against loss account below the balance in such account at the close of the preceding taxable year.

(iii) Priorities. (a) Section 824(d)(3) provides a priority system for making the subtractions required under section 824(d)(1). Under section 824(d)(3)(A) the subtractions required to be made under section 824(d)(1)(A), (B), and (C), are to be made (1) first (on a first-in, first-out basis), from amounts in the account with respect to the five preceding taxable years and the taxable year, and (2) then, from amounts in the account with respect to earlier years.

(b) Section 824(d)(3)(B) provides that the amounts to be subtracted under section 824(d)(1)(E) are to be subtracted only from amounts in the protection against loss account with respect to the taxable year.

(c) Section 824(d)(3)(C) provides that if the amount to be subtracted from the total amounts in the protection against loss account with respect to any taxable year is less than such total, the amount required to be subtracted from such account under section 824(d)(1)(A), (B), (C), and (E) is to be subtracted from each of the amounts referred to in section 824(a)(1) in the account with respect to such year in the proportion which each bears to the total amount in the account with respect to such year.

(c) Examples. The application of this section may be illustrated by the following examples:

Example (1). The computation of mutual insurance company taxable income, statutory underwriting income, and the protection against loss account, for a 6-year period with successive underwriting gains may be illustrated by assuming the facts shown in the following table:

Year	Insurance losses incurred	Underwriting gain	Additions to protection against loss account	Taxable investment in income
1963	700	12	10 (7+3)	10
1964	800	16	12 (8+4)	11
1965	600	12	9 (6+3)	12
1966	600	20	11 (6+5)	13
1967	900	24	15 (9+6)	14
1968	1,000	20	15 (10+5)	15

For 1963, the statutory underwriting income would be 2 (underwriting gain of 12 minus the 1 percent of incurred losses (7) and the 25 percent of underwriting gain (3) credited to the protection against loss account) while mutual insurance company taxable income would be 12, the sum of the taxable investment income of 10 and the statutory underwriting income of 2. For 1964 the statutory underwriting income would be 4 and the mutual insurance company taxable income 15; for 1965, the corresponding amounts would be 3 and 15; for 1966, 9 and 22; and for 1967, 9 and 23.

For 1968 the statutory underwriting income would be 5 (underwriting gain of 20 minus the 1 percent of losses incurred (10) and the 25 percent of underwriting gain (5) credited to the protection against loss account); but there would be included in mutual insurance company taxable income an amount equal to the first item added to the protection against loss account in 1963 (7), and half of the second item (1.5), so that for 1968 the mutual insurance company taxable income would be 28.5, the sum of the taxable investment income (15), the statutory underwriting income (5), and the 8.5 subtracted from the protection against loss account in accordance with section 824(d)(1)(D).

At the end of 1968, therefore, the total amount in the protection against loss account would be 63.5; amounts totaling 62 added for 1964 and the 4 following years plus 1.5 remaining from amounts added in 1963. Under the priority system provided by section 824(d)(3), the amounts added for 1964 and the 4 following years would be the amounts first subject to losses for years following 1968. If after having been in the account for 5 years such amounts were not absorbed by losses, then section 824(d)(1)(D) would require the amount attributable to the 1 percent of losses incurred for the fifth preceding taxable year, and one-half of the amount attributable to the 25 percent of underwriting gain for the fifth preceding taxable year, to be included in income.

Example (2). If in example (1) there had been a statutory underwriting loss of 30 for 1966 computed without regard to the protection against loss deduction, and losses incurred had been 600, the addition to the protection against loss account would have been 6 (1 percent of incurred losses of 600, plus 25 percent of underwriting gain of zero), and the statutory underwriting loss would be 36. After increasing the protection against loss account by the addition of 6, 23 would be subtracted from the protection against loss account under section 824(d)(1). Of the amount subtracted, 6 would be attributable to section 824(d)(1)(A) (the excess of the protection against loss deduction (6) over the underwriting gain (9)), and 17 would be attributable to section 824(d)(1)(B) (the excess of the statutory underwriting loss reduced by the subtraction required by section 824(d)(1)(A) (36 minus 6, or 30) over the taxable investment income (13)). Under section 824(d)(3)(A), the subtractions required by section 824(d)(1)(A), (B), and (C), would be made first (on a first-in, first-out basis) from amounts in the account with respect to the five preceding taxable years and the taxable year. Thus, the subtractions would be made as follows: 10 from the 10 added for 1963; next, 12 from the 12 added for 1964; finally, 1 from the 9 added for 1965. Since the amount to be subtracted from amounts added in 1965 is less than the total added for such year, the subtraction must be made from each of the amounts in the account with respect to 1965 in the proportion which each amount bears to the total amount in the account for such year. Of the 9 added to the protection against loss account in 1965, 6 represented 1 percent of losses incurred, and 3 represented 25 percent of the underwriting gain for that year. Thus, ⅔ of the amount to be subtracted will be subtracted from the 6, and ⅓ will be subtracted from the 3. After the subtractions required by section 824(d), the balance remaining in the protection against loss account at the end of 1966 will be 14, comprised of 8 (5.33 plus 2.67) from 1965, plus the 6 added for 1966. Since the 10 added in 1963 and the 12 added in 1964 were eliminated from the protection against loss account, there would be nothing to be included in mutual insurance company taxable income for 1968 or 1969 by reason of section 824(d)(1)(D). The mutual insurance company taxable income for 1966 would be zero (23 subtracted from the protection against loss account plus taxable investment income of 13, minus statutory underwriting loss of 36).

Example (3). For the taxable year 1963, W, a mutual insurance company taxable under section 821(a), writes windstorm, hail, and flood insurance, exclusively, and only operates in the States of A, B, and C. For the taxable year 1963 W has underwriting gain (as defined by section 824(a)(1)) of 100, losses incurred of 1,000, and earned premiums of 1,500. For purposes of determining its concentrated risk premium percentage for 1963, W selects the area encompassed by a circle having a 200-mile radius (400-mile diameter) with its center in Central City, State of B. W determines that during 1963, it earned premiums attributable to insurance against losses arising within this area in the amount of 1,350. On the facts assumed, W's concentrated risk premium percentage for the taxable year 1963 is 90 percent (1,350 divided by 1,500), and W's protection against loss deduction is 85. Of this amount, 10 (1 percent of losses incurred, or 1 percent of 1,000) is attributable to section 824(a)(1)(A); 25 (25 percent of underwriting gain, or 25 percent of 100) is attributable to section 824(a)(1)(B); and 50—the amount determined by multiplying the underwriting gain by so much of the concentrated windstorm, etc., premium percentage as exceeds 40 percent, or 50 percent (90 percent minus 40 percent) times 100—is attributable to section 824(a)(1)(C). W's selection of the area to be used in determining its concentrated risk premium percentage is not binding. In future taxable years, W may select some other area, such as the State of A, B, or C, or the area within 200 miles of any fixed point. Furthermore, W may file an amended return for 1963 (within the period of limitations prescribed) in order to change its selection for that year.

Example (4). For the taxable year 1969, X, a mutual insurance company subject to the tax imposed by section 821(a), has taxable investment income of 25 and a statutory underwriting loss of 22 (including a protection against loss deduction of 7 which is entirely attributable to the application of section 824(a)(1)(A)). The following table shows the protection against loss account of X before and after the application of section 824(d) for the taxable year 1969:

PROTECTION AGAINST LOSS ACCOUNT

	1963	1964	1965	1966	1967	1968	1969
Balance remaining in account with respect to each taxable year (before application of sec. 824(d))	3	1	1	1	2	1	7
Balance remaining in account with respect to each taxable year (after application of sec. 824(d))	3	0	0	0	0	0	6

Under the provisions of section 824(d)(1)(A), for the taxable year 1969, X would subtract 7 from its protection against loss account (the amount by which the protection against loss deduction allowed under section 824(a) for the taxable year exceeds the underwriting gain for the taxable year, or 7 minus 0). Under the provisions of section 824(d)(3)(A), since the subtractions are to be made with respect to amounts in the account for the 5 preceding taxable years and the taxable year on a first-in, first-out basis, X would first apply the amount to be subtracted to the amount in the account with respect to 1964, 1965, 1966, 1967, and 1968, in that order. This would reduce the total amount in the account with respect to such taxable years by 6, and the balance in the account with respect to each of the taxable years 1964 through 1968 would be reduced to zero. The remaining amount required to be subtracted under section 824(d)(1)(A), 1 (7 minus 6), would then be subtracted from the amount added to the account for the taxable year, 7 (an amount equal to the protection against loss deduction for the taxable year 1969), leaving a balance of 6 (7 minus 1) in the account with respect to 1969. No proration of the subtraction from the amount in the account for 1969 is required under section 824(d)(3)(C) since the entire amount added to the account in 1969 was added by reason of section 824(a)(1)(A).

Example (5). Assume the facts are the same as in example (4), except that X has taxable investment income of 7 (instead of 25) for the taxable year 1969. After the application of section 824(d) for the taxable year 1969, the results would be as follows:

PROTECTION AGAINST LOSS ACCOUNT

	1963	1964	1965	1966	1967	1968	1969
Balance remaining in account with respect to each taxable year (after application of sec. 824(d))	1	0	0	0	0	0	0

Under the provisions of section 824(d)(1), for the taxable year 1969, X would subtract 15 from its protection against loss account. Of this amount, 7 would be attributable to the application of section 824(d)(1)(A) (*i.e.*, the amount by which the protection against loss deduction allowed under section 824(a) for the taxable year exceeds the underwriting gain for the taxable year, or 7 minus 0), and 8 would be attributable to the application of section 824(d)(1)(B) (*i.e.*, the amount by which the statutory underwriting loss for the taxable year, reduced by the amount determined under section 824(d)(1)(A), exceeds the taxable investment income for the taxable year, or the amount by which 15 (22 minus 7) exceeds 7). Under section 824(d)(3)(A)(i), this subtraction would be made (on a first-in, first-out basis) from amounts in the account with respect to 1964, 1965, 1966, 1967, 1968, and 1969, in that order. This would reduce the total amount in the account with respect to such taxable years by 13, and the balance in the account with respect to each of the taxable years 1964 through 1969 would be reduced to zero. Under the provisions of section 824(d)(3)(A)(ii), the remaining amount required to be subtracted under section 824(d)(1), 2 (15 minus 13), would then be subtracted from the amount in the account with respect to 1963 (*i.e.*, the amount representing one-half of the amount added by reason of section 824(a)(1)(B) which was not required to be subtracted from the protection against loss account under section 824(d)(1)(D) in 1968). Thus, the amount in the account with respect to 1963 would be reduced to 1 (3 minus 2).

Example (6). Assume that Y, a mutual insurance company subject to tax under section 821(a), has a protection against loss account which reflects the following items for the taxable years 1963 through 1968:

ADDITIONS TO PROTECTION AGAINST LOSS ACCOUNT

	1963	1964	1965	1966	1967	1968
1 percent of losses incurred	15	20	60	60	60	60
25 percent of underwriting gain	60	20	40	50	45	45
Additional deduction for concentrated risks	0	0	5	5	0	0
Total	75	40	105	115	105	105

Y, in computing mutual insurance company taxable income for 1968, is required to subtract from the account with respect to 1963 the entire amount of 1 percent of losses incurred added for 1963 (15) and one-half of the underwriting gain (30) added for such year. Upon taking into account these subtractions, the balance in the protection against loss account with respect to 1963 is 30 (the one-half remaining in the account after the application of section 824(d)(1)(D)).

Assume further, that for the taxable year 1969, Y has taxable investment income of 50, underwriting gain of 80 (premiums earned less dividends to policyholders of 5,080, less incurred losses of 4,000 and expenses of 1,000). Under section 824(a), the protection against loss deduction for 1969 is 60. After applying section 824(c), but before applying section 824(d) for 1969, the protection against loss account as of the close of 1969 (after subtracting in 1968 the 45 amount with respect to 1963) would be as follows:

PROTECTION AGAINST LOSS ACCOUNT

	1963	1964	1965	1966	1967	1968	1969
Additions:							
1 percent of loss incurred	0	20	60	60	60	60	40
25 percent of underwriting gain	30	20	40	50	45	45	20
Additional deduction for concentrated risks	0	0	5	5	0	0	0
Total with respect to taxable year	30	40	105	115	105	105	60
Total (as of end of each year before 1969 subtractions)....	30	70	175	290	395	500	560

After making the addition to the protection against loss account for 1969 and obtaining the results shown in the table above, Y is required to make the subtractions for 1969 from the account. These subtractions may be summarized as follows:

SUBTRACTIONS UNDER SECTION 824(d) FOR 1969

Taxable year with respect to which amount is subtracted	1963	1964	1965	1966	1967	1968	1969
Par. (1)(A) subtraction...........	0	0	0	0	0	0	0
Par. (1)(B) subtraction...........	0	0	0	0	0	0	0
Par. (1)(C) subtraction...........	0	0	0	0	0	0	0
Par. (1)(D) subtraction...........	0	[1]30	0	0	0	0	0
Par. 1(E) subtraction	0	0	0	0	0	0	12
Pars. (4) and (5) subtraction	0	0	0	0	0	0	0

[1] 20 represents the amount added for 1964 with reference to incurred losses; 10 represents one-half of the amount added for 1964 with reference to underwriting gain.

After determining the subtractions with respect to years before 1969, the next step is to determine whether any subtraction is required for the taxable year 1969 under section 824(d)(1)(E). Since the total balance in the account after the application of section 824(d) (other than paragraph (1)(E) thereof), 520 (560 minus 30, and excluding 10 added to the account by reason of the additional deduction for protection against losses for concentrated windstorm, etc., companies provided by section 824(a)(1)(C)), exceeds 10 percent of premiums earned on insurance contracts during the taxable year less dividends to policyholders, 508 (10 percent of 5,080), Y would be subject to the ceiling on the protection against loss account for the taxable year 1969 and would be required to subtract 12 (the excess of 520 over 508) from the account under section 824(d)(1)(E). Under the provisions of section 824(d)(3)(B) this subtraction would be made only from amounts in the account with respect to the taxable year 1969. Under the provisions of section 824(d)(3)(C), however, since the amount to be subtracted, 12, is less than the total amount added to the account for the taxable year, 60 (40 plus 20), the subtractions under section 824(d)(1)(E) would be applied ratably against each of the amounts added to the account for the taxable year. Thus, the amount remaining in the account with respect to section 824(a)(1)(A) for the taxable year 1969, would be 32 (40 minus $^{40}/_{60} \times 12$, or 40 minus 8), and the amount remaining in the account with respect to section 824(a)(1)(B) for the taxable year 1969, would be 16 (20 minus $^{20}/_{60} \times 12$, or 20 minus 4).

Based on these facts, Y's mutual insurance company taxable income for 1969 would be 112 (the sum of taxable investment income of 50, plus statutory underwriting income of 20 (underwriting gain minus protection against loss deduction, or 80 minus 60), plus subtractions from the protection against loss account under section 824(d) of 42).

[T.D. 6681, 28 FR 11119, Oct. 17, 1963]

§ 1.824–2 Termination of taxability under section 821.

Section 824(d)(4) provides that if the taxpayer is not subject to tax under section 821 for any taxable year, the entire amount in its protection

against loss account at the close of the preceding taxable year must be subtracted from such account in such preceding taxable year and included in the company's mutual insurance company taxable income (as defined in section 821(b)) for such preceding taxable year.

[T.D. 6681, 28 FR 11122, Oct. 17, 1963]

§ 1.824–3 Election to subtract amount from protection against loss account.

(a) In general. Section 824(d)(5) provides that a taxpayer subject to the tax imposed by section 821(a) for any taxable year may elect, in the manner provided in paragraph (b) of this section, to subtract from its protection against loss account the amount which would otherwise be in such account at the close of such taxable year. The amount so subtracted is to be included in mutual insurance company taxable income (as defined in section 821(d)) for the taxable year.

(b) Manner of making election. The election provided by section 824(d)(5) and this section shall be made (after the close of the taxable year) in a statement attached to the taxpayer's income tax return originally filed for the taxable year for which such election is to apply or to an amended return for such year. If the election is made in an amended return, such amended return and statement must be filed not later than the time prescribed by law for filing the return (including extensions thereof) for the taxable year following such taxable year. The statement shall include the name and address of the taxpayer, and shall be signed by the taxpayer (or his duly authorized representative). In addition, the statement shall indicate that the company has elected under section 824(d)(5) to reduce the balance of its protection against loss account to zero as of the close of the taxable year and shall set forth the amount which would have been in such account but for such election.

(c) Scope of election. An election made under section 824(d)(5) and this section shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which such election is to apply. If the election allowed by section 824(d)(5) and this section has been made for any taxable year, it cannot be revoked.

[T.D. 6681, 28 FR 11122, Oct. 17, 1963]

§ 1.825–1 Unused loss deduction; in general.

(a) Amount of deduction. Section 825(a) provides that the unused loss deduction of a mutual insurance company subject to the tax imposed by section 821(a) shall be an amount equal to the sum of the unused loss carryovers and carrybacks to the taxable year. The amount so determined is used in the computation of mutual insurance company taxable income for the taxable year. See section 821(b) and § 1.821–4.

(b) Unused loss defined. Section 825(b) defines the term "unused loss" as the amount (if any) by which—

(1) The sum of the statutory underwriting loss (as defined in section 823(a)(2)) and the investment loss (as defined in section 822(a)(2)) exceeds

(2) The sum of—

(i) The taxable investment income (as defined in section 822(a)(1)),

(ii) The statutory underwriting income (as defined in section 823(a)(1)), and

(iii) The amounts required to be subtracted from the protection against loss account under section 824(d).

(c) Steps in computation of unused loss deduction. The three steps to be taken in the ascertainment of the unused loss deduction for any taxable year are as follows:

(1) Compute the unused loss for any preceding or succeeding taxable year from which an unused loss may be carried over or carried back to the taxable year.

(2) Compute the unused loss carryovers to the taxable year from such preceding taxable years and the unused loss carrybacks to the taxable year from such succeeding taxable years.

(3) Add such unused loss carryovers and carrybacks in order to determine the unused loss deduction for the taxable year.

(d) Statement with tax return. Every mutual insurance company taxable under section 821(a) claiming an unused loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the unused loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the unused loss deduction.

(e) Ascertainment of deduction dependent upon unused loss carryback. If a mutual insurance company taxable under section 821(a) is entitled in computing its unused loss deduction to a carry-

back which it is not able to ascertain at the time its return is due, it shall compute the unused loss deduction on its return without regard to such unused loss carryback. When the company ascertains the unused loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the unused loss deduction for the taxable year with the inclusion of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(f) Law applicable to computations. The following rules shall apply to taxable years for which the taxpayer is subject to the tax imposed by section 821(a)—

(1) In determining the amount of any unused loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The unused loss for any taxable year shall be determined under the law applicable to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the unused loss deduction.

(3) The amount of the unused loss deduction which shall be allowed for any taxable year shall be determined under the law applicable for that year.

[T.D. 6681, 28 FR 11122, Oct. 17, 1963]

§ 1.825–2 Unused loss carryovers and carrybacks.

(a) Years to which loss may be carried—(1) In general. In order to determine its unused loss deduction for any taxable year, a mutual insurance company taxable under section 821(a) must first determine the part of any unused losses for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. An unused loss is to be an unused loss carryback to each of the 3 taxable years preceding the loss year, and an unused loss carryover to each of the 5 taxable years following the loss year, subject to the limitations provided in section 825(g) and subparagraph (2) of this paragraph.

(2) Limitations. An unused loss may not be carried—

(i) To or from any taxable year beginning before January 1, 1963,

(ii) To or from any taxable year for which the taxpayer is not subject to the tax imposed by section 821(a), nor

(iii) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the taxpayer was not subject to the tax imposed by section 821(a).

(3) Periods of less than 12 months. A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 825 the first, second, etc., preceding or succeeding taxable year.

(b) Loss year defined. The term "loss year" as used in this section means any taxable year for which a company subject to the tax imposed by section 821(a) has an unused loss in excess of zero.

(c) Amount of carrybacks and carryovers. Section 825(e) provides that in the case of a loss year for a company taxable under section 821(a), the entire amount of the unused loss shall be carried to the earliest taxable year to which such loss may be carried under section 825(d) (subject to the limitations of section 825(g)). The amount of the unused loss carried to each of the other taxable years to which such loss may be carried under section 825(d) following such earliest taxable year shall be the excess (if any) of such loss over the sum of the offsets for each taxable year preceding the taxable year to which the unused loss is carried.

(d) Offset defined—(1) In general. Section 825(f) defines the term "offset" and provides that the taxable year to which an unused loss is carried shall be referred to as the "offset year". The definition of the term offset in the case of an unused loss carryback to an offset year, differs from the definition of such term in the case of an unused loss carryover to an offset year.

(2) Offset in case of carryback. In the case of an unused loss carryback from the loss year to the offset year, the offset is the mutual insurance company taxable income for the offset year, computed without regard to any unused loss carryback from the loss year or any taxable year thereafter.

(3) Offset in case of carryover. In the case of an unused loss carryover from the loss year to the offset year, the offset is equal to the sum of—

(i) The amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) (relating to amounts equal to the unused loss carryovers to the offset year), plus

(ii) The mutual insurance company taxable income for the taxable year, computed without regard to any unused loss carryback or carryover from the loss year or any taxable year thereafter. [T.D. 6681, 28 FR 11123, Oct. 17, 1963]

§ 1.825–3 Examples.

The application of section 825 may be illustrated by the following examples:

Example (1). For the taxable year 1967, F, a mutual insurance company subject to the tax imposed by section 821(a), has the following items:

Taxable investment income	1
Underwriting loss	59
Addition to protection against loss account	8
Statutory underwriting loss	67

The subtractions from the protection against loss account are as follows:

Amount subtracted from amounts in account with respect to taxable years 1963 through 1966	18
Amount subtracted from amounts in account with respect to taxable year 1967	8
Total subtractions from protection against loss account under section 824(d)	26

The application of section 825 in this case may be illustrated by the facts and results shown in the following table and explained below:

TAXABLE YEAR

	1963	1964	1965	1966	1967	1968
Protection against loss account:						
Addition to account during taxable year	6	2	3	7	8	7
Subtraction from account during taxable year	0	0	0	0	8	7
Protection against loss account (at end of year)	6	2	3	7	0	0
Protection against loss account (at end of taxable year 1968)	0	0	0	0	0	0
Unused loss	0	0	0	0	40	0
Unused loss carryback	0	40	35	25	0	0
Unused loss carryover	0	0	0	0	0	18
Unused loss deduction	0	40	35	25	0	18
Mutual insurance company taxable income (computed without regard to unused loss)	13	5	10	7	0	2
Mutual insurance company taxable income (computed with regard to unused loss)	13	0	0	0	0	0
Offset for year	0	5	10	7	0	9
Offset total	0	5	15	22	22	31

1967: Under the provisions of section 825(b), F's unused loss for 1967 is 40, the amount by which the sum of the statutory underwriting loss and the investment loss, 67 (67 plus 0), exceeds the sum of the taxable investment income, the statutory underwriting income, and the amounts required to be subtracted from the protection against loss account under section 824(d) for the taxable year, 27 (the sum of 1, 0, and 26, respectively).

1967 carryback to 1964: Under the provisions of section 825(e), the entire unused loss for 1967 of 40 is carried back to 1964, the earliest year to which the loss may be carried under section 825(d). Since there are no other amounts carried to 1964, the unused loss deduction for 1964 is 40. Thus, after taking the unused loss deduction into account, the mutual insurance company taxable income for 1964 is zero, and the offset for 1964 is 5 (the mutual insurance company taxable income for 1964 determined without regard to the unused loss carryback from 1967 or any year thereafter).

1967 carryback to 1965: The portion of the unused loss for 1967 which is carried back to 1965 is 35 (40 minus 5, the offset for 1964). After taking the unused loss deduction into account, the mutual insurance company taxable income for 1965 is zero. The offset for 1965 is 10, the mutual insurance company taxable income for 1965 determined without regard to any unused loss carryback from 1967 or any year thereafter.

1967 carryback to 1966: The portion of the unused loss for 1967 which is carried back to 1966 is 25. This amount is the excess of the unused loss for 1967 of 40 over the sum of the offset for 1964 (5) and the offset for 1965 (10). As a result of the unused loss deduction the mutual insurance company taxable income for 1966 is reduced to zero. The offset for 1966 is 7.

1967 carryover to 1968: Under the provisions of section 825(d), the portion of the unused loss for 1967 which is carried forward to 1968 is 18 (40 minus the sum of 5, 10, and 7, the offsets for 1964, 1965, and 1966, respectively). Under section 825(f)(2), this amount is first applied against any amounts in the protection against loss account at the end of 1968, and is then applied against the mutual insurance company taxable income for 1968 (computed without regard to any unused loss carryovers or carrybacks from 1967 or any taxable year thereafter). Thus, assuming that there are no other subtractions from its protection against loss account under section 824(d) for 1968, F's protection against loss account of 7 is reduced to zero by reason of the subtraction under section 824(d)(1)(C). The remaining portion of the unused loss for 1967 which is carried to 1968, 11 (18 minus 7, the amount of the unused loss carryover to 1968 which is subtracted from the protection against loss account under section 824(d)(1)(C)), is then applied against the mutual insurance company taxable income for 1968 computed without regard to any unused carryback or carryover

from the loss year (1967) or any taxable year thereafter. After the application of the unused loss deduction for 1968, the mutual insurance company taxable income for 1968 is zero. The offset for 1968 is 9, the sum of the amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) for 1968 (7), plus the mutual insurance company taxable income for 1968, determined without regard to any unused loss carryover or carryback from 1967 or any year thereafter (2). The remaining 9 of the unused loss for 1967 (40 minus the sum of 5, 10, 7, and 9, the offsets for 1964, 1965, 1966, and 1968, respectively), is carried forward to 1969, and to the extent not used in that year or any year thereafter, may be carried forward to 1970, 1971, and 1972, in that order.

Example (2). If in example (1) F had an unused loss in 1966 of 22, then, with respect to F's 1967 unused loss of 40, the offset for 1964 would be zero; the offset for 1965 would be 6—the 1965 mutual insurance company taxable income of 10 less an unused loss carryback of 4 from 1966 (the 1966 unused loss of 22 minus the 1963 offset of 13 and the 1964 offset of 5); the offset for the loss year 1966 would be zero, and 34 (the 1967 unused loss of 40 minus the offset for 1965 of 6) would remain as an unused loss carryover to 1968, 1969, 1970, 1971, 1972, in that order. Thus, the unused loss carrybacks or carryovers to an offset year are applied against the mutual insurance company taxable income for such year in the order in which the losses occurred, with the earliest loss being offset first.

Example (3). For the taxable year 1963, M, a mutual insurance company subject to tax imposed by section 821(a), has an unused loss (as defined in section 825(b)) of $65,000. Under section 825(g), the loss may not be carried back to any taxable year beginning before 1963. However, the loss may be carried forward to each of the 5 taxable years following 1963 provided that for each of such succeeding taxable years M is subject to the tax imposed by section 821(a).

Example (4). Assume the facts are the same as in example (3), except that for the taxable year 1964, the gross amount received by M from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) exceeds $150,000 but does not exceed $500,000. If M does not make the election under section 821(d) (relating to election to be taxed under section 821(a)) for 1964, M's 1963 unused loss of $65,000 will not be allowed as an unused loss carryover or carryback since, by reason of section 825(g)(3), the unused loss may not be carried to any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 821(a), and by reason of section 825(g)(1), the unused loss may not be carried to any taxable year beginning before 1963.

[T.D. 6681, 28 FR 11123, Oct. 17, 1963]

§ 1.826–1 Election by reciprocal underwriters and interinsurers.

(a) In general. Except as otherwise provided in section 826(c), any mutual insurance company which is an interinsurer or reciprocal underwriter taxable under section 821(a) may elect under section 826(a) to limit its deductions for amounts paid or incurred to its attorney-in-fact to the deductions of its attorney-in-fact which are allocable to income received by the attorney-in-fact from the reciprocal during the taxable year. See § 1.826–4 for rules relating to allocation of expenses. In no case may such an election increase the amount deductible by the reciprocal for amounts paid or due its attorney-in-fact for the taxable year. The election allowed by section 826(a) and this section in effect increases the income of the reciprocal by the net income of the attorney-in-fact attributable to its business with the reciprocal. A reciprocal making the election is allowed a credit for the amount of tax paid by the attorney-in-fact for the taxable year which is attributable to income received by the attorney-in-fact from the reciprocal. See section 826(e) and § 1.826–5.

(b) Companies eligible to elect under section 826(a). Any mutual insurance company which is a reciprocal underwriter or interinsurer subject to the tax imposed by section 821(a) may elect (in the manner prescribed by paragraph (c) of this section) to be subject to the limitation provided by section 826(b) and paragraph (a) of this section provided the attorney-in-fact of the electing reciprocal—

(1) Is subject to the taxes imposed by section 11 (b) and (c) and the regulations thereunder;

(2) Consents (in the manner provided by paragraph (a) of § 1.826–3) to provide the information required under paragraph (b) of § 1.826–3 during the period in which the election made under section 826(a) and this section is in effect;

(3) Reports the income received from the reciprocal and the deductions allocable thereto under the same method of accounting used by the reciprocal in reporting its deductions for amounts paid or due its attorney-in-fact; and

(4) Files its income tax return on a calendar year basis.

(c) Manner of making election. The election provided by section 826(a) and this section shall be made in a statement attached to the taxpayer's income tax return for the first taxable year for which such election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized representative), and shall be filed not later than the time prescribed by law for filing the income tax return (including extensions thereof) for the first taxable year for which such election is to apply. For information required of an electing reciprocal, see paragraph (e) of this section.

(d) Scope of election. The election allowed by section 826(a) is binding for the taxable year for which made and all succeeding taxable years unless the Commissioner consents to a revocation of

such election. Whether revocation will be permitted will depend upon the facts and circumstances of each particular case.

(e) Information required of an electing company. Every reciprocal underwriter or interinsurer making the election provided by section 826(a) and this section shall, in the manner provided by paragraph (f) of this section, furnish the following information for each taxable year during which such election is in effect:

(1) The name and address of the attorney-in-fact with respect to which the election allowed by section 826(a) and this section is in effect; the district in which such attorney-in-fact filed its return for the taxable year; and a copy of the consent required by section 826 and § 1.826–3 and the date and district in which such consent was filed;

(2) The deductible amount paid or due to such attorney-in-fact from the reciprocal computed without regard to the limitation provided by section 826(b);

(3) The total amount claimed as a deduction by the reciprocal for amounts paid to its attorney-in-fact after giving effect to the limitation provided by section 826(b);

(4) The amount of the increase (if any) in underwriting gain (as defined in section 824(a)) attributable to the election allowed by section 826(a);

(5) The amount of the increase (if any) in the deduction allowed by section 824(a) (relating to deduction to provide protection against losses) attributable to the election allowed by section 826(a);

(6) The amount of any increase or decrease in the statutory underwriting income or loss for the taxable year (as computed under section 823) attributable to the election allowed by section 826(a);

(7) The amount of any increase or decrease in the mutual insurance company taxable income or unused loss for the taxable year attributable to the election allowed by section 826(a);

(8) The amount of the increase (if any) in the tax liability of the reciprocal for the taxable year attributable to the election allowed by section 826(a) before taking into account the credit provided by section 826(e);

(9) The amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year (as determined under § 1.826–5) claimed (under section 826(e) and paragraph (a) of this section) by the reciprocal as a credit for the taxable year; and

(10) The information which the attorney-in-fact is required to submit to the reciprocal under paragraphs (b) and (c) of § 1.826–3.

(f) Manner in which information is to be provided. The information required by paragraph (e) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which such information is required. Such statement shall include the name and address of the taxpayer; and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year with respect to which such information is being provided.

[T.D. 6681, 28 FR 11124, Oct. 17, 1963]

§ 1.826–2 Special rules applicable to electing reciprocals.

(a) Protection against loss account. Section 826(d) provides that for purposes of determining the amount to be subtracted from the protection against loss account under section 824(d)(1)(D) and the regulations thereunder (relating to amounts added to the account for the fifth preceding taxable year) for any taxable year, any amount which was added to such account by reason of the election under section 826(a) and paragraph (a) of § 1.826–1 shall be treated as having been added by reason of section 824(a)(1)(A) and the regulations thereunder (relating to amounts equal to 1 percent of losses incurred during the taxable year). Thus, no amount added to the protection against loss account by reason of an election made under section 826(a) may remain in such account beyond the end of the fifth taxable year following the taxable year with respect to which such amount was added. See section 824(d)(1)(D) and paragraph (b)(3) of § 1.824–1. The amount added to the protection against loss account by reason of an election under section 826(a) is that amount which is equal to 25 percent (plus, in the case of a reciprocal which qualifies as a concentrated risk company under section 824(a), so much of the concentrated wind-storm, etc., premium percentage as exceeds 40 percent) of the amount by which—

(1) The underwriting gain (as defined by section 824(a)(1)) computed after taking into account the limitation provided by section 826(b) and § 1.826–1, exceeds

(2) The underwriting gain computed without regard to the limitation provided by section 826(b) and § 1.826–1.

(b) Denial of surtax exemption. Section 826(f) provides that the tax imposed upon any increase in the mutual insurance company taxable income of a reciprocal which is attributable to the limitation provided by section 826(b) shall be computed without regard to the surtax exemption provided by section 821(a)(2) and the regulations thereunder. Thus, a company making the election provided under section 826(a) will be subject to surtax, as well as normal tax, on the increase in its mutual insurance company taxable income for the taxable year which is attributable to such election. Similarly, any amount which was added to the protection against loss account by reason of an election under section 826(a) and § 1.826–1, and which is subtracted from such account in accordance with section 826(d) and paragraph (a) of this section, will be subject to surtax, as well as normal tax, to the extent such amount increases mutual insurance company taxable income in the year in which the subtraction is made. Furthermore, the company will be subject to surtax on such increases notwithstanding the fact that it may have no normal tax liability for the taxable year, because its mutual insurance company taxable income (after giving effect to the election provided by section 826(a)) does not exceed $6,000.

(c) Adjustment for refunds. Section 826(g) provides that if for any taxable year an attorney-in-fact is allowed a credit or refund for taxes paid with respect to which credit or refund to the reciprocal resulted under section 826(e), the taxes of such reciprocal for such taxable year shall be properly adjusted. The reciprocal shall make the adjustment required by section 826(g) by increasing its income tax liability for its taxable year in which the credit or refund is allowed to the attorney-in-fact by the amount of such credit or refund which is attributable to taxes paid by the attorney-in-fact on income received from the reciprocal, as determined under § 1.826–6, but only to the extent that the payment of such amount by the attorney-in-fact resulted in a credit or refund to the reciprocal. However, if the refund or credit to the attorney-in-fact is the result of an error in determining its items of income or deduction for the taxable year with respect to which the refund or credit is allowed, and such error affects the amount of deductions allocable to its reciprocal for such taxable year, then, if the reciprocal's period for filing an amended return has not otherwise expired, the preceding sentence shall not apply and the reciprocal shall make the adjustment required by section 826(g) by filing an amended return for such taxable year and all subsequent taxable years for which an adjustment is required. The reciprocal's amended return or returns shall give effect to the change in the deductions of the attorney-in-fact allocable to income received from the reciprocal and the tax paid by the attorney-in-fact attributable to such income. The amount of any adjustment required by section 826(g) and this section and the computation thereof shall be set forth in a statement attached to and filed with the taxpayer's income tax return for the taxable year for which the adjustment is made. Such statement shall include the name and address of the taxpayer, and a copy of the notification received by the attorney-in-fact indicating that it has been allowed the credit or refund requiring adjustment of the reciprocal's taxes.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5334, March 20, 1971]

§ 1.826–3 Attorney-in-fact of electing reciprocals.

(a) Manner of making consent. Section 826(c)(2) provides that a reciprocal may not elect to be subject to the limitation provided by section 826(b) unless its attorney-in-fact consents to make certain information available. See paragraph (b) of this section. The attorney-in-fact of a reciprocal making the election provided by section 826(a) shall signify the consent required by section 826(c) in a statement attached to its income tax return for the first taxable year for which the reciprocal's election is to apply. Such statement shall include the name and address of the consenting taxpayer; the name and address of the reciprocal with respect to which such consent is to apply; shall be signed by the taxpayer (or its duly authorized representative); and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which such consent is to apply. In addition, such statement shall specify that the taxpayer is subject to the taxes imposed by section 11 (b) and (c); the method of accounting used in reporting income received from its reciprocal and the deductions allocable thereto; and that its return is filed on the calendar year basis. Consent, once given, shall be irrevocable for the period during which the election provided for the reciprocal by section 826(a) is in effect. See paragraph (e) of § 1.826–1.

(b) Information required of consenting attorney-in-fact. Every attorney-in-fact making the consent provided by section 826(c)(2) and para-

graph (a) of this section shall, in the manner prescribed by paragraph (c) of this section, furnish the following information for each taxable year during which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect:

(1) The name and address of the reciprocal with respect to which the consent required by section 826(c)(2) and paragraph (a) of this section is to apply;

(2) Gross income in total and by sources, adjusted for returns and allowances;

(3) Deductions (itemized to the same extent as on taxpayer's income tax return and accompanying schedules) allocable to each source of gross income and in total (see § 1.826–4);

(4) Method of allocation used in subparagraph (3) of this paragraph;

(5) Taxable income (if any) in total and by sources, as in subparagraph (2) of this paragraph (income by sources from subparagraph (2) of this paragraph minus expenses allocable thereto under subparagraph (3) of this paragraph);

(6) Total income tax liability (if any) for the taxable year;

(7) Taxes paid attributable (under § 1.826–5) to income earned by the taxpayer in dealing with the reciprocal;

(8) Such other information as may be required by the district director.

(c) Manner in which information is to be provided. (1) The information required by paragraph (b) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for each taxable year for which such information is required.

(2) A copy of the statement containing the information required by paragraph (b) of this section shall be submitted to the board of advisors (or other comparable body) of the reciprocal on whose behalf the consent provided under section 826(c)(2) is given. The copy shall be executed in the same manner as the original and shall be delivered to such board not later than 10 days before the last date prescribed by law (including extensions thereof) for filing the reciprocal's income tax return for the taxable year for which the information is required unless the attorney-in-fact establishes to the satisfaction of the district director that the failure to furnish such copy or the failure to furnish such copy within the prescribed 10 day period was due to circumstances beyond its control. In addition, there shall be attached to and made a part of such copy, a copy of the income tax return of the attorney-in-fact (including accompanying schedules) for each taxable year for which such statement is required.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963]

§ 1.826–4 Allocation of expenses.

An attorney-in-fact allocating expenses as required by section 826(b) and paragraph (b) of § 1.826–3 shall allocate each expense itemized in its income tax return (and accompanying schedules) for the taxable year to each source of gross income (as set forth pursuant to paragraph (b)(2) of § 1.826–3). However, no portion of the net operating loss deduction allowed by section 172 shall be allocated to income received or due from the reciprocal, and no expenses, other than those directly related thereto, shall be allocated to capital gains. Where the method of allocation used by the taxpayer does not reasonably reflect the expenses of the taxpayer allocable to income received or due from the reciprocal, the district director may require the taxpayer to use such other method of allocation as is reasonable under the circumstances.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§ 1.826–5 Attribution of tax.

(a) In general. Section 826(e) provides that a reciprocal making the election allowed by section 826(a) shall be credited with so much of the tax paid by the attorney-in-fact as is attributable to the income received by the attorney-in-fact from the reciprocal in such taxable year.

(b) Computation. For purposes of section 826(e) and paragraph (a) of this section, the amount of tax attributable to income received by the attorney-in-fact from the reciprocal in the taxable year shall be computed in the following manner:

(1) First, compute the taxable income (if any) from each source of gross income set forth in paragraph (b)(2) of § 1.826–3 by deducting from each such amount the expenses allocable thereto under § 1.826–4;

(2) Second, compute the normal tax on each amount of taxable income computed in subparagraph (1) of this paragraph at the rate provided by section 11(b) of the Code;

(3) Third, deduct from each amount determined in subparagraph (1) of this paragraph an amount which bears the same proportion to the surtax exemption provided by section 11(c) of the Code as each amount computed under subparagraph (1) of this paragraph bears to the total of the amounts computed under subparagraph (1) of this paragraph;

(4) Fourth, compute the surtax on each remainder computed in subparagraph (3) of this paragraph at the rate provided by section 11(c) of the Code;

(5) Fifth, add the normal tax computed under subparagraph (2) of this paragraph to the surtax computed under subparagraph (4) of this paragraph for each amount computed under subparagraph (1) of this paragraph;

(6) Sixth, deduct from each amount of tax computed under subparagraph (5) of this paragraph any tax credits (other than those arising from payments made with respect to the tax liability for the taxable year or other taxable years) allocable (in the same manner as provided for expenses under § 1.826–4) to such amount;

(7) Seventh, compute that amount which bears the same proportion to the tax actually paid with respect to the taxable year as each individual amount computed under subparagraph (6) of this paragraph bears to the total of the amounts computed under subparagraph (6) of this paragraph. The amount so determined with respect to each amount computed under subparagraph (6) of this paragraph is the tax paid which is attributable to the amount computed under subparagraph (1) of this paragraph.

To the extent the amounts determined under subparagraph (1) of this paragraph are attributable to amounts received from the reciprocal for the taxable year, the tax attributable to such amounts (as determined under subparagraph (7) of this paragraph) shall be the amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year.

(c) **Taxes of attorney-in-fact unaffected.** Nothing in section 826 or the regulations thereunder shall increase or decrease the taxes imposed on the income of the attorney-in-fact.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§ 1.826–6 Credit or refund.

(a) **Notification required.** In any case where a taxpayer applies for a credit or refund of taxes paid by it in respect of a taxable year for which the taxpayer was the consenting attorney-in-fact of a reciprocal making the election provided by section 826(a), such taxpayer shall give notice to its reciprocal for such taxable year, first, upon applying for the credit or refund; and again, within 10 days from the date on which a final determination is made that such credit or refund has been allowed or denied.

(b) **Notice form.** The notices required by this section shall include the name and address of the taxpayer and shall be signed by the taxpayer or its duly authorized representative. In addition, there shall be attached to and made a part of each first notice a concise statement of the claim upon which the application for refund or credit is based; and there shall be attached to and made a part of each second notice:

(1) A copy of the notification (if any) received by the taxpayer indicating that the credit or refund has been allowed; and

(2) A statement setting forth the amount of such credit or refund attributable to taxes paid by the taxpayer on income received from the reciprocal, and the computation by which such amount was determined.

(c) **Manner of apportioning refund or credit.** The taxpayer shall determine the amount of the refund or credit attributable to taxes paid on income received from its reciprocal by reallocating its income and expense items for the taxable year, with respect to which the refund or credit is allowed, in the manner provided by §§ 1.826–3 and 1.826–4 so as to reflect the adjustments (if any) in such items which resulted in the credit or refund of tax for the taxable year. The taxpayer shall then recompute the tax attributable to income received from its reciprocal for such taxable year in the manner provided by § 1.826–5. The district director may require such additional information as may be necessary in the circumstances to verify the computations required by this paragraph.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

§ 1.826–7 Examples.

The application of section 826 may be illustrated by the following examples:

Example (1). For the taxable year 1963, R, a reciprocal underwriter subject to the taxes imposed by section 821(a), has

the following items (determined before applying any election under section 826):

Gross income under sec. 832		$578
Gross investment income		50
Deductions under sec. 832 (as modified by sec. 823(b)):		
Deduction for amounts paid by R to attorney-in-fact A	$100	
All other deductions	500	
Total deductions under sec. 832	600	
Deductions under sec. 822(c)		40
Incurred losses		400
Protection against loss deduction		4
Underwriting gain		0
Mutual insurance company taxable income		0
Unused loss		22
Credit or refund for taxes paid		0

Assume that the deductions of attorney-in-fact A allocable to the income received by A from R are 60 and the tax paid by A allocable to the income received from R is 16. If R elects to be subject to the limitation provided in section 826(b), the results for 1963 would be as follows:

Gross income under sec. 832		$578
Gross investment income		50
Deductions under sec. 832 (as modified by sec. 823(b)):		
Deduction for amounts paid by R to attorney-in-fact A	$60	
All other deductions	500	
Total deduction under sec. 832	560	
Deductions under sec. 822(c)		40
Incurred losses		400
Underwriting gain		8
Protection against loss deduction		6
Mutual insurance company taxable income		12
Unused loss		0
Credit or refund for taxes paid		16

Under the provisions of section 826(b), R's deduction for amounts paid or incurred to the attorney-in-fact in the taxable year 1963 would be limited to the deductions of A allocable to the income received by A from R. Thus, R's deductions under section 832 (as modified by section 823(b)) for 1963 would be 60 (the deductions of A which are allocable to the income received by A from R). As a result of making the election under section 826(a) for the taxable year 1963, R's underwriting gain would be 8, and its statutory underwriting income would be 2 (the underwriting gain of 8 minus the protection against loss deduction of 6—of which 4 represents the amount determined under section 824(a)(1)(A)—and 2 represents the amount determined under section 824(a)(1)(B)—or 8 minus 6). R's mutual insurance company taxable income for 1963 would be 12, consisting of taxable investment income of 10 (gross investment income minus deductions under section 822(c), or 50 minus 40) plus statutory underwriting income of 2. Since all of R's mutual insurance company taxable income of 12 is attributable to the limitation under section 826(b), the entire amount is subject to the surtax under section 821(a)(2) without regard to the $25,000 surtax exemption. The credit of 16, representing that part of the tax paid by A which is allocable to the income received by A from R, may be applied by R against its taxes with respect to its mutual insurance company taxable income of 12 for 1963, and R would be entitled to a refund of any excess of the amount of such credit over its tax liability for 1963.

Under the provisions of section 826(d), no portion of the amount added to the protection against loss account in 1963 by reason of the election under section 826(a), 2 (25 percent of the amount by which the consolidated underwriting gain exceeds 25 percent of the underwriting gain determined without regard to the election under section 826(a), or the amount by which 25 percent of 8 exceeds 25 percent of 0), may remain in such account beyond the taxable year 1968.

Example (2). For the taxable year 1963, F is a corporate attorney-in-fact subject to the taxes imposed by section 11(b) and (c) of the Code. F files its return on the calendar year basis and reports income received from its reciprocal and the deductions allocable thereto under the same method of accounting used by its reciprocal in reporting its deductions for amounts paid to R. F properly consents to provide the information required by paragraph (b) of § 1.826–3. In addition to its attorney-in-fact business, F owns real estate for investment purposes, and operates a real estate management service. For the taxable year 1963, F has gross income from these various sources as follows:

Attorney-in-fact fees	$85,000
Real estate management fees	18,000
Rental income	25,000

F allocates its expenses for the taxable year on the basis of their direct relation to each source of income. During 1963, F acquired property for use in its attorney-in-fact operations which entitled F to an investment credit of $800 under section 38. For 1963, F determines that the tax paid by it which is attributable to its reciprocal is $21,863, computed as follows:

	Attor-ney-in fact fees	Real estate man-agement	Rental income	Total
Gross income	$85,000	$18,000	$25,000	$128,000
Allocable expenses	25,000	3,000	35,000	63,000
Taxable income (loss)	60,000	15,000	(10,000)	65,000
Normal tax (30 percent)	18,000	4,500	0	19,500
Surtax exemption	20,000	5,000	0	25,000
Income subject to surtax	40,000	10,000	0	40,000
Surtax (22 percent)	8,800	2,200	0	8,800
Total tax	26,800	6,700	0	28,300
Investment credit	800	0	0	800
1963 tax liability	26,000	6,700	0	27,500
1963 tax paid				27,500
Allocation of tax paid	21,863	5,637	0	27,500

Under paragraph (b)(1) of § 1.826–5, F computes its taxable income from its attorney-in-fact fees to be $60,000 ($85,000 minus $25,000), and its taxable income from its real estate management to be $15,000 ($18,000 minus $3,000). Since F's rental operations resulted in a $10,000 loss for the taxable year ($25,000 minus $35,000), F's taxable income from its rental operations is zero. Using the 30 percent rate provided by section 11(b), F computes its normal tax to be $18,000 on its attorney-in-fact fees and $4,500 on its real estate management operations. F's normal tax on total income is $19,500. The $3,000 difference between the normal tax on F's total income and the normal taxes on F's profitable operations results from the loss on F's rental operations. Under paragraph (b)(3) of § 1.826–5, F allocates its surtax exemption as follows: $20,000 ($60,000/$75,000 × $25,000) to its attorney-in-fact fees; and

$5,000 ($15,000/$75,000×$25,000) to its real estate management operations. F computes its surtax on its profitable operations at the 22 percent rate provided by section 11(c) as follows: $8,800 (22 percent of $40,000) on attorney-in-fact fees; and $2,200 (22 percent of $10,000) on real estate management income. F adds its normal tax and surtax on its profitable operations and determines its total tax to be $26,800 on its attorney-in-fact operations; $6,700 on its real estate management operations; and $28,300 on its total income. F must allocate its investment credit on the same basis as it used to allocate its expenses. Thus, F's entire investment credit must be allocated to its attorney-in-fact operations. Accordingly, F's 1963 tax liability is $26,000 on its attorney-in-fact fees; $6,700 on its real estate management operations; $0 on its rental operations; and $27,500 on its total income. Under paragraph (b)(7) of § 1.826–5, F allocates $21,863 ($26,000/$32,700×$27,500) of its 1963 tax paid to its attorney-in-fact fees; and $5,637 ($6,700/$32,700×$27,500) of its 1963 tax paid to its real estate management business. F's reciprocal will be allowed a credit or refund of $21,863 for taxes paid by F which are attributable to F's income received from its reciprocal.

Example (3). Assume the same facts as in example (2), and assume further that in 1966 F sustains a net operating loss on its overall operations of $5,000. In carrying the loss back to 1963 as a net operating loss deduction under section 172, F must allocate the deduction under the same method it used in allocating its 1963 deductions. Thus, if the loss was entirely attributable to F's rental operations for the taxable year 1966, F would reduce its taxable income attributable to those operations by the entire amount of the loss and would recompute the tax attributable to those operations under paragraph (b) of § 1.826–5. As recomputed in the table below, F's 1963 tax liability from attorney-in-fact fees would be $19,800 and F's total tax liability would be $24,900.

	Attorney-in-fact fees	Real estate management	Rental income	Total
Gross income	$85,000	$18,000	$25,000	$128,000
Allocable expenses	25,000	3,000	35,000	63,000
Net operating loss deduction	0	0	5,000	5,000
Taxable income (loss)	60,000	15,000	(15,000)	60,000
Normal tax (30 percent)	18,000	4,500	0	18,000
Surtax exemption	20,000	5,000	0	25,000
Income subject to surtax	40,000	10,000	0	35,000
Surtax (22 percent)	8,800	2,200	0	7,700
Total tax	26,800	6,700	0	25,700
Investment credit	800	0	0	800
1963 tax liability	26,000	6,700	0	24,900
1963 tax paid				24,900
Allocation of tax paid	19,800	5,100	0	24,900

As a result of its 1966 net operating loss, F would be entitled to a refund of $2,600 (1963 taxes paid of $27,500 minus recomputed 1963 taxes of $24,900). Under paragraph (a) of § 1.826–6, F would be required to notify its reciprocal of its claim for refund and of the amount of the refund or credit attributable to taxes paid on income received from the reciprocal. Since the 1963 tax paid by F attributable to its reciprocal (as recomputed) is less than the amount claimed in 1963 by F's reciprocal as a credit, F's reciprocal would be required, under section 826(g), to add the difference—$2,063 ($21,863 minus $19,800), to its tax liability for 1966. Thus, F's reciprocal would first compute its tax liability for 1966 without regard to section 826(g) and then would increase such liability by $2,063.
[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

Other Insurance Companies

§ 1.831–1 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, and mutual fire insurance companies issuing perpetual policies.

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire insurance companies exclusively issuing either perpetual policies, or policies for which the sole premium charged is a single deposit which, except for such deduction of underwriting costs as may be provided, is refundable upon cancellation or expiration of the policy, are subject to the tax imposed by section 831. As used in this section and §§ 1.832–1 and 1.832–2, the term "insurance companies" means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of § 1.801–1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States

are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the $25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.831–2 Taxable years affected.

Section 1.831–1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Section 1.831–3 is applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended. Section 1.831–4 is applicable only with respect to the companies described therein, and only with respect to taxable years beginning after December 31, 1961.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§ 1.831–3 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, mutual fire insurance companies issuing perpetual policies, and mutual fire or flood insurance companies operating on the basis of premium deposits; taxable years beginning after December 31, 1962.

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire or flood insurance companies exclusively issuing perpetual policies or whose principal business is the issuance of policies for which the premium deposits are the same regardless of the length of the term for which the policies are written, are subject to the tax imposed by section 831 if the unabsorbed portion of such premium deposits not required for losses, expenses or reserves is returned or credited to the policyholder on cancellation or expiration of the policy. For purposes of section 831 and this section, in the case of a mutual flood insurance company, the premium deposits will be considered to be the same if the payment of a premium increases the total insurance under the policy in an amount equal to the amount of such premium and the omission of any annual premium does not result in the reduction or suspension of coverage under the policy. As used in this section and section 832 and the regulations thereunder, the term "insurance companies" means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of § 1.801–1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the $25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§ 1.831–4 Election of multiple line companies to be taxed on total income.

(a) In general. Section 831(c) provides that any mutual insurance company engaged in writing marine, fire, and casualty insurance which, for any 5-year period beginning after December 31, 1941, and ending before January 1, 1962, was subject to the tax imposed by section 831 (or the tax imposed by corresponding provisions of prior law) may elect, in the manner provided by paragraph (b) of this section, to be subject to the tax imposed by section 831, whether or not marine insurance is its predominant source of premium income. A company making an election under section 831(c) and this section will be subject to the tax imposed by section 831 for taxable years beginning after December 31, 1961, rather than subject to the tax imposed by section 821.

(b) Time and manner of making election. The election provided by section 831(c) and paragraph (a) of this section shall be made in a statement attached to the taxpayer's return for the taxable year 1962. The statement shall indicate that the taxpayer has made the election provided by section 831(c) and this section; shall include the name and address of the taxpayer, and shall be signed by the taxpayer or his duly authorized representative. In addition, the statement shall list the 5 consecutive taxable years prior to 1962 for which the taxpayer was subject to tax under section 831 (or the corresponding provisions of prior law); the types of insurance written by the company; and the percentage of marine insurance to total insurance written. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for the taxable year 1962. However, if the last date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year 1962 falls before October 17, 1963, the election provided by section 831(c) and this section may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before January 16, 1964.

(c) Scope of election. An election made under section 831(c) and paragraph (b) of this section shall be binding for all taxable years beginning after December 31, 1961, unless consent to revoke the election is obtained from the Commissioner. However, if a taxpayer made the election provided by section 831(c) and this section for taxable years beginning prior to October 17, 1963, the taxpayer may revoke such election without obtaining consent from the Commissioner by filing, before January 16, 1964, a statement that the taxpayer desires to revoke such election. Such statement shall be signed by the taxpayer or its duly authorized representative. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) Limitation on certain net operating loss carryovers and carrybacks. In the case of a taxpayer making the election allowed under section 831(c) and this section, a net operating loss shall not be carried—

(1) To or from any taxable year for which the insurance company is not subject to the tax imposed by section 831(a) (or predecessor sections); or

(2) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 831(a) (or predecessor sections).

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

§ 1.832–1 Gross income.

(a) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in § 1.831–1 the amount of single deposit premiums received, but not assessments, shall be excluded from gross income. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets. The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared

to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year. In computing "premiums earned on insurance contracts during the taxable year" the amount of the unearned premiums shall include (1) life insurance reserves as defined in section 803(b) and § 1.803–1 pertaining to the life, burial, or funeral insurance, or annuity business of an insurance company subject to the tax imposed by section 831 and not qualifying as a life insurance company under section 801, and (2) liability for return premiums under a rate credit or retrospective rating plan based on experience, such as the "War Department Insurance Rating Plan," and which return premiums are therefore not earned premiums. In computing "losses incurred" the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for "losses incurred" which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, can be said to represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of such losses which, in the opinion of the district director are in excess of the actual liability determined as provided in the preceding sentence will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for "losses incurred."

(c) That part of the deduction for "losses incurred" which represents an adjustment to losses paid for salvage and reinsurance recoverable shall, except as hereinafter provided, include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash), real or personal, tangible or intangible, except that which may not be included by reason of express statutory provisions (or rules and regulations of an insurance department) of any State or Territory or the District of Columbia in which the company transacts business. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash received during the taxable year with respect to items of salvage or reinsurance shall be taken into account in computing losses paid during such taxable year.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

§ 1.832–2 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, "gross income" shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), Chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulations thereunder. Insurance companies, other than mutual fire insurance companies described in § 1.831–1, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 823(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.
[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6867, 30 FR 15094, Dec. 12, 1965]

§ 1.832–3 Taxable years affected.

Sections 1.832–1 and 1.832–2 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Sections 1.832–4, 1.832–5, and 1.832–6 are applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended.
[T.D. 6681, 28 FR 11129, Oct. 17, 1963]

§ 1.832–4T Gross income(temporary).

(a)(1) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in section 831(a)(3)(A) the amount of single deposit premiums received, but not assessments, shall be excluded from gross income. Section 832(b)(1)(D) provides that in the case of a mutual fire or flood insurance company described in section 831(a)(3)(B), there shall be included in gross income an amount equal to 2 percent of the premiums earned during the taxable year on contracts described in section 831(a)(3)(B) after deduction of premium deposits returned or credited during such taxable year with respect to such contracts. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets.

(2) The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year.

(3) In computing "premiums earned on insurance contracts during the taxable year" the amount of the unearned premiums shall include:

(i) Life insurance reserves as defined in section 803(b) and § 1.803–1 pertaining to the life, burial, or funeral insurance, or annuity business of an insurance company subject to the tax imposed by section 831 and not qualifying as a life insurance company under section 801;

(ii) Liability for return premiums under a rate credit or retrospective rating plan based on experience, such as the "War Department Insurance Rating Plan," and which return premiums are therefore not earned premiums; and

(iii) In the case of a mutual fire or flood insurance company described in section 831(a)(3)(B) (with respect to the contracts described therein), the amount of unabsorbed premium deposits which the company would be obligated to return to its policyholders at the close of the company's taxable year if all of its policies were terminated at such time.

(4) In computing the amount of unabsorbed premium deposits which a mutual fire or flood insurance company described in section 831(a)(3)(B) would be obligated to return to its policyholders at the close of its taxable year, the company must use its own schedule of unabsorbed premium deposit returns then in effect. A copy of the applicable schedule must be filed with the company's income tax return for each taxable year for which a computation based upon such schedule is made. In addition, a taxpayer making such a computation must provide the following information for each taxable year for which the computation is made:

(i) The amount of gross premiums received during the taxable year, and the amount of premiums paid for reinsurance during the taxable year, on the policies described in section 831(a)(3)(B) and on other policies;

(ii) The amount of insurance written during the taxable year under the policies described in section 831(a)(3)(B) and under other policies, and the amount of such insurance written which was reinsured during the taxable year. The information required under this subdivision shall only be submitted upon the specific request of the district director for a statement setting forth such information, and, if required, such statement shall be filed in the manner provided by this subparagraph or in such other manner as is satisfactory to the district director;

(iii) The amount of premiums earned during the taxable year on the policies described in section 831(a)(3)(B) and on other policies and the computations by which such amounts were determined, including sufficient information to support the taxpayer's determination of the amount of unearned premiums on premium deposit plan and other policies at the beginning and end of the taxable year, and the amount of unabsorbed premium deposits at the beginning and end of the taxable year on policies described in section 831(a)(3)(B).

The information required by this subparagraph shall be set forth in a statement attached to the taxpayer's income tax return for the taxable year for which such information is being provided. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year.

(5) In computing "losses incurred" the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them. See paragraph (b) of this section for rules relating to the treatment of salvage and reinsurance in determining unpaid losses.

(b) Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for "losses incurred" which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, represent a fair and reasonable estimate of the amount the company will be required to pay. Estimated recoveries on account of salvage and reinsurance attributable to unpaid losses must be taken into account in the computation of unpaid losses. The amounts of such expected recoveries should be estimated based upon the facts in each case and the company's experience with similar cases. Amounts included in, or added to, the estimates of unpaid losses which, in the opinion of the district director, are in excess of the actual liability determined as provided in the preceding sentences will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for "losses incurred."

(c) That part of the deduction for "losses incurred" which represents an adjustment to losses paid for salvage and reinsurance recoverable shall include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash or cash equivalents), real or personal, tangible or intangible. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash or cash equivalents received during the taxable year with respect to items of salvage or reinsurance shall reduce losses paid during such taxable year. For purposes of this section the term "salvage" includes subrogation claims.

(d)(1) The treatment of salvage and reinsurance is a method of accounting. Every insurance company to which this section applies that did not treat salvage and reinsurance as provided in this section for the last taxable year beginning before

January 1, 1988, must change its method of accounting with respect to salvage and reinsurance in the first taxable year beginning after December 31, 1987. The change in method of accounting will result in a section 481(a) adjustment. The fresh start provision of section 1023(e) of the Tax Reform Act of 1986 does not apply to the change in method of accounting required by this paragraph (d)(1).

(2) In the case of any insurance company required by paragraph (d)(1) of this section to change its method of accounting for any taxable year, such change shall be treated as initiated by the taxpayer and made with the consent of the Commissioner.

(3) Any insurance company required to change its method of accounting under paragraph (d)(1) of this section shall take the required adjustment into account as provided in applicable administrative procedures.

(e) This section is effective for taxable years beginning after December 31, 1987. In computing unpaid losses for taxable years beginning before January 1, 1988, an insurance company to which this section applies is not required to take into account estimated recoveries on account of salvage attributable to unpaid losses. In addition, in computing paid losses for such taxable years, an insurance company to which this section applies is not required to take into account salvage recoverable if during such taxable years the inclusion of such salvage was prohibited by the laws of a state in which the company transacted business.

[T.D. 6681, 28 FR 11129, Oct. 17, 1963; T.D. 8171, 53 FR 118, Jan. 5, 1988]

§ 1.832–5 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, "gross income" shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulation thereunder. Insurance companies, other than mutual fire insurance companies described in section 831(a)(3)(A) and the regulations thereunder, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual insurance companies. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(f)(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963, as amended by T.D. 6867, 30 FR 15094, Dec. 7, 1965]

§ 1.832–6 Policyholders of mutual fire or flood insurance companies operating on the basis of premium deposits.

For purposes of determining his taxable income for any taxable year, a taxpayer insured by a mutual fire or flood insurance company under a policy for which the premium deposit is the same regardless of the length of the term for which the

policy is written, and who is entitled to have returned or credited to his on the cancellation or expiration of such policy the unabsorbed portion of the premium deposit not required for losses, expenses, or establishment of reserves, may, if such amount is otherwise deductible under this chapter, deduct so much of his premium deposit as was absorbed by the company during the taxpayer's taxable year. The amount of the premium deposit absorbed during the taxpayer's taxable year shall be determined in accordance with the schedule of unabsorbed premium deposit returns in effect for the company during such taxable year. If the taxpayer is unable to determine the applicable rate of absorption in effect during his taxable year, he shall compute his deduction on the basis of the rate of absorption in effect at the end of the company's taxable year which next preceded the end of the taxpayer's taxable year. In such a case, an appropriate adjustment will be made upon the final determination of the rate of absorption applicable to the taxable year.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963]

REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS

§ 1.851–1 Definition of regulated investment company.

(a) In general. The term "regulated investment company" is defined to mean any domestic corporation (other than a personal holding company as defined in section 542) which meets (1) the requirements of section 851(a) and paragraph (b) of this section, and (2) the limitations of section 851(b) and § 1.851–2. As to the definition of the term "corporation", see section 7701(a)(3).

(b) Requirement. To qualify as a regulated investment company, a corporation must be:

(1) Registered at all times during the taxable year, under the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 to 80b–2), either as a management company or a unit investment trust, or

(2) A common trust fund or similar fund excluded by section 3(c)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a–3(c)) from the definition of "investment company" and not included in the definition of "common trust fund" by section 584(a).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.851–2 Limitations.

(a) Election to be a regulated investment company. Under the provisions of section 851(b)(1), a corporation, even though it satisfies the other requirements of part I, subchapter M, chapter 1 of the Code, for the taxable year, will not be considered a regulated investment company for such year, within the meaning of such part I, unless it elects to be a regulated investment company for such taxable year, or has made such an election for a previous taxable year which began after December 31, 1941. The election shall be made by the taxpayer by computing taxable income as a regulated investment company in its return for the first taxable year for which the election is applicable. No other method of making such election is permitted. An election once made is irrevocable for such taxable year and all succeeding taxable years.

(b) Gross income requirement—(1) General rule. Section 851(b)(2) and (3) provides that (i) at least 90 percent of the corporation's gross income for the taxable year must be derived from dividends, interest, and gains from the sale or other disposition of stocks or securities, and (ii) less than 30 percent of its gross income must have been derived from the sale or other disposition of stock or securities held for less than three months. In determining the gross income requirements under section 851(b)(2) and (3), a loss from the sale or other disposition of stock or securities does not enter into the computation. A determination of the period for which stock or securities have been held shall be governed by the provisions of section 1223 insofar as applicable.

(2) Special rules. (i) For purposes of section 851(b)(2), there shall be treated as dividends amounts which are included in gross income for the taxable year under section 951(a)(1)(A)(i) to the extent that (a) a distribution out of a foreign corporation's earnings and profits of the taxable year is not included in gross income by reason of section 959(a)(1), and (b) the earnings and profits are attributable to the amounts which were so included in gross income under section 951(a)(1)(A)(i). For allocation of distributions to earnings and profits of foreign corporations, see § 1.959–3. The provisions of this subparagraph shall apply with respect to taxable years of controlled foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (within the meaning of section 951(b) within which or with which such taxable years of such controlled foreign corporations end.

(ii) For purposes of subdivision (i) of this subparagraph, if by reason of section 959(a)(1) a distribution of a foreign corporation's earnings and profits for a taxable year described in section 959(c)(2) is not included in a shareholder's gross income, then such distribution shall be allocated proportionately between amounts attributable to amounts included under each clause of section 951(a)(1)(A). Thus, for example, M is a United States shareholder in X Corporation, a controlled foreign corporation. M and X each use the calendar year as the taxable year. For 1977, M is required by section 951(a)(1)(A) to include $3,000 in its gross income, $1,000 of which is included under clause (i) thereof. In 1977, M received a distribution described in section 959(c)(2) of $2,700 out of X's earnings and profits for 1977, which is, by reason of section 959(a)(1), excluded from M's gross income. The amount of the distribution attributable to the amount included under section 951(a)(1)(A)(i) is $900, *i.e.,* $2,700 multiplied by ($1,000/$3,000).

(c) **Diversification of investments.** (1) Subparagraph (A) of section 851(b)(4) requires that at the close of each quarter of the taxable year at least 50 percent of the value of the total assets of the taxpayer corporation be represented by one or more of the following:

(i) Cash and cash items, including receivables;

(ii) Government securities;

(iii) Securities of other regulated investment companies; or

(iv) Securities (other than those described in subdivisions (ii) and (iii) of this subparagraph) of any one or more issuers which meet the following limitations: (a) The entire amount of the securities of the issuer owned by the taxpayer corporation is not greater in value than 5 percent of the value of the total assets of the taxpayer corporation, and (b) the entire amount of the securities of such issuer owned by the taxpayer corporation does not represent more than 10 percent of the outstanding voting securities of such issuer. For the modification of the percentage limitations applicable in the case of certain venture capital investment companies, see section 851(e) and § 1.851–6.

Assuming that at least 50 percent of the value of the total assets of the corporation satisfies the requirements specified in this subparagraph, and that the limiting provisions of subparagraph (B) of section 851(b)(4) and subparagraph (2) of this paragraph are not violated, the corporation will satisfy the requirements of section 851(b)(4), notwithstanding that the remaining assets do not satisfy the diversification requirements of subparagraph (A) of section 851(b)(4). For example, a corporation may own all the stock of another corporation, provided it otherwise meets the requirements of subparagraphs (A) and (B) of section 851(b)(4).

(2) Subparagraph (B) of section 851(b)(4) prohibits the investment at the close of each quarter of the taxable year of more than 25 percent of the value of the total assets of the corporation (including the 50 percent or more mentioned in subparagraph (A) of section 851(b)(4)) in the securities (other than Government securities or the securities of other regulated investment companies) of any one issuer, or of two or more issuers which the taxpayer company controls and which are engaged in the same or similar trades or businesses or related trades or businesses, including such issuers as are merely a part of a unit contributing to the completion and sale of a product or the rendering of a particular service. Two or more issuers are not considered as being in the same or similar trades or businesses merely because they are engaged in the broad field of manufacturing or of any other general classification of industry, but issuers shall be construed to be engaged in the same or similar trades or businesses if they are engaged in a distinct branch of business, trade, or manufacture in which they render the same kind of service or produce or deal in the same kind of product, and such service or products fulfill the same economic need. If two or more issuers produce more than one product or render more than one type of service, then the chief product or service of each shall be the basis for determining whether they are in the same trade or business. [T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4090, April 28, 1962; T.D. 7555, 43 FR 32753, July 28, 1978]

§ 1.851–3 Rules applicable to section 851(b)(4).

In determining the value of the taxpayer's investment in the securities of any one issuer, for the purposes of subparagraph (B) of section 851(b)(4), there shall be included its proper proportion of the investment of any other corporation, a member of a controlled group, in the securities of such issuer. See example (4) in § 1.851–5. For purposes of §§ 1.851–2, 1.851–4, 1.851–5, and 1.851–6, the terms "controls", "controlled group", and "value" have the meaning assigned to them by section 851(c). All other terms used in such sections have the same meaning as when used in the Investment

Company Act of 1940 (15 U.S.C., ch. 2D) or that act as amended.
[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.851–4 Determination of status.

With respect to the effect which certain discrepancies between the value of its various investments and the requirements of section 851(b)(4) and paragraph (c) of § 1.851–2, or the effect that the elimination of such discrepancies will have on the status of a company as a regulated investment company for purposes of part I, subchapter M, chapter 1 of the Code, see section 851(d). A company claiming to be a regulated investment company shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 851 during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.
[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4090, April 28, 1962]

§ 1.851–5 Examples.

The provisions of section 851 may be illustrated by the following examples:

Example (1). Investment Company W at the close of its first quarter of the taxable year has its assets invested as follows:

	Percent
Cash	5
Government securities	10
Securities of regulated investment companies	20
Securities of Corporation A	10
Securities of Corporation B	15
Securities of Corporation C	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	20
Total	100

Investment Company W owns all of the voting stock of Corporations A and B, 15 percent of the voting stock of Corporation C, and less than 10 percent of the voting stock of the other corporations. None of the corporations is a member of a controlled group. Investment Company W meets the requirements under section 851(b)(4) at the end of its first quarter. It complies with subparagraph (A) of section 851(b)(4) since it has 55 percent of its assets invested as provided in such subparagraph. It complies with subparagraph (B) of section 851(b)(4) since it does not have more than 25 percent of its assets invested in the securities of any one issuer, or of two or more issuers which it controls.

Example (2). Investment Company V at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash	10
Government securities	35
Securities of Corporation A	7
Securities of Corporation B	12
Securities of Corporation C	15
Securities of Corporation D	21
Total	100

Investment Company V fails to meet the requirements of subparagraph (A) of section 851(b)(4) since its assets invested in Corporations A, B, C, and D exceed in each case 5 percent of the value of the total assets of the company at the close of the particular quarter.

Example (3). Investment Company X at the close of the particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	20
Securities of Corporation A	5
Securities of Corporation B	10
Securities of Corporation C	25
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	40
Total	100

Investment Company X owns more than 20 percent of the voting power of Corporations B and C and less than 10 percent of the voting power of all of the other corporations. Corporation B manufactures radios and Corporation C acts as its distributor and also distributes radios for other companies. Investment Company X fails to meet the requirements of subparagraph (B) of section 851(b)(4) since it has 35 percent of its assets invested in the securities of two issuers which it controls and which are engaged in related trades or businesses.

Example (4). Investment Company Y at the close of a particular quarter of the taxable year has its assets invested as follows:

	Percent
Cash and Government securities	15
Securities of Corporation K (a regulated investment company)	30
Securities of Corporation A	10
Securities of Corporation B	20
Securities of various corporations (not exceeding 5 percent of its assets in any one company)	25
Total	100

Corporation K has 20 percent of its assets invested in Corporation L and Corporation L has 40 percent of its assets invested in Corporation B. Corporation A also has 30 percent of its assets invested in Corporation B, and owns more than 20 percent of the voting power in Corporation B. Investment Company Y owns more than 20 percent of the voting power of Corporations A and K. Corporation K owns more than 20 percent of the voting power of Corporation L, and Corporation L owns more than 20 percent of the voting power of Corporation L. Investment Company Y is disqualified under subparagraph (B) of section 851(b)(4) since more than 25 percent of its assets are considered invested in Corporation B as shown by the following calculation:

	Percent
Percentage of assets invested directly in Corporation B	20.0
Percentage invested through the controlled group, Y–K–L–B (40 percent of 20 percent of 30 percent)	2.4

	Percent
Percentage invested in the controlled group, Y–A–B (30 percent of 10 percent)	3.0
Total percentage of assets of investment Company Y invested in Corporation B	25.4

Example (5). Investment Company Z, which keeps its books and makes its returns on the basis of the calendar year, at the close of the first quarter of 1955 meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation A. Later during the taxable year it makes distributions to its shareholders and because of such distributions it finds at the close of the taxable year that it has more than 25 percent of its remaining assets invested in Corporation A. Investment Company Z does not lose its status as a regulated investment company for the taxable year 1955 because of such distributions, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such distributions.

Example (6). Investment Company Q, which keeps its books and makes its returns on the basis of a calendar year, at the close of the first quarter of 1955, meets the requirements of section 851(b)(4) and has 20 percent of its assets invested in Corporation P. At the close of the taxable year 1955, it finds that it has more than 25 percent of its assets invested in Corporation P. This situation results entirely from fluctuations in the market values of the securities in Investment Company Q's portfolio and is not due in whole or in part to the acquisition of any security or other property. Corporation Q does not lose its status as a regulated investment company for the taxable year 1955 because of such fluctuations in the market values of the securities in its portfolio, nor will it lose its status as a regulated investment company for 1956 or any subsequent year solely as a result of such market value fluctuations.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.851–6 Investment companies furnishing capital to development corporations.

(a) Qualifying requirements. (1) In the case of a regulated investment company which furnishes capital to development corporations, section 851(e) provides an exception to the rule relating to the diversification of investments, made applicable to regulated investment companies by section 851(b)(4)(A). This exception (as provided in paragraph (b) of this section) is available only to registered management investment companies which the Securities and Exchange Commission determines, in accordance with regulations issued by it, and certifies to the Secretary or his delegate, not earlier than 60 days before the close of the taxable year of such investment company, to be principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available.

(2) For the purpose of the aforementioned determination and certification, unless the Securities and Exchange Commission determines otherwise, a corporation shall be considered to be principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available, for at least 10 years after the date of the first acquisition of any security in such corporation or any predecessor thereof by such investment company if at the date of such acquisition the corporation or its predecessor was principally so engaged, and an investment company shall be considered at any date to be furnishing capital to any company whose securities it holds if within 10 years before such date it had acquired any of such securities, or any securities surrendered in exchange therefor, from such other company or its predecessor.

(b) Exception to general rule. (1) The registered management investment company, which for the taxable year meets the requirements of paragraph (a) of this section, may (subject to the limitations of section 851(e)(2) and paragraph (c) of this section) in the computation of 50 percent of the value of its assets under section 851(b)(4)(A) and paragraph (c)(1) of § 1.851–2 for any quarter of such taxable year, include the value of any securities of an issuer (whether or not the investment company owns more than 10 percent of the outstanding voting securities of such issuer) if at the time of the latest acquisition of any securities of such issuer the basis of all such securities in the hands of the investment company does not exceed 5 percent of the value of the total assets of the investment company at that time. The exception provided by section 851(e)(1) and this subparagraph is not applicable to the securities of an issuer if the investment company has continuously held any security of such issuer or of any predecessor company (as defined in paragraph (d) of this section) for 10 or more years preceding such quarter of the taxable year. The rule of section 851(e)(1) with respect to the relationship of the basis of the securities of an issuer to the value of the total assets of the investment company is, in substance, a qualification of the 5-percent limitation in section 851(b)(4)(A)(ii) and paragraph (c)(1)(iv) of § 1.851–2. All other provisions and requirements of section 851 and §§ 1.851–1 through 1.851–6 are applicable in determining whether such registered management investment company qualifies as a regulated investment company.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). (i) The XYZ Corporation, a regulated investment company, qualified under section 851(e) as an investment company furnishing capital to development corporations. On

June 30, 1954, the XYZ Corporation purchased 1,000 shares of the stock of the A Corporation at a cost of $30,000. On June 30, 1954, the value of the total assets of the XYZ Corporation was $1,000,000. Its investment in the stock of the A Corporation ($30,000) comprised 3 percent of the value of its total assets, and it therefore met the requirements prescribed by section 851(b)(4)(A)(ii) as modified by section 851(e)(1).

(ii) On June 30, 1955, the value of the total assets of the XYZ Corporation was $1,500,000 and the 1,000 shares of stock of the A Corporation which the XYZ Corporation owned appreciated in value so that they were then worth $60,000. On that date, the XYZ Investment Company increased its investment in the stock of the A Corporation by the purchase of an additional 500 shares of that stock at a total cost of $30,000. The securities of the A Corporation owned by the XYZ Corporation had a value of $90,000 (6 percent of the value of the total assets of the XYZ Corporation) which exceeded the limit provided by section 851(b)(4)(A)(ii). However, the investment of the XYZ Corporation in the A Corporation on June 30, 1955, qualified under section 851(b)(4)(A) as modified by section 851(e)(1), since the basis of those securities to the investment company did not exceed 5 percent of the value of its total assets as of June 30, 1955, illustrated as follows:

Basis to the XYZ Corporation of the A Corporation's stock acquired on June 30, 1954	$30,000
Basis of the 500 shares of the A Corporation's stock acquired by the XYZ Corporation on June 30, 1955	30,000
Basis of all stock of A Corporation	60,000

Basis of stock of A Corporation ($60,000)/Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition ($1,500,000) = 4 percent

Example (2). The same facts existed as in example (1), except that on June 30, 1955, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 1,000 shares of that stock (instead of 500 shares) at a total cost of $60,000. No part of the investment of the XYZ Corporation in the A Corporation qualified under the 5 percent limitation provided by section 851(b)(4)(A) as modified by section 851(e)(1), illustrated as follows:

Basis to the XYZ Corporation of the 1,000 shares of the A Corporation's stock acquired on June 30, 1954	$30,000
Basis of the 1,000 shares of the A Corporation's stock acquired on June 30, 1955	60,000
Total	90,000

Basis of stock of A Corporation ($90,000)/Value of XYZ Corporation's total assets at June 30, 1955, time of the latest acquisition ($1,500,000) = 6 percent

Example (3). The same facts existed as in example (2) and on June 30, 1956, the XYZ Corporation increased its investment in the stock of the A Corporation by the purchase of an additional 100 shares of that stock at a total cost of $6,000. On June 30, 1956, the value of the total assets of the XYZ Corporation was $2,000,000 and on that date the investment in the A Corporation qualified under section 851(b)(4)(A) as modified by section 851(e)(1) illustrated as follows:

Basis to the XYZ Corporation of investments in the A Corporation's stock:	
1,000 shares acquired June 30, 1954	$30,000
1,000 shares acquired June 30, 1955	60,000
100 shares acquired June 30, 1956	6,000
Total	96,000

Basis of stock of A Corporation ($96,000)/Value of XYZ Corporation's total assets at June 30, 1956, time of the latest acquisition ($2,000,000) = 4.8 percent

(c) Limitation. Section 851(e) and this section do not apply in the quarterly computation of 50 percent of the value of the assets of an investment company under subparagraph (A) of section 851(b)(4) and paragraph (c)(1) of § 1.851–2 for any taxable year if at the close of any quarter of such taxable year more than 25 percent of the value of its total assets (including the 50 percent or more mentioned in such subparagraph (A)) is represented by securities (other than Government securities or the securities of other regulated investment companies) of issuers as to each of which such investment company (1) holds more than 10 percent of the outstanding voting securities of such issuer, and (2) has continuously held any security of such issuer (or any security of a predecessor of such issuer) for 10 or more years preceding such quarter, unless the value of its total assets so represented is reduced to 25 percent or less within 30 days after the close of such quarter.

(d) Definition of predecessor company. As used in section 851(e) and this section, the term "predecessor company" means any corporation the basis of whose securities in the hands of the investment company was, under the provisions of section 358 or corresponding provisions of prior law, the same in whole or in part as the basis of any of the securities of the issuer and any corporation with respect to whose securities any of the securities of the issuer were received directly or indirectly by the investment company in a transaction or series of transactions involving nonrecognition of gain or loss in whole or in part. The other terms used in this section have the same meaning as when used in section 851(b)(4). See paragraph (c) of § 1.851–2 and § 1.851–3.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.851–7 Certain unit investment trusts.

(a) In general. For purposes of the Internal Revenue Code, a unit investment trust (as defined in paragraph (d) of this section) shall not be treated as a person (as defined in section 7701(a)(1)) except for years ending before January 1, 1969. A holder of an interest in such a trust will be treated as directly owning the assets of such trust for taxable years of such holder which end with or within any year of the trust to which section 851(f) and this section apply.

(b) Treatment of unit investment trust. A unit investment trust shall not be treated as an individual, a trust estate, partnership, association, compa-

ny, or corporation for purposes of the Internal Revenue Code. Accordingly, a unit investment trust is not a taxpayer subject to taxation under the Internal Revenue Code. No gain or loss will be recognized by the unit investment trust if such trust distributes a holder's proportionate share of the trust assets in exchange for his interest in the trust. Also, no gain or loss will be recognized by the unit investment trust if such trust sells the holder's proportionate share of the trust assets and distributes the proceeds from such share to the holder in exchange for his interest in the trust.

(c) Treatment of holder of interest in unit investment trust. (1) Each holder of an interest in a unit investment trust shall be treated (to the extent of such interest) as owning a proportionate share of the assets of the trust. Accordingly, if the trust distributes to the holder of an interest in such trust his proportionate share of the trust assets in exchange for his interest in the trust, no gain or loss shall be recognized by such holder (or by any other holder of an interest in such trust). For purposes of this paragraph, each purchase of an interest in the trust by the holder will be considered a separate interest in the trust. Items of income, gain, loss, deduction, or credit received by the trust or a custodian thereof shall be taxed to the holders of interests in the trust (and not to the trust) as though they had received their proportionate share of the items directly on the date such items were received by the trust or custodian.

(2) The basis of the assets of such trust which are treated under subparagraph (1) of this paragraph as being owned by the holder of an interest in such trust shall be the same as the basis of his interest in such trust. Accordingly, the amount of the gain or loss recognized by the holder upon the sale by the unit investment trust of the holder's pro rata share of the trust assets shall be determined with reference the basis, of his interest in the trust. Also, the basis of the assets received by the holder, if the trust distributes a holder's pro rata share of the trust assets in exchange for his interest in the trust, will be the same as the basis of his interest in the trust. If the unit investment trust sells less than all of the holder's pro rata share of the trust assets and the holder retains an interest in the trust, the amount of the gain or loss recognized by the holder upon the sale shall be determined with reference to the basis of his interest in the assets sold by the trust, and the basis of his interest in the trust shall be reduced accordingly. If the trust distributes a portion of the holder's pro rata share of the trust assets in exchange for a portion of his interest in the trust, the basis of the assets received by the holder shall be determined with reference to the basis of his interest in the assets distributed by the trust, and the basis of his interest in the trust shall be reduced accordingly. For purposes of this subparagraph the basis of the holder's interest in assets sold by the trust or distributed to him shall be an amount which bears the same relationship to the basis of his total interest in the trust that the fair market value of the assets so sold or distributed bears to the fair market value of such total interest in the trust, such fair market value to be determined on the date of such sale or distribution.

(3) The period for which the holder of an interest in such trust has held the assets of the trust which are treated under subparagraph (1) of this paragraph as being owned by him is the same as the period for which such holder has held his interest in such trust. Accordingly, the character of the gain, loss, deduction, or credit recognized by the holder upon the sale by the unit investment trust of the holder's proportionate share of the trust assets shall be determined with reference to the period for which he has held his interest in the trust. Also, the holding period of the assets received by the holder if the trust distributes the holder's proportionate share of the trust assets in exchange for his interest in the trust will include the period for which the holder has held his interest in the trust.

(4) The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered a periodic payment plan of a unit investment trust (as defined in paragraph (d) of this section) with X Bank as custodian and Z as plan sponsor. Under this plan, upon B's demand, X must either redeem B's interest at a price substantially equal to the fair market value of the number of shares in Y, a management company, which are credited to B's account by X in connection with the unit investment trust, or at B's option distribute such shares of Y to B. B's plan provides for quarterly payments of $1,000. On October 1, 1969, B made his initial quarterly payment of $1,000 and X credited B's account with 110 shares of Y. On December 1, 1969, Y declared and paid a dividend of 25 cents per share, 5 cents of which was designated as a capital gain dividend pursuant to section 852(b)(3) and § 1.852–4. X credited B's account with $27.50 but did not distribute the money to B in 1969. On December 31, 1969, X charged B's account with $1 for custodial fees for calendar year 1969. On January 1, 1970, B paid X $1,000 and X credited B's account with 105 shares of Y. On April 1, 1970, B paid X $1,000 and X credited B's account with 100 shares of Y. B must include in his tax return for 1969 a dividend of $22 and a long-term capital gain of $5.50. In addition, B is entitled to deduct the annual custodial fee of $1 under section 212 of the Code.

(a) On April 4, 1970, at B's request, X sells the shares of Y credited to B's account (315 shares) for $10 per share and distributes the proceeds ($3,150) to B together with the remaining balance of $26.50 in B's account. The receipt of the $26.50

does not result in any tax consequences to B. B recognizes a long-term capital gain of $100 and a short-term capital gain of $50, computed as follows:

(1) B is treated as owning 110 shares of Y as of October 1, 1969. The basis of these shares is $1,000, and they were sold for $1,100 (110 shares at $10 per share). Therefore, B recognizes a gain from the sale or exchange of a capital asset held for more than 6 months in the amount of $100.

(2) B is treated as owning 105 shares of Y as of January 1, 1970, and 100 shares as of April 1, 1970. With respect to the shares acquired on April 1, 1970, there is no gain recognized as the shares were sold for $1,000, which is B's basis of the shares. The shares acquired on January 1, 1970, were sold for $1,050 (105 shares at $10 per share), and B's basis of these shares is $1,000. Therefore, B recognizes a gain of $50 from the sale or exchange of a capital asset held for not more than 6 months.

(b) On April 4, 1970, at B's request, X distributes to B the shares of Y credited to his account and $26.50 in cash. The receipt of the $26.50 does not result in any tax consequences to B. B does not recognize gain or loss on the distribution of the shares of Y to him. The bases and holding periods of B's interests in Y are as follows:

Number of shares	Date acquired	Basis
110	10-1-69	$9.09
105	1-1-70	9.52
100	4-1-70	10.00

(d) Definition. A unit investment trust to which this section refers is a business arrangement (other than a segregated asset account, whether or not it holds assets pursuant to a variable annuity contract, under the insurance laws or regulations of a State) which (except for taxable years ending before Jan. 1, 1969)—

(1) Is a unit investment trust (as defined in the Investment Company Act of 1940);

(2) Is registered under such Act;

(3) Issues periodic payment plan certificates (as defined in such Act) in one or more series;

(4) Possesses, as substantially all of its assets, as to all such series, securities issued by—

(i) A single management company (as defined in such Act), and securities acquired pursuant to subparagraph (5) of this paragraph, or

(ii) A single other corporation; and

(5) Has no power to invest in any other securities except securities issued by a single other management company, when permitted by such Act or the rules and regulations of the Securities and Exchange Commission.

(e) Investment in two single management companies. (1) A unit investment trust may possess securities issued by two or more separate single management companies (as defined in such Act) if—

(i) The trust issues a separate series of periodic payment plan certificates (as defined in such Act) with respect to the securities of each separate single management company which it possesses; and

(ii) None of the periodic payment plan certificates issued by the trust permits joint acquisition of an interest in each series nor the application of payments in whole or in part first to a series issued by one of the single management companies and then to any other series issued by any other single management company.

(2) If a unit investment trust possesses securities of two or more separate single management companies as described in subparagraph (1) of this paragraph and issues a separate series of periodic payment plan certificates with respect to the securities of each such management company, then the holder of an interest in a series shall be treated as the owner of the securities in the single management company represented by such interest.

(i) A holder of an interest in a series of periodic payment plan certificates of a trust who transfers or sells his interest in the series in exchange for an interest in another series of periodic payment plan certificates of the trust shall recognize the gain or loss realized from the transfer or sale as if the trust had sold the shares credited to his interests in the series at fair market value and distributed the proceeds of the sale to him.

(ii) The basis of the interests in the series so acquired by the holder shall be the fair market value of his interests in the series transferred or sold.

(iii) The period for which the holder has held his interest in the series so acquired shall be measured from the date of his acquisition of his interest in that series.

(f) Cross references. (1) For reporting requirements imposed on custodians of unit investment trusts described in this section, see §§ 1.852-4, 1.852-9, 1.853-3, 1.854-2, and 1.6042-2.

(2) For rules relating to redemptions of certain unit investment trusts not described in this section, see § 1.852-10.

[T.D. 7187, 37 FR 13254, July 6, 1972, as amended by T.D. 7187, 37 FR 20688, Oct. 3, 1972]

§ 1.852-1 Taxation of regulated investment companies.

(a) Requirements applicable thereto—(1) In general. Section 852(a) denies the application of

the provisions of part I, subchapter M, chapter 1 of the Code (other than section 852(c), relating to earnings and profits), to a regulated investment company for a taxable year beginning after February 28, 1958, unless—

(i) The deduction for dividends paid for such taxable year as defined in section 561 (computed without regard to capital gain dividends) is equal to at least 90 percent of its investment company taxable income for such taxable year (determined without regard to the provisions of section 852(b)(2)(D) and paragraph (d) of § 1.852–3); and

(ii) The company complies for such taxable year with the provisions of § 1.852–6 (relating to records required to be maintained by a regulated investment company).

See section 853(b)(1)(B) and paragraph (a) of § 1.853–2 for amounts to be added to the dividends paid deduction, and section 855 and § 1.855–1, relating to dividends paid after the close of the taxable year.

(2) Special rule for taxable years of regulated investment companies beginning before March 1, 1958. The provisions of part I of subchapter M (including section 852(c)) are not applicable to a regulated investment company for a taxable year beginning before March 1, 1958, unless such company meets the requirements of section 852(a) and subparagraph (1)(i) and (ii) of this paragraph.

(b) Failure to qualify. If a regulated investment company does not meet the requirements of section 852(a) and paragraph (a)(1)(i) and (ii) of this section for the taxable year, it will, even though it may otherwise be classified as a regulated investment company, be taxed in such year as an ordinary corporation and not as a regulated investment company. In such case, none of the provisions of part I of subchapter M (other than section 852(c) in the case of taxable years beginning after February 28, 1958) will be applicable to it. For the rules relating to the applicability of section 852(c), see § 1.852–5.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4091, April 28, 1962]

§ 1.852–2 Method of taxation of regulated investment companies.

(a) Imposition of normal tax and surtax. Section 852(b)(1) imposes a normal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the investment company taxable income, as defined in section 852(b)(2) and § 1.852–3, for each taxable year of a regulated investment company. The tax is imposed as if the investment company taxable income were the taxable income referred to in section 11. In computing the normal tax under section 11, the regulated investment company's taxable income and the dividends paid deduction (computed without regard to the capital gains dividends) shall both be reduced by the deduction for partially tax-exempt interest provided by section 242.

(b) Taxation of capital gains—(1) In general. Section 852(b)(3)(A) imposes (i) in the case of a taxable year beginning before January 1, 1970, a tax of 25 percent, or (ii) in the case of a taxable year beginning after December 31, 1969, a tax determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201–1, on the excess, if any, of the net long-term capital gain of a regulated investment company (subject to tax under part I, subchapter M, chapter 1 of the Code) over the sum of its net short-term capital loss and its deduction for dividends paid (as defined in section 561) determined with reference to capital gain dividends only. For the definition of capital gain dividend paid by a regulated investment company, see section 852(b)(3)(C) and paragraph (c) of § 1.852–4. In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, such deduction for dividends paid shall first be made from the amount subject to tax in accordance with section 1201(a)(1)(B), to the extent thereof, and then from the amount subject to tax in accordance with section 1201(a)(1)(A). See § 1.852–10, relating to certain distributions in redemption of interests in unit investment trusts which, for purposes of the deduction for dividends paid with reference to capital gain dividends only, are not considered preferential dividends under section 562(c). See section 855 and § 1.855–1, relating to dividends paid after the close of the taxable year.

(2) Undistributed capital gains—(i) In general. A regulated investment company (subject to tax under part I of subchapter M) may, for taxable years beginning after December 31, 1956, designate under section 852(b)(3)(D) an amount of undistributed capital gains to each shareholder of the company. For the definition of the term "undistributed capital gains" and for the treatment of such amounts by a shareholder, see paragraph (b)(2) of § 1.852–4. For the rules relating to the method of making such designation, the returns to be filed, and the payment of the tax in such cases, see paragraph (a) of § 1.852–9.

(ii) **Effect on earnings and profits of a regulated investment company.** If a regulated investment company designates an amount as undistributed capital gains for a taxable year, the earnings and profits of such regulated investment company for such taxable year shall be reduced by the total amount of the undistributed capital gains so designated. In such case, its capital account shall be increased—

(a) In the case of a taxable year ending before January 1, 1970, by 75 percent of the total amount designated,

(b) In the case of a taxable year ending after December 31, 1969, and beginning before January 1, 1975, by the total amount designated decreased by the amount of tax imposed by section 852(b)(3)(A) with respect to such amount, or

(c) In the case of a taxable year beginning after December 31, 1974, by 70 percent of the total amount designated. The earnings and profits of a regulated investment company shall not be reduced by the amount of tax which is imposed by section 852(b)(3)(A) on an amount designated as undistributed capital gains and which is paid by the corporation but deemed paid by the shareholder.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4091, April 28, 1962; T.D. 6921, 32 FR 8754, June 20, 1967; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

§ 1.852–3 Investment company taxable income.

Section 852(b)(2) requires certain adjustments to be made to convert taxable income of the investment company to investment company taxable income, as follows:

(a) The excess, if any, of the net long-term capital gain over the net short-term capital loss shall be excluded;

(b) The net operating loss deduction provided in section 172 shall not be allowed;

(c) The special deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code, shall not be allowed. Those not allowed are the deduction for partially tax-exempt interest provided by section 242, the deductions for dividends received provided by sections 243, 244, and 245, and the deduction for certain dividends paid provided by section 247. However, the deduction provided by section 248 (relating to organizational expenditures), otherwise allowable in computing taxable income, shall likewise be allowed in computing the investment company taxable income. See section 852(b)(1) and paragraph (a) of § 1.852–2 for treatment of the deduction for partially tax-exempt interest (provided by section 242) for purposes of computing the normal tax under section 11;

(d) The deduction for dividends paid (as defined in section 561) shall be allowed, but shall be computed without regard to capital gains dividends (as defined in section 852(b)(3)(C) and paragraph (c) of § 1.852–4); and

(e) The taxable income shall be computed without regard to section 443(b). Thus, the taxable income for a period of less than 12 months shall not be placed on an annual basis even though such short taxable year results from a change of accounting period.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.852–4 Method of taxation of shareholders of regulated investment companies.

(a) **Ordinary income.** (1) Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a regulated investment company shall include such dividends in gross income for the taxable year in which they are received.

(2) See section 853(b)(2) and (c) and paragraph (b) of § 1.853–2 and § 1.853–3 for the treatment by shareholders of dividends received from a regulated investment company which has made an election under section 853(a) with respect to the foreign tax credit. See section 854 and §§ 1.854–1 through 1.854–3 for limitations applicable to dividends received from regulated investment companies for the purpose of the credit under section 34 (for dividends received on or before December 31, 1964), the exclusion from gross income under section 116, and the deduction under section 243. See section 855(b) and (d) and paragraphs (c) and (f) of § 1.855–1 for treatment by shareholders of dividends paid by a regulated investment company after the close of the taxable year in the case of an election under section 855(a).

(b) **Capital gains—(1) In general.** Under section 852(b)(3)(B), shareholders of a regulated investment company who receive capital gain dividends (as defined in paragraph (c) of this section), in respect of the capital gains of an investment company for a taxable year for which it is taxable under part I, subchapter M, chapter 1 of the Code,

as a regulated investment company, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend to which section 1201(d)(1) or (2) applies is the portion so designated by the regulated investment company pursuant to paragraph (c)(2) of this section.

(2) **Undistributed capital gains.** (i) A person who is a shareholder of a regulated investment company at the close of a taxable year of such company for which it is taxable under part I of subchapter M shall include in his gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) any amount of undistributed capital gains. The term "undistributed capital gains" means the amount designated as undistributed capital gains in accordance with paragraph (a) of § 1.852–9, but the amount so designated shall not exceed the shareholder's proportionate part of the amount subject to tax under section 852(b)(3)(A). Such amount shall be included in gross income for the taxable year of the shareholder in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount of such gains designated under paragraph (a) of § 1.852–9 as gain described in section 1201(d)(1) or (2) shall be included in the shareholder's gross income as gain described in section 1201(d)(1) or (2). For certain administrative provisions relating to undistributed capital gains, see § 1.852–9.

(ii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall be deemed to have paid for his taxable year for which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, a tax equal to 25 percent of such amount.

(b) In the case of a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, a tax equal to the tax designated under paragraph (a)(1) of § 1.852–9 by the regulated investment company as his proportionate share of the capital gains tax paid with respect to such amount, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, a tax equal to 30 percent of such amount.

Such shareholder is entitled to a credit or refund of the tax so deemed paid in accordance with the rules provided in paragraph (c)(2) of § 1.852–9.

(iii) Any shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D)(i) and subdivision (i) of this subparagraph shall increase the adjusted basis of the shares of stock with respect to which such amount is so includible—

(a) In the case of an amount designated with respect to a taxable year of the company ending before January 1, 1970, by 75 percent of such amount.

(b) In the case of an amount designated with respect to a taxable year of the company ending after December 31, 1969, and beginning before January 1, 1975, by the amount designated under paragraph (a)(1)(iv) of § 1.852–9 by the regulated investment company, or

(c) In the case of an amount designated with respect to a taxable year of the company beginning after December 31, 1974, by 70 percent of such amount.

(iv) For purposes of determining whether the purchaser or seller of a share or regulated investment company stock is the shareholder at the close of such company's taxable year who is required to include an amount of undistributed capital gains in gross income, the amount of the undistributed capital gains shall be treated in the same manner as a cash dividend payable to shareholders of record at the close of the company's taxable year. Thus, if a cash dividend paid to shareholders of record as of the close of the regulated investment company's taxable year would be considered income to the purchaser, then the purchaser is also considered to be the shareholder of such company at the close of its taxable year for purposes of including an amount of undistributed capital gains in gross income. If, in such a case, notice on Form 2439 is, pursuant to paragraph (a)(1) of § 1.852–9, mailed by the regulated investment company to the seller, then the seller shall be considered the nominee of the purchaser and, as

such, shall be subject to the provisions in paragraph (b) of § 1.852-9. For rules for determining whether a dividend is income to the purchaser or seller of a share of stock, see paragraph (c) of § 1.61-9.

(3) **Partners and partnerships.** If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a partnership, such amount shall be included in the gross income of the partnership for the taxable year of the partnership in which falls the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated. The amount so includible by the partnership shall be taken into account by the partners as distributive shares of the partnership gains and losses from sales or exchanges of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) pursuant to section 702(a)(2) and paragraph (a)(2) of § 1.702-1. The tax with respect to the undistributed capital gains is deemed paid by the partnership (under section 852(b)(3)(D)(ii) and subparagraph (2)(ii) of this paragraph), and the credit or refund of such tax shall be taken into account by the partners in accordance with section 702(a)(8) and paragraph (a)(8)(ii) of § 1.702-1 and paragraph (c)(2) of § 1.852-9. In accordance with section 705(a), the partners shall increase the basis of their partnership interests under section 705(a)(1) by the distributive shares of such gains, and shall decrease the basis of their partnership interests by the distributive shares of the amount of the tax under section 705(a)(2)(B) (relating to certain nondeductible expenditures) and paragraph (a)(3) of § 1.705-1.

(4) **Nonresident alien individuals.** If the shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a nonresident alien individual, such shareholder shall be treated, for purposes of section 871 and the regulations thereunder, as having realized a long-term capital gain in such amount on the last day of the taxable year of the regulated investment company in respect of which the undistributed capital gains were designated.

(5) **Effect on earnings and profits of corporate shareholders of a regulated investment company.** If a shareholder required to include an amount of undistributed capital gains in gross income under section 852(b)(3)(D) and subparagraph (2) of this paragraph is a corporation, such corporation, in computing its earnings and profits for the taxable year for which such amount is so includible, shall treat such amount as if it had actually been received and the taxes paid shall include any amount of tax liability satisfied by a credit under section 852(b)(3)(D) and subparagraph (2) of this paragraph.

(c) **Definition of capital gain dividend—(1) General rule.** A capital gain dividend, as defined in section 852(b)(3)(C), is any dividend or part thereof which is designated by a regulated investment company as a capital gain dividend in a written notice mailed to its shareholders within the period specified in paragraph (c)(4) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855) is greater than the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate amount so designated. For example, a regulated investment company making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1955, that of a distribution of $500,000 made December 15, 1955, $200,000 constituted a capital gain dividend, amounting to $2 per share. It was later discovered that an error had been made in determining the excess of the net long-term capital gain over the net short-term capital loss of the taxable year, and that such excess was $100,000 instead of $200,000. In such case each shareholder would have received a capital gain dividend of $1 per share instead of $2 per share.

(2) **Shareholder of record custodian of certain unit investment trusts.** In any case where a notice is mailed pursuant to subparagraph (1) of this paragraph by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970, to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851-7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the capital gain dividend shown on the notice received by the nominee

pursuant to subparagraph (1) of this paragraph. The notice shall include the name and address of the nominee identified as such. This subparagraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of subparagraph (1) of this paragraph with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and, not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this subparagraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this subparagraph within 30 days of such notice. If a notice under paragraph (c)(1) of this section is mailed within the 120-day period following the date of a determination pursuant to paragraph (c)(4)(ii) of this section, the 120-day period and the 130-day period following the date of the determination shall be substituted for the 45-day period and the 55-day period following the close of the regulated investment company's taxable year prescribed by this subparagraph (2).

(3) **Subsection (d) gain for certain taxable years.** In the case of capital gain dividends with respect to any taxable year of a regulated investment company ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 855), the company must include in its written notice under paragraph (c)(1) of this section a statement showing the shareholder's proportionate share of the capital gain dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d)(1) or (2), the regulated investment company shall consider that capital gain dividends for a taxable year are first made from its long-term capital gains for such year which are not described in section 1201(d)(1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d)(1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the company's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of each capital gain dividend (to which this paragraph applies) which is gain described in section 1201(d)(1) or (2). If, for his taxable year, a shareholder must include in his gross income a capital gain dividend to which this paragraph applies, he shall attach to his income tax return for such taxable year a statement showing, with respect to the total of such dividends for such taxable year received from each regulated investment company, the name and address of the regulated investment company from which such dividends are received, the amount of such dividends, the portion of such dividends which was designated as gain described in section 1201(d)(1), and the portion of such dividends which was designated as gain described in section 1201(d)(2).

(4) **Mailing of written notice to shareholders.** (i) Except as provided in paragraph (c)(4)(ii) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year of the regulated investment company.

(ii) If a determination (as defined in section 860(e)) after November 6, 1978, increases the excess for the taxable year of the net capital gain over the deduction for capital gains dividends paid, then a regulated investment company may designate all or part of any dividend as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determi-

nation. The aggregate amount designated during this period may not exceed this increase. A dividend may be designated if it is actually paid during the taxable year, is one paid after the close of the taxable year to which section 855 applies, or is a deficiency dividend (as defined in section 860(f)), including a deficiency dividend paid by an acquiring corporation to which section 381(c)(25) applies. The date of a determination is established under § 1.860–2(b)(1).

(d) Special treatment of loss on the sale or exchange of regulated investment company stock held less than 31 days—(1) In general. Under section 852(b)(4), if any person, with respect to a share of regulated investment company stock acquired by such person after December 31, 1957, and held for a period of less than 31 days, is required by section 852(b)(3)(B) or (D) to include in gross income as a gain from the sale or exchange of a capital asset held for more than six months—

(i) The amount of a capital gain dividend, or

(ii) An amount of undistributed capital gains,

then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share of stock as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). Such special treatment with respect to the sale of regulated investment company stock held for a period of less than 31 days is applicable to losses for taxable years ending after December 31, 1957.

(2) Determination of holding period. The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 852(b)(4) and this paragraph, a share of regulated investment company stock has been held for a period of less than 31 days. In applying those rules, however, "30 days" shall be substituted for the number of days specified in subparagraph (B) of section 246(c)(3).

(3) Example. The application of section 852(b)(4) and this paragraph may be illustrated by the following example:

Example. On December 15, 1958, A purchased a share of stock in the X regulated investment company for $20. The X regulated investment company declared a capital gain dividend of $2 per share to shareholders of record on December 31, 1958. A, therefore, received a capital gain dividend of $2 which, pursuant to section 852(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than 6 months. On January 5, 1959, A sold his share of stock in the X regulated investment company for $17.50, which sale resulted in a loss of $2.50. Under section 852(b)(4) and this paragraph, A must treat $2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than 6 months.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6531, 26 FR 413, Jan. 19, 1961; T.D. 6598, 27 FR 4091, April 28, 1962; T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7337, 39 FR 44972, Dec. 30, 1974; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.852–5 Earnings and profits of a regulated investment company.

(a) Any regulated investment company, whether or not such company meets the requirements of section 852(a) and paragraph (a)(1)(i) and (ii) of § 1.852–1, shall apply paragraph (b) of this section in computing its earnings and profits for a taxable year beginning after February 28, 1958. However, for a taxable year of a regulated investment company beginning before March 1, 1958, paragraph (b) of this section shall apply only if the regulated investment company meets the requirements of section 852(a) and paragraph (a)(1)(i) and (ii) of § 1.852–1.

(b) In the determination of the earnings and profits of a regulated investment company, section 852(c) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a corporation would have had earnings and profits of $500,000 for the taxable year except for the fact that it had a net capital loss of $100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a regulated investment company would be $500,000. If the regulated investment company had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year, the earnings and profits for the taxable year to be considered in such computation would amount to $400,000 assuming that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, $500,000, the corporation would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and

would begin such year with its paid-in capital reduced by $100,000, an amount equal to the excess of the $500,000 distributed over the $400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.852–6 Records to be kept for purpose of determining whether a corporation claiming to be a regulated investment company is a personal holding company.

(a) Every regulated investment company shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from the shareholders. The actual owner of stock includes the person who is required to include in gross income in his return the dividends received on the stock. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) For the purpose of determining whether a domestic corporation claiming to be a regulated investment company is a personal holding company as defined in section 542, the permanent records of the company shall show the maximum number of shares of the corporation (including the number and face value of securities convertible into stock of the corporation) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the corporation's taxable year, as provided in section 544.

(c) Statements setting forth the information (required by paragraph (b) of this section) shall be demanded not later than 30 days after the close of the corporation's taxable year as follows:

(1) In the case of a corporation having 2,000 or more record owners of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a corporation having less than 2,000 and more than 200 record owners of its stock, on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a corporation having 200 or less record owners of its stock, on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

When making demand for the written statements required of each shareholder by this paragraph, the company shall inform each of the shareholders of his duty to submit as a part of his income tax return the statements which are required by § 1.852–7 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with a company's demand shall be maintained as a part of its record required by this section. A company which fails to keep such records to show the actual ownership of its outstanding stock as are required by this section shall be taxable as an ordinary corporation and not as a regulated investment company.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.852–7 Additional information required in returns of shareholders.

Any person who fails or refuses to comply with the demand of a regulated investment company for the written statements which § 1.852–6 requires the company to demand from its shareholders shall submit as a part of his income tax return a statement showing, to the best of his knowledge and belief—

(a) The number of shares actually owned by him at any and all times during the period for which the return is filed in any company claiming to be a regulated investment company;

(b) The dates of acquisition of any such stock during such period and the names and addresses of persons from whom it was acquired;

(c) The dates of disposition of any such stock during such period and the names and addresses of the transferees thereof;

(d) The names and addresses of the members of his family (as defined in section 544(a)(2)); the names and addresses of his partners, if any, in any partnership; and the maximum number of shares, if any, actually owned by each in any corporation claiming to be a regulated investment company, at any time during the last half of the taxable year of such company;

(e) The names and addresses of any corporation, partnership, association, or trust in which he had a beneficial interest to the extent of at least 10 percent at any time during the period for which such return is made, and the number of shares of any corporation claiming to be a regulated investment company actually owned by each;

(f) The maximum number of shares (including the number and face value of securities convertible into stock of the corporation) in any domestic corporation claiming to be a regulated investment company to be considered as constructively owned by such individual at any time during the last half of the corporation's taxable year, as provided in section 544 and the regulations thereunder; and

(g) The amount and date of receipt of each dividend received during such period from every corporation claiming to be a regulated investment company.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.852–8 Information returns.

Nothing in §§ 1.852–6 and 1.852–7 shall be construed to relieve regulated investment companies or their shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.852–9 Special procedural requirements applicable to designation under section 852(b)(3)(D).

(a) Regulated investment company—(1) Notice to shareholders. (i) A designation of undistributed capital gains under section 852(b)(3)(D) and paragraph (b)(2)(i) of § 1.852–2 shall be made by notice on Form 2439 mailed by the regulated investment company to each person who is a shareholder of record of the company at the close of the company's taxable year. The notice on Form 2439 shall show the name, address, and employer identification number of the regulated investment company; the taxable year of the company for which the designation is made; the name, address, and identifying number of the shareholder; the amount designated by the company for inclusion by the shareholder in computing his long-term capital gains; and the tax paid with respect thereto by the company which is deemed to have been paid by the shareholder.

(ii) In the case of a designation of undistributed capital gains with respect to a taxable year of the regulated investment company ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show the shareholder's proportionate share of such gains which is gain described in section 1201(d)(1), his proportionate share of such gains which is gain described in section 1201(d)(2), and the amount (determined pursuant to subdivision (iv) of this subparagraph) by which the shareholder's adjusted basis in his shares shall be increased.

(iii) In determining under subdivision (ii) of this subparagraph the portion of the undistributed capital gains which, in the hands of the shareholder, is gain described in section 1201(d)(1) or (2), the company shall consider that capital gain dividends for a taxable year are made first from its long-term capital gains for such year which are not described in section 1201(d)(1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d)(1) or (2). A shareholder's proportionate share of undistributed capital gains for a taxable year which is gain described in section 1201(d)(1) is the amount which bears the same ratio to the amount included in his income as designated undistributed capital gains for such year as (a) the aggregate amount of the company's gains for such year which are described in section 1201(d)(1) and designated as undistributed capital gains bears to (b) the aggregate amount of the company's gains for such year which are designated as undistributed capital gains. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every regulated investment company shall keep a record of the proportion of undistributed capital gains (to which this subdivision applies) which is gain described in section 1201(d)(1) or (2).

(iv) In the case of a designation of undistributed capital gains for any taxable year ending after December 31, 1969, and beginning before January 1, 1975, Form 2439 shall also show with respect to the undistributed capital gains of each shareholder the amount by which such shareholder's adjusted basis in his shares shall be increased under section 852(b)(3)(D)(iii). The amount by which each shareholder's adjusted basis in his shares shall be increased is the amount includible in his gross income with respect to such shares under section 852(b)(3)(D)(i) less the tax which the shareholder is deemed to have paid with respect to such shares. The tax which each shareholder is deemed to have paid with respect to such shares is the amount which bears the same ratio to the amount of the tax imposed by section 852(b)(3)(A) for such year with respect to the aggregate amount of the designated undistributed capital gains as the amount of such gains includible in the shareholder's gross income bears to the aggregate amount of such gains so designated.

(v) Form 2439 shall be prepared in triplicate, and copies B and C of the form shall be mailed to the shareholder on or before the 45th day (30th

day for a taxable year ending before February 26, 1964) following the close of the company's taxable year. Copy A of each Form 2439 must be associated with the duplicate copy of the undistributed capital gains tax return of the company (Form 2438), as provided in subparagraph (2)(ii) of this paragraph.

(2) Return of undistributed capital gains tax—(i) Form 2438. Every regulated investment company which designates undistributed capital gains for any taxable year beginning after December 31, 1956, in accordance with subparagraph (1) of this paragraph, shall file for such taxable year an undistributed capital gains tax return on Form 2438 including on such return the total of its undistributed capital gains so designated and the tax with respect thereto. The return on Form 2438 shall be prepared in duplicate and shall set forth fully and clearly the information required to be included therein. The original of Form 2438 shall be filed on or before the 30th day after the close of the company's taxable year with the internal revenue officer designated in instructions applicable to Form 2438. The duplicate copy of Form 2438 for the taxable year shall be attached to and filed with the income tax return of the company on Form 1120 for such taxable year.

(ii) Copies A of Form 2439. For each taxable year which ends on or before December 31, 1965, there shall be submitted with the company's return on Form 2438 all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. For each taxable year which ends after December 31, 1965, there shall be submitted with the duplicate copy of the company's return on Form 2438, which is attached to and filed with the income tax return of the company on Form 1120 for the taxable year, all copies A of Form 2439 furnished by the company to its shareholders in accordance with subparagraph (1) of this paragraph. The copies A of Form 2439 shall be accompanied by lists (preferably in the form of adding machine tapes) of the amounts of undistributed capital gains and of the tax paid with respect thereto shown on such forms. The totals of the listed amounts of undistributed capital gains and of tax paid with respect thereto must agree with the corresponding entries on Form 2438.

(3) Payment of tax. The tax required to be returned on Form 2438 shall be paid by the regulated investment company on or before the 30th day after the close of the company's taxable year to the internal revenue officer with whom the return on Form 2438 is filed.

(b) Shareholder of record not actual owner—(1) Notice to actual owner. In any case in which a notice on Form 2439 is mailed pursuant to paragraph (a)(1) of this section by a regulated investment company to a shareholder of record who is a nominee of the actual owner or owners of the shares of stock to which the notice relates, the nominee shall furnish to each such actual owner notice of the owner's proportionate share of the amounts of undistributed capital gains and tax with respect thereto, as shown on the Form 2439 received by the nominee from the regulated investment company. The nominee's notice to the actual owner shall be prepared in triplicate on Form 2439 and shall contain the information prescribed in paragraph (a)(1) of this section, except that the name and address of the nominee, identified as such, shall be entered on the form in addition to, and in the space provided for, the name and address of the regulated investment company, and the amounts of undistributed capital gains and tax with respect thereto entered on the form shall be the actual owner's proportionate share of the corresponding items shown on the nominee's notice from the regulated investment company. Copies B and C of the Form 2439 prepared by the nominee shall be mailed to the actual owner—

(i) For taxable years of regulated investment companies ending after February 25, 1964, on or before the 75th day (55th day in the case of a nominee who is acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7 for taxable years of regulated investment companies ending after December 8, 1970, and 135th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year, or

(ii) For taxable years of regulated investment companies ending before February 26, 1964, on or before the 60th day (120th day if the nominee is a resident of a foreign country) following the close of the regulated investment company's taxable year.

(2) Transmittal of Form 2439. The nominee shall enter the word "Nominee" in the upper right hand corner of copy B of the notice on Form 2439 received by him from the regulated investment company, and on or before the appropriate day specified in subdivision (i) or (ii) of subparagraph (1) of this paragraph shall transmit such copy B, together with all copies A of Form 2439 prepared by him pursuant to subparagraph (1) of this para-

graph, to the internal revenue officer with whom his income tax return is required to be filed.

(3) Custodian of certain unit investment trusts. The requirements of this paragraph shall not apply to a nominee who is acting as a custodian of the unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7 provided that the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by such nominee as custodian and on or before the 45th day following the close of the company's taxable year, files with the Internal Revenue Service office where the company's income tax return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

(c) Shareholders—(1) Return requirements. The copy B of the Form 2439 furnished to a shareholder by the regulated investment company or by a nominee, as provided in paragraph (a) or (b), respectively, of this section, shall be attached to the return of income made by the shareholder for his taxable year in which the amount of undistributed capital gains is includible in gross income, as provided in paragraph (b)(2) of § 1.852–4.

(2) Credit or refund—(i) In general. The amount of the tax paid by the regulated investment company with respect to the undistributed capital gains required under section 852(b)(3)(D) and paragraph (b)(2) of § 1.852–4 to be included by a shareholder in his computation of long-term capital gains for any taxable year is deemed paid by such shareholder under section 852(b)(3)(D)(ii) and such payment constitutes, for purposes of section 6513(a) (relating to time tax considered paid), an advance payment in like amount of the tax imposed under chapter 1 of the Code for such taxable year. In the case of an overpayment of tax within the meaning of section 6401, see section 6402 and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration) for rules applicable to the treatment of an overpayment of tax and section 6511 and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration) with respect to the limitations applicable to the credit or refund of an overpayment of tax.

(ii) Form to be used. Claim for refund or credit of the tax deemed to have been paid by a shareholder with respect to an amount of undistributed capital gains shall be made on the shareholder's income tax return for the taxable year in which such amount of undistributed capital gains is includable in gross income. In the case of a shareholder which is a partnership, claim shall be made by the partners on their income tax returns for refund or credit of their distributive shares of the tax deemed to have been paid by the partnership. In the case of a shareholder which is exempt from tax under section 501(a) and to which section 511 does not apply for the taxable year, claim for refund of the tax deemed to have been paid by such shareholder on an amount of undistributed capital gains for such year shall be made on Form 843 and copy B of Form 2439 furnished to such shareholder shall be attached to its claim. For other rules applicable to the filing of claims for credit or refund of an overpayment of tax, see § 301.6402–2 of this chapter (Regulations on Procedure and Administration), relating to claims for credit or refund, and § 301.6402–3 of this chapter, relating to special rules applicable to income tax.

(3) Records. The shareholder is required to keep copy C of the Form 2439 furnished for the regulated investment company's taxable years ending after December 31, 1969, and beginning before January 1, 1975, as part of his records to show increases in the adjusted basis of his shares in such company.

(d) Penalties. For criminal penalties for willful failure to file a return, supply information, or pay tax, and for filing a false or fraudulent return, statement, or other document, see sections 7203, 7206, and 7207.

[T.D. 6500, 25 FR 11710, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8755, June 20, 1967; T.D. 7012, 34 FR 7688, May 15, 1969; T.D. 7187, 37 FR 13256, July 6, 1972; T.D. 7332, 39 FR 44217, Dec. 23, 1974; T.D. 7337, 39 FR 44973, Dec. 30, 1974]

§ 1.852–10 Distributions in redemption of interests in unit investment trusts.

(a) *In general.* In computing that part of the excess of its net long-term capital gain over net short-term capital loss on which it must pay a capital gains tax, a regulated investment company is allowed under section 852(b)(3)(A)(ii) a deduction for dividends paid (as defined in section 561) determined with reference to capital gains dividends only. Section 561(b) provides that in determining the deduction for dividends paid, the rules provided in section 562 are applicable. Section 562(c) (relating to preferential dividends) provides that the amount of any distribution shall not be considered as a dividend unless such distribution is pro-rata, with no preference to any share of stock as compared with other shares of the same class except to the extent that the former is entitled to such preference.

(b) *Redemption distributions made by unit investment trust*—(1) *In general.* Where a unit investment trust (as defined in paragraph (c) of this section) liquidates part of its portfolio represented by shares in a management company in order to make a distribution to a holder of an interest in the trust in redemption of part or all of such interest, and by so doing, the trust realizes net long-term capital gain, that portion of the distribution by the trust which is equal to the amount of the net long-term capital gain realized by the trust on the liquidation of the shares in the management company will not be considered a preferential dividend under section 562(c). For example, where the entire amount of net long-term capital gain realized by the trust on such a liquidation is distributed to the redeeming interest holder, the trust will be allowed the entire amount of net long-term capital gain so realized in determining the deduction under section 852(b)(3)(A)(ii) for dividends paid determined with reference to capital gains dividends only. This paragraph and section 852(d) shall apply only with respect to the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) realized by the trust which is attributable to a redemption by a holder of an interest in such trust. Such dividend may be designated as a capital gain dividend by a written notice to the certificate holder. Such designation should clearly indicate to the holder that the holder's gain or loss on the redemption of the certificate may differ from such designated amount, depending upon the holder's basis for the redeemed certificate, and that the holder's own records are to be used in computing the holder's gain or loss on the redemption of the certificate.

(2) *Example.* The application of the provisions of this paragraph may be illustrated by the following example:

Example. B entered into a periodic payment plan contract with X as custodian and Z as plan sponsor under which he purchased a plan certificate of X. Under this contract, upon B's demand, X must redeem B's certificate at a price substantially equal to the value of the number of shares in Y, a management company, which are credited to B's account by X in connection with the unit investment trust. Except for a small amount of cash which X is holding to satisfy liabilities and to invest for other plan certificate holders, all of the assets held by X in connection with the trust consist of shares in Y. Pursuant to the terms of the periodic payment plan contract, 100 shares of Y are credited to B's account. Both X and Y have elected to be treated as regulated investment companies. On March 1, 1965, B notified X that he wished to have his entire interest in the unit investment trust redeemed. In order to redeem B's interest, X caused Y to redeem 100 shares of Y which X held. At the time of redemption, each share of Y had a value of $15. X then distributed the $1,500 to B. X's basis for each of the Y shares which was redeemed was $10. Therefore, X realized a long-term capital gain of $500 ($5 × 100 shares) which is attributable to the redemption by B of his interest in the trust. Under section 852(d), the $500 capital gain distributed to B will not be considered a preferential dividend. Therefore, X is allowed a deduction of $500 under section 852(b)(3)(A)(ii) for dividends paid determined with reference to capital gains dividends only, with the result that X will not pay a capital gains tax with respect to such amount.

(c) *Definition of unit investment trust.* A unit investment trust to which paragraph (a) of this section refers is a business arrangement which—

(1) Is registered under the Investment Company Act of 1940 as a unit investment trust;

(2) Issues periodic payment plan certificates (as defined in such Act);

(3) Possesses, as substantially all of its assets, securities issued by a management company (as defined in such Act);

(4) Qualifies as a regulated investment company under section 851; and

(5) Complies with the requirements provided for by section 852(a).

Paragraph (a) of this section does not apply to a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7.

[T.D. 6921, 32 FR 8755, June 20, 1967, as amended by T.D. 7187, 37 FR 13527, July 6, 1972; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.853–1 Foreign tax credit allowed to shareholders.

(a) *In general.* Under section 853, a regulated investment company, meeting the requirements set forth in section 853(a) and paragraph (b) of this

section, may make an election with respect to the income, war-profits, and excess profits taxes described in section 901(b)(1) which it pays to foreign countries or possessions of the United States during the taxable year, including such taxes as are deemed paid by it under the provisions of any income tax convention to which the United States is a party. If an election is made, the shareholders of the regulated investment company shall apply their proportionate share of such foreign taxes paid, or deemed to have been paid by it pursuant to any income tax convention, as either a credit (under section 901) or as a deduction (under section 164(a)) as provided by section 853(b)(2) and paragraph (b) of § 1.853–2. The election is not applicable with respect to taxes deemed to have been paid under section 902 (relating to the credit allowed to corporate stockholders of a foreign corporation for taxes paid by such foreign corporation).

(b) Requirements. To qualify for the election provided in section 853(a), a regulated investment company (1) must have more than 50 percent of the value of its total assets, at the close of the taxable year for which the election is made, invested in stocks and securities of foreign corporations, and (2) must also, for that year, comply with the requirements prescribed in section 852(a) and paragraph (a) of § 1.852–1. The term "value", for purposes of the first requirement, is defined in section 851(c)(4). For the definition of foreign corporation, see section 7701(a).

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.853–2 Effect of election.

(a) Regulated investment company. A regulated investment company making a valid election with respect to a taxable year under the provisions of section 853(a) is, for such year, denied both the deduction for foreign taxes provided by section 164(a) and the credit for foreign taxes provided by section 901 with respect to all income, war-profits, and excess profits taxes (described in section 901(b)(1)) which it has paid to any foreign country or possession of the United States. See section 853(b)(1)(A). However, under section 853(b)(1)(B), the regulated investment company is permitted to add the amount of such foreign taxes paid to its dividends paid deduction for that taxable year. See paragraph (a) of § 1.852–1.

(b) Shareholder. Under section 853(b)(2), a shareholder of an investment company, which has made the election under section 853, is, in effect, placed in the same position as a person directly owning stock in foreign corporations, in that he must include in his gross income (in addition to taxable dividends actually received) his proportionate share of such foreign taxes paid and must treat such amount as foreign taxes paid by him for the purposes of the deduction under section 164(a) and the credit under section 901. For such purposes he must treat as gross income from a foreign country or possession of the United States (1) his proportionate share of the taxes paid by the regulated investment company to such foreign country or possession and (2) the portion of any dividend paid by the investment company which represents income derived from such sources.

(c) Dividends paid after the close of the taxable year. For additional rules applicable to certain distributions made after the close of the taxable year which may be designated as income received from sources within and taxes paid to foreign countries or possessions of the United States, see section 855(d) and paragraph (f) of § 1.855–1.

(d) Example. This section may be illustrated as follows:

(1) The X Corporation, a regulated investment company, has total assets, at the close of the taxable year, of $10 million invested as follows:

Domestic corporations		$4,000,000
Foreign corporations in:		
Country A	$3,500,000	
Country B	2,500,000	
		6,000,000
Total assets		10,000,000

(2) The dividend income of X Corporation is received from the following sources:

Domestic corporations		$300,000
Foreign corporations:		
Country A	$250,000	
Country B	250,000	
		500,000
Total dividend income		800,000
Operation and management expenses		80,000
Net dividend income		720,000
Taxes withheld by Country B on dividends of $250,000 at a rate of 10 percent	25,000	
Taxes withheld by Country B on dividends of $250,000 at a rate of 20 percent	50,000	
Total foreign taxes withheld		75,000
Income available for distribution		645,000

(3) X Corporation has 250,000 shares of common stock outstanding and distributes the entire $645,000 as a dividend of $2.58 per share of stock.

(4) The X Corporation meets the 50 percent requirement of section 851(b)(4) and the require-

ments of section 852(a). It notifies each shareholder by mail, within the time prescribed by section 853(c), that by reason of the election they are to treat as foreign taxes paid $0.30 per share of stock ($75,000 of foreign taxes paid, divided by the 250,000 shares of stock outstanding), of which $0.20 represents taxes paid to Country B and $0.10 taxes paid to Country A. The shareholders must report as income $2.88 per share ($2.58 of dividends actually received plus the $0.30 representing foreign taxes paid). Of the $2.88 per share, $1.80 per share ($450,000 (which represents such part of the net dividend income of $720,000 as the foreign dividend income of $500,000 bears to the total dividend income of $800,000) divided by 250,000 shares) is to be considered as received from foreign sources. Ninety cents is to be considered as received from Country A, and ninety cents from Country B.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.853–3 Notice to shareholders.

(a) **General rule.** If a regulated investment company makes an election under section 853(a), in the manner provided in § 1.853–4, the investment company is required, under section 853(c), to furnish its shareholders with a written notice mailed not later than 45 days (30 days for taxable years ending before Feb. 26, 1964) after the close of its taxable year. The notice must designate the shareholder's portion of foreign taxes paid to each such country or possession and the portion of the dividend which represents income derived from sources within each such country or possession. For purposes of section 853(b)(2) and paragraph (b) of § 1.853–2, the amount that a shareholder may treat as his proportionate share of foreign taxes paid and the amount to be included as gross income derived from any foreign country or possession of the United States shall not exceed the amounts so designated by the company in such written notice. If, however, the amount designated by the company in the notice exceeds the shareholder's proper proportionate share of foreign taxes or gross income from sources within any foreign country or possession, the shareholder is limited to the amount correctly ascertained.

(b) **Shareholder of record custodian of certain unit investment trusts.** In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (b) of § 1.851–7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts of foreign taxes paid to each such country or possession and the holder's proportionate share of the dividend which represents income derived from sources within each country or possession shown on the notice received by the nominee pursuant to paragraph (a) of this section. The notice shall include the name and address of the nominee identified as such. This paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return for the taxable year is to be filed, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; *provided however,* if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8756, June 20, 1967; T.D. 7187, 37 FR 13257, July 6, 1972]

§ 1.853–4 Manner of making election.

(a) **General rule.** A regulated investment company, to make a valid election under section 853, must—

(1) File with Form 1099 and Form 1096 a statement as part of its return which sets forth the following information:

(i) The total amount of income received from sources within foreign countries and possessions of the United States;

(ii) The total amount of income, war profits, or excess profits taxes (described in section 901(b)(1)) paid, or deemed to have been paid under the provisions of any treaty to which the United States is a party, to such foreign countries or possessions;

(iii) The date, form, and contents of the notice to its shareholders;

(iv) The proportionate share of such taxes paid during the taxable year and foreign income received during such year attributable to one share of stock of the regulated investment company; and

(2) File as part of its return for the taxable year a Form 1118 modified so that it becomes a statement in support of the election made by a regulated investment company for taxes paid to a foreign country or a possession of the United States.

(b) Irrevocability of the election. The election is applicable only with respect to taxable years subject to the Code, shall be made with respect to all such foreign taxes, and must be made not later than the time prescribed for filing the return (including extensions thereof). Such election, if made, shall be irrevocable with respect to the dividend (or portion thereof), and the foreign taxes paid with respect thereto, to which the election applies.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.854–1 Limitations applicable to dividends received from regulated investment company.

(a) In general. Section 854 provides special limitations applicable to dividends received from a regulated investment company for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporations, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34.

(b) Capital gain dividend. Under the provisions of section 854(a) a capital gain dividend as defined in section 852(b)(3) and paragraph (c) of § 1.852–4 shall not be considered a dividend for purposes of the exclusion under section 116, the deduction under section 243, and, in the case of taxable years ending before January 1, 1965, the credit under section 34.

(c) Rule for dividends other than capital gain dividends. (1) Section 854(b)(1) limits the amount that may be treated as a dividend (other than a capital gain dividend) by the shareholder of a regulated investment company, for the purposes of the credit, exclusion, and deduction specified in paragraph (b) of this section, where the investment company receives substantial amounts of income (such as interest, etc.) from sources other than dividends from domestic corporations, which dividends qualify for the exclusion under section 116.

(2) Where the "aggregate dividends received" (as defined in section 854(b)(3)(B) and paragraph (b) of § 1.854–3) during the taxable year by a regulated investment company (which meets the requirements of section 852(a) and paragraph (a) of § 1.852–1 for the taxable year during which it paid such dividend) are less than 75 percent of its gross income for such taxable year (as defined in section 854(b)(3)(A) and paragraph (a) of § 1.854–3), only that portion of the dividend paid by the regulated investment company which bears the same ratio to the amount of such dividend paid as the aggregate dividends received by the regulated investment company, during the taxable year, bears to its gross income for such taxable year (computed without regard to gains from the sale or other disposition of stocks or securities) may be treated as a dividend for purposes of such credit, exclusion, and deduction.

(3) Subparagraph (2) of this paragraph may be illustrated by the following example:

Example. The XYZ regulated investment company meets the requirements of section 852(a) for the taxable year and has received income from the following sources:

Capital gains (from the sale of stock or securities)	$100,000
Dividends (from domestic sources other than dividends described in section 116(b))	70,000
Dividend (from foreign corporations)	5,000
Interest	25,000
Total	200,000
Expenses	20,000
Taxable income	180,000

The regulated investment company decides to distribute the entire $180,000. It distributes a capital gain dividend of $100,000 and a dividend of ordinary income of $80,000. The aggregate dividends received by the regulated investment company from domestic corporations ($70,000) is less than 75 percent of its gross income ($100,000) computed without regard to capital gains from sales of securities. Therefore, an apportionment is required. Since $70,000 is 70 percent of $100,000, out of every $1 dividend of ordinary income paid by the regulated investment company only 70 cents would be available for the credit, exclusion, or deduction referred to in section 854(b)(1). The capital gains dividend and the dividend received from foreign corporations are excluded from the computation.

(d) Dividends received from a regulated investment company during taxable years of sharehold-

ers ending after July 31, 1954, and subject to the Internal Revenue Code of 1939. For the application of section 854 to taxable years of shareholders of a regulated investment company ending after July 31, 1954, and subject to the Internal Revenue Code of 1939, see § 1.34–5 and § 1.116–2.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8756, June 20, 1967]

§ 1.854–2 Notice to shareholders.

(a) **General rule.** Section 854(b)(2) provides that the amount that a shareholder may treat as a dividend for purposes of the exclusion under section 116 for dividends received by individuals, the deduction under section 243 for dividends received by corporation, and, in the case of dividends received by individuals before January 1, 1965, the credit under section 34, shall not exceed the amount so designated by the company in a written notice to its shareholders mailed not later than 45 days (30 days for a taxable year ending before Feb. 26, 1964) after the close of the company's taxable year. If, however, the amount so designated by the company in the notice exceeds the amount which may be treated by the shareholder as a dividend for such purposes, the shareholder is limited to the amount as correctly ascertained under section 854(b)(1) and paragraph (c) of § 1.854–1.

(b) **Shareholder of record custodian of certain unit investment trusts.** In any case where a notice is mailed pursuant to paragraph (a) of this section by a regulated investment company with respect to a taxable year of the regulated investment company ending after December 8, 1970 to a shareholder of record who is a nominee acting as a custodian of a unit investment trust described in section 851(f)(1) and paragraph (d) of § 1.851–7, the nominee shall furnish each holder of an interest in such trust with a written notice mailed on or before the 55th day following the close of the regulated investment company's taxable year. The notice shall designate the holder's proportionate share of the amounts that may be treated as a dividend for purposes of the exclusion under section 116 for dividends received by individuals and the deduction under section 243 for dividends received by corporations shown on the notice received by the nominee pursuant to paragraph (a) of this section. This notice shall include the name and address of the nominee identified as such. This paragraph shall not apply if the regulated investment company agrees with the nominee to satisfy the notice requirements of paragraph (a) of this section with respect to each holder of an interest in the unit investment trust whose shares are being held by the nominee as custodian and not later than 45 days following the close of the company's taxable year, files with the Internal Revenue Service office where such company's return is to be filed for the taxable year, a statement that the holders of the unit investment trust with whom the agreement was made have been directly notified by the regulated investment company. Such statement shall include the name, sponsor, and custodian of each unit investment trust whose holders have been directly notified. The nominee's requirements under this paragraph shall be deemed met if the regulated investment company transmits a copy of such statement to the nominee within such 45-day period; provided however, if the regulated investment company fails or is unable to satisfy the requirements of this paragraph with respect to the holders of interest in the unit investment trust, it shall so notify the Internal Revenue Service within 45 days following the close of its taxable year. The custodian shall, upon notice by the Internal Revenue Service that the regulated investment company has failed to comply with the agreement, satisfy the requirements of this paragraph within 30 days of such notice.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8757, June 20, 1967; T.D. 7187, 37 FR 13257, July 6, 1972]

§ 1.854–3 Definitions.

(a) For the purpose of computing the limitation prescribed by section 854(b)(1)(B) and paragraph (c) of § 1.854–1, the term "gross income" does not include gain from the sale or other disposition of stock or securities. However, capital gains arising from the sale or other disposition of capital assets, other than stock or securities, shall not be excluded from gross income for this purpose.

(b) The term "aggregate dividends received" includes only dividends received from domestic corporations other than dividends described in section 116(b) (relating to dividends not eligible for exclusion from gross income). Accordingly, dividends received from foreign corporations will not be included in the computation of "aggregate dividends received". In determining the amount of any dividend for purposes of this section, the rules provided in section 116(c) (relating to certain distributions) shall apply.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960]

§ 1.855–1 Dividends paid by regulated investment company after close of taxable year.

(a) **General rule.** In—

(1) Determining under section 852(a) and paragraph (a) of § 1.852–1 whether the deduction for dividends paid during the taxable year (without regard to capital gain dividends) by a regulated investment company equals or exceeds 90 percent of its investment company taxable income (determined without regard to the provisions of section 852(b)(2)(D)),

(2) Computing its investment company taxable income (under section 852(b)(2) and § 1.852–3), and

(3) Determining the amount of capital gain dividends (as defined in section 852(b)(3) and paragraph (c) of § 1.852–4) paid during the taxable year, any dividend (or portion thereof) declared by the investment company either before or after the close of the taxable year but in any event before the time prescribed by law for the filing of its return for the taxable year (including the period of any extension of time granted for filing such return) shall, to the extent the company so elects in such return, be treated as having been paid during such taxable year. This rule is applicable only if the entire amount of such dividend is actually distributed to the shareholders in the 12-month period following the close of such taxable year and not later than the date of the first regular dividend payment made after such declaration.

(b) Election—(1) *Method of making election.* The election must be made in the return filed by the company for the taxable year. The election shall be made by the taxpayer (the regulated investment company) by treating the dividend (or portion thereof) to which such election applies as a dividend paid during the taxable year in computing its investment company taxable income, or if the dividend (or portion thereof) to which such election applies is to be designated by the company as a capital gain dividend, in computing the amount of capital gain dividends paid during such taxable year. The election provided in section 855(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of section 852(c) and § 1.852–5) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year (not including distributions with respect to which an election has been made for a prior year under section 855(a)). The dividend or portion thereof, with respect to which the regulated investment company has made a valid election under section 855(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(2) *Irrevocability of the election.* After the expiration of the time for filing the return for the taxable year for which an election is made under section 855(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) Receipt by shareholders. Under section 855(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includible in the gross income of the shareholders of the regulated investment company for the taxable year in which the dividend is received by them.

(d) Examples. The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example (1). The X Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of $100,000. During that year the company distributed to shareholders taxable dividends aggregating $88,000. On March 10, 1955, the company declared a dividend of $37,000 payable to shareholders on March 20, 1955. Such dividend consisted of the first regular quarterly dividend for 1955 of $25,000 plus an additional $12,000 representing that part of the taxable income for 1954 which was not distributed in 1954. On March 15, 1955, the X Company filed its federal income tax return and elected therein to treat $12,000 of the total dividend of $37,000 to be paid to shareholders on March 20, 1955, as having been paid during the taxable year 1954. Assuming that the X Company actually distributed the entire amount of the dividend of $37,000 on March 20, 1955, an amount equal to $12,000 thereof will be treated for the purposes of section 852(a) as having been paid during the taxable year 1954. Such amount ($12,000) will be considered by the X Company as a distribution out of the earnings and profits for the taxable year 1954, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them.

Example (2). The Y Company, a regulated investment company, had taxable income (and earnings or profits) for the calendar year 1954 of $100,000, and for 1955 taxable income (and earnings or profits) of $125,000. On January 1, 1954, the company had a deficit in its earnings and profits accumulated since February 28, 1913, of $115,000. During the year 1954 the company distributed to shareholders taxable dividends aggregating $85,000. On March 5, 1955, the company declared a dividend of $65,000 payable to shareholders on March 31, 1955. On March 15, 1955, the Y Company filed its federal income tax return in which it included $40,000 of the total dividend of $65,000 payable to shareholders on March 31, 1955, as a dividend paid by it during the taxable year 1954. On March 31, 1955, the Y Company distributed the entire amount of the dividend of $65,000 declared on March 5, 1955. The election under section 855(a) is valid only to the extent of $15,000, the amount of the undistributed earnings and profits for 1954 ($100,000 earnings and profits less $85,000 distributed during 1954). The remainder ($50,000) of the $65,000 dividend paid on March 31, 1955, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Company out of earnings and profits for the taxable year

1955. Assuming that the only other distribution by the Y Company during 1955 was a distribution of $75,000 paid as a dividend on October 31, 1955, the total amount of the distribution of $65,000 paid on March 31, 1955, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Company will treat the amount of $15,000 as a distribution of the earnings or profits of the company for the taxable year 1954, and the remaining $50,000 as a distribution of the earnings or profits for the year 1955. The distribution of $75,000 on October 31, 1955, is, of course, a taxable dividend out of the earnings and profits for the year 1955.

(e) **Notice to shareholders.** Section 855(c) provides that in the case of dividends, with respect to which a regulated investment company has made an election under section 855(a), any notice to shareholders required under subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. Thus, the notice requirements of section 852(b)(3)(C) and paragraph (c) of § 1.852–4 with respect to capital gain dividends, section 853(c) and § 1.853–3 with respect to allowance to shareholder of foreign tax credit, and section 854(b)(2) and § 1.854–2 with respect to the amount of a distribution which may be treated as a dividend, may be satisfied with respect to amounts to which section 855(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 45 days (30 days for a taxable year ending before February 26, 1964) after the close of the taxable year in which the distribution is made. If the notice under section 855(c) relates to an election with respect to any capital gain dividends, such capital gain dividends shall be aggregated by the investment company with the designated capital gain dividends actually paid during the taxable year to which the election applies (not including such dividends with respect to which an election has been made for a prior year under section 855) for the purpose of determining whether the aggregate of the designated capital gain dividends with respect to such taxable year of the company is greater than the excess of the net long-term capital gain over the net short-term capital loss of the company. See section 852(b)(3)(C) and paragraph (c) of § 1.852–4.

(f) **Foreign tax election.** Section 855(d) provides that in the case of an election made under section 853 (relating to foreign taxes), the shareholder of the investment company shall consider the foreign income received, and the foreign tax paid, as received and paid, respectively, in the shareholder's taxable year in which distribution is made.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 6921, 32 FR 8757, June 20, 1967]

Real Estate Investment Trusts

§ 1.856–0 Revenue Act of 1978 amendments not included.

The regulations under part II of subchapter M of the Code do not reflect the amendments made by the Revenue Act of 1978, other than the changes made by section 362 of the Act, relating to deficiency dividends.

[T.D. 7767, 46 FR 11265, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.856–1 Definition of real estate investment trust.

(a) **In general.** The term "real estate investment trust" means a corporation, trust, or association which (1) meets the status conditions in section 856(a) and paragraph (b) of this section, and (2) satisfies the gross income and asset diversification requirements under the limitations of section 856(c) and § 1.856–2. (See, however, paragraph (f) of this section, relating to the requirement that, for taxable years beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association).

(b) **Qualifying conditions.** To qualify as a "real estate investment trust", an organization must be one—

(1) Which is managed by one or more trustees or directors,

(2) The beneficial ownership of which is evidenced by transferable shares or by transferable certificates of beneficial interest,

(3) Which would be taxable as a domestic corporation but for the provisions of part II, subchapter M, chapter 1 of the Code,

(4) Which, in the case of a taxable year beginning before October 5, 1976, does not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business,

(5) Which is neither (i) a financial institution to which section 585, 586, or 593 applies, nor (ii) an insurance company to which subchapter L applies,

(6) The beneficial ownership of which is held by 100 or more persons, and

(7) Which would not be a personal holding company (as defined in section 542) if all of its gross income constituted personal holding company income (as defined in section 543).

(c) Determination of status. The conditions described in subparagraphs (1) through (5) of paragraph (b) of this section must be met during the entire taxable year and the condition described in subparagraph (6) of paragraph (b) of this section must exist during at least 335 days of a taxable year of 12 months or during a proportionate part of a taxable year of less than 12 months. The days during which the latter condition must exist need not be consecutive. In determining the minimum number of days during which the condition described in paragraph (b)(6) of this section is required to exist in a taxable year of less than 12 months, fractional days shall be disregarded. For example, in a taxable year of 310 days, the actual number of days prescribed would be $284^{38}/_{73}$ days ($^{310}/_{365}$ of 335). The fractional day is disregarded so that the required condition in such taxable year need exist for only 284 days.

(d) Rules applicable to status requirements. For purposes of determining whether an organization meets the conditions and requirements in section 856(a), the following rules shall apply.

(1) Trustee. The term "trustee" means a person who holds legal title to the property of the real estate investment trust, and has such rights and powers as will meet the requirement of "centralization of management" under paragraph (c) of § 301.7701–2 of this chapter (Regulations on Procedure and Administration). Thus, the trustee must have continuing exclusive authority over the management of the trust, the conduct of its affairs, and (except as limited by section 856(d)(3) and § 1.856–4) the management and disposition of the trust property. For example, such authority will be considered to exist even though the trust instrument grants to the shareholders any or all of the following rights and powers: To elect or remove trustees; to terminate the trust; and to ratify amendments to the trust instrument proposed by the trustee. The existence of a mere fiduciary relationship does not, in itself, make one a trustee for purposes of section 856(a)(1). The trustee will be considered to hold legal title to the property of the trust, for purposes of this subparagraph, whether the title is held in the name of the trust itself, in the name of one or more of the trustees, or in the name of a nominee for the exclusive benefit of the trust.

(2) Beneficial ownership. Beneficial ownership shall be evidenced by transferable shares, or by transferable certificates of beneficial interest, and (subject to the provisions of paragraph (c) of this section) must be held by 100 or more persons, determined without reference to any rules of attribution. Provisions in the trust instrument or corporate charter or bylaws which permit the trustee or directors to redeem shares or to refuse to transfer shares in any case where the trustee or directors, in good faith, believe that a failure to redeem shares or that a transfer of shares would result in the loss of status as a real estate investment trust will not render the shares "nontransferable." For purposes of the regulations under part II of subchapter M, the terms "stockholder," "stockholders," "shareholder," and "shareholders" include holders of beneficial interest in a real estate investment trust, the terms "stock," "shares," and "shares of stock" include certificates of beneficial interest and the term "shares" includes shares of stock.

(3) Unincorporated organization taxable as a domestic corporation. The determination of whether an unincorporated organization would be taxable as a domestic corporation, in the absence of the provisions of part II of subchapter M, shall be made in accordance with the provisions of section 7701(a)(3) and (4) and the regulations thereunder and for such purposes an otherwise qualified real estate investment trust is deemed to satisfy the "objective to carry on business" requirement of paragraph (a) of § 301.7701–2 of this chapter. (Regulations on Procedure and Administration).

(4) Property held for sale to customers. In the case of a taxable year beginning before October 5, 1976, a real estate investment trust may not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business. Whether property is held for sale to customers in the ordinary course of the trade or business of a real estate investment trust depends upon the facts and circumstances in each case.

(5) Personal holding company. A corporation, trust, or association, even though it may otherwise meet the requirements of part II of subchapter M, will not be a real estate investment trust if, by considering all of its gross income as personal

holding company income under section 543, it would be a personal holding company as defined in section 542. Thus, if at any time during the last half of the trust's taxable year more than 50 percent in value of its outstanding stock is owned (directly or indirectly under the provisions of section 544) by or for not more than 5 individuals, the stock ownership requirement in section 542(a)(2) will be met and the trust would be a personal holding company. See § 1.857–8, relating to record requirements for purposes of determining whether the trust is a personal holding company.

(e) **Other rules applicable.** To the extent that other provisions of chapter 1 of the Code are not inconsistent with those under part II of subchapter M there of and the regulations thereunder, such provisions will apply with respect to both the real estate investment trust and its shareholders in the same manner that they would apply to any other organization which would be taxable as a domestic corporation. For example:

(1) Taxable income of a real estate investment trust is computed in the same manner as that of a domestic corporation;

(2) Section 301, relating to distributions of property, applies to distributions by a real estate investment trust in the same manner as it would apply to a domestic corporation;

(3) Sections 302, 303, 304, and 331 are applicable in determining whether distributions by a real estate investment trust are to be treated as in exchange for stock;

(4) Section 305 applies to distributions by a real estate investment trust of its own stock;

(5) Section 311 applies to distributions by a real estate investment trust;

(6) Except as provided in section 857(d), earnings and profits of a real estate investment trust are computed in the same manner as in the case of a domestic corporation;

(7) Section 316, relating to the definition of a dividend, applies to distributions by a real estate investment trust; and

(8) Section 341, relating to collapsible corporations, applies to gain on the sale or exchange of, or a distribution which is in exchange for, stock in a real estate investment trust in the same manner that it would apply to a domestic corporation.

(f) **Unincorporated status required for certain taxable years.** In the case of a taxable year beginning before October 5, 1976, a real estate investment trust must be an unincorporated trust or unincorporated association. Accordingly, in applying the regulations under part II of subchapter M of the Code with respect to such a taxable year, the term "an unincorporated trust or unincorporated association" is to be substituted for the term "a corporation, trust, or association" each place it appears, and the references to "directors" and "corporate charter or bylaws" are to be disregarded.

[T.D. 6598, 27 FR 4082, April 28, 1962, as amended by T.D. 6928, 32 FR 13221, Sept. 19, 1967; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.856–2 Limitations.

(a) **Effective date.** The provisions of part II, subchapter M, chapter 1 of the Code, and the regulations thereunder apply only to taxable years of a real estate investment trust beginning after December 31, 1960.

(b) **Election.** Under the provisions of section 856(c)(1), a trust, even though it satisfies the other requirements of part II of subchapter M for the taxable year, will not be considered a "real estate investment trust" for such year, within the meaning of such part II, unless it elects to be a real estate investment trust for such taxable year, or has made such an election for a previous taxable year which has not been terminated or revoked under section 856(g)(1) or (2). The election shall be made by the trust by computing taxable income as a real estate investment trust in its return for the first taxable year for which it desires the election to apply, even though it may have otherwise qualified as a real estate investment trust for a prior year. No other method of making such election is permitted. An election cannot be revoked with respect to a taxable year beginning before October 5, 1976. Thus, the failure of an organization to be a qualified real estate investment trust for a taxable year beginning before October 5, 1976, does not have the effect of revoking a prior election by the organization to be a real estate investment trust, even though the organization is not taxable under part II of subchapter M for such taxable year. See section 856(g) and § 1.856–8 for rules under which an election may be revoked with respect to taxable years beginning after October 4, 1976.

(c) **Gross income requirements.** Section 856(c)(2), (3), and (4), provides that a corporation, trust, or association is not a "real estate investment trust" for a taxable year unless it meets certain requirements with respect to the sources of

its gross income for the taxable year. In determining whether the gross income of a real estate investment trust satisfies the percentage requirements of section 856(c)(2), (3), and (4), the following rules shall apply:

(1) Gross income. For purposes of both the numerator and denominator in the computation of the specified percentages, the term "gross income" has the same meaning as that term has under section 61 and the regulations thereunder. Thus, in determining the gross income requirements under section 856(c)(2), (3), and (4), a loss from the sale or other disposition of stock, securities, real property, etc. does not enter into the computation.

(2) Lapse of options. Under section 856(c)(6)(C), the term "interests in real property" includes options to acquire land or improvements thereon, and options to acquire leaseholds of land and improvements thereon. However, where a corporation, trust, or association writes an option giving the holder the right to acquire land or improvements thereon, or writes an option giving the holder the right to acquire a leasehold of land or improvements thereon, any income that the corporation, trust, or association recognizes because the option expires unexercised is not considered to be gain from the sale or other disposition of real property (including interests in real property) for purposes of section 856(c)(2)(D) and (3)(C). The rule in the preceding sentence also applies for purposes of section 856(c)(4)(C) in determining gain from the sale or other disposition of real property for the 30-percent-of-gross-income limitation.

(3) Commitment fees. For purposes of section 856(c)(2)(G) and (3)(G), if consideration is received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property, or for an agreement to purchase or lease both real property and other property, an apportionment of the consideration is required. The apportionment of consideration received or accrued for an agreement to make a loan secured by a mortgage covering both real property and other property shall be made under the principles of § 1.856–5(c), relating to the apportionment of interest income.

(4) Holding period of property. For purposes of the 30-percent limitation of section 856(c)(4), the determination of the period for which property described in such section has been held is governed by the provisions of section 1223 and the regulations thereunder.

(5) Rents from real property and interest. See §§ 1.856–4 and 1.856–5 for rules relating to rents from real property and interest.

(d) Diversification of investment requirements —(1) 75-percent test. Section 856(c)(5)(A) requires that at the close of each quarter of the taxable year at least 75 percent of the value of the total assets of the trust be represented by one or more of the following:

(i) Real estate assets;

(ii) Government securities; and

(iii) Cash and cash items (including receivables).

For purposes of this subparagraph the term "receivables" means only those receivables which arise in the ordinary course of the trust's operation and does not include receivables purchased from another person. Subject to the limitations in section 856(c)(5)(B) and subparagraph (2) of this paragraph, the character of the remaining 25 percent (or less) of the value of the total assets is not restricted.

(2) Limitations on certain securities. Under section 856(c)(5)(B), not more than 25 percent of the value of the total assets of the trust may be represented by securities other than those described in section 856(c)(5)(A). The ownership of securities under the 25-percent limitation in section 856(c)(5)(B) is further limited in respect of any one issuer to an amount not greater in value than 5 percent of the value of the total assets of the trust and to not more than 10 percent of the outstanding voting securities of such issuer. Thus, if the real estate investment trust meets the 75-percent asset diversification requirement in section 856(c)(5)(A), it will also meet the first test under section 856(c)(5)(B) since it will, of necessity, have not more than 25 percent of its total assets represented by securities other than those described in section 856(c)(5)(A). However, the trust must also meet two additional tests under section 856(c)(5)(B), i.e. it cannot own the securities of any one issuer in an amount (i) greater in value than 5 percent of the value of the trust's total assets, or (ii) representing more than 10 percent of the outstanding voting securities of such issuer.

(3) Determination of investment status. The term "total assets" means the gross assets of the trust determined in accordance with generally accepted accounting principles. In order to determine the effect, if any, which an acquisition of any security or other property may have with respect to the status of a trust as a real estate investment

trust, section 856(c)(5) requires a revaluation of the trust's assets at the end of the quarter in which such acquisition was made. A revaluation of assets is not required at the end of any quarter during which there has been no acquisition of a security or other property since the mere change in market value of property held by the trust does not, of itself, affect the status of the trust as a real estate investment trust. A change in the nature of "cash items", for example, the prepayment of insurance or taxes, does not constitute the acquisition of "other property" for purposes of this subparagraph. A real estate investment trust shall keep sufficient records as to investments so as to be able to show that it has complied with the provisions of section 856(c)(5) during the taxable year. Such records shall be kept at all times available for inspection by any internal revenue officer or employee and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(4) Illustrations. The application of section 856(c)(5) and this paragraph may be illustrated by the following examples:

Example (1). Real Estate Investment Trust M, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	6
Government securities	7
Real estate assets	63
Securities of various corporations (not exceeding, with respect to any one issuer, 5 percent of the value of the total assets of the trust nor 10 percent of the outstanding voting securities of such issuer)	24
Total	100

Trust M meets the requirements of section 856(c)(5) for that quarter of its taxable year.

Example (2). Real Estate Investment Trust P, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	6
Government securities	7
Real estate assets	63
Securities of Corporation Z	20
Securities of Corporation X	4
Total	100

Trust P meets the requirement of section 856(c)(5)(A) since at least 75 percent of the value of the total assets is represented by cash, Government securities, and real estate assets. However, Trust P does not meet the diversification requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation Z exceeds 5 percent of the value of the trust's total assets.

Example (3). Real Estate Investment Trust G, at the close of the first quarter of its taxable year, has its assets invested as follows:

	Percent
Cash	4
Government securities	9
Real estate assets	70
Securities of Corporation S	5
Securities of Corporation L	4
Securities of Corporation U	4
Securities of Corporation M (which equals 25 percent of Corporation M's outstanding voting securities)	4
Total	100

Trust G meets the 75-percent requirement of section 856(c)(5)(A), but does not meet the requirements of section 856(c)(5)(B) because its investment in the voting securities of Corporation M exceeds 10 percent of Corporation M's outstanding voting securities.

Example (4). Real Estate Investment Trust R, at the close of the first quarter of its taxable year (i.e. calendar year), is a qualified real estate investment trust and has its assets invested as follows:

Cash	$5,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities of Corporation P	4,000
Securities of Corporation O	5,000
Securities of Corporation U	5,000
Securities of Corporation T	5,000
Total assets	100,000

During the second calendar quarter the stock in Corporation P increases in value to $50,000 while the value of the remaining assets has not changed. If Real Estate Investment Trust R has made no acquisition of stock or other property during such second quarter it will not lose its status as a real estate investment trust merely by reason of the appreciation in the value of P's stock. If, during the third quarter, Trust R acquires stock of Corporation S worth $2,000, such acquisition will necessitate a revaluation of all of the assets of Trust R as follows:

Cash	$3,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	50,000
Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	2,000
Total assets	146,000

Because of the discrepancy between the value of its various investments and the 25-percent limitation in section 856(c)(5), resulting in part from the acquisition of the stock of Corporation S, Trust R, at the end of the third quarter, loses its status as a real estate investment trust. However, if Trust R, within 30 days after the close of such quarter, eliminates the discrepancy so that it meets the 25-percent limitation, the trust will be considered to have met the requirements of section 856(c)(5) at the close of the third quarter, even though the discrepancy between the value of its investment in Corporation P and the 5-percent limitation in section 856(c)(5) (resulting solely from

appreciation) may still exist. If instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P, then because of the discrepancy between the value of its investments and both the 5-percent and the 25-percent limitations in section 856(c)(5) resulting in part from this acquisition, trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter both of the discrepancies are eliminated.

Example (5). If, in the previous example, the stock of Corporation P appreciates only to $10,000 during the second quarter and, in the third quarter, Trust R acquires stock of Corporation S worth $1,000, the assets as of the end of the third quarter would be as follows:

Cash	$4,000
Government securities	4,000
Receivables	4,000
Real estate assets	68,000
Securities in Corporation P	10,000
Securities in Corporation O	5,000
Securities in Corporation U	5,000
Securities in Corporation T	5,000
Securities in Corporation S	1,000
Total assets	106,000

Because the discrepancy between the value of its investment in Corporation P and the 6-percent limitation in section 856(c)(5) results solely from appreciation, and because there is no discrepancy between the value of its various investments and the 25-percent limitation, Trust R, at the end of the third quarter, does not lose its status as a real estate investment trust. If, instead of acquiring stock of Corporation S, Trust R had acquired additional stock of Corporation P worth $1,000, then, because of the discrepancy between the value of its investment in Corporation P and the 5-percent limitation resulting in part from this acquisition, Trust R, at the end of the third quarter, would lose its status as a real estate investment trust, unless within 30 days after the close of such quarter this discrepancy is eliminated.

[T.D. 6598, 27 FR 4083, April 28, 1962, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.856–3 Definitions.

For purposes of the regulations under part II, subchapter M, chapter 1 of the Code, the following definitions shall apply.

(a) Value. The term "value" means, with respect to securities for which market quotations are readily available, the market value of such securities; and with respect to other securities and assets, fair value as determined in good faith by the trustees of the real estate investment trust. In the case of securities of other qualified real estate investment trusts, fair value shall not exceed market value or asset value, whichever is higher.

(b) Real estate assets. The term "real estate assets" means real property, interests in mortgages on real property (including interests in mortgages on leaseholds of land or improvements thereon), and shares in other qualified real estate investment trusts. The term "mortgages on real property" includes deeds of trust on real property.

(c) **Interests in real property.** The term "interests in real property" includes fee ownership and co-ownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term does not, however, include mineral, oil, or gas royalty interests, as, for example, a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term "interests in real property" also includes options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(d) Real property. The term "real property" means land or improvements thereon, such as buildings or other inherently permanent structures thereon (including items which are structural components of such buildings or structures). In addition, the term "real property" includes interests in real property. Local law definitions will not be controlling for purposes of determining the meaning of the term "real property" as used in section 856 and the regulations thereunder. The term includes, for example, the wiring in a building, plumbing systems, central heating, or central air-conditioning machinery, pipes or ducts, elevators or escalators installed in the building, or other items which are structural components of a building or other permanent structure. The term does not include assets accessory to the operation of a business, such as machinery, printing press, transportation equipment which is not a structural component of the building, office equipment, refrigerators, individual air-conditioning units, grocery counters, furnishings of a motel, hotel, or office building, etc., even though such items may be termed fixtures under local law.

(e) **Securities.** The term "securities" does not include "interests in real property" or "real estate assets" as those terms are defined in section 856 and this section.

(f) **Qualified real estate investment trusts.** The term "qualified real estate investment trust" means a real estate investment trust within the meaning of part II of subchapter M which is taxable under such part as a real estate investment trust. For purposes of the 75-percent requirement in section 856(c)(5)(A), the trust whose stock has been included by another trust as "real estate assets" must be a "qualified real estate investment trust" for its full taxable year in which falls the close of each quarter of the trust's taxable year for which the computation is made. For example, Real

Estate Investment Trust Z for its taxable year ending December 31, 1963, holds as "real estate assets" stock in Real Estate Investment Trust Y, which is also on a calendar year. If Trust Y is not a qualified real estate investment trust for its full taxable year ending December 31, 1963, Trust Z may not include the stock of Trust Y as "real estate assets" in computing the 75-percent requirement as of the close of any quarter of its taxable year ending December 31, 1963.

(g) Partnership interest. In the case of a real estate investment trust which is a partner in a partnership, as defined in section 7701(a)(2) and the regulations thereunder, the trust will be deemed to own its proportionate share of each of the assets of the partnership and will be deemed to be entitled to the income of the partnership attributable to such share. For purposes of section 856, the interest of a partner in the partnership's assets shall be determined in accordance with his capital interest in the partnership. The character of the various assets in the hands of the partnership and items of gross income of the partnership shall retain the same character in the hands of the partners for all purposes of section 856. Thus, for example, if the trust owns a 30-percent capital interest in a partnership which owns a piece of rental property the trust will be treated as owning 30 percent of such property and as being entitled to 30 percent of the rent derived from the property by the partnership. Similarly, if the partnership holds any property primarily for sale to customers in the ordinary course of its trade or business, the trust will be treated as holding its proportionate share of such property primarily for such purpose. Also, for example, where a partnership sells real property or a trust sells its interest in a partnership which owns real property, any gross income realized from such sale, to the extent that it is attributable to the real property, shall be deemed gross income from the sale or disposition of real property held for either the period that the partnership has held the real property of the period that the trust was a member of the partnership, whichever is the shorter.

(h) Net capital gain. The term "net capital gain" means the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for the taxable year.

[T.D. 6598, 27 FR 4084, April 28, 1962, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 7767, 46 FR 11266, Feb. 6, 1981]

§ 1.856–4 Rents from real property.

(a) In general. Subject to the exceptions of section 856(d) and paragraph (b) of this section, the term "rents from real property" means, generally, the gross amounts received for the use of, or the right to use, real property of the real estate investment trust.

(b) Amounts specifically included or excluded—(1) Charges for customary services. For taxable years beginning after October 4, 1976, the term "rents from real property", for purposes of paragraphs (2) and (3) of section 856(c), includes charges for services customarily furnished or rendered in connection with the rental of real property, whether or not the charges are separately stated. Services furnished to the tenants of a particular building will be considered as customary if, in the geographic market in which the building is located, tenants in buildings which are of a similar class (such as luxury apartment buildings) are customarily provided with the service. The furnishing of water, heat, light, and air-conditioning, the cleaning of windows, public entrances, exits, and lobbies, the performance of general maintenance and of janitorial and cleaning services, the collection of trash, and the furnishing of elevator services, telephone answering services, incidental storage space, laundry equipment, watchman or guard services, parking facilities, and swimming pool facilities are examples of services which are customarily furnished to the tenants of a particular class of buildings in many geographic marketing areas. Where it is customary, in a particular geographic marketing area, to furnish electricity or other utilities to tenants in buildings of a particular class, the submetering of such utilities to tenants in such buildings will be considered a customary service. To qualify as a service customarily furnished, the service must be furnished or rendered to the tenants of the real estate investment trust or, primarily for the convenience or benefit of the tenant, to the guests, customers, or subtenants of the tenant. The service must be furnished through an independent contractor from whom the trust does not derive or receive any income. See paragraph (b)(5) of this section. For taxable years beginning before October 5, 1976, the rules in paragraph (b)(3) of 26 CFR 1.856–4 (revised as of April 1, 1977), relating to the furnishing of services, shall continue to apply.

(2) Amounts received with respect to certain personal property—(i) In general. In the case of taxable years beginning after October 4, 1976, rent attributable to personal property that is leased under, or in connection with, the lease of real property is treated under section 856(d)(1)(C) as

"rents from real property" (and thus qualified for purposes of the income source requirements) if the rent attributable to the personal property is not more than 15 percent of the total rent received or accrued under the lease for the taxable year. If, however, the rent attributable to personal property is greater than 15 percent of the total rent received or accrued under the lease for the taxable year, then the portion of the rent from the lease that is attributable to personal property will not qualify as "rents from real property".

(ii) Application. In general, the 15 percent test in section 856(d)(1)(C) is applied separately to each lease of real property. However, where the real estate investment trust rents all (or a portion of all) the units in a multiple unit project under substantially similar leases (such as the leasing of apartments in an apartment building or complex to individual tenants), the 15 percent test may be applied with respect to the aggregate rent received or accrued for the taxable year under the similar leases of the property, by using the average of the trust's aggregate adjusted bases of all of the personal property subject to such leases, and the average of the trust's aggregate adjusted bases of all real and personal property subject to such leases. A lease of a furnished apartment is not considered to be substantially similar to a lease of an unfurnished apartment (including an apartment where the trust provides only personal property, such as major appliances, that is commonly provided by a landlord in connection with the rental of unfurnished living quarters).

(iii) Taxable years beginning before October 5, 1976. In the case of taxable years beginning before October 5, 1976, any amount of rent that is attributable to personal property does not qualify as rent from real property.

(3) Disqualification of rent which depends on income or profits of any person. Except as provided in paragraph (b)(6)(ii) of this section, no amount received or accrued, directly or indirectly, with respect to any real property (or personal property leased under, or in connection with, real property) qualifies as "rents from real property" where the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. However, any amount so accrued or received shall not be excluded from the term "rents from real property" solely by reason of being based on a fixed percentage or percentages of receipts or sales (whether or not receipts or sales are adjusted for returned merchandise, or Federal, State, or local sales taxes). Thus, for example, "rents from real property" would include rents where the lease provides for differing percentages or receipts or sales from different departments or from separate floors of a retail store so long as each percentage is fixed at the time of entering into the lease and a change in such percentage is not renegotiated during the term of the lease (including any renewal periods of the lease), in a manner which has the effect of basing the rent on income of profits. See paragraph (b)(6) of this section for rules relating to certain amounts received or accrued by a trust which are considered to be based on the income or profits of a sublessee of the prime tenant. The amount received or accrued as rent for the taxable year which is based on a fixed percentage or percentages of the lessee's receipts or sales reduced by escalation receipts (including those determined under a formula clause) will qualify as "rents from real property". Escalation receipts include amounts received by a prime tenant from subtenants by reason of an agreement that rent shall be increased to reflect all or a portion of an increase in real estate taxes, property insurance, operating costs of the prime tenant, or similar items customarily included in lease escalation clauses. Where in accordance with the terms of an agreement an amount received or accrued as rent for the taxable year includes both a fixed rental and a percentage of all or a portion of the lessee's income or profits, neither the fixed rental nor the additional amount will qualify as "rents from real property". However, where the amount received or accrued for the taxable year under such an agreement includes only the fixed rental, the determination of which does not depend in whole or in part on the income or profits derived by the lessee, such amount may qualify as "rents from real property". An amount received or accrued as rent for the taxable year which consists, in whole or in part, of one or more percentages of the lessee's receipts or sales in excess of determinable dollar amounts may qualify as "rents from real property", but only if two conditions exist. First, the determinable amounts must not depend in whole or in part on the income or profits of the lessee. Second, the percentages and, in the case of leases entered into after July 7, 1978, the determinable amounts, must be fixed at the time the lease is entered into and a change in percentages and determinable amounts is not renegotiated during the term of the lease (including any renewal periods of the lease) in a manner which has the effect of basing rent on income or profits. In any event, an amount will not qualify as "rents from real property" if, considering the lease and all the surrounding circumstances, the arrangement does not conform with normal busi-

ness practice but is in reality used as a means of basing the rent on income or profits. The provisions of this subparagraph may be illustrated by the following example:

Example. A real estate investment trust owns land underlying an office building. On January 1, 1975, the trust leases the land for 50 years to a prime tenant for an annual rental of \$100x plus 20 percent of the prime tenant's annual gross receipts from the office building in excess of a fixed base amount of \$5,000x and 10 percent of such gross receipts in excess of \$10,000x. For this purpose the lease defines gross receipts as all amounts received by the prime tenant from occupancy tenants pursuant to leases of space in the office building reduced by the amount by which real estate taxes, property insurance, and operating costs related to the office building for a particular year exceed the amount of such items for 1974. The exclusion from gross receipts of increases since 1974 in real estate taxes, property insurance, and other expenses relating to the office building reflects the fact that the prime tenant passes on to occupancy tenants by way of a customary lease escalation provision the risk that such expenses might increase during the term of an occupancy lease. The exclusion from gross receipts of these expense escalation items will not cause the rental received by the real estate investment trust from the prime tenant to fail to qualify as "rents from real property" for purposes of section 856(c).

(4) Disqualification of amounts received from persons owned in whole or in part by the trust. "Rents from real property" does not include any amount received or accrued, directly or indirectly, from any person in which the real estate investment trust owns, at any time during the taxable year, the specified percentage or number of shares of stock (or interest in the assets or net profits) of that person. Any amount received from such person will not qualify as "rents from real property" if such person is a corporation and the trust owns 10 percent or more of the total combined voting power of all classes of its stock entitled to vote or 10 percent or more of the total number of shares of all classes of its outstanding stock, or if such person is not a corporation and the trust owns a 10-percent-or-more interest in its assets or net profits. For example, a trust leases an office building to a tenant for which it receives rent of \$100,000 for the taxable year 1962. The lessee of the building subleases space to various subtenants for which it receives gross rent of \$500,000 for the year 1962. The trust owns 15 percent of the total assets of an unincorporated subtenant. The rent paid by this subtenant for the taxable year is \$50,000. Therefore, \$10,000 (50,000/500,000 × \$100,000) of the rent paid to the trust does not qualify as "rents from real property". Where the real estate investment trust receives, directly or indirectly, any amount of rent from any person in which it owns any proprietary interest, the trust shall submit, at the time it files its return for the taxable year (or before June 1, 1962, whichever is later), a schedule setting forth—

(i) The name and address of such person and the amount received as rent from such person; and

(ii) If such person is a corporation, the highest percentage of the total combined voting power of all classes of its stock entitled to vote, and the highest percentage of the total number of shares of all classes of its outstanding stock, owned by the trust at any time during the trust's taxable year; or

(iii) If such person is not a corporation, the highest percentage of the trust's interest in the assets or net profits of such person, owned by the trust at any time during its taxable year.

(5) Furnishing of services or management of property must be through an independent contractor—(i) In general. No amount received or accrued, directly or indirectly, with respect to any real property (or any personal property leased under, or in connection with, the real property) qualifies as "rents from real property" if the real estate investment trust furnishes or renders services to the tenants of the property or manages or operates the property, other than through an independent contractor from whom the trust itself does not derive or receive any income. The prohibition against the trust deriving or receiving any income from the independent contractor applies regardless of the source from which the income was derived by the independent contractor. Thus, for example, the trust may not receive any dividends from the independent contractor. The requirement that the trust not receive any income from an independent contractor requires that the relationship between the two be an arm's-length relationship. The independent contractor must be adequately compensated for any services which are performed for the trust. Compensation to an independent contractor determined by reference to an unadjusted percentage of gross rents will generally be considered to be adequate where the percentage is reasonable taking into account the going rate of compensation for managing similar property in the same locality, the services rendered, and other relevant factors. The independent contractor must not be an employee of the trust (*i.e.*, the manner in which he carries out his duties as independent contractor must not be subject to the control of the trust). Although the cost of services which are customarily rendered or furnished in connection with the rental of real property may be borne by the trust, the services must be furnished or rendered through an independent contractor. Furthermore, the facilities through which the ser-

vices are furnished must be maintained and operated by an independent contractor. For example, if a heating plant is located in the building, it must be maintained and operated by an independent contractor. To the extent that services (other than those customarily furnished or rendered in connection with the rental of real property) are rendered to the tenants of the property by the independent contractor, the cost of the services must be borne by the independent contractor, a separate charge must be made for the services, the amount of the separate charge must be received and retained by the independent contractor, and the independent contractor must be adequately compensated for the services.

(ii) Trustee or director functions. The trustees or directors of the real estate investment trust are not required to delegate or contract out their fiduciary duty to manage the trust itself, as distinguished from rendering or furnishing services to the tenants of its property or managing or operating the property. Thus, the trustees or directors may do all those things necessary, in their fiduciary capacities, to manage and conduct the affairs of the trust itself. For example, the trustees or directors may establish rental terms, choose tenants, enter into and renew leases, and deal with taxes, interest, and insurance, relating to the trust's property. The trustees or directors may also make capital expenditures with respect to the trust's property (as defined in section 263) and may make decisions as to repairs of the trust's property (of the type which would be deductible under section 162), the cost of which may be borne by the trust.

(iii) Independent contractor defined. The term "independent contractor" means—

(a) A person who does not own, directly or indirectly, at any time during the trust's taxable year more than 35 percent of the shares in the real estate investment trust, or

(b) A person—

(1) If a corporation, not more than 35 percent of the total combined voting power of whose stock (or 35 percent of the total shares of all classes of whose stock), or

(2) If not a corporation, not more than 35 percent of the interest in whose assets or net profits

is owned, directly or indirectly, at any time during the trust's taxable year by one or more persons owning at any time during such taxable year 35 percent or more of the shares in the trust.

(iv) Information required. The real estate investment trust shall submit with its return for the taxable year (or before June 1, 1962, whichever is later) a statement setting forth the name and address of each independent contractor; and

(a) The highest percentage of the outstanding shares in the trust owned at any time during its taxable year by such independent contractor and by any person owning at any time during such taxable year any shares of stock or interest in the independent contractor.

(b) If the independent contractor is a corporation such statement shall set forth the highest percentage of the total combined voting power of its stock and the highest percentage of the total number of shares of all classes of its stock owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(c) If the independent contractor is not a corporation such statement shall set forth the highest percentage of any interest in its assets or net profits owned at any time during its taxable year by any person owning shares in the trust at any time during such taxable year.

(6) Amounts based on income or profits of subtenants. (i) Except as provided in paragraph (b)(6)(ii) of this section, if a trust leases real property to a tenant under terms other than solely on a fixed sum rental (for example, a percentage of the tenant's gross receipts), and the tenant subleases all or a part of such property under an agreement which provides for a rental based in whole or in part on the income or profits of the sublessee, the entire amount of the rent received by the trust from the prime tenant with respect to such property is disqualified as "rents from real property".

(ii) Exception. For taxable years beginning after October 4, 1976, section 856(d)(4) provides an exception to the general rule that amounts received or accrued, directly or indirectly, by a real estate investment trust do not qualify as rents from real property if the determination of the amount depends in whole or in part on the income or profits derived by any person from the property. This exception applies where the trust rents property to a tenant (the prime tenant) for a rental which is based, in whole or in part, on a fixed percentage or percentages of the receipts or sales of the prime tenant, and the rent which the trust receives or accrues from the prime tenant pursuant to the lease would not qualify as "rents from real property" solely because the prime tenant receives

or accrues from subtenants (including concessionaires) rents or other amounts based on the income or profits derived by a person from the property. Under the exception, only a proportionate part of the rent received or accrued by the trust does not qualify as "rents from real property". The proportionate part of the rent received or accrued by the trust which is non-qualified is the lesser of the following two amounts:

(A) The rent received or accrued by the trust from the prime tenant pursuant to the lease, that is based on a fixed percentage or percentages of receipts or sales, or

(B) The product determined by multiplying the total rent which the trust receives or accrues from the prime tenant pursuant to the lease by a fraction, the numerator of which is the rent or other amount received by the prime tenant that is based, in whole or in part, on the income or profits derived by any person from the property, and the denominator of which is the total rent or other amount received by the prime tenant from the property. For example, assume that a real estate investment trust owns land underlying a shopping center. The trust rents the land to the owner of the shopping center for an annual rent of $10x plus 2 percent of the gross receipts which the prime tenant receives from subtenants who lease space in the shopping center. Assume further that, for the year in question, the prime tenant derives total rent from the shopping center of $100x and, of that amount, $25x is received from subtenants whose rent is based, in whole or in part, on the income or profits derived from the property. Accordingly, the trust will receive a total rent of $12x, of which $2x is based on a percentage of the gross receipts of the prime tenant. The portion of the rent which is disqualified is the lesser of $2x (the rent received by the trust which is based on percentage of gross receipts), or $3x, ($12x multiplied by $25x/$100x). Accordingly, $10x of the rent received by the trust qualifies as "rents from real property" and $2x does not qualify.

(7) **Attribution rules.** Paragraphs (2) and (3) of section 856(d) relate to direct or indirect ownership of stock, assets, or net profits by the persons described therein. For purposes of determining such direct or indirect ownership, the rules prescribed by section 318(a) (for determining the ownership of stock) shall apply except that "10 percent" shall be substituted for "50 percent" in section 318(a)(2)(C) and (3)(C).

[T.D. 6598, 27 FR 4085, April 28, 1962, as amended by T.D. 6969, 33 FR 12000, Aug. 23, 1968; T.D. 7767, 46 FR 11266, Feb. 6, 1981]

§ 1.856–5 Interest.

(a) **In general.** In computing the percentage requirements in section 856(c)(2)(B) and (3)(B), the term "interest" includes only an amount which constitutes compensation for the use or forbearance of money. For example, a fee received or accrued by a lender which is in fact a charge for services performed for a borrower rather than a charge for the use of borrowed money is not includable as interest.

(b) **Where amount depends on income or profits of any person.** Except as provided in paragraph (d) of this section, any amount received or accrued, directly or indirectly, with respect to an obligation is not includable as interest for purposes of section 856(c)(2)(B) and (3)(B) if, under the principles set forth in paragraphs (b)(3) and (6)(i) of § 1.856–4, the determination of the amount depends in whole or in part on the income or profits of any person (whether or not derived from property secured by the obligation). Thus, for example, if in accordance with a loan agreement an amount is received or accrued by the trust with respect to an obligation which includes both a fixed amount of interest and a percentage of the borrower's income or profits, neither the fixed interest nor the amount based upon the percentage will qualify as interest for purposes of section 856(c)(2)(B) and (3)(B). This paragraph and paragraph (d) of this section apply only to amounts received or accrued in taxable years beginning after October 4, 1976, pursuant to loans made after May 27, 1976. For purposes of the preceding sentence, a loan is considered to be made before May 28, 1976, if it is made pursuant to a binding commitment entered into before May 28, 1976.

(c) **Apportionment of interest—(1) In general.** Where a mortgage covers both real property and other property, an apportionment of the interest income must be made for purposes of the 75-percent requirement of section 856(c)(3). For purposes of the 75-percent requirement, the apportionment shall be made as follows:

(i) If the loan value of the real property is equal to or exceeds the amount of the loan, then the entire interest income shall be apportioned to the real property.

(ii) If the amount of the loan exceeds the loan value of the real property, then the interest income apportioned to the real property is an amount equal to the interest income multiplied by a frac-

tion, the numerator of which is the loan value of the real property, and the denominator of which is the amount of the loan. The interest income apportioned to the other property is an amount equal to the excess of the total interest income over the interest income apportioned to the real property.

(2) Loan value. For purposes of this paragraph, the loan value of the real property is the fair market value of the property, determined as of the date on which the commitment by the trust to make the loan becomes binding on the trust. In the case of a loan purchased by the trust, the loan value of the real property is the fair market value of the property, determined as of the date on which the commitment by the trust to purchase the loan becomes binding on the trust. However, in the case of a construction loan or other loan made for purposes of improving or developing real property, the loan value of the real property is the fair market value of the land plus the reasonably estimated cost of the improvements or developments (other than personal property) which will secure the loan and which are to be constructed from the proceeds of the loan. The fair market value of the land and the reasonably estimated cost of improvements or developments shall be determined as of the date on which a commitment to make the loan becomes binding on the trust. If the trust does not make the construction loan but commits itself to provide long-term financing following completion of construction, the loan value of the real property is determined by using the principles for determining the loan value for a construction loan. Moreover, if the mortgage on the real property is given as additional security (or as a substitute for other security) for the loan after the trust's commitment is binding, the real property loan value is its fair market value when it becomes security for the loan (or, if earlier, when the borrower makes a binding commitment to add or substitute the property as security).

(3) Amount of loan. For purposes of this paragraph, the amount of the loan means the highest principal amount of the loan outstanding during the taxable year.

(d) Exception. Section 856(f)(2) provides an exception to the general rule that amounts received, directly or indirectly, with respect to an obligation do not qualify as "interest" where the determination of the amounts depends in whole or in part on the income or profits of any person. The exception applies where the trust receives or accrues, with respect to the obligation of its debtor, an amount that is based in whole or in part on a fixed percentage or percentages of receipts or sales of the debtor, and the amount would not qualify as interest solely because the debtor has receipts or sale proceeds that are based on the income or profits of any person. Under this exception only a proportionate part of the amount received or accrued by the trust fails to qualify as interest for purposes of the percentage-of-income requirements of section 856(c)(2) and (3). The proportionate part of the amount received or accrued by the trust that is non-qualified is the lesser of the following two amounts:

(1) The amount received or accrued by the trust from the debtor with respect to the obligation that is based on a fixed percentage or percentages of receipts or sales, or

(2) The product determined by multiplying by a fraction the total amount received or accrued by the trust from the debtor with respect to the obligation. The numerator of the fraction is the amount of receipts or sales of the debtor that is based, in whole or in part, on the income or profits of any person and the denominator is the total amount of the receipts or sales of the debtor. For purposes of the preceding sentence, the only receipts or sales to be taken into account are those taken into account in determining the payment to the trust pursuant to the loan agreement.

[T.D. 7767, 46 FR 11268, Feb. 6, 1981]

§ 1.856–6 Foreclosure property.

(a) In general. Under section 856(e) a real estate investment trust may make an irrevocable election to treat as "foreclosure property" certain real property (including interests in real property), and any personal property incident to the real property, acquired by the trust after December 31, 1973. This section prescribes rules relating to the election, including rules relating to property eligible for the election. This section also prescribes rules relating to extensions of the general two-year period (hereinafter the "grace period") during which property retains its status as foreclosure property, as well as rules relating to early termination of the grace period under section 856(e)(4). The election to treat property as foreclosure property does not alter the character of the income derived therefrom (other than for purposes of section 856(c)(2)(F) and (3)(F)). For example, if foreclosure property is sold, the determination of whether it is property described in section 1221(1) will not be affected by the fact that it is foreclosure property.

(b) **Property eligible for the election—(1) Rules relating to acquisitions.** In general, the trust must acquire the property after December 31, 1973, as the result of having bid in the property at foreclosure, or having otherwise reduced the property to ownership or possession by agreement or process of law, after there was default (or default was imminent) on a lease of the property (where the trust was the lessor) or on an indebtedness owed to the trust which the property secured. Foreclosure property which secured an indebtedness owed to the trust is acquired for purposes of section 856(e) on the date of which the trust acquires ownership of the property for Federal income tax purposes. Foreclosure property which a trust owned and leased to another is acquired for purposes of section 856(e) on the date on which the trust acquires possession of the property from its lessee. A trust will not be considered to have acquired ownership of property for purposes of section 856(e) where it takes control of the property as a mortgagee-in-possession and cannot receive any profit or sustain any loss with respect to the property except as a creditor of the mortgagor. A trust may be considered to have acquired ownership of property for purposes of section 856(e) even though legal title to the property is held by another person. For example, where, upon foreclosure of a mortgage held by the trust, legal title to the property is acquired in the name of a nominee for the exclusive benefit of the trust and the trust is the equitable owner of the property, the trust will be considered to have acquired ownership of the property for purposes of section 856(e). Generally, the fact that under local law the mortgagor has a right of redemption after foreclosure is not relevant in determining whether the trust has acquired ownership of the property for purposes of section 856(e). Property is not ineligible for the election solely because the property, in addition to securing an indebtedness owed to the trust, also secures debts owed to other creditors. Property eligible for the election includes a building or other improvement which has been constructed on land owned by the trust and which is acquired by the trust upon default of a lease of the land.

(2) **Personal property.** Personal property (including personal property not subject to a mortgage or lease of the real property) will be considered incident to a particular item of real property if the personal property is used in a trade or business conducted on the property or the use of the personal property is otherwise an ordinary and necessary corollary of the use to which the real property is put. In the case of a hotel, such items as furniture, appliances, linens, china, food, etc. would be examples of incidental personal property. Personal property incident to the real property is eligible for the election even though it is acquired after the real property is acquired or is placed in the building or other improvement in the course of the completion of construction.

(3) **Property with respect to which default is anticipated.** Property is not eligible for the election to be treated as foreclosure property if the loan or lease with respect to which the default occurs (or is imminent) was made or entered into (or the lease or indebtedness was acquired) by the trust with an intent to evict or foreclose, or when the trust knew or had reason to know that default would occur ("improper knowledge"). For purposes of the preceding sentence, a trust will not be considered to have improper knowledge with respect to a particular lease or loan, if the lease or loan was made pursuant to a binding commitment entered into by the trust at a time when it did not have improper knowledge. Moreover, if the trust, in an attempt to avoid default or foreclosure, advances additional amounts to the borrower in excess of amounts contemplated in the original loan commitment or modifies the lease or loan, such advance or modification will be considered not to have been made with an intent to evict or foreclose, or with improper knowledge, unless the original loan or lease was entered into with that intent or knowledge.

(c) **Election—(1) In general.** (i) An election to treat property as foreclosure property applies to all of the eligible real property acquired in the same taxable year by the trust upon the default (or as a result of the imminence of default) on a particular lease (where the trust is the lessor) or on a particular indebtedness owed to the trust. For example, if a loan made by a trust is secured by two separate tracts of land located in different cities, and in the same taxable year the trust acquires both tracts on foreclosure upon the default (or imminence of default) of the loan, the trust must include both tracts in the election. For a further example, the trust may choose to make a separate election for only one of the tracts if they are acquired in different taxable years or were not security for the same loan. If real property subject to the same election is acquired at different times in the same taxable year, the grace period for a particular property begins when that property is acquired.

(ii) If the trust acquires separate pieces of real property that secure the same indebtedness (or are under the same lease) in different taxable years because the trust delays acquiring one of them

until a later taxable year, and the primary purpose for the delay is to include only one of them in an election, then if the trust makes an election for one piece it must also make an election for the other piece. A trust will not be considered to have delayed the acquisition of property for this purpose if there is a legitimate business reason for the delay (such as an attempt to avoid foreclosure by further negotiations with the debtor or lessee).

(iii) All of the eligible personal property incident to the real property must also be included in the election.

(2) Time for making election. The election to treat property as foreclosure property must be made on or before the due date (including extensions of time) for filing the trust's income tax return for the taxable year in which the trust acquires the property with respect to which the election is being made, or April 3, 1975, whichever is later.

(3) Manner of making the election. An election made after February 6, 1981, shall be made by a statement attached to the income tax return for the taxable year in which the trust acquired the property with respect to which the election is being made. The statement shall indicate that the election is made under section 856(e) and shall identify the property to which the election applies. The statement shall also set forth—

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired by the trust, and

(iii) A brief description of how the real property was acquired, including the name of the person or persons from whom the real property was acquired and a description of the lease or indebtedness with respect to which default occurred or was imminent.

An election made on or before February 6, 1981 shall be filed in the manner prescribed in 26 CFR 10.1(f) (revised as of April 1, 1977) (temporary regulations relating to the election to treat property as foreclosure property) as in effect when the election is made.

(4) Status of taxpayer. In general, a taxpayer may make an election with respect to an acquisition of property only if the taxpayer is a qualified real estate investment trust for the taxable year in which the acquisition occurs. If, however, the taxpayer establishes, to the satisfaction of the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for a taxable year was due to reasonable cause and not due to willful neglect, the taxpayer may make the election with respect to property acquired in such taxable year. The principles of §§ 1.856–7(c) and 1.856–8(d) (including the principles relating to expert advice will apply in determining whether, for purposes of this subparagraph, the failure of the taxpayer to be a qualified real estate investment trust for the taxable year in which the property is acquired was due to reasonable cause and not due to willful neglect. If a taxpayer makes a valid election to treat property as foreclosure property, the property will not lose its status as foreclosure property solely because the taxpayer is not a qualified real estate investment trust for a subsequent taxable year (including a taxable year which encompasses an extension of the grace period). However, the rules relating to the termination of foreclosure property status in section 856(e)(4) (but not the tax on income from foreclosure property imposed by section 857(b)(4)) apply to the year in which the property is acquired and all subsequent years, even though the taxpayer is not a qualified real estate investment trust for such year.

(d) Termination of 2-year grace period; subsequent leases—(1) In general. Under section 856(e)(4)(A), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which the trust either—

(i) Enters into a lease with respect to any of the property which, by its terms, will give rise to income of the trust which is not described in section 856(c)(3) (other than section 856(c)(3)(F)), or

(ii) Receives or accrues, directly or indirectly, any amount which is not described in section 856(c)(3) (other than section 856(c)(3)(F)) pursuant to a lease with respect to any of the real property entered into by the trust on or after the day the trust acquired the property.

For example, assume the trust acquires, in a particular taxable year, a shopping center upon the default of an indebtedness owed to the trust. Also assume that the trust subsequently enters into a lease with respect to one of several stores in the shopping center that requires the lessee to pay rent to the trust which is not income described in

section 856(c)(3) (other than section 856(c)(3)(F)). In such case, the entire shopping center will cease to be foreclosure property on the day the trust enters into the lease.

(2) **Extensions or renewals of leases.** Generally, the extension or renewal of a lease of foreclosure property will be treated as the entering into of a new lease only if the trust has a right to renegotiate the terms of the lease. If, however, by operation of law or by contract, the acquisition of the foreclosure property by the trust terminates a preexisting lease of the property, or gives the trust a right to terminate the lease, then for purposes of section 856(e)(4)(A), a trust, in such circumstances, will not be considered to have entered into a lease with respect to the property solely because the terms of the preexisting lease are continued in effect after foreclosure without substantial modification. The letting of rooms in a hotel or motel does not constitute the entering into a lease for purposes of section 856(e)(4)(A).

(3) **Rent attributable to personal property.** Solely for the purposes of section 856(e)(4)(A), if a trust enters into a lease with respect to real property on or after the day upon which the trust acquires such real property by foreclosure, and a portion of the rent from such lease is attributable to personal property which is foreclosure property incident to such real property, such rent attributable to the incidental personal property will not be considered to terminate the status of such real property (or such incidental personal property) as foreclosure property.

(e) **Termination of 2-year grace period; completion of construction—(1) In general.** Under section 856(e)(4)(B), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring on or after the day on which the trust acquired the property) on which any construction takes place on the property, other than completion of a building (or completion of any other improvement) where more than 10 percent of the construction of the building (or other improvement) was completed before default became imminent. If more than one default occurred with respect to an indebtedness or lease in respect of which there is an acquisition, the more-than-10-percent test (including the rule prescribed in this paragraph relating to the test) will not be applied at the time a particular default became imminent if it is clear that the acquisition did not occur as the result of such default. For example, if the debtor fails to make four consecutive payments of principal and interest on the due dates, and the trust takes action to acquire the property securing the debt only after the fourth default becomes imminent, the 10-percent test is applied at the time the fourth default became imminent (even though the trust would not have foreclosed on the property had not all four defaults occurred).

(2) **Determination of percentage of completion.** The determination of whether the construction of a building or other improvement was more than 10 percent complete when default became imminent shall be made by comparing the total direct costs of construction incurred with respect to the building or other improvement as of the date default became imminent with the estimated total direct costs of construction as of such date. If the building or other improvement qualifies as more than 10 percent complete under this method, the building or other improvement shall be considered to be more than 10 percent complete. For purposes of this subparagraph, direct costs of construction include the cost of labor and materials which are directly connected with the construction of the building or improvement.

Thus, for example, direct costs of construction incurred as of the date default became imminent would include amounts paid, or for which liability has been incurred, for labor which has been performed as of such date that is directly connected with the construction of the building or other improvement and for building materials and supplies used or consumed in connection with the construction as of such date. For purposes of applying the 10-percent test the trust may also take into account the cost of building materials and supplies which have been delivered to the construction site as of the date default became imminent and which are to be used or consumed in connection with the construction. On the other hand, architect's fees, administrative costs of the developer or builder, lawyers' fees, and expenses incurred in connection with obtaining zoning approval or building permits are not considered to be direct costs of construction. Any construction by the trust as mortgagee-in-possession is considered to have taken place after default resulting in acquisition of the property became imminent. Generally, the trust's estimate of the total direct costs of completing construction as of the date the default became imminent will be accepted, provided that the estimate is reasonable, in good faith, and is based on all of the data reasonably available to the trust when the trust undertakes completion of construction of the building or other improvement.

Appropriate documentation which shows that construction was more than 10 percent complete when default became imminent must be available at the principal place of business of the trust for inspection in connection with an examination of the income tax return. Construction includes the renovation of a building, such as the remodeling of apartments, or the renovation of an apartment building to convert rental units to a condominium. The renovation must be more than 10 percent complete (determined by comparing the total direct cost of the physical renovation which has been incurred when default became imminent with the estimated total direct cost of renovation as of such date) when default became imminent in order for the property not to lose its status as foreclosure property if the trust undertakes the renovation.

(3) Modification of a building or improvement. Generally, the terms "building" and "improvement" in section 856(e)(4)(B) mean the building or improvement (including any integral part thereof) as planned by the mortgagor or lessee (or other person in possession of the property, if appropriate) as of the date default became imminent. The trust, however, may estimate the total direct costs of construction and complete the construction of the building or other improvement by modifying the building or other improvement as planned as of the date default became imminent so as to reduce the estimated direct cost of construction of the building or improvement. If the trust does so modify the planned construction of the building or improvement, the 10-percent test is to be applied by comparing the direct costs of construction incurred as of the date default became imminent that are attributable to the building or improvement as modified, with the estimated total direct costs (as of such date) of construction of the building or other improvement as modified. The trust, in order to meet the 10-percent test, may not, however, modify the planned building or improvement by reducing the estimated direct cost of construction to such an extent that the building or improvement is not functional.

Also, the trust may make subsequent modifications which increase the direct cost of construction of the building or improvement if such modifications—

(i) Are required by a Federal, State, or local agency, or

(ii) Are alterations that are either required by a prospective lessee or purchaser as a condition of leasing or buying the property or are necessary for the property to be used for the purpose planned at the time default became imminent.

Subdivision (ii) of the preceding sentence applies, however, only if the building or improvement, as modified, was more than 10 percent complete when default became imminent. A building completed by the trust will not cease to be foreclosure property solely because the building is used in a manner other than that planned by the defaulting mortgagor or lessee. Thus, for example, assume a trust acquired on foreclosure a planned apartment building which was 20 percent complete when default became imminent and that the trust completes the building without modifications which increase the direct cost of construction. The property will not cease to be foreclosure property by reason of section 856(e)(4)(B) solely because the trust sells the dwelling units in the building as condominium units, rather than holding them for rent as planned by the defaulting mortgagor. (See, however, section 856(e)(4)(C) and paragraph (f)(2) of this section for rules relating to the requirement that where foreclosure property is used in a trade or business (including a trade or business of selling the foreclosure property), the trade or business must be conducted through an independent contractor after 90 days after the property is acquired.)

(4) Application on building-by-building basis. Generally the more than 10 percent test is to be applied on a building-by-building basis. Thus, for example, if a trust has foreclosed on land held by a developer building a housing subdivision, the trust may complete construction of the houses which were more than 10 percent complete when default became imminent. The trust, however, may not complete construction of houses which were only 10 percent (or less) complete, nor may the trust begin construction of other houses planned for the subdivision on which construction has not begun. The trust, however, may construct an additional building or improvement (whether or not the construction thereof has begun) which is an integral part of another building or other improvement that was more than 10 percent complete when default became imminent if the additional building or improvement and the other building or improvement, taken together as a unit, meet the more than 10 percent test. For purposes of this paragraph, an additional building or other improvement will be considered to be an integral part of another building or improvement if—

(i) It is ancillary to the other building or improvement and its principal intended use is to furnish services or facilities which either supplement the use of such other building or improvement or are necessary for such other building or

improvement to be utilized in the manner or for the purpose for which it is intended, or

(ii) The buildings or improvements are intended to comprise constituent parts of an interdependent group of buildings or other improvements.

However, a building or other improvement will not be considered to be an integral part of another building or improvement unless the buildings or improvements were planned as part of the same overall construction plan or project before default became imminent. An additional building or other improvement (such as, for example, an outdoor swimming pool or a parking garage) may be considered to be an integral part of another building or improvement, even though the additional building or improvement was also intended to be used to provide facilities or services for use in connection with several other buildings or improvements which will not be completed. If the trust chooses not to undertake the construction of an additional building or other improvement which qualifies as an integral part of another building or improvement, so much of the costs of construction (including both the direct costs of construction incurred before the default became imminent and the estimated costs of completion) as are attributable to that "integral part" shall not be taken into account in determining whether any other building or improvement was more than 10 percent complete when default became imminent. For example, assume the trust acquires on foreclosure a property on which the defaulting mortgagor has begun construction of a motel. The motel, as planned by the mortgagor, was to consist of a two-story building containing 30 units, and two detached one-story wings, each of which was to contain 20 units. At the time default became imminent, the defaulting mortgagor had completed more than 10 percent of the construction of the two-story structure but the two wings, an access road, a parking lot, and an outdoor swimming pool planned for the motel were each less than 10 percent complete. The trust may construct the two wings of the motel, the access road, the parking lot, and the swimming pool: *Provided*, That the motel and the other improvements which the trust undertakes to construct, taken together as a unit, were more than 10 percent complete when default became imminent. If, however, the trust chooses not to undertake construction of the swimming pool, the cost of construction attributable to the swimming pool, whether incurred before default became imminent or estimated as the cost of completion, shall not be taken into account in determining whether the trust can complete construction of the other buildings and improvements. For another example, assume that the trust acquires a planned shopping center on foreclosure. At the time default became imminent several large buildings intended to house shops and stores in the shopping center were more than 10 percent complete. Less than 10 percent of the construction, however, had been completed on a separate structure intended to house a bank. The bank was planned as a component of the shopping center in order to provide, in conjunction with the other shops and stores, a specific range and variety of goods and services with which to attract customers to the shopping center. The trust may complete construction of the bank: *Provided*, That the bank and the other buildings and improvements which the trust undertakes to complete, taken together as a unit, were more than 10 percent complete when default became imminent. If the trust chooses not to construct the bank, no actual or estimated construction costs attributable to the bank are to be taken into account in applying the 10-percent test with respect to the other buildings and improvements in the shopping center. For a third example, assume that a defaulting mortgagor had planned to construct two identical apartment buildings, A and B, on the same tract of land, that neither building is to provide substantial facilities or services to be used in connection with the other, and that only building A was more than 10 percent complete when default became imminent. The trust, in this case, may not complete building B. On the other hand, if the facts are the same except that pursuant to the plans of the defaulting mortgagor, one of the buildings is to contain the furnace and central air conditioning machinery for both buildings A and B, the trust may complete both buildings A and B: *Provided*, That, taken together as a unit, the two buildings meet the more-than-10-percent test.

(5) **Repair and maintenance.** Under this paragraph (e), "construction" does not include—

(i) The repair or maintenance of a building or other improvement (such as the replacement of warn or obsolete furniture and appliances) to offset normal wear and tear or obsolescence, and the restoration of property required because of damage from fire, storm, vandalism or other casualty.

(ii) The preparation of leased space for a new tenant which does not substantially extend the useful life of the building or other improvement or significantly increase its value, even though, in the case of commercial space, this preparation includes adapting the property to the conduct of a different business, or

(iii) The performing of repair or maintenance described in paragraph (e)(5)(i) of this section after property is acquired that was deferred by the defaulting party and that does not constitute renovation under paragraph (e)(2) of this section.

(6) Independent contractor required. If any construction takes place on the foreclosure property more than 90 days after the day on which such property was acquired by the trust, such construction must be performed by an independent contractor (as defined in section 856(d)(3) and § 1.856–4(b)(5)(iii)) from whom the trust does not derive or receive any income. Otherwise, the property will cease to be foreclosure property.

(7) Failure to complete construction. Property will not cease to be foreclosure property solely because a trust which undertakes the completion of construction of a building or other improvement on the property that was more than 10 percent complete when default became imminent does not complete the construction. Thus, for example, if a trust continues construction of a building that was 20 percent complete when default became imminent, and the trust constructs an additional 40 percent of the building and then sells the property, the property will not lose its status as foreclosure property solely because the trust fails to complete construction of the building.

(f) Termination of 2-year grace period; use of foreclosure property in a trade or business—(1) In general. Under section 856(e)(4)(C), all real property (and any incidental personal property) for which a particular election has been made (see paragraph (c)(1) of this section) shall cease to be foreclosure property on the first day (occurring more than 90 days after the day on which the trust acquired the property) on which the property is used in a trade or business conducted by the trust, other than a trade or business conducted by the trust through an independent contractor from whom the trust itself does not derive or receive any income. (See section 856(d)(3) for the definition of independent contractor.)

(2) Property held primarily for sale to customers. For the purposes of section 856(e)(4)(C), foreclosure property held by the trust primarily for sale to customers in the ordinary course of a trade or business is considered to be property used in a trade or business conducted by the trust. Thus, if a trust holds foreclosure property (whether real property or personal property incident to real property) for sale to customers in the ordinary course of a trade or business more than 90 days after the day on which the trust acquired the real property, the trade or business of selling the property must be conducted by the trust through an independent contractor from whom the trust does not derive or receive any income. Otherwise, after such 90th day the property will cease to be foreclosure property.

(3) Change in use. Foreclosure property will not cease to be foreclosure property solely because the use of the property in a trade or business by the trust differs from the use to which the property was put by the person from whom it was acquired. Thus, for example, if a trust acquires a rental apartment building on foreclosure, the property will not cease to be foreclosure property solely because the trust converts the building to a condominium apartment building and, through an independent contractor from whom the trust derives no income, engages in the trade or business of selling the individual condominium units.

(g) Extension of 2-year grace period—(1) In general. A real estate investment trust may apply to the district director of the internal revenue district in which is located the principal place of business (or principal office or agency) of the trust for an extension of the 2-year grace period. If the trust establishes to the satisfaction of the district director that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in foreclosure property, or for an orderly renegotiation of a lease or leases of the property, the district director may extend the 2-year grace period. See section 856(e)(3) (as in effect with respect to the particular extension) for rules relating to the maximum length of an extension, and the number of extensions which may be granted. An extension of the grace period may be granted by the district director either before or after the date on which the grace period, but for the extension, would expire. The extension shall be effective as of the date on which the grace period, but for the extension, would expire.

(2) Showing required. Generally, in order to establish the necessity of an extension, the trust must demonstrate that it has made good faith efforts to renegotiate leases with respect to, or dispose of, the foreclosure property. In certain cases, however, the trust may establish the necessity of an extension even though it has not made such efforts. For example, if the trust demonstrates that, for valid business reasons, construction of the foreclosure property could not be completed before the expiration of the grace period, the necessity of the extension could be established even though the trust had made no effort to sell the property. For another example, if the trust

demonstrates that due to a depressed real estate market, it could not sell the foreclosure property before the expiration of the grace period except at a distress price, the necessity of an extension could be established even though the trust had made no effort to sell the property. The fact that property was acquired as foreclosure property prior to January 3, 1975 (the date of enactment of section 856(e)), generally will be considered as a factor (but not a controlling factor) which tends to establish that an extension of the grace period is necessary.

(3) **Time for requesting an extension of the grace period.** A request for an extension of the grace period must be filed with the appropriate district director more than 60 days before the day on which the grace period would otherwise expire. In the case of a grace period which would otherwise expire before August 6, 1976, a request for an extension will be considered to be timely filed if filed on or before June 7, 1976.

(4) **Information required.** The request for an extension of the grace period shall identify the property with respect to which the request is being made and shall also include the following information:

(i) The name, address, and taxpayer identification number of the trust,

(ii) The date the property was acquired as foreclosure property by the trust,

(iii) The taxable year of the trust in which the property was acquired,

(iv) If the trust has been previously granted an extension of the grace period with respect to the property, a statement to that effect (which shall include the date on which the grace period, as extended, expires) and a copy of the information which accompanied the request for the previous extension,

(v) A statement of the reasons why the grace period should be extended,

(vi) A description of any efforts made by the trust after the acquisition of the property to dispose of the property or to renegotiate any lease with respect to the property, and

(vii) A description of any other factors which tend to establish that an extension of the grace period is necessary for the orderly liquidation of the trust's interest in the property, or for an orderly renegotiation of a lease or leases of the property.

The trust shall also furnish any additional information requested by the district director after the request for extension is filed.

(5) **Automatic extension.** If a real estate investment trust files a request for an extension with the district director more than 60 days before the expiration of the grace period, the grace period shall be considered to be extended until the end of the 30th day after the date on which the district director notifies the trust by certified mail sent to its last known address that the period of extension requested by the trust is not granted. In no event, however, shall the rule in the preceding sentence extend the grace period beyond the expiration of (i) the period of extension requested by the trust, or (ii) the 1-year period following the date that the grace period (but for the automatic extension) would expire. The date of the postmark on the sender's receipt is considered to be the date of the certified mail for purposes of this subparagraph. This subparagraph does not apply, however, if the date of the notification by certified mail described in the first sentence is more than 30 days before the date that the grace period (determined without regard to this subparagraph) expires. Moreover, this subparagraph shall not operate to allow any period of extension that is prohibited by the last sentence of section 856(e)(3) (as in effect with respect to the particular extension).

(6) **Extension of time for filing.** If a real estate investment trust fails to file the request for an extension of the grace period within the time provided in paragraph (g)(3) of this section, then the district director shall grant a reasonable extension of time for filing such request, provided (i) it is established to the satisfaction of the district director that there was reasonable cause for failure to file the request within the prescribed time and (ii) a request for such extension is filed within such time as the district director considers reasonable under the circumstances.

(7) **Status of taxpayer.** The reference to "real estate investment trust" or "trust" in this paragraph (g) shall be considered to include a taxpayer that is not a qualified real estate investment trust, if the taxpayer establishes to the satisfaction of the district director that its failure to be a qualified real estate investment trust for the taxable year was due to reasonable cause and not due to willful neglect. The principles of § 1.856–7(c) and § 1.856–8(d) (including the principles relating to expert advice) shall apply for determining reason-

able cause (and absence of willful neglect) for this purpose.

[T.D. 7767, 46 FR 11269, Feb. 6, 1981; 46 FR 15263, March 5, 1981]

§ 1.856–7 Certain corporations, etc., that are considered to meet the gross income requirements.

(a) In general. A corporation, trust, or association which fails to meet the requirements of paragraph (2) or (3) of section 856(c), or of both such paragraphs, for any taxable year nevertheless is considered to have satisfied these requirements if the corporation, trust, or association meets the requirements of subparagraphs (A), (B), and (C) of section 856(c)(7) (relating to a schedule attached to the return, the absence of fraud, and reasonable cause).

(b) Contents of the schedule. The schedule required by subparagraph (A) of section 856(c)(7) must contain a breakdown, or listing, of the total amount of gross income falling under each of the separate subparagraphs of section 856(c)(2) and (3). Thus, for example, the real estate investment trust, for purposes of listing its income from the sources described in section 856(c)(2), would list separately the total amount of dividends, the total amount of interest, the total amount of rents from real property, etc. The listing is not required to be on a lease-by-lease, loan-by-loan, or project-by-project basis, but the real estate investment trust must maintain adequate records on such a basis with which to substantiate each total amount listed in the schedule.

(c) Reasonable cause—(1) In general. The failure to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs) will be considered due to reasonable cause and not due to willful neglect if the real estate investment trust exercised ordinary business care and prudence in attempting to satisfy the requirements. Such care and prudence must be exercised at the time each transaction is entered into by the trust. However, even if the trust exercised ordinary business care and prudence in entering into a transaction, if the trust later determines that the transaction results in the receipt or accrual of nonqualified income and that the amounts of such nonqualified income, in the context of the trust's overall portfolio, reasonably can be expected to cause a source-of-income requirement to be failed, the trust must use ordinary business care and prudence in an effort to renegotiate the terms of the transaction, dispose of property acquired or leased in the transaction, or alter other elements of its portfolio. In any case, failure to meet an income source requirement will be considered due to willful neglect and not due to reasonable cause if the failure is willful and the trust could have avoided such failure by taking actions not inconsistent with ordinary business care and prudence. For example, if the trust enters into a lease knowing that it will produce nonqualified income which reasonably can be expected to cause a source-of-income requirement to be failed, the failure is due to willful neglect even if the trust has a legitimate business purpose for entering into the lease.

(2) Expert advice—(i) In general. The reasonable reliance on a reasoned, written opinion as to the characterization for purposes of section 856 of gross income to be derived (or being derived) from a transaction generally constitutes "reasonable cause" if income from that transaction causes the trust to fail to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs). The absence of such a reasoned, written opinion with respect to a transaction does not, by itself, give rise to any inference that the failure to meet a percentage of income requirement was without reasonable cause. An opinion as to the character of income from a transaction includes an opinion pertaining to the use of a standard form of transaction or standard operating procedure in a case where such standard form or procedure is in fact used or followed.

(ii) If the opinion indicates that a portion of the income from a transaction will be nonqualified income, the trust must still exercise ordinary business care and prudence with respect to the nonqualified income and determine that the amount of that income, in the context of its overall portfolio, reasonably cannot be expected to cause a source-of-income requirement to be failed. Reliance on an opinion is not reasonable if the trust has reason to believe that the opinion is incorrect (for example, because the trust withholds facts from the person rendering the opinion).

(iii) Reasoned written opinion. For purposes of this subparagraph (2), a written opinion means an opinion, in writing, rendered by a tax advisor (including house counsel) whose opinion would be relied on by a person exercising ordinary business care and prudence in the circumstances of the particular transaction. A written opinion is considered "reasoned" even if it reaches a conclusion which is subsequently determined to be incorrect, so long as the opinion is based on a full disclosure of the factual situation by the real estate investment trust and is addressed to the facts and law

which the person rendering the opinion believes to be applicable. However, an opinion is not considered "reasoned" if it does nothing more than recite the facts and express a conclusion.

(d) **Application of section 856(c)(7) to taxable years beginning before October 5, 1976.** Pursuant to section 1608(b) of the Tax Reform Act of 1976, paragraph (7) of section 856(c) and this section apply to a taxable year of a real estate investment trust which begins before October 5, 1976, only if as the result of a determination occurring after October 4, 1976, the trust does not meet the requirements of paragraph (2) or (3) of section 856(c), or both paragraphs, as in effect for the taxable year. The requirement that the schedule described in subparagraph (A) of section 856(c)(7) be attached to the income tax return of a real estate investment trust in order for section 856(c)(7) to apply is not applicable to taxable years beginning before October 5, 1976. For purposes of section 1608(b) of the Tax Reform Act of 1976 and this paragraph, the rules relating to determinations prescribed in section 860(e) and § 1.860–2(b)(1) (other than the second, third, and last sentences of § 1.860–2(b)(1)(ii)) shall apply. However, a determination consisting of an agreement between the taxpayer and the district director (or other official to whom authority to sign the agreement is delegated) shall set forth the amount of gross income for the taxable year to which the determination applies, the amount of the 90 percent and 75 percent source-of-income requirements for the taxable year to which the determination applies, and the amount by which the real estate investment trust failed to meet either or both of the requirements. The agreement shall also set forth the amount of tax for which the trust is liable pursuant to section 857(b)(5). The agreement shall also contain a finding as to whether the failure to meet the requirements of paragraph (2) or (3) of section 856(c) (or of both paragraphs) was due to reasonable cause and not due to willful neglect.

[T.D. 7767, 46 FR 11274, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.856–8 Revocation or termination of election.

(a) **Revocation of an election to be a real estate investment trust.** A corporation, trust, or association that has made an election under section 856(c)(1) to be a real estate investment trust may revoke the election for any taxable year after the first taxable year for which the election is effective. The revocation must be made by filing a statement with the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency. The statement must be filed on or before the 90th day after the first day of the first taxable year for which the revocation is to be effective. The statement must be signed by an official authorized to sign the income tax return of the taxpayer and must—

(1) Contain the name, address, and taxpayer identification number of the taxpayer,

(2) Specify the taxable year for which the election was made, and

(3) Include a statement that the taxpayer, pursuant to section 856(g)(2), revokes its election under section 856(c)(1) to be a real estate investment trust.

The revocation may be made only with respect to a taxable year beginning after October 4, 1976, and is effective for the taxable year in which made and for all succeeding taxable years. A revocation with respect to a taxable year beginning after October 4, 1976, that is filed before February 6, 1981, in the time and manner prescribed in § 7.856(g)–1 of this chapter (as in effect when the revocation was filed) is considered to meet the requirements of this paragraph.

(b) **Termination of election to be a real estate investment trust.** An election of a corporation, trust, or association under section 856(c)(1) to be a real estate investment trust shall terminate if the corporation, trust, or association is not a qualified real estate investment trust for any taxable year (including the taxable year with respect to which the election is made) beginning after October 4, 1976. (This election terminates whether the failure to be a qualified real estate investment trust is intentional or inadvertent.) The term "taxable year" includes a taxable year of less than 12 months for which a return is made under section 443. The termination of the election is effective for the first taxable year beginning after October 4, 1976, for which the corporation, trust, or association is not a qualified real estate investment trust and for all succeeding taxable years.

(c) **Restrictions on election after termination or revocation—(1) General rule.** Except as provided in paragraph (d) of this section, if a corporation, trust, or association has made an election under section 856(c)(1) to be a real estate investment trust and the election has been terminated or revoked under section 856(g)(1) or (2), the corporation, trust, or association (and any successor corporation, trust, or association) is not eligible to

make a new election under section 856(c)(1) for any taxable year prior to the fifth taxable year which begins after the first taxable year for which the termination or revocation is effective.

(2) Successor corporation. The term "successor corporation, trust, or association", as used in section 856(g)(3), means a corporation, trust, or association which meets both a continuity of ownership requirement and a continuity of assets requirement with respect to the corporation, trust, or association whose election has been terminated under section 856(g)(1) or revoked under section 856(g)(2). A corporation, trust, or association meets the continuity of ownership requirement only if at any time during the taxable year the persons who own, directly or indirectly, 50 percent or more in value of its outstanding shares owned, at any time during the first taxable year for which the termination or revocation was effective, 50 percent or more in value of the outstanding shares of the corporation, trust, or association whose election has been terminated or revoked. A corporation, trust, or association meets the continuity of assets requirement only if either (i) a substantial portion of its assets were assets of the corporation, trust, or association whose election has been revoked or terminated, or (ii) it acquires a substantial portion of the assets of the corporation, trust, or association whose election has been terminated or revoked.

(3) Effective date. Section 856(g)(3) does not apply to the termination of an election that was made by a taxpayer pursuant to section 856(c)(1) on or before October 4, 1976, unless the taxpayer is a qualified real estate investment trust for a taxable year ending after October 4, 1976, for which the pre-October 5, 1976, election is in effect. For example, assume that Trust X, a calendar year taxpayer, files a timely election under section 856(c)(1) with respect to its taxable year 1974, and is a qualified real estate investment trust for calendar years 1974 and 1975. Assume further that Trust X is not a qualified real estate investment trust for 1976 and 1977 because it willfully fails to meet the asset diversification requirements of section 856(c)(5) for both years. The failure (whether or not willful) to meet these requirements in 1977 terminates the election to be a real estate investment trust made with respect to 1974. (See paragraph (b) of this section.) The termination is effective for 1977 and all succeeding taxable years. However, under section 1608(d)(3) of the Tax Reform Act of 1976, Trust X is not prohibited by section 856(g)(3) from making a new election under section 856(c)(1) with respect to 1978.

(d) Exceptions. Section 856(g)(4) provides an exception to the general rule of section 856(g)(3) that the termination of an election to be a real estate investment trust disqualifies the corporation, trust, or association from making a new election for the 4 taxable years following the first taxable year for which the termination is effective. This exception applies where the corporation, trust, or association meets the requirements of section 856(g)(4)(A), (B) and (C) (relating to the timely filing of a return, the absence of fraud, and reasonable cause, respectively) for the taxable year with respect to which the termination of election occurs. In order to meet the requirements of section 856(g)(4)(C), the corporation, trust, or association must establish, to the satisfaction of the district director for the internal revenue district in which the corporation, trust, or association maintains its principal place of business or principal office or agency, that its failure to be a qualified real estate investment trust for the taxable year in question was due to reasonable cause and not due to willful neglect. The principles of § 1.856–7(c) (including the principles relating to expert advice will apply in determining whether, for purposes of section 856(g)(4), the failure of a corporation, trust, or association to be a qualified real estate investment trust for a taxable year was due to reasonable cause and not due to willful neglect. Thus, for example, the corporation, trust, or association must exercise ordinary business care and prudence in attempting to meet the status conditions of section 856(a) and the distribution and recordkeeping requirements of section 857(a), as well as the gross income requirements of section 856(c). The provisions of section 856(g)(4) do not apply to a taxable year in which the corporation, trust, or association makes a valid revocation, under section 856(g)(2), of an election to be a real estate investment trust.

[T.D. 7767, 46 FR 11275, Feb. 6, 1981; 46 FR 15263, March 5, 1981]

§ 1.856–9 Election with respect to property held for sale in a taxable year beginning before October 5, 1976.

(a) In general. Section 856(a)(4), as in effect with respect to taxable years beginning before October 5, 1976, provided that a real estate investment trust could not hold any property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business. Section 1603 of the Tax Reform Act of 1976 (the Act) repealed the prohibition on holding property primarily for sale to customers, effective for taxable years beginning after October 4, 1976,

and imposed the tax on net income from prohibited transactions under section 857(b)(6). Section 1608(d)(2) of the Act provides that if as a result of a determination occurring after October 4, 1976, a real estate investment trust does not meet the requirement of section 856(a)(4) (as in effect before amendment by the Act) for any taxable year beginning before October 5, 1976, the trust may elect to have the provisions of section 1603 (other than paragraphs (1), (2), (3), and (4) of section 1603 (c)) of the Act apply with respect to the taxable year. For purposes of section 1608(d)(2) of the Tax Reform Act of 1976 and this section, the definition of "determination" in section 860(e) shall apply.

(b) Election. The election provided by section 1608(d)(2) of the Act shall be made by filing a statement with the district director for the internal revenue district in which the taxpayer maintains its principal place of business or principal office or agency. The statement shall be signed by the taxpayer and shall include the following information:

(1) The name, address, and taxpayer identification number of the taxpayer;

(2) The taxable year (or years) to which the election applies;

(3) A statement that the taxpayer, pursuant to section 1608(d)(2) of the Tax Reform Act of 1976, elects to have the provisions of section 1603 (other than paragraphs (1), (2), (3), and (4) of section 1603(c)) of the Act apply to such taxable year (or years); and

(4) A description of the determination and the date upon which the determination became final.

A copy of the closing agreement, the Tax Court decision, the judgment, decree, or other order, or the agreement with the district director (or other official) which constitutes the determination shall be attached to the statement.

(c) Time for filing the election. The election must be filed within 60 days after the date of the determination. The date of a determination described in section 860(e)(1) or (2) shall be determined in accordance with section 860(e) and § 1.860–2(b)(1)(i). The date of a determination which is an agreement with the district director (or other official) under section 860(e)(3) shall be determined in accordance with paragraph (e) of this section.

(d) Revocation—(1) In general. An election made by a taxpayer pursuant to section 1608(d)(2) of the Tax Reform Act of 1976 after February 6, 1981 is irrevocable.

(2) Elections made under temporary regulations. A taxpayer who has made an election under section 1608(d)(2) of the Act on or before February 6, 1981 in accordance with § 7.0(c)(1) of this chapter may apply to the Commissioner for consent to revoke the election. The application for consent must be filed with the Commissioner after February 6, 1981 and before May 8, 1981.

(e) Determination. For purposes of section 1608(d)(2) of the Tax Reform Act of 1976, a determination under section 860(e)(3) may be made by an agreement signed by the district director or such other official to whom authority to sign the agreement is delegated, and by or on behalf of the taxpayer. The agreement shall identify the taxable year (or years) to which it applies and shall state that the taxpayer, during such taxable year (or years), held property (other than foreclosure property) primarily for sale to customers in the ordinary course of its trade or business, within the meaning of section 856(c)(4), as in effect before amendment by the Act. The agreement further shall set forth, for each taxable year to which it applies, the amount, if any, of the net income (or net loss) from prohibited transactions, and the amount, if any, of the tax imposed by paragraph (6) of section 857(b). An agreement under this subparagraph shall be sent to the taxpayer at its last known address by either registered or certified mail. If registered mail is used, the date of registration shall be treated as the date of determination. If certified mail is used, the date of the postmark on the sender's receipt shall be treated as the date of determination. However, if the statement described in paragraph (b) of this section is filed by the taxpayer before the registration or postmark date but on or after the date the agreement is signed by the district director (or the other official to whom authority to sign the agreement is delegated), the date of determination shall be the date of signing.

(f) Rules relating to refunds, credits, assessment, and collection. In a case where an election to have section 1603 of the Act apply results in an overpayment of tax, the taxpayer, in order to secure credit or refund of the overpayment, must file a claim on Form 1120X. See section 1608(d)(2) of the Act for special rules relating to the period of limitations on filing the claim and to assessment and collection of any deficiency established by the determination.

[T.D. 7767, 46 FR 11276, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.857-1 Taxation of real estate investment trusts.

(a) Requirements applicable thereto. Section 857(a) denies the application of the provisions of part II, subchapter M, chapter 1 of the Code (other than sections 856(g), relating to the revocation or termination of an election, and 857(d), relating to earnings and profits) to a real estate investment trust for a taxable year unless—

(1) The deduction for dividends paid for the taxable year as defined in section 561 (computed without regard to capital gain dividends) equals or exceeds the amount specified in section 857(a)(1), as in effect for the taxable year; and

(2) The trust complies for such taxable year with the provisions of § 1.857-8 (relating to records required to be maintained by a real estate investment trust).

See section 858 and § 1.858-1, relating to dividends paid after the close of the taxable year.

(b) Failure to qualify. If a real estate investment trust does not meet the requirements of section 857(a) and paragraph (a) of this section for the taxable year, it will, even though it may otherwise be classified as a real estate investment trust, be taxed in such year as an ordinary corporation and not as a real estate investment trust. In such case, none of the provisions of part II of subchapter M (other than sections 856(g) and 857(d)) will be applicable to it. For the rules relating to the applicability of sections 856(g) and 857(d), see § 1.857-7.

[T.D. 6598, 27 FR 4087, April 28, 1962, as amended T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857-2 Real estate investment trust taxable income and net capital gain.

(a) Real estate investment trust taxable income. Section 857(b)(1) imposes a normal tax and surtax, computed at the rates and in the manner prescribed in section 11, on the "real estate investment trust taxable income", as defined in section 857(b)(2). Section 857(b)(2) requires certain adjustments to be made to convert taxable income of the real estate investment trust to "real estate investment trust taxable income". The adjustments are as follows:

(1) Net capital gain. In the case of taxable years ending before October 5, 1976, the net capital gain, if any, is excluded.

(2) Special deductions disallowed. The special deductions provided in part VIII, subchapter B, chapter 1 of the Code (except the deduction under section 248) are not allowed.

(3) Deduction for dividends paid—(i) General rule. The deduction for dividends paid (as defined in section 561) is allowed. In the case of taxable years ending before October 5, 1976, the deduction for dividends paid is computed without regard to capital gains dividends.

(ii) Deduction for dividends paid if there is net income from foreclosure property. If for any taxable year the trust has net income from foreclosure property (as defined in section 857(b)(4)(B) and § 1.857-3), the deduction for dividends paid is an amount equal to the amount which bears the same proportion to the total dividends paid or considered as paid during the taxable year that otherwise meet the requirements for the deduction for dividends paid (as defined in section 561) as the real estate investment trust taxable income (determined without regard to the deduction for dividends paid) bears to the sum of—

(A) The real estate investment trust taxable income (determined without regard to the deduction for dividends paid), and

(B) The amount by which the net income from foreclosure property exceeds the tax imposed on such income by section 857(b)(4)(A).

For purposes of the preceding sentence, the term "total dividends paid or considered as paid during the taxable year" includes deficiency dividends paid with respect to the taxable year that are not otherwise excluded under this subdivision or section 857(b)(3)(A). The term, however, does not include either deficiency dividends paid during the taxable year with respect to a preceding taxable years ending before October 5, 1976, capital gains dividends.

(iii) Deduction for dividends paid for purposes of the alternative tax. The rules in section 857(b)(3)(A) apply in determining the amount of the deduction for dividends paid that is taken into account in computing the alternative tax. Thus, for example, if a real estate investment trust has net income from foreclosure property for a taxable year ending after October 4, 1976, then for purposes of determining the partial tax described in section 857(b)(3)(A)(i), the amount of the deduction for dividends paid is computed pursuant to paragraph (a)(3)(ii) of this section, except that capital gains dividends are excluded from the dividends paid or considered as paid during the taxable year, and the net capital gain is excluded in computing real estate investment trust taxable income.

(4) **Section 443(b) disregarded.** The taxable income is computed without regard to section 443(b). Thus, the taxable income for a period of less than 12 months is not placed on an annual basis even though the short taxable year results from a change of accounting period.

(5) **Net operating loss deduction.** In the case of a taxable year ending before October 5, 1976, the net operating loss deduction provided in section 172 is not allowed.

(6) **Net income from foreclosure property.** An amount equal to the net income from foreclosure property (as defined in section 857(b)(4)(B) and paragraph (a) of § 1.857–3), if any, is excluded.

(7) **Tax imposed by section 857(b)(5).** An amount equal to the tax (if any) imposed on the trust by section 857(b)(5) for the taxable year is excluded.

(8) **Net income or loss from prohibited transactions.** An amount equal to the amount of any net income derived from prohibited transactions (as defined in section 857(b)(6)(B)(i) is excluded. On the other hand, an amount equal to the amount of any net loss derived from prohibited transactions (as defined in section 857(b)(6)(B)(ii)) is included. Because the amount of the net loss derived from prohibited transactions is taken into account in computing taxable income before the adjustments required by section 857(b)(2) and this section are made, the effect of including an amount equal to the amount of the loss is to disallow a deduction for the loss.

(b) **Net capital gain in taxable years ending before October 5, 1976.** The rules relating to the taxation of capital gains in 26 CFR 1.857–2(b) (revised as of April 1, 1977) apply to taxable years ending before October 5, 1976.

[T.D. 6598, 27 FR 4087, Apr. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857–3 Net income from foreclosure property.

(a) **In general.** For purposes of section 857(b)(4)(B), net income from foreclosure property means the aggregate of—

(1) All gains and losses from sales or other dispositions of foreclosure property described in section 1221(1), and

(2) The difference (hereinafter called "net gain or loss from operations") between (i) the gross income derived from foreclosure property (as defined in section 856(e)) to the extent such gross income is not described in subparagraph (A), (B), (C), (D), (E), or (G) of section 856(c)(3), and (ii) the deductions allowed by chapter 1 of the Code which are directly connected with the production of such gross income.

Thus, the sum of the gains and losses from sales or other dispositions of foreclosure property described in section 1221(1) is aggregated with the net gain or loss from operations in arriving at net income from foreclosure property. For example, if for a taxable year a real estate investment trust has gain of $100 from the sale of an item of foreclosure property described in section 1221(1), a loss of $50 from the sale of an item of foreclosure property described in section 1221(1), gross income of $25 from the rental of foreclosure property that is not gross income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3), and deductions of $35 allowed by chapter 1 of the Code which are directly connected with the production of the rental income, the net income from foreclosure property for the taxable years is $40 (($100–$50) + ($25–$35)).

(b) **Directly connected deductions.** A deduction which is otherwise allowed by chapter 1 of the Code is "directly connected" with the production of gross income from the foreclosure property if it has a proximate and primary relationship to the earning of the income. Thus, in the case of gross income from real property that is foreclosure property, "directly connected" deductions would include depreciation on the property, interest paid or accrued on the indebtedness of the trust (whether or not secured by the property) to the extent attributable to the carrying of the property, real estate taxes, and fees paid to an independent contractor hired to manage the property. On the other hand, general overhead and administrative expenses of the trust are not "directly connected" deductions. Thus, salaries of officers and other administrative employees of the trust are not "directly connected" deductions. The net operating loss deduction provided by section 172 is not allowed in computing net income from foreclosure property.

(c) **Net loss from foreclosure property.** The tax imposed by section 857(b)(4) applies only if there is net income from foreclosure property. If there is a net loss from foreclosure property (that is, if the aggregate computed under paragraph (a) of this section results in a negative amount) the loss is taken into account in computing real estate investment trust taxable income under section 857(b)(2).

(d) Gross income not subject to tax on foreclosure property. If the gross income derived from foreclosure property consists of two classes, a deduction directly connected with the production of both classes (including interest attributable to the carrying of the property) must be apportioned between them. The two classes are:

(1) Gross income which is taken into account in computing net income from foreclosure property and

(2) Other income (such as income described in subparagraph (A), (B), (C), (D), or (G) of section 856(c)(3)).

The apportionment may be made on any reasonable basis.

(e) Allocation and apportionment of interest. For purposes of determining the amount of interest attributable to the carrying of foreclosure property under paragraph (b) of this section, the following rules apply:

(1) Deductible interest. Interest is taken into account under this paragraph (e) only if it is otherwise deductible under chapter 1 of the Code.

(2) Interest specifically allocated to property. Interest that is specifically allocated to an item of property is attributable only to the carrying of that property. Interest is specifically allocated to an item of property if (i) the indebtedness on which the interest is paid or accrued is secured only by that property, (ii) such indebtedness was specifically incurred for the purpose of purchasing, constructing, maintaining, or improving that property, and (iii) the proceeds of the borrowing were applied for that purpose.

(3) Other interest. Interest which is not specifically allocated to property is apportioned between foreclosure property and other property under the principles of § 1.861–8(e)(2)(v).

(4) Effective date. The rules in this paragraph (e) are mandatory for all taxable years ending after February 6, 1981.

[T.D. 7767, 46 FR 11277, Feb. 6, 1981]

§ 1.857–4 Tax imposed by reason of the failure to meet certain source-of-income requirements.

Section 857(b)(5) imposes a tax on a real estate investment trust that is considered, by reason of section 856(c)(7), as meeting the source-of-income requirements of paragraph (2) or (3) of section 856(c) (or both such paragraphs). The amount of the tax is determined in the manner prescribed in section 857(b)(5).

[T.D. 7767, 46 FR 11278, Feb. 2, 1981]

§ 1.857–5 Net income and loss from prohibited transactions.

(a) In general. Section 857(b)(6) imposes, for each taxable year, a tax equal to 100 percent of the net income derived from prohibited transactions. A prohibited transaction is a sale or other disposition of property described in section 1221(1) that is not foreclosure property. The 100-percent tax is imposed to preclude a real estate investment trust from retaining any profit from ordinary retailing activities such as sales to customers of condominium units or subdivided lots in a development tract. In order to prevent a trust from receiving any tax benefit from such activities, a net loss from prohibited transactions effectively is disallowed in computing real estate investment trust taxable income. See § 1.857–2(a)(8). Such loss, however, does reduce the amount which a trust is required to distribute as dividends. For purposes of applying the provisions of the Code, other than those provisions of part II of subchapter M which relate to prohibited transactions, no inference is to be drawn from the fact that a type of transaction does not constitute a prohibited transaction.

(b) Special rules. In determining whether a particular transaction constitutes a prohibited transaction, the activities of a real estate investment trust with respect to foreclosure property and its sales of such property are disregarded. Also, if a real estate investment trust enters into a purchase and leaseback of real property with an option in the seller-lessee to repurchase the property at the end of the lease period, and the seller exercises the option pursuant to its terms, income from the sale generally will not be considered to be income from a prohibited transaction solely because the purchase and leaseback was entered into with an option in the seller to repurchase and because the option was exercised pursuant to its terms. Other facts and circumstances, however, may require a conclusion that the property is held primarily for sale to customers in the ordinary course of a trade or business. Gain from the sale or other disposition of property described in section 1221(1) (other than foreclosure property) that is included in gross income for a taxable year of a qualified real estate investment trust constitutes income from a prohibited transaction, even though the sale or other disposition from which the gain is derived occurred in a prior taxable year. For example, if a corporation that is a qualified real

estate investment trust for the current taxable year elected to report the income from the sale of an item of section 1221(1) property (other than foreclosure property) on the installment method of reporting income, the gain from the sale that is taken into income by the real estate investment trust for the current taxable year is income from a prohibited transaction. This result follows even though the sale occurred in a prior taxable year for which the corporation did not qualify as a real estate investment trust. On the other hand, if the gain is taken into income in a taxable year for which the taxpayer is not a qualified real estate investment trust, the 100-percent tax does not apply.

(c) **Net income or loss from prohibited transactions.** Net income or net loss from prohibited transactions is determined by aggregating all gains from the sale or other disposition of property (other than foreclosure property) described in section 1221(1) with all losses from the sale or other disposition of such property. Thus, for example, if a real estate investment trust sells two items of property described in section 1221(1) (other than foreclosure property) and recognizes a gain of $100 on the sale of one item and a loss of $40 on the sale of the second item, the net income from prohibited transactions will be $60.

[T.D. 7767, 46 FR 11278, Feb. 6, 1981]

§ 1.857–6 Method of taxation of shareholders of real estate investment trusts.

(a) **Ordinary income.** Except as otherwise provided in paragraph (b) of this section (relating to capital gains), a shareholder receiving dividends from a real estate investment trust shall include such dividends in gross income for the taxable year in which they are received. See section 858(b) and paragraph (c) of § 1.858–1 for treatment by shareholders of dividends paid by a real estate investment trust after the close of its taxable year in the case of an election under section 858(a).

(b) **Capital gains.** Under section 857(b)(3)(B), shareholders of a real estate investment trust who receive capital gain dividends (as defined in paragraph (e) of this section), in respect of the capital gains of a corporation, trust, or association for a taxable year for which it is taxable under part II of subchapter M as a real estate investment trust, shall treat such capital gain dividends as gains from the sale or exchange of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) and realized in the taxable year of the shareholder in which the dividend was received. In the case of dividends with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975, the portion of a shareholder's capital gain dividend which in his hands is gain to which section 1201(d)(1) or (2) applies is the portion so designated by the real estate investment trust pursuant to paragraph (e)(2) of this section.

(c) **Special treatment of loss on the sale or exchange of real estate investment trust stock held less than 31 days—(1) In general.** Under section 857(b)(7), if any person with respect to a share of real estate investment trust stock held for a period of less than 31 days, is required by section 857(b)(3)(B) to include in gross income as a gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) the amount of a capital gains dividend, then such person shall, to the extent of such amount, treat any loss on the sale or exchange of such share as a loss from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977).

(2) **Determination of holding period.** The rules contained in section 246(c)(3) (relating to the determination of holding periods for purposes of the deduction for dividends received) shall be applied in determining whether, for purposes of section 857(b)(7)(B) and this paragraph, a share of real estate investment trust stock has been held for a period of less than 31 days. In applying those rules, however, "30 days" shall be substituted for the number of days specified in subparagraph (B) of such section.

(3) **Illustration.** The application of section 857(b)(7) and this paragraph may be illustrated by the following example:

Example. On December 15, 1961, A purchased a share of stock in the S Real Estate Investment Trust for $20. The S trust declared a capital gains dividend of $2 per share to shareholders of record on December 31, 1961. A, therefore, received a capital gain dividend of $2 which, pursuant to section 857(b)(3)(B), he must treat as a gain from the sale or exchange of a capital asset held for more than six months. On January 5, 1962, A sold his share of stock in the S trust for $17.50, which sale resulted in a loss of $2.50. Under section 857(b)(4) and this paragraph, A must treat $2 of such loss (an amount equal to the capital gain dividend received with respect to such share of stock) as a loss from the sale or exchange of a capital asset held for more than six months.

(d) **Dividend received credit, exclusion, and deduction not allowed.** Any dividend received from

a real estate investment trust which, for the taxable year to which the dividend relates, is a qualified real estate investment trust, shall not be eligible for the dividend received credit (for dividends received on or before December 31, 1964) under section 34(a), the dividend received exclusion under section 116, or the dividend received deduction under section 243.

(e) Definition of capital gain dividend. (1)(i) A capital gain dividend, as defined in section 857(b)(3)(C), is any dividend or part thereof which is designated by a real estate investment trust as a capital gain dividend in a written notice mailed to its shareholders within the period specified in section 857(b)(3)(C) and paragraph (f) of this section. If the aggregate amount so designated with respect to the taxable year (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858) is greater than the net capital gain of the taxable year, the portion of each distribution which shall be a capital gain dividend shall be only that proportion of the amount so designated which such excess of the net long-term capital gain over the net short-term capital loss bears to the aggregate of the amount so designated. For example, a real estate investment trust making its return on the calendar year basis advised its shareholders by written notice mailed December 30, 1961, that $200,000 of a distribution of $500,000 made December 15, 1961, constituted a capital gain dividend, amounting to $2 per share. It was later discovered that an error had been made in determining the net capital gain of the taxable year and the net capital gain was $100,000 instead of $200,000. In such case, each shareholder would have received a capital gain dividend of $1 per share instead of $2 per share.

(ii) For purposes of section 857(b)(3)(C) and this paragraph, the net capital gain for a taxable year ending after October 4, 1976, is deemed not to exceed the real estate investment trust taxable income determined by taking into account the net operating loss deduction for the taxable year but not the deduction for dividends paid. See example (2) in § 1.172–5(a)(4).

(2) In the case of capital gain dividends designated with respect to any taxable year of a real estate investment trust ending after December 31, 1969, and beginning before January 1, 1975 (including capital gain dividends paid after the close of the taxable year pursuant to an election under section 858), the real estate investment trust must include in its written notice designating the capital gain dividend a statement showing the shareholder's proportionate share of such dividend which is gain described in section 1201(d)(1) and his proportionate share of such dividend which is gain described in section 1201(d)(2). In determining the portion of the capital gain dividend which, in the hands of a shareholder, is gain described in section 1201(d)(1) or (2), the real estate investment trust shall consider that capital gain dividends for a taxable year are first made from its long-term capital gains which are not described in section 1201(d)(1) or (2), to the extent thereof, and then from its long-term capital gains for such year which are described in section 1201(d)(1) or (2). A shareholder's proportionate share of gains which are described in section 1201(d)(1) is the amount which bears the same ratio to the amount paid to him as a capital gain dividend in respect of such year as (i) the aggregate amount of the trust's gains which are described in section 1201(d)(1) and paid to all shareholders bears to (ii) the aggregate amount of the capital gain dividend paid to all shareholders in respect of such year. A shareholder's proportionate share of gains which are described in section 1201(d)(2) shall be determined in a similar manner. Every real estate investment trust shall keep a record of the proportion of each capital gain divided (to which this subparagraph applies) which is gain described in section 1201(d)(1) or (2).

(f) Mailing of written notice to shareholders—(1) General rule. Except as provided in paragraph (f)(2) of this section, the written notice designating a dividend or part thereof as a capital gain dividend must be mailed to the shareholders not later than 30 days after the close of the taxable year of the real estate investment trust.

(2) Net capital gain resulting from a determination. If, as a result of a determination (as defined in section 860(e)), occurring after October 4, 1976, there is an increase in the amount by which the net capital gain exceeds the deduction for dividends paid (determined with reference to capital gains dividends only) for the taxable year, then a real estate investment trust may designate a dividend (or part thereof) as a capital gain dividend in a written notice mailed to its shareholders at any time during the 120-day period immediately following the date of the determination. The designation may be made with respect to a dividend (or part thereof) paid during the taxable year to which the determination applies (including a dividend considered as paid during the taxable year pursuant to section 858). A deficiency dividend (as defined in section 860(f)), or a part thereof, that is paid with respect to the taxable year also may be designated as a capital gain dividend by the real

estate investment trust (or by the acquiring corporation to which section 381(c)(25) applies) before the expiration of the 120-day period immediately following the determination. However, the aggregate amount of the dividends (or parts thereof) that may be designated as capital gain dividends after the date of the determination shall not exceed the amount of the increase in the excess of the net capital gain over the deduction for dividends paid (determined with reference to capital gains dividends only) that results from the determination. The date of a determination shall be established in accordance with § 1.860-2(b)(1).

[T.D. 6598, 27 FR 4088, April 28, 1962 as amended by T.D. 6777, 29 FR 17809, Dec. 16, 1964; T.D. 7337, 39 FR 44974, Dec. 30, 1974; T.D. 7728, 45 FR 72650, Nov. 3, 1980. Redesignated and amended by T.D. 7767, 46 FR 11277, 11279 and 11283, Feb. 6, 1981; T.D. 7936, 49 FR 2107, Jan. 18, 1984; T.D. 8107, 51 FR 43347, Dec. 2, 1986]

§ 1.857-7 Earnings and profits of a real estate investment trust.

(a) Any real estate investment trust whether or not such trust meets the requirements of section 857(a) and paragraph (a) of § 1.857-1 for any taxable year beginning after December 31, 1960 shall apply paragraph (b) of this section in computing its earnings and profits for such taxable year.

(b) In the determination of the earnings and profits of a real estate investment trust, section 857(d) provides that such earnings and profits for any taxable year (but not the accumulated earnings and profits) shall not be reduced by any amount which is not allowable as a deduction in computing its taxable income for the taxable year. Thus, if a trust would have had earnings and profits of $500,000 for the taxable year except for the fact that it had a net capital loss of $100,000, which amount was not deductible in determining its taxable income, its earnings and profits for that year if it is a real estate investment trust would be $500,000. If the real estate investment trust had no accumulated earnings and profits at the beginning of the taxable year, in determining its accumulated earnings and profits as of the beginning of the following taxable year, the earnings and profits for the taxable year to be considered in such computation would amount to $400,000 assuming that there had been no distribution from such earnings and profits. If distributions had been made in the taxable year in the amount of the earnings and profits then available for distribution, $500,000, the trust would have as of the beginning of the following taxable year neither accumulated earnings and profits nor a deficit in accumulated earnings and profits, and would begin such year with its paid-in capital reduced by $100,000, an amount equal to the excess of the $500,000 distributed over the $400,000 accumulated earnings and profits which would otherwise have been carried into the following taxable year. For purposes of section 857(d) and this section, if an amount equal to any net loss derived from prohibited transactions is included in real estate investment trust taxable income pursuant to section 857(b)(2)(F), that amount shall be considered to be an amount which is not allowable as a deduction in computing taxable income for the taxable year. The earnings and profits for the taxable year (but not the accumulated earnings and profits) shall not be considered to be less than (i) in the case of a taxable year ending before October 5, 1976, the amount (if any) of the net capital gain for the taxable year, or (ii) in the case of a taxable year ending after December 31, 1973, the amount (if any), of the excess of the net income from foreclosure property for the taxable year over the tax imposed thereon by section 857(b)(4)(A).

[T.D. 6598, 27 FR 4088, April 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857-8 Records to be kept by a real estate investment trust.

(a) **In general.** Under section 857(a)(2) a real estate investment trust is required to keep such records as will disclose the actual ownership of its outstanding stock. Thus, every real estate investment trust shall maintain in the internal revenue district in which it is required to file its income tax return permanent records showing the information relative to the actual owners of its stock contained in the written statements required by this section to be demanded from its shareholders. Such records shall be kept at all times available for inspection by any internal revenue officer or employee, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

(b) **Actual owner of stock.** The actual owner of stock of a real estate investment trust is the person who is required to include in gross income in his return the dividends received on the stock. Generally, such person is the shareholder of record of the real estate investment trust. However, where the shareholder of record is not the actual owner of the stock, the stockholding record of the real estate investment trust may not disclose the actual ownership of such stock. Accordingly, the real

estate investment trust shall demand written statements from shareholders of record disclosing the actual owners of stock as required in paragraph (d) of this section.

(c) Stock ownership for personal holding company determination. For the purpose of determining under section 856(a)(6) whether a trust, claiming to be a real estate investment trust, is a personal holding company, the permanent records of the trust shall show the maximum number of shares of the trust (including the number and face value of securities convertible into stock of the trust) to be considered as actually or constructively owned by each of the actual owners of any of its stock at any time during the last half of the trust's taxable year, as provided in section 544.

(d) Statements to be demanded from shareholders. The information required by paragraphs (b) and (c) of this section shall be set forth in written statements which shall be demanded from shareholders of record as follows:

(1) In the case of a trust having 2,000 or more shareholders of record of its stock on any dividend record date, from each record holder of 5 percent or more of its stock; or

(2) In the case of a trust having less than 2,000 and more than 200 shareholders of record of its stock on any dividend record date, from each record holder of 1 percent or more of its stock; or

(3) In the case of a trust having 200 or less shareholders of record of its stock on any dividend record date, from each record holder of one-half of 1 percent or more of its stock.

(e) Demands for statements. The written statements from shareholders of record shall be demanded by the real estate investment trust in accordance with paragraph (d) of this section within 30 days after the close of the real estate investment trust's taxable year (or before June 1, 1962, whichever is later). When making demand for such written statements, the trust shall inform each such shareholder of his duty to submit at the time he files his income tax return (or before July 1, 1962, whichever is later) the statements which are required by § 1.857–9 if he fails or refuses to comply with such demand. A list of the persons failing or refusing to comply in whole or in part with the trust's demand for statements under this section shall be maintained as a part of the trust's records required by this section. A trust which fails to keep such records to show, to the extent required by this section, the actual ownership of its outstanding stock shall be taxable as an ordinary corporation and not as a real estate investment trust.

[T.D. 5598, 27 FR 4088, April 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857–9 Information required in returns of shareholders.

(a) In general. Any person who fails or refuses to submit to a real estate investment trust the written statements required under § 1.857–8 to be demanded by such trust from its shareholders of record shall submit at the time he files his income tax return for his taxable year which ends with, or includes, the last day of the trust's taxable year (or before July 1, 1962, whichever is later) a statement setting forth the information required by this section.

(b) Information required—(1) Shareholder of record not actual owner. In the case of any person holding shares of stock in any trust claiming to be a real estate investment trust who is not the actual owner of such stock, the name and address of each actual owner, the number of shares owned by each actual owner at any time during such person's taxable year, and the amount of dividends belonging to each actual owner.

(2) Actual owner of shares. In the case of an actual owner of shares of stock in any trust claiming to be a real estate investment trust—

(i) The name and address of each such trust, the number of shares actually owned by him at any and all times during his taxable year, and the amount of dividends from each such trust received during his taxable year;

(ii) If shares of any such trust were acquired or disposed of during such person's taxable year, the name and address of the trust, the number of shares acquired or disposed of, the dates of acquisition or disposition, and the names and addresses of the persons from whom such shares were acquired or to whom they were transferred;

(iii) If any shares of stock (including securities convertible into stock) of any such trust are also owned by any member of such person's family (as defined in section 544(a)(2)), or by any of his partners, the name and address of the trust, the names and addresses of such members of his family and his partners, and the number of shares owned by each such member of his family or partner at any and all times during such person's taxable year; and

(iv) The names and addresses of any corporation, partnership, association, or trust, in which such person had a beneficial interest of 10 percent or more at any time during his taxable year.
[T.D. 6598, 27 FR 4089, April 28, 1962, as amended by T.D. 6628, 27 FR 12794, Dec. 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.857-10 Information returns.

Nothing in §§ 1.857-8 and 1.857-9 shall be construed to relieve a real estate investment trust or its shareholders from the duty of filing information returns required by regulations prescribed under the provisions of subchapter A, chapter 61 of the Code.
[T.D. 6598, 27 FR 4089, April 28, 1962. Redesignated and amended by T.D. 7767, 46 FR 11277 and 11279, Feb. 6, 1981]

§ 1.858-1 Dividends paid by real estate investment trust after close of taxable year.

(a) General rule. Under section 858, a real estate investment trust may elect to treat certain dividends that are distributed within a specified period after the close of a taxable year as having been paid during the taxable year. The dividend is taken into account in determining the deduction for dividends paid for the taxable year in which it is treated as paid. The dividend may be an ordinary dividend or, subject to the requirements of sections 857(b)(3)(C) and 858(c), a capital gain dividend. The trust may make the dividend declaration required by section 858(a)(1) either before or after the close of the taxable year as long as the declaration is made before the time prescribed by law for filing its return for the taxable year (including the period of any extension of time granted for filing the return).

(b) Election—(1) Method of making election. The election must be made and the return filed by the trust for the taxable year. The election shall be made by treating the dividend (or portion thereof) to which the election applies as a dividend paid during the taxable year of the trust in computing its real estate investment trust taxable income and, if applicable, the alternative tax imposed by section 857(b)(3)(A). (In the case of an election with respect to a taxable year ending before October 5, 1976, if the dividend (or portion thereof) to which the election is to apply is a capital gain dividend, the trust shall treat the dividend as paid during such taxable year in computing the amount of capital gains dividends paid during the taxable year.) In the case of an election with respect to a taxable year beginning after October 4, 1976, the trust must also specify in its return (or in a statement attached to its return) the exact dollar amount that is to be treated as having been paid during the taxable year.

(2) Limitation based on earnings and profits. The election provided in section 858(a) may be made only to the extent that the earnings and profits of the taxable year (computed with the application of sections 857(d) and 1.857-7) exceed the total amount of distributions out of such earnings and profits actually made during the taxable year. For purposes of the preceding sentence, deficiency dividends and distributions with respect to which an election has been made for a prior year under section 858(a) are disregarded in determining the total amount of distributions out of earnings and profits actually made during the taxable year. The dividend or portion thereof, with respect to which the real estate investment trust has made a valid election under section 858(a), shall be considered as paid out of the earnings and profits of the taxable year for which such election is made, and not out of the earnings and profits of the taxable year in which the distribution is actually made.

(3) Additional limitation based on amount specified. The amount treated under section 858(a) as having been paid in a taxable year beginning after October 4, 1976, cannot exceed the lesser of (i) the dollar amount specified by the trust in its return (or a statement attached thereto)in making the election or (ii) the amount allowable under the limitation prescribed in paragraph (b)(2) of this section.

(4) Irrevocability of the election. After the expiration of the time for filing the return for the taxable year for which an election is made under section 858(a), such election shall be irrevocable with respect to the dividend or portion thereof to which it applies.

(c) Receipt by shareholders. Under section 858(b), the dividend or portion thereof, with respect to which a valid election has been made, will be includable in the gross income of the shareholders of the real estate investment trust for the taxable year in which the dividend is received by them.

(d) Illustrations. The application of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example (1). The X Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar

year 1961 of $100,000. During that year the trust distributed to shareholders taxable dividends aggregating $88,000. On March 10, 1962, the trust declared a dividend of $37,000 payable to shareholders on March 20, 1962. Such dividend consisted of the first regular quarterly dividend for 1962 of $25,000 plus an additional $12,000 representing that part of the taxable income for 1961 which was not distributed in 1961. On March 15, 1962, the X Trust filed its Federal income tax return and elected therein to treat $12,000 of the total dividend of $37,000 to be paid to shareholders on March 20, 1962, as having been paid during the taxable year 1961. Assuming that the X Trust actually distributed the entire amount of the dividend of $37,000 on March 20, 1962, an amount equal to $12,000 thereof will be treated for the purposes of section 857(a) as having been paid during the taxable year 1961. Upon distribution of such dividend the trust becomes a qualified real estate investment trust for the taxable year 1961. Such amount ($12,000) will be considered by the X Trust as a distribution out of the earnings and profits for the taxable year 1961, and will be treated by the shareholders as a taxable dividend for the taxable year in which such distribution is received by them. However, assuming that the X Trust is not a qualified real estate investment trust for the calendar year 1962, nevertheless, the $12,000 portion of the dividend (paid on March 20, 1962) which the trust elected to relate to the calendar year 1961, will not qualify as a dividend for purposes of section 34, 116, or 243.

Example (2). The Y Trust, a real estate investment trust, had taxable income (and earnings and profits) for the calendar year 1964 of $100,000, and for 1965 taxable income (and earnings and profits) of $125,000. On January 1, 1964, the trust had a deficit in its earnings and profits accumulated since February 28, 1913, of $115,000. During the year 1964 the trust distributed to shareholders taxable dividends aggregating $85,000. On March 5, 1965, the trust declared a dividend of $65,000 payable to shareholders on March 31, 1965. On March 15, 1965, the Y Trust filed its Federal income tax return in which it included $40,000 of the total dividend of $65,000 payable to shareholders on March 31, 1965, as a dividend paid by it during the taxable year 1964. On March 31, 1965, the Y Trust distributed the entire amount of the dividend of $65,000 declared on March 5, 1965. The election under section 858(a) is valid only to the extent of $15,000, the amount of the undistributed earnings and profits for 1964 ($100,000 earnings and profits less $85,000 distributed during 1964). The remainder ($50,000) of the $65,000 dividend paid on March 31, 1965, could not be the subject of an election, and such amount will be regarded as a distribution by the Y Trust out of earnings and profits for the taxable year 1965. Assuming that the only other distribution by the Y Trust during 1965 was a distribution of $75,000 paid as a dividend on October 31, 1965, the total amount of the distribution of $65,000 paid on March 31, 1965, is to be treated by the shareholders as taxable dividends for the taxable year in which such dividend is received. The Y Trust will treat the amount of $15,000 as a distribution of the earnings or profits of the trust for the taxable year 1964, and the remaining $50,000 as a distribution of the earnings or profits for the year 1965. The distribution of $75,000 on October 31, 1966, is, of course, a taxable dividend out of the earnings and profits for the year 1965.

Example (3). Assume the facts are the same as in example (2), except that the taxable years involved are calendar years 1977 and 1978, and Y Trust specified in its Federal income tax return for 1977 that the dollar amount of $40,000 of the $65,000 distribution payable to shareholders on March 31, 1978, is to be treated as having been paid in 1977. The result will be the same as in example (2), since the amount of the undistributed earnings and profits for 1977 is less than the $40,000 amount specified by Y Trust in making its election. Accordingly, the election is valid only to the extent of $15,000. Y Trust will treat the amount of $15,000 as a distribution, in 1977, of earnings and profits of the trust for the taxable year 1977 and the remaining $50,000 as a distribution, in 1978, of the earnings and profits for 1978.

(e) **Notice to shareholders.** Section 858(c) provides that, in the case of dividends with respect to which a real estate investment trust has made an election under section 858(a), any notice to shareholders required under part II, subchapter M, chapter 1 of the Code, with respect to such amounts, shall be made not later than 30 days after the close of the taxable year in which the distribution is made. Thus, the notice requirement of section 857(b)(3)(C) and paragraph (f) of § 1.857–6 with respect to capital gains dividends may be satisfied with respect to amounts to which section 858(a) and this section apply if the notice relating to such amounts is mailed to the shareholders not later than 30 days after the close of the taxable year in which the distribution is made. If the notice under section 858(c) relates to an election with respect to any capital gains dividends, such capital gains dividends shall be aggregated by the real estate investment trust with the designated capital gains dividends actually paid during the taxable year to which the election applies (not including deficiency dividends or dividends with respect to which an election has been made for a prior taxable year under section 858) to determine whether the aggregate of the designated capital gains dividends with respect to such taxable year exceeds the net capital gain of the trust. See section 857(b)(3)(C) and paragraph (f) of § 1.857–6.

[T.D. 6598, 27 FR 4089, April 28, 1962, as amended by T.D. 7767, 46 FR 11279, Feb. 6, 1981]

§ 1.860–1 Deficiency dividends.

Section 860 allows a qualified investment entity to be relieved from the payment of a deficiency in (or to be allowed a credit or refund of) certain taxes. "Qualified investment entity" is defined in section 860(b). The taxes referred to are those imposed by sections 852(b)(1) and (3), 857(b)(1) or (3), the minimum tax on tax preferences imposed by section 56 and, if the entity fails the distribution requirements of section 852(a)(1)(A) or 857(a)(1) (as applicable), the corporate income tax imposed by section 11(a) or 1201(a). The method provided by section 860 is to allow an additional deduction for a dividend distribution (that meets the requirements of section 860 and § 1.860–2) in computing the deduction for dividends paid for the taxable year for which the deficiency is determined. A deficiency divided may be an ordinary

dividend or, subject to the limitations of sections 852(b)(3)(C), 857(b)(3)(C), and 860(f)(2)(B), may be a capital gain dividend.

[T.D. 7767, 46 FR 11280, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2107, Jan. 18, 1984]

§ 1.860–2 Requirements for deficiency dividends.

(a) In general—(1) Determination, etc. A qualified investment entity is allowed a deduction for a deficiency divided only if there is a determination (as defined in section 860(e) and paragraph (b)(1) of this section) that results in an adjustment (as defined in section 860(d)(1) or (2)) for the taxable year for which the deficiency dividend is paid. An adjustment does not include an increase in the excess of (i) the taxpayer's interest income excludable from gross income under section 103(a) over (ii) its deductions disallowed under sections 265 and 171(a)(2).

(2) Payment date and claim. The deficiency dividend must be paid on, or within 90 days after, the date of the determination and before the filing of a claim under section 860(g) and paragraph (b)(2) of this section. This claim must be filed within 120 days after the date of the determination.

(3) Nature and amount of distribution. (i) The deficiency dividend must be a distribution of property (including money) that would have been properly taken into account in computing the dividends paid deduction under section 561 for the taxable year for which tax liability resulting from the determination exists if the property had been distributed during that year. Thus, if the distribution would have been a dividend under section 316(a) if it had been made during the taxable year for which the determination applies, and the distribution may qualify under sections 316(b)(3), 562(a), and 860(f)(1), even though the distributing corporation, trust, or association has no current or accumulated earnings and profits for the taxable year in which the distribution is actually made. The amount of the distribution is determined under section 301 as of the date of the distribution.

The amount of the deduction is subject to the applicable limitations under sections 562 and 860(f)(2). Thus, if the entity distributes to an individual shareholder property (other than money) which on the date of the distribution has a fair market value in excess of its adjusted basis in the hands of the entity, the amount of the deficiency dividend in the individual's hands for purposes of section 316(b)(3) is determined by using the property's fair market value on that date. Nevertheless, the amount of the deficiency dividend the entity may deduct is limited, under § 1.562–1(a), to the adjusted basis of the property and the amount taxable to the individual as a dividend is determined by reference to the current and accumulated earnings and profits for the year to which the determination applies.

(ii) The qualified investment entity does not have to distribute the full amount of the adjustment in order to pay a deficiency dividend. For example, assume that in 1983 a determination with respect to a calendar year regulated investment company results in an increase of $100 in investment company taxable income (computed without the dividends paid deduction) for 1981 and no other change. The regulated investment company may choose to pay a deficiency dividend of $100 or of any lesser amount and be allowed a dividends paid deduction for 1981 for the amount of that deficiency dividend.

(4) Status of distributor. The corporation, trust, or association that pays the deficiency dividend does not have to be a qualified investment entity at the time of payment.

(5) Certain definitions to apply. For purposes of sections 860(d) (defining adjustment) and (f)(2) (limitations) the definitions of the terms "investment company taxable income," "real estate investment trust taxable income," and "capital gains dividends" in sections 852(b)(2), 857(b)(2), 852(b)(3)(C), and 857(b)(3)(C) apply, as appropriate to the particular entity.

(b) Determination and claim for deduction—(1) Determination. For purposes of applying section 860(e), the following rules apply:

(i) The date of determination by a decision of the United States Tax Court, the date upon which a judgment of a court becomes final, and the date of determination by a closing agreement shall be determined under the rules in § 1.547–2(b)(1)(ii), (iii), and (iv).

(ii) A determination under section 860(e)(3) may be made by an agreement signed by the district director or another official to whom authority to sign the agreement is delegated, and by or on behalf of the taxpayer. The agreement shall set forth the amount, if any, of each adjustment described in subparagraphs (A), (B), and (C) of section 860(d)(1) or (2) (as appropriate) for the taxable year and the amount of the liability for any tax imposed by section 11(a), 56(a), 852(b)(1), 852(b)(3)(A), 857(b)(1), 857(b)(3)(A), or 1201(a) for the taxable year. The agreement shall also set

forth the amount of the limitation (determined under section 860(f)(2)) on the amount of deficiency dividends that can qualify as capital gain dividends and ordinary dividends, respectively, for the taxable year. An agreement under this subdivision (ii) which is signed by the district director (or other delegate) shall be sent to the taxpayer at its last known address by either registered or certified mail. If registered mail is used, the date of registration is the date of determination. If certified mail is used, the date of the postmark on the sender's receipt is the date of determination. However, if a dividend is paid by the taxpayer before the registration or postmark date, but on or after the date the agreement is signed by the district director (or other delegate), the date of determination is the date of signing.

(2) **Claim for deduction.** A claim for deduction for a deficiency dividend shall be made, with the requisite declaration, on Form 976 and shall contain the following information and have the following attachments:

(i) The name, address, and taxpayer identification number of the corporation, trust, or association;

(ii) The amount of the deficiency and the taxable year or years involved;

(iii) The amount of the unpaid deficiency or, if the deficiency has been paid in whole or in part, the date of payment and the amount thereof;

(iv) A statement as to how the deficiency was established (i.e., by an agreement under section 860(e)(3), by a closing agreement under section 7121, or by a decision of the Tax Court or court judgment);

(v) Any date or other information with respect to the determination that is required by Form 976;

(vi) The amount and date of payment of the dividend with respect to which the claim for the deduction for deficiency dividends is filed;

(vii) The amount claimed as a deduction for deficiency dividends;

(viii) If the amount claimed as a deduction for deficiency dividends includes any amount designated (or to be designated) as capital gain dividends, the amount of capital gain dividends for which a deficiency dividend deduction is claimed;

(ix) Any other information required by the claim form;

(x) A certified copy of the resolution of the trustees, directors, or other authority authorizing the payment of the dividend with respect to which the claim is filed; and

(xi) A copy of any court decision, judgment, agreement, or other document required by Form 976.

(3) **Filing claim.** The claim, together with the accompanying documents, shall be filed with the district director, or director of the internal revenue service center, with whom the income tax return for the taxable year for which the determination applies was filed. In the event that the determination is an agreement with the district director (or other delegate) described in section 860(e)(3) and paragraph (b)(1)(ii) of this section, the claim may be filed with the district director with whom (or pursuant to whose delegation) the agreement was made.

[T.D. 7767, 46 FR 11280, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2107, Jan. 18, 1984; 49 FR 3177, Jan. 26, 1984]

§ 1.860–3 Interest and additions to tax.

(a) *In general.* If a qualified investment entity is allowed a deduction for deficiency dividends with respect to a taxable year, under section 860(c)(1) the tax imposed on the entity by chapter 1 of the Code (computed by taking into account the deduction) for that year is deemed to be increased by the amount of the deduction. This deemed increase in tax, however, applies solely for purposes of determining the liability of the entity for interest under subchapter A of chapter 67 of the Code and for additions to tax and additional amounts under chapter 68 of the Code. For purposes of applying subchapter A of chapter 67 and chapter 68, the last date prescribed for payment of the deemed increase in tax is considered to be the last date prescribed for the payment of tax (determined in the manner provided in section 6601(b)) for the taxable year for which the deduction for deficiency dividends is allowed. The deemed increase in tax is considered to be paid as of the date that the claim for the deficiency dividend deduction described in section 860(g) is filed.

(b) **Overpayments of tax.** If a qualified investment entity is entitled to a credit or refund of an overpayment of the tax imposed by chapter 1 of the Code for the taxable year for which the deficiency dividend deduction is allowed, then, for purposes of computing interest, additions to tax, and additional amounts, the payment (or payments) that result in the overpayment and that precede the filing of the claim described in section 860(g) will be applied against and reduce the

increase in tax that is deemed to occur under section 860(c)(1).

(c) **Examples.** This section is illustrated by the following examples:

Example (1). Corporation X is a real estate investment trust that files its income tax return on a calendar year basis. X receives an extension of time until June 15, 1978, to file its 1977 income tax return and files the return on May 15, 1978. X does not elect to pay any tax due in installments. For 1977, X reports real estate investment trust taxable income (computed without the dividends paid deduction) of $100, a dividends paid deduction of $100, and no tax liability. Following an examination of X's 1977 return, the district director and X enter into an agreement which is a determination under section 860(e)(3). The determination is dated November 1, 1979, and increases X's real estate investment trust taxable income (computed without the dividends paid deduction) by $20 to $120. Thus, taking into account the $100 of dividends paid in 1977, X has undistributed real estate investment trust taxable income of $20 as a result of the determination. X pays a dividend of $20 on November 10, 1979, files a claim for a deficiency dividend deduction of this $20 pursuant to section 860(g) on November 15, 1979, and is allowed a deficiency dividend deduction of $20 for 1977. After taking into account this deduction, X has no real estate investment trust taxable income and meets the distribution requirements of section 857(a)(1). However, for purposes of section 6601 (relating to interest on underpayment of tax), the tax imposed by chapter 1 of the Code on X for 1977 is deemed increased by this $20, and the last date prescribed for payment of the tax is March 15, 1978 (the due date of the 1977 return determined without any extension of time). The tax of $20 is deemed paid on November 15, 1979, the date the claim for the deficiency dividend deduction is filed. Thus, X is liable for interest on $20, at the rate established under section 6621, for the period from March 15, 1978, to November 15, 1979. Also, for purposes of determining whether X is liable for any addition to tax or additional amount imposed by chapter 68 of the Code (including the penalty prescribed by section 6697), the amount of tax imposed on X by chapter 1 of the Code is deemed to be increased by $20 (the amount of the deficiency dividend deduction allowed), the last date prescribed for payment of such tax is March 15, 1978, and the tax of $20 is deemed to be paid on November 15, 1979. X, however, is not subject to interest and penalties for the amount of any tax for which it would have been liable under section 11(a), 56(a), 1201(a), or 857(b) had it not been allowed the $20 deduction for deficiency dividends.

Example (2). Assume the facts are the same as in example (1) except that the district director, upon examining X's income tax return, asserts an income tax deficiency of $4, based on an asserted increase of $10 in real estate investment trust taxable income, and no agreement is entered into between the parties. X pays the $4 on June 1, 1979, and files suit for refund in the United States District Court. The District Court, in a decision which becomes final on November 1, 1980, holds that X did fail to report $10 of real estate investment trust taxable income and is not entitled to any refund. (No other item of income or deduction is in issue.) X pays a dividend of $10 on November 10, 1980, files a claim for a deficiency dividend deduction of this $10 on November 15, 1980, and is allowed a deficiency dividend deduction of $10 for 1977. Assume further that $4 is refunded to X on December 31, 1980, as the result of the $10 deficiency dividend deduction being allowed. Also assume that any assessable penalties, additional amounts, and additions to tax (including the penalty imposed by section 6697) for which X is liable are paid within 10 days of notice and demand, so that no interest is imposed on such penalties, etc. X's liability for interest for the period March 15, 1978, to June 1, 1979, is determined with respect to $10 (the amount of the deficiency dividend deduction allowed). X's liability for interest for the period June 1, 1979, to November 15, 1980, is determined with respect to $6, i.e., $10 minus the $4 payment. X is entitled to interest on the $4 overpayment for the period described in section 6611(b)(2), beginning on November 15, 1980.

[T.D. 7767, 46 FR 11281, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2108, Jan. 18, 1984]

§ 1.860–4 Claim for credit or refund.

If the allowance of a deduction for a deficiency dividend results in an overpayment of tax, the taxpayer, in order to secure credit or refund of the overpayment, must file a claim on Form 1120X in addition to the claim for the deficiency dividend deduction required under section 860(g). The credit or refund will be allowed as if on the date of the determination (as defined in section 860(e)) two years remained before the expiration of the period of limitations on the filing of claim for refund for the taxable year to which the overpayment relates.

[T.D. 7767, 46 FR 11282, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2109, Jan. 18, 1984]

§ 1.860–5 Effective date.

(a) **In general.** Section 860 and §§ 1.860–1 through 1.860–4 apply with respect to determinations after November 6, 1978.

(b) **Prior determination of real estate investments trusts.** Section 859 (as in effect before the enactment of the Revenue Act of 1978) applies to determinations with respect to real estate investment trusts occurring after October 4, 1976, and before November 7, 1978. In the case of such a determination, the rules in §§ 1.860–1 through 1.860–4 apply, a reference in this chapter 1 to section 860 (or to a particular provision of section 860) shall be considered to be a reference to section 859 (or to the corresponding substantive provision of section 859), as in effect before enactment of the Revenue Act of 1978, and "qualified investment entity" in §§ 1.381(c)25–1(a) and 1.860–1 through 1.860–3 means a real estate investment trust.

[T.D. 7936, 49 FR 2109, Jan. 18, 1984]

§ 1.860D–1T Election to be treated as a real estate mortgage investment conduit (temporary).

(a) **In general.** An entity, or a segregated pool of assets within an entity, shall elect to be treated as a REMIC by complying with the requirements of paragraph (b) of this section and computing tax-

able income as a REMIC on its return (as prescribed in §1.860F-4T(b)) for the first taxable year of its existence. Once made, this election is irrevocable for that taxable year and all succeeding taxable years.

(b) Required information. When electing to be treated as a REMIC, the entity, or segregated pool of assets within an entity, shall provide either on its return or in a separate statement attached to its return—

(1) The REMIC's employer identification number, which shall not be the same as the identification number of any other entity,

(2) Information concerning the terms and conditions of the regular interests and the designated residual interest of the REMIC, or a copy of the offering circular or prospectus containing such information,

(3) A description of the prepayment and reinvestment assumptions that are made pursuant to section 1272(a)(6) and the regulations thereunder, including a statement supporting the selection of the prepayment assumption,

(4) The form of the electing entity under State law or, if an election is being made with respect to a segregated pool of assets within an entity, the form of that latter entity under State law, and

(5) Such other information as the Commissioner may by form or revenue procedure require.

(c) Determination of status. An entity, or segregated pool of assets within an entity, that elects to be a REMIC shall keep sufficient records as to investments and other assets to be able to show that it has complied with the provisions of sections 860A through 860G and the regulations thereunder during each taxable year.

[T.D. 8186, 53 FR 7510, March 9, 1988]

§ 1.860F–4T REMIC reporting requirements and other administrative rules (temporary).

(a) In general. For purposes of Subtitle F of the Code, a REMIC shall be treated as a partnership and any holder of a residual interest in the REMIC shall be treated as a partner. A REMIC shall not be subject, however, to the rules of Subchapter C of Chapter 63 of Subtitle F, relating to the treatment of partnership items, for a taxable year, if there is at no time during the taxable year more than one holder of a REMIC residual interest.

(b) REMIC tax return—(1) Return of income. To satisfy the requirement under section 6031 to make a return of income for each taxable year, a REMIC shall file the return required by paragraph (b)(2) of this section. The due date and any extensions for filing the REMIC's annual return shall be determined as if the REMIC were a partnership.

(2) Income tax return. Because a REMIC, unlike a partnership, may be liable for taxes imposed under Subtitle A of the Code (for example, the tax imposed under section 860F(a) on net income from prohibited transactions), the REMIC shall make a return, as required by section 6011(a), for each taxable year on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return. The return shall include—

(i) The amount of principal outstanding on each class of regular interests as of the close of the taxable year,

(ii) The amount of the daily accruals determined under section 860E(c),

(iii) The REMIC's employer identification number, and

(iv) Such other information as the Commissioner may by form or revenue procedure require.

(c) Signing of REMIC return. For purposes of section 6063, a REMIC's income tax return for any taxable year may be signed by any one of the holders of a residual interest during that taxable year or, as provided in section 6903, by a fiduciary as defined in section 7701(a)(6) who is acting for the REMIC and who has furnished adequate notice in the manner prescribed in § 301.6903-1(b).

(d) Designation of tax matters person. A REMIC may designate a tax matters person in the same manner in which a partnership may designate a tax matters partner under § 301.6231(a)(7)-1T. For purposes of applying that section, all holders of a residual interest in the REMIC are treated as general partners.

(e) Notice to holders of residual interests—(1) Information required—(i) In general. At the close of each calendar quarter, a REMIC shall provide to each person who held a residual interest in the REMIC during that quarter notice on Schedule Q (Form 1066) of all the information required by the form and the information required by paragraphs (e) (1) (i) (A) Through (F) of this section.

(A) The REMIC shall provide to a residual interest holder that person's share of the taxable income or net loss of the REMIC for the calendar quarter.

(B) The REMIC shall provide to a residual interest holder the amount of the excess inclusion (as defined in section 860E and the regulations thereunder), if any, with respect to that person's residual interest for the calendar quarter.

(C) If the holder of a residual interest is also a pass-through interest holder (as defined in § 1.67-3T (a) (2)), the REMIC shall provide to that holder the allocable investment expenses (as defined in § 1.67-3T (a) (3)) for the calendar quarter.

(D) For calendar quarters after 1987, if the percentage of the REMIC's assets, computed on the basis of the average fair market value of the assets held during the calendar quarter (as described in paragraph (e) (1) (ii) (A) of this section), represented by each of the following categories:

(1) Qualifying real property loans under section 593,

(2) Assets of a domestic building and loan association (as described in section 7701 (a) (19)), and

(3) Real estate assets as defined in paragraph (e) (1) (ii) (C) of this section,

is at least 95 percent, the REMIC shall provide a statement for each category for which the REMIC met this test, specifying that at least 95 percent of the REMIC's assets were represented by that category. If the REMIC fails to meet the 95 percent test for any category, the percentage of the REMIC's assets represented by that category shall be provided.

(E) For calendar quarters after 1987, if less than 95 percent of the assets of the REMIC are real estate assets (as defined in paragraph (e) (1) (ii) (C) of this section), the REMIC shall also provide to any real estate investment trust (REIT) that holds a residual interest the following information:

(1) The percentage of the REMIC's assets described in section 856 (c) (5) (A), excluding from real estate assets any property (not otherwise a real estate asset) attributable to the temporary investment of new capital, computed on the bases of the average fair market value of the assets of the REMIC during the calendar quarter (as described in paragraph (e) (1) (ii) (A) of this section), and

(2) The percentage of the REMIC's gross income (as defined in paragraph (e) (1) (ii) (B) of this section) described in section 856 (c) (3) (A) through (F), computed as of the close of the calendar quarter. For purposes of this paragraph, the term "foreclosure property" contained in section 856 (c) (3) (F) shall have the meaning specified in section 860G (a) (8).

In determining whether a REIT satisfies the limitations of section 856 (c) (2), all gross income shall be deemed to be derived from a source specified in section 856 (c) (2).

(F) For calendar quarters in 1987, the percentages of assets required in paragraph (e) (1) (i) (D) and (E) of this section may be computed on the basis of the fair market value of the assets of the REMIC as of the close of the calendar quarter, instead of on the basis of the average during the calendar quarter.

(ii) **Special provisions.** For purposes of this paragraph (e) (1) (ii) and paragraph (e) (1) (i) (D), (E), and (F) of this section:

(A) The average fair market value of the assets during each calendar quarter is determined by making the appropriate computation as of the close of each month, week, or day, and by using the quarterly average of the monthly, weekly or daily percentages. The monthly, weekly, or daily computation period shall be applied uniformly during the calendar quarter to all categories of assets and gross income, and may not be changed in succeeding calendar quarters without the consent of the Commissioner.

(B) Gross income shall mean gross income excluding gross income from prohibited transactions defined in section 860F (a) (2).

(C) Real estate assets shall mean real estate assets and defined in section 856 (c) (6) (B) excluding any property (not otherwise a real estate asset) attributable to the temporary investment of new capital.

(2) **Quarterly notice required—(i) In general.** Schedule Q shall be mailed (or otherwise delivered) to each holder of a residual interest during a calendar quarter no later than the last day of the month following the close of the calendar quarter.

(ii) **Special rule for 1987.** Notice to any holder of a REMIC residual interest of the information required in paragraph (e) (1) of this section for any of the four calendar quarters of 1987 shall be mailed (or otherwise delivered) to each holder no later than March 28, 1988.

(3) **Nominee reporting—(i) In general.** If a REMIC is required under paragraphs (e) (1) and (2) of this section to provide notice to an interest holder who is a nominee of another person with

respect to an interest in the REMIC, the nominee shall furnish such notice to the actual owner or owners.

(ii) Time for furnishing statement. Under paragraph (e) (3) (i) of this section, the nominee shall furnish the required notice to the actual owner or owners of a REMIC interest no later than 30 days after receiving such information.

(4) Reports to the Internal Revenue Service. A copy of Schedule Q for each person who was a residual interest holder at any time during a REMIC's taxable year and for each quarter in which that person was a residual interest holder shall be attached to the REMIC's income tax return for that taxable year. Quarterly notice to the Internal Revenue Service is not required.
